Subject: TLW2170 Activities (except dry cycle) Complete

Jim and Phillip,

We've finished all of the shooting and measuring activities for the 40X XMP trigger assemblies for DAT. In light of the pending lab workload, the optional post-endurance accuracy test has been summarily cancelled by Messrs Franz and Diaz. The only outstanding DAT activity remaining to be completed is dry cycle.

Have a Happy Easter! Try not to eat too much chocolate – see you all on Monday.
