Fired when safe was taken off

damaged RV

Firing pin followed down as rec'd. and it would fire when safe was released after pulling trigger with safe on. Took trig assy apart and found that trig housing side plates and trigger were rusted. Exchange trig assy. apart at N/A due to age of gun and prior difficulties.

Sincerely,
Steven K. Stewart

I've enclosed this letter to let you know what's happen with this gun. This is the second sendee I've had in a 12 month period. The first one was purchase 12-20-95. I'd send it back to the dealer and he said I had the gun not work anything and this was very Alarming. I called the dealer back and he said I left before if to you. I agreed. After Season was over. This Pass weekend 12-21-96 I loaded my gun and when I went from safety to fire the discharged with the bullet some then my R. into another. IT says on your Box and on the safety defects on you. Doesn't it start at the factory first. I've heard on you & me. Please for this gun so I can enjoy my hunt without fear of hurting or killing someone. The gun is in the fire position, but the trigger ~~will~~ want to pull.
