MAIN FAULT

Upon receipt the trigger was seized and would not  
release from heavy rounds with a heavy hammer strike.  
Left properly maintained but never updated.

Remington Model 660  
Bolt action .308  
Serial # 100527

To whom it may concern:

I am sending this rifle in for repair after experiencing the gun going off after the bolt is locked or the safety is released. The rifle has been in storage for many years. I got the rifle out and cleaned it and took it to the range and thats when I found out the gun has a problem. I called Remington and they told me to send it in because of a recall that involved that model in the trigger assembly. If there are any questions please call me, otherwise please fix the recall problem and send it back to me at your earliest convience.

Respectfully,

  
Terry Poltz
