To whom it may concern,

I received this gun 6 or 7 years ago from a family member and the first time I loaded 5 shells into it, it discharged when I went to put the safety on. I had it checked out locally and could not get the incident to re-occur.

This last season I was coming out of the woods at the end of the day and prepared to unload the gun. When I took the safety off the gun dis-charged.

Please check and inspect every part of this gun and repair anything you may find defective. Call me with your findings before you repair.
