Time of Modification:	10:40:45 AM		Date of Modification:	7/7/99	

Enclosed you'll find A model 700 VS - SN-E64354109
this rifle was purchased at Outdoor World in Dania FL
on 5.29.99 as shown by the copy of the receipt.

What a pleasure it was taking this fine
rifle to the range. After approx. 100 rounds, I
started noticing inconsistent firing pin hits
including strikes without ignition and, punch-thrus -
where the firing pin actually punctured the primer.
Originally thinking this was ammo related, more shots were
fired. Eventually the trigger locked up - not moving at all.
clearing the action, a quick examination of the rifle
showed nothing obviously wrong. Another round was
chambered and, as the firing safety was set to
the "Fire" position, the rifle went off!!

the muzzle was pointed downrange so no injuries
happened as it fired.

I know this is an uncommon occurrence and have
otherwise enjoyed and respected Remington's excellent
reputation and workmanship. Please correct the
problem promptly and return the rifle to me. So
that I can continue to enjoy it SAFELY

Thank You. Ward C. BENJAMIN
