S	Sometimes it will fire when moved from safe to fire	Cause:4006 Concern:1007 Fired on Safe Release	Altered Adjustments or Components	Unknown
C				

6/2/11 Per note with rifle, this rifle has several problems related to the trigger and or safety. It is an intermittent problem that is getting worse. Sometimes the rifle will fire when the safety is moved from safe to fire without touching the trigger. Sometimes the safety will get hung up halfway between safe and fire and require wiggling to move. Sometimes after firing the bolt will not open and require wiggling to release it. Sometimes it functions fine.cm

This rifle has several problems related to the trigger and or safety. It is an intermittent problem that is getting worse. Sometimes the rifle will fire when the safety is moved from safe to fire without touching the trigger. Very scary! Sometimes the safety will get hung up halfway between safe and fire and require wiggling to move. Sometimes after firing the bolt will not open and require wiggling to release it. Sometimes it functions fine. Please call me about cost if you can figure out a solution.

Thanks,  
Perry Locke
