Remington Arms Co Attn: Jack Kasp 14 Hoefler Ave. Ilion, NY 13357

Dear Mr. Kasp,

After talking to your service department, they recommend I ship this gun to your attention.

This 35 Whelen Model 700 Serial # C6282314 has had less than a full box of factory ammo shot thru it. The problems are:

- 1. Bolt does not always cock firing pin when pulling it back. It happens about 1 out of 10 times.
- 2. Gun fires sometimes when moving the bolt into lock position when loading a cartridge. I almost killed an associate!
- 3. When the bolt does cock and you pull the trigger you get a simulated hang fire situation which has caused two unretreived wounded animals. This situation is criminal in my opinion.

My request is that this rifle be fixed at no cost or destroyed before it ends up causing a death and a product liability lawsuit.

If you have any questions, please call me. I would like a detailed report if this gun is repaired.
