RE: Remington 700 S/n A6560026

Gentlemen:

My problem began with The enclosed rifle firing when I pushed the safety lever to the fire position, wilthout pulling the trigger. This only happenen once, but was quite a surprise. Two days ago, I aimed at an eight point buck, squeezed the trigger, and nothing. Then about two seconds later, after I'd lost the aim, it fired all by itself. I would like you to take a close look at the firing mechanism of this rifle, because at this piont, I'm afraid to use it. If you need to reach me by phone, 802-773-4593.

James M. Rowe

Sincerely,
