1/13/13 Per letter with rifle, Hodges is the original owner and used it frequently in the 60's & 70's, not much since then. About 5 yrs ago he loaned it to a family member and they returned it dirty. He cleaned the rifle and noticed the trigger seemed a little more sensitive. He did not fire it until several months ago. he took it to the range, drew the bolt back, inserted a round and upon seating the bolt the rifle fired unexpectedly. Upon further testing it was repeatable.cm

To Whom It May Concern,

SUBJECT: M240 - BOLT LOCK SAFETY MODIFICATION AND SPECIAL REQUEST

This rifle was purchased new by myself around 1966-1968 from Oakwood Sporting Goods in Louisville, KY. At the time of purchase, Oakwood added a Leopold scope and trigger extension (widened). I was able to remove the scope and mount and leather-strap but did not have the small hex wrench to remove the trigger extension. I would like to get that extension back if you have to replace the trigger assembly as part of the safety modification.

The rifle was used frequently (<1000 rounds) for varmint control and target practice in the late 60's and early 70's and only infrequently (<100 rounds) since then. About 5 years ago, I lent the rifle to a family member (after cleaning and performing various function checks) and received it back in a less clean state than when it was borrowed. I cleaned the rifle thoroughly and noticed the trigger seemed a little more sensitive than I had remembered it previously—but wasn't concerned. Since that time, it has not been fired.

Several months ago, I had the need to mitigate a coyote problem, and took the rifle to a local range as prep. I drew back the bolt assembly and inserted a factory round, and upon seating the bolt, the rifle fired unexpectedly (prematurely). Upon further testing, this symptom was quite repeatable and I must assume the issue lies in the trigger mechanism. Hope this explains the current condition.

I also own the same model in a .222 caliber that was purchased by my now deceased father in the late 60's early 70's and wondered if this rifle might have a similar problem. I have not tested this rifle due to safety concerns. Please let me know if I should be concerned.

Sincerely,

D. Brooks Hodges III
Brigadier General (Ret), USA
