Please describe your problem: Recently divcovered a safety recall for this rifle. Rifle can discharge when safety is released without trigger pull. My rifle did this one time and scared me badly. I purchased rifle new in the box about 1970, no V showing on the left side of trigger, blot is locked when safety is on, and did fire once without trigger pull. Seems it is a candidate for repair. I understand that you will check rifle, change safety so bolt can be opened with safety on or off, and possibly replace trigger. 6 characters left
