Hello,

My son received this rifle from my father a couple years back. My father has just past away and while reminiscing with my four older brothers about all our hunting years, this gun came into topic. I indicated I was planning to return it to have the safety checked out. That was followed by a three stories of accidental firings from the various brothers over the years. Each of the stories involved the gun going off while unloading. Luckily in each event, the gun was pointed in a safe direction.

Please do what you can for this to make it safer so I feel more comfortable allowing my son to use it and keep it in the family.

Thank you,

Dean Deick

<b>Please describe your problem:</b>			
<p>My son received the model 721 30-06 as gift from my father. It is the gun used by now by three generations of hunters to shoot their first deer. I as recently informed of a potential safety issue with the firearm and after research found I may be able to get the safety replaced. I'm concerned about the potential of something going wrong.</p> <p>I would like the gun assessed for the safety replacement program.</p>
