Dear Sirs,

Enclosed please find a Model 700, BDL in .270 Cal., serial # 246246. I have experienced a problem which I am hoping you can repair before the upcoming deer season. Sometimes when the action is "worked" the hammer drops when the bolt is closed.

The gun has been used very little and possibly some lubricant as "gummed up" the trigger spring, which prevents the trigger from being returned to a neutral position. Maybe?

Thank you for your assistance in this matter and please advise any expense involved.

Sincerely,

Joe Bazin, owner
