RE: Remington Model 600-Cal. 308
Serial #22503

I am returning (once again) my model #600. This gun was repaired by Remington many years ago when it began firing as the bolt was closed on a live round without the trigger being pulled. The gun was repaired and returned, and I have enjoyed many years of trouble free and safe service.

Recently, after a day hunt, this gun discharged when the safety was released to unload the rifle. Once again, the trigger was not engaged when the rifle fired.

Needles to say, I am very concerned about the safety of this firearm. Please let me know about repairing this firearm to a safe working condition.

Yours truly,

Jeff Pinnell
