Att. Service Dept.

Enclosed you will find one Model 700. Serial number A6783520 Cal. 30.06. I was given this rifle by a family member who is deceased. The rifle was probably never used for many years. I found that when you bolted the rifle it went off. The firing sear was gunked up with some material which made the sear stay down. I took the trigger apart and cleaned everything. The rifle worked fine until yesterday. I was hunting, I had the rifle standing up. I had a deer coming in I went to take the safety off ahead of time because it make a lot of noise, as so the rifle went off. My finger was no where the trigger. Well I did not get the deer, but I got a good ringing in my ear.

[over]

I will not use this rifle no more until it is repaired. It does not feel safe to me.

I would like to have it repaired.

I do not like the safety system on this 700. You have to put it to fire to open the bolt to unload. My other 700 you do not have to do that, it can be opened in the safe position which I think is safer.

Thank you
Truly Yours,
Nick Cosentino
