

Remington®

2007 PRESS KIT

R 2198923

**TO OUR FRIENDS IN THE PRESS,
THANK YOU FOR YOUR DEDICATION AND CONTINUED
EFFORTS TO PROMOTE OUR INDUSTRY.**

YEAR AFTER YEAR REMINGTON BRINGS THE MOST INNOVATIVE AND EXPANSIVE FIREARM AND AMMUNITION PRODUCT OFFERINGS TO THE MARKETPLACE ALONG WITH A COMPLIMENTING LINE OF COLLECTIBLE AND UTILITY KNIVES, GUN CARE PRODUCTS AND FACTORY AUTHORIZED PARTS. 2007 WILL BE NO EXCEPTION. IN THE ENCLOSED PAGES, WE ARE PLEASED TO INTRODUCE THE LATEST FIREARMS, AMMUNITION AND ACCESSORY OFFERINGS FROM BIG GREEN.

OUR DEPARTMENT'S GOAL IS TO MAKE YOUR JOB A LITTLE EASIER BY PROVIDING THE LATEST PRODUCT INFORMATION, TECHNICAL SUPPORT AND A PRODUCT EVALUATION PROGRAM. SIMPLY CONTACT OUR OFFICE VIA EMAIL OR THROUGH OUR TOLL-FREE WRITERS' LINE AT (800) 537-2278 WITH YOUR QUESTIONS, PRODUCT REQUESTS OR TO DISCUSS A STORY IDEA.

YOU CAN VISIT OUR WEB SITE AT WWW.REMINGTON.COM FOR THE LATEST CORPORATE NEWS, PRODUCT SPECIFICATIONS OR FREQUENTLY ASKED QUESTIONS, AND NOW FOR YOUR CONVENIENCE, PRODUCT IMAGES CAN BE EASILY DOWNLOADED AT WWW.REMINGTON.COM/ARTWORK.

WE VALUE YOUR SUPPORT AND YOUR EFFORTS TO PROMOTE OUR HUNTING HERITAGE AND THE SHOOTING SPORTS. ON BEHALF OF OUR DEPARTMENT AND THE ENTIRE REMINGTON FAMILY, THANK YOU AND WE LOOK FORWARD TO WORKING WITH YOU THROUGHOUT THE YEAR.

Competition-Ready Over & Unders Join Premier® Shotgun Offerings from Remington

Madison, NC – Since their debut at the 2006 SHOT Show, the Remington® Premier Over & Under line of target and field shotguns have rapidly made their mark in the competitive world of clay shooting and with wingshooters alike. Classic Italian craftsmanship, superior balance and sleek handling elevate these over & unders to a status of their own. Remington is pleased to expand this line of finely-crafted and well-designed break actions for 2007 with the addition of three new 12-gauge competition versions. The **Premier STS® Competition** with 32-inch barrel and **Premier STS Competition Adjustable Comb** with choice of 30 or 32-inch barrel lengths join the initial Premier STS Competition 12-gauge offering with 28 or 30-inch barrel.

Each **Premier STS Competition** offering features a low-profile, machined steel receiver with electroless nickel plating for added protection; polished blued, target-style barrels; premium figured walnut stock with right-hand palm swell and target-style Schnabeled fore-end for quick, responsive handling. Both stock and fore-end are enhanced with detailed cut checkering and handsome high gloss finish. The barrels are overbored (0.735 inch diameter) with lengthened forcing cones for optimal pattern performance and reduction of felt recoil. The wider 10mm rib and ivory front and steel mid beads provide for quick target acquisition and the vented barrel filets aid in dissipation of the heat associated with high-volume shooting. Five custom ProBore™ Choke tubes (Skeet, Improved Cylinder, Light Modified, Modified and Full) with convenient knurled extensions are included, allowing for quick adjustment for varying course conditions or target presentation. The barrel selector is conveniently located on the tang safety. Other features that set this 12-gauge apart from the competition include stylish engraving on the receiver; script “R” logo on the bottom of the receiver; and distinctive gold trigger. These well-designed Premier Over & Under shotguns come with a FAA-approved, lockable hard case.

To further enhance your gun fit and performance, select the **Premier STS Competition Adjustable Comb** stock version with 30 or 32-inch barrel length. This feature allows the stock to be customized to the shooter with adjustment for both height and cast.

Competitively-styled and classically-designed, the **Premier Competition STS Over & Unders** deliver clay-crushing performance in an extremely attractive package. Available at suggested retail prices of \$2540 and \$2890 (with Adjustable Comb).

Remington Unveils the 2007 Conservation Gun of the Year in Partnership with the Ruffed Grouse Society – the Premier® Over & Under RGS

Madison, NC – The recently-launched Premier Over & Under family of target and field shotguns from Remington combine dependability and reliability with fine Italian craftsmanship, balance and smooth handling in classically-styled STS® Competition, Upland and Field versions. New for 2007 is the inaugural Conservation Gun of the Year - the **Premier Field Over & Under RGS (Ruffed Grouse Society)** in 20-gauge. This limited-production, collectible offering will be available for one year only. Remington will donate a portion from each sale of this special edition shotgun to RGS in support of their long-standing efforts to restore and maintain habitat for ruffed grouse, American woodcock, songbirds and other forest wildlife.

This solidly-built, 3-inch chambered 20-gauge features a low-profile, machined steel receiver; single-selective trigger; polished blued barrels; premium walnut English straight-grip stock and hunting-style Schnabeled fore-end featuring detailed cut checkering and satin oil finish; and 26-inch barrel with 7mm rib, ivory front and steel mid beads and solid barrel filets. This field-ready gun comes equipped with five flush ProBore™ choke tubes (Skeet, Improved Cylinder, Light Modified, Modified and Full). FAA-approved, lockable hard case is included.

Adding to the collectibility of this attractive field gun is the distinctive black finished receiver, emblazoned on each side of the receiver with the RGS logo and Remington script “R” logo on the frame bottom, both in eye-catching gold.

Speaking on behalf of the Ruffed Grouse Society, Executive Director Mike Zagata stated, “We are pleased that Remington has recognized RGS with their first Conservation Gun of the Year. Partnerships with Corporate Sponsors, like Remington, enable us to supplement our existing educational programs and restore or create additional habitat for grouse, woodcock and other early-forest wildlife.”

The **Remington® Field Premier Over & Under RGS** shotgun in 20 gauge will be available for one year only at a suggested retail price of \$2380.

New Remington® Model SP-10™ Autoloader Optimized for Today's Waterfowl Hunter

Madison, NC – Dedicated waterfowl and turkey hunters have looked to the hard-hitting, extended-range Model SP-10 Magnum autoloading shotgun since its introduction in 1989. This high performance 10-gauge delivers superior patterns at maximum ranges and with its soft-recoiling gas operating system, less felt recoil than most 12 gauge, 3 1/2-inch shotguns in the marketplace today. Joining this family of special purpose shotguns for 2007 is the **Model SP-10 Magnum Waterfowl**, fully camouflaged with the new Mossy Oak® Duck Blind™ pattern and optimized for waterfowl hunting with its special Briley® Choke Tube System and HiViz® Fiber Optic Front Sight.

This version of America's most popular, gas-operated 10-gauge features a 26-inch vent rib Rem™ Choke barrel; rugged, weather-defying synthetic stock and fore-end; magazine cap and rear swivel studs for attachment of the included black padded sling; and recoil-taming R3® Recoil Pad. At the core of this magnum 3 1/2-inch gun is the corrosion-resistant gas-operating system featuring a non-traditional design that involves movement of the cylinder, not the piston, making this autoloader more comfortable to shoot.

The Model SP-10 Magnum Waterfowl is effective whatever the hunting environment – marshes, potholes, bottomland or corn fields with its full coverage in the latest specialty pattern from Mossy Oak, the all-new Duck Blind camo. Target acquisition in low light conditions is enhanced with the HiViz Fiber Optic Front Sight and completing this well-designed shotgun is a set of three Briley Waterfowl Chokes. Included are Decoying, Intermediate and Ported Pass Shooting extended choke tubes. Partner this high performance shotgun with the new heavy-density Wingmaster HD™ loads from Remington and waterfowl don't have a chance.

Waterfowl hunting requires specialized equipment and this autoloader fills the niche. The **Model SP-10 Magnum Waterfowl** shotgun is available at a suggested retail price of \$1853. Please visit our web site at www.remington.com for a complete listing of Model SP-10 shotguns.

New Thumbhole Stock Version of Remington® Model SP-10™ Autoloader Available for Spring Turkey Season

Madison, NC – The maximum payload delivered by the gas-operated Model SP-10 makes it the ideal shotgun for hardcore turkey and waterfowl hunters. New for Spring 2007 is the ultimate neck-breaking, fully camouflaged version of this smooth-operating autoloader - the **Model SP-10 Magnum Thumbhole Camo** with easy-handling 23-inch barrel.

The Model SP-10 Magnum autoloading shotgun is the most popular gas operated 10-gauge shotgun in America with its ease of operation, durability and softer recoil. The gas system on this 10-gauge is corrosion-resistant and features a unique design that involves movement of the gas cylinder, not the piston. This hard-hitting, 3 1/2-inch magnum shotgun delivers a punishing payload without the “punch” due to a combination of the effective gas operating system and the Remington R3® Recoil Pad, featuring the patented LimbSaver™ recoil reducing technology.

This special purpose Model SP-10 features a laminated thumbhole stock for rifle-like accuracy and solid handling with durable synthetic fore-end; both effectively covered with the versatile Mossy Oak Obsession® camo pattern. Magazine cap and rear stock swivel studs provide for easy attachment of the matching camouflaged sling. The compact 23-inch Rem™ Choke, rifle-sighted barrel comes equipped with metallic Williams® FireSights® which include a fiber optic front sight and fully adjustable fiber optic rear sight for enhanced sight picture. Adding to this high performance SP-10 package is a Briley® Straight-Rifled Ported Turkey Choke Tube. While the porting reduces felt recoil, this extended choke tube is designed to deliver tight dense patterns at extended range.

Remington understands your obsession with turkey hunting and delivers the most effective, longbeard-busting package to the marketplace - the **Model SP-10 Magnum Thumbhole Camo** autoloader combined with the new high density Remington Wingmaster HD™ turkey loads.

The Model SP-10 is available at a suggested retail price of \$1952.

Madison, NC – Versatile, durable and affordable describe the family of Remington® Model 11-87 Sportsman Synthetic shotguns. These soft-recoiling autoloaders are ergonomically designed, solidly built and feature the smooth operating Model 11-87 action for reliable performance in the field. Two new fully camouflaged members join the Sportsman family for 2007 – the **Model 11-87 Sportsman Camo 12 gauge** with 28-inch barrel and the **Model 11-87 Sportsman Camo 20 gauge** with 26-inch barrel.

Both the 12 and 20-gauge versions can handle 2 3/4 or 3-inch loads interchangeably and feature standard contour, hammer-forged vent rib Rem™ Choke barrels (Modified choke tube included) and single bead steel sight. The durable, all-weather synthetic stock and fore-end are designed for superior handling and feature stock swivel stud and magazine cap swivel stud for ease of sling attachment. The solid steel receiver, carbon steel barrel and synthetic stock and fore-end are fully covered with Mossy Oak Break-Up® in the new redesigned, computer-enhanced version.

With the addition of these two fully camouflaged versions, the Model 11-87 Sportsman autoloading shotgun is now available in four versatile field packages in both 12 and 20-gauge black synthetic with 26 and 28-inch barrel lengths; 21-inch fully rifled cantilever set-up for the slug gun hunter; and Youth version with shorter length of pull and barrel length (20 gauge only). For complete specifications on the new **Model 11-87 Sportsman Camo** and the family of Model 11-87 shotguns, please visit our web site at www.remington.com. Available at a suggested retail price of \$845.

New Model 11-87™ SPS™ Super Magnum™ Provides Unmatched Performance and Features for the Hardcore Waterfowl Hunter

Madison, NC – Remington delivers the ultimate autoloading shotgun for today's dedicated waterfowl hunter who wants a firearm designed with his specific needs in mind - the new **Model 11-87 Special Purpose Synthetic (SPS) Super Magnum Waterfowl**. This fully camouflaged 12 gauge, 3 1/2-inch magnum shotgun can handle 2 3/4, 3 and 3-1/2 shells interchangeably and features the SpeedFeed® I shell holder stock; HiViz® fiber optic sight system and smooth-handling 30-inch Rem™ Choke barrel for enhanced performance with the legendary reliability and unmatched speed of the Model 11-87 autoloading platform.

A camouflaged shotgun is a must for the serious waterfowl hunter and this special purpose Model 11-87 is fully covered with the newly introduced Mossy Oak® Duck Blind™ pattern. This extremely effective camo layers wet and dry ground tones with native grasses, crops and marsh plants for maximum concealment regardless of the hunting environment. Durability is a necessity, so the Model 11-87 SPS Waterfowl wears a rugged, weather-resistant synthetic stock and fore-end. Unique to this high performance model is the SpeedFeed I shell holder stock. This well-designed, utilitarian stock features two magazine tubes molded into the sides of the stock, just behind the pistol grip. With a steel spring in each tube, a simple flick of your finger will release the next shell for quick reloading. This feature provides for shell holding capacity of four additional 2 3/4-inch shells or two 3 or 3 1/2-inch shells. A fast-loading, extended carrier assembly has been added for quick reloads, even with cold or gloved hands. The versatile 30-inch vent rib Rem Choke barrel adapts for varying shot presentations with the interchangeable Improved Cylinder, Modified and Full Rem Choke Tubes that are included. Addition of the HiViz fiber optic sight system (with interchangeable light elements) provides for fast target acquisition in even the lowest light conditions.

Other standard features of this well-designed Model 11-87 include the Remington® R3® Recoil Pad for significant reduction of felt recoil; sling swivel studs for easy attachment of the included padded, black sling; and the ultra-reliable Model 11-87 gas-operating system designed for rapid follow-up shots.

When you combine these high performance features, the durability and unmatched reliability of Remington's Model 11-87 SPS autoloader in one package, ducks and geese don't stand a chance. The **Model 11-87 SPS Super Magnum Waterfowl** is available at a suggested retail price of \$1199. For additional information on this special purpose Model 11-87 and other Remington autoloading shotguns, please visit our web site at www.remington.com.

Weather-Defying XCS Marine Magnum Joins the Remington® Line of Model 870™ Special Purpose Shotguns

Madison, NC – Weather resistance, durability and functionality are taken to the next level with the introduction of the new Model 870 Xtreme Conditions Shotgun (XCS) Marine Magnum. This gun features 7-round total shot capacity with shell holder stock that can hold up to four additional 2 3/4-inch shells. This rugged, weather-defying 12-gauge, 3-inch capable shotgun features our proprietary TriNyte™ Corrosion Control System, reliable Model 870 pump action platform and many popular utilitarian design features including the convenient SpeedFeed® I shell holder stock.

The Model 870 XCS Marine Magnum package begins with the time-proven, solidly-built carbon steel receiver and hammer-forged, smoothbore barrel; both encased in our corrosion and scratch-resistant black TriNyte Corrosion Control System. This extra layer of protection makes the XCS practically immune to the most extreme weather conditions and harsh hunting environments and for maximum corrosion protection, the trigger group components also feature electroless nickel plating. Added durability is provided by the black matte synthetic fore-end and SpeedFeed I stock. This well-designed stock features two magazine tubes molded into the sides of the stock, just behind the pistol grip. With a steel spring in each tube, a simple flick of your finger will release the next shell for quick reloading. With this unique feature, the XCS Marine Magnum is capable of holding four additional 2 3/4-inch shells or two 3-inch shells.

With functionality in mind, the Marine Magnum sports an overall black matte finish; compact 18-inch barrel with fixed cylinder choke and single bead sight; 2-shot magazine extension tube for 6+1 total round capacity; patented R3® Recoil Pad which effectively reduces felt recoil over 30% by absorbing and redirecting recoil energy; sling swivel studs; and durable padded sling.

When the conditions get tough, the Remington Model 870 XCS Marine Magnum should be your “go to” shotgun. Available at a suggested retail price of \$848.

The New Remington® Model 870™ SPS™ Super Magnum™ MAX Gobbler Breaks the Mold for Specialty Turkey Guns

Madison, NC – Turkey hunting will never be the same with the introduction of the **Model 870 Special Purpose Synthetic (SPS) Super Magnum MAX Gobbler** shotgun. This heavy-hitting 12 gauge pump action will interchangeably handle 2 3/4, 3 and 3 1/2-inch magnum shells and with its Realtree® AP Green camo package, adjustable Knoxx SpecOps™ recoil-reducing stock, Williams® FireSights® system and additional enhancements from Remington, this Model 870 delivers maximum gobbler-stomping power and performance.

This featured-packed, Super Magnum pump action starts with the ultra reliable and smooth-operating twin-action bar design; solid-steel milled receiver and superior handling properties of the legendary Model 870. Key features that optimize this pump action for the hardcore turkey hunter include a Knoxx SpecOps synthetic stock, designed for instant length of pull adjustment from 12 to 16 inches and incorporates a patented recoil compensating system which provides significant recoil reduction. The pistol grip design also allows for solid-handling and exceptional pinpoint accuracy. The 23-inch rifle-sighted, Rem™ Choke barrel is topped with Williams FireSights front and adjustable rear fiber optic sights for quick target acquisition in low light conditions. For the option of adding an optics system, the receiver has been drilled and tapped for a Weaver-style rail mount. High performance turkey guns require full camouflage and this Model 870 wears the latest camo pattern from Realtree – All-Purpose™ Green HD™ designed for concealment in the spring turkey woods. The MAX Gobbler also comes with a Super Full Turkey choke tube for optimum patterns with today's high performance turkey loads and a padded camo sling.

Only Remington can combine the dependable Model 870 pump action platform with the latest specialty features and deliver the technologically advanced Wingmaster HD™ loads to today's avid turkey hunter. Visit your local dealer to see the **Model 870 Special Purpose Synthetic Super Magnum MAX Gobbler** shotgun and other specialty Remington firearms.

Available at a suggested retail price of \$799.

New Model 870™ Express® Super Magnum™ Waterfowl Gun Features Mossy Oak® Duck Blind™ Camo

Madison, NC – Waterfowl hunters demand durable and reliable shotguns and for over 50 years, Remington has delivered with the family of Model 870 Express pump action shotguns. New for 2007 is the specially-designed Model 870 Express Super Magnum Waterfowl version, fully camouflaged with the highly-effective, new Mossy Oak Duck Blind pattern. This 12 gauge, 3 1/2-inch magnum, fit with a 30-inch vent rib Rem™ Choke barrel, is designed to live up to the challenge regardless of the hunting conditions.

At the core of this powerful 12-gauge is the time-proven design of the Model 870 slide action with twin action bars to eliminate binding or twisting for smooth operation and quick follow-up shots. The solidly-built, all-steel receiver can handle heavy 3 1/2 and 3-inch magnum loads as well as lighter 2 3/4-inch field loads interchangeably and the addition of a well-balanced 30-inch hammer-forged, vent rib Rem Choke barrel provides smooth-handling characteristics as well as versatility. A Modified Rem Choke tube is included. The harsh conditions and frequent use associated with waterfowl hunting are no match for the durability and weather resistance of the synthetic stock and fore-end. Rear sling swivel stud and magazine cap swivel stud complete the package. Receiver, barrel, stock and fore-end are fully covered with the latest specialty camo pattern from Mossy Oak. Duck Blind is an enhanced, three-dimensional pattern that includes wet and dry ground images with overlying layers of grasses, crops and marsh plants for effective concealment in any terrain.

The Model 870 Express Super Magnum Waterfowl shotgun is available at a suggested retail price of \$559. Visit our web site at www.remington.com for a complete listing of Model 870 Express shotguns.

Camouflaged Model 870™ Express® Combo Package Includes Two Barrels - Made for Deer and Turkey Hunters

Madison, NC – The Remington® Model 870 Express is renowned as the most popular and reliable shotgun ever made and now this time-honored pump action just got better. Introducing the **Model 870 Express Camo Turkey/Deer Combo** in versatile 12 gauge, 3-inch chambering with a compact 21-inch vent rib barrel perfect for the turkey woods and a 23-inch fully rifled barrel with rigid cantilever scope mount, designed for precision accuracy with today's high powered slug loads.

The Model 870 pump action platform starts with a durable receiver milled from a solid billet of steel; smooth and reliable non-binding action with its twin action bar design; and legendary accuracy. This Express Turkey/Deer Combo features a weather-resistant, synthetic stock and fore-end camouflaged with the redesigned, multipurpose Mossy Oak Break-Up® pattern. The carbon steel, hammer-forged barrels wear a non-reflective matte black finish for added concealment as does the receiver. The 21-inch vent rib bead sighted barrel features the Rem™ Choke system and comes supplied with a Turkey Extra Full Choke Tube. With its .687 inch constriction, this extended choke delivers extremely tight and dense patterns to "reach out and touch" that wary longbeard. When deer season rolls around, simply switch out the shorter smoothbore barrel for the 23-inch fully rifled version. This heavy contour barrel design decreases recoil and optimizes accuracy when shooting hard-hitting slug loads. The solidly-constructed cantilever scope mount accepts Weaver-style rings for the convenience of adding a scope.

Versatility and reliability are trademark features of the Model 870 pump action and with the combination of turkey and deer barrels, this camouflaged 12-gauge Express just may be the ideal hunting shotgun. Available at a suggested retail price of \$632.

Seven-Round Capacity Version of Model 870™ Express® Synthetic Now Available in 20 Gauge

Madison, NC – If durability and reliability are critical features for your utility or personal shotgun, then the time-proven Model 870 Express Synthetic pump action should be your gun of choice. For 2007, Remington is adding an 18-inch barrel version with seven-round capacity of this popular shotgun in the softer-recoiling 20 gauge. This multi-purpose **Model 870 Express Synthetic with 7-Round Capacity 20 gauge** joins the 12 gauge version with seven-round capacity and Remington's extensive line of Express pump action shotguns. Also new for 2007, the existing 12 gauge offering will feature factory installed sling swivel studs on the magazine clamp and on the stock as does the new 20 gauge version.

This ruggedly designed workhorse features a black synthetic stock and fore-end; non-glare matte black finish on exposed metalwork; functional 18-inch single bead sight barrel with fixed cylinder choke; 2-shot magazine extension for a 7-round total capacity; and sling swivel studs. At the core of this dependable Express is the non-binding, twin action bar design; solid steel receiver; and smooth handling characteristics of the legendary Model 870 pump action. Matched with today's technologically advanced shotshell loads, this light recoiling 3-inch capable 20 gauge makes an effective tool in the field or for personal protection.

The extensive Model 870 Express family provides reliable, durable and functional offerings for every camp, field or tactical application. Please visit our web site at www.remington.com for a complete listing of Model 870 pump actions – one of the best values in the marketplace today. The **Model 870 Express Synthetic with 7-Round Capacity 20 gauge** is available at a suggested retail price of \$388.

Softer-Recoiling Model 1100™ Autoloading Shotguns Available in Two All-Black Tactical Platforms

Madison, NC – Remington launched a tactical line of Model 870™ pump action and Model 1100 autoloading shotguns at the 2006 SHOT Show. Based on consumer feedback, these versatile shotguns have been enhanced and now feature an all-black tactical look and feel. Ideal for competitive shooting or for home defense, these highly functional guns feature shorter barrel lengths with single bead sight, specialized stock designs and magazine tube extensions. Two enhanced versions of the softer-recoiling, 12 gauge Model 1100 will be offered in 2007 – the **Model 1100 Tac-2 SPEEDFEED IV® Stock** with 18-inch barrel and 7-shot total shell capacity and the **Model 1100 Tac-4 Standard Stock** with versatile 22-inch Rem™ Choke barrel and 9-shot total shell capacity. Both guns are chambered for 2³/₄-inch shells only.

The **Model 1100 Tac-2 SPEEDFEED IV Stock** version has an 18-inch barrel with 2-shot magazine tube extension. Equipped with the sturdy SPEEDFEED IV pistol grip-style stock and revolutionary R3® Recoil Pad, this Model 1100 can be easily controlled with one hand and recoil is lessened even when shooting hard-hitting slug loads. Both the stock and fore-end are solidly constructed of durable synthetic materials and finished in a non-glare matte black. The standard profile, carbon steel hammer-forged barrel has a single bead sight and fixed Improved Cylinder choke. Shotshell magazine capacity of six is achieved with the 2-shot magazine extension tube and with the addition of an extended carrier release and oversized operating handle reloading is quick and easy. The solid steel receiver is drilled and tapped for Weaver rail and wears the “1100 Tactical” rollmark. All exposed metalwork features a blasted black oxide finish. Rear swivel stud and front extension bracket swivel stud complete this offering. Suggested retail price: \$839

The **Model 1100 Tac-4 Standard Stock** version is offered in a 22-inch barrel length with 4-shot magazine tube extension. This autoloader is ideal for the competitive shooter who requires an eight shell capacity (+ one in the chamber). Sporting a traditional Model 1100 black synthetic stock with R3 Recoil Pad and standard fore-end, this 12-gauge is designed for versatility, easy-handling and quick response. The oversized operating handle and extended carrier release provide for rapid and easy reloading. The 22-inch vent rib Rem Choke, standard contour barrel comes with front bead sight and is equipped with Full, Modified and Improved Cylinder chokes for maximizing shotshell performance. This Model 1100 receiver wears the Tactical rollmark and is drilled and tapped for Weaver-style rail. Exposed metalwork has a blasted black oxide finish and rear swivel stud and front extension bracket swivel stud provide for easy attachment of a sling. Suggested retail price: \$905

Law enforcement agencies look to Remington for their tactical needs, shouldn't you? Please visit our web site at www.remington.com for complete specifications on the Remington Tactical line of pump action and autoloading shotguns.

Remington® Model 870™ Tactical Shotguns Now Available with Three Versatile Stock Designs and All-Black Platform

Madison, NC – Remington is pleased to announce enhanced offerings of its Model 870 line of 12-gauge tactical shotguns for 2007. These versatile pump action shotguns, based on our law enforcement line, feature compact barrels with cylinder bores and front bead sight and highly functional stock designs with magazine tube extensions. Four durable, well-designed models will be offered – **Model 870 Tac-2 Knoxx SpecOps™ Stock** with 18-inch barrel; **Model 870 Tac-3 SPEEDFEED® IV Stock** with 20-inch barrel; **Model 870 Tac-2 Knoxx SpecOps Folder Stock** with 18-barrel; and **Model 870 Tac-3 Knoxx SpecOps Folder Stock** with 20-inch barrel. Tac-2 versions feature a two-shot magazine extension and Tac-3 models have a three-shot magazine extension for maximum firepower.

Based on the time-proven and extremely reliable Model 870 pump action platform, these extremely utilitarian shotguns feature standard profile, carbon steel hammer-forged barrels with single front bead sight and fixed cylinder choke; durable black synthetic tactical-style fore-ends with front extension bracket swivel stud and rear swivel stud; amazing, recoil-taming R3® Recoil Pad (excluding folding stock versions); blasted black oxide finish on exposed metalwork; and are chambered for 2³/₄ and 3-inch shells. The sturdily constructed receiver, featuring the “870 Tactical” rollmark and milled from solid steel, is drilled and tapped for the easy attachment of optics with Weaver-style rail. Stocks and fore-ends feature a non-glare, matte black finish completing the all-black package.

The Model 870 tactical shotguns equipped with the SpecOps or SpecOps Folder stocks feature the unique Knoxx Industries recoil-compensating system contained within the pistol grip. This patented mechanism reduces muzzle jump as well as taming recoil for consistent shot placement, rapid follow-up shots and less shooter fatigue.

The **Model 870 Tac-2 SpecOps Stock** version has an 18-inch barrel with 2-shot extension. Setting this tactical 870 apart is the adjustable and recoil compensating Knoxx SpecOps pistol grip stock. With an easily adjustable LOP (length of pull) feature, this pump action can almost instantaneously be fit to any shooter or adjusted to accommodate additional layers of clothing with a LOP from 12 to 16 inches. Suggested retail price: \$665

The **Model 870 Tac-3 SPEEDFEED IV Stock** version has a 20-inch barrel length with 3-shot extension. This fast-handling, pump action features the highly regarded SPEEDFEED IV pistol grip stock for true one-hand control and added comfort when shooting magnum shells or slugs. Suggested retail price: \$572.

Remington® Model 870™ Tactical Shotguns Now Available with Three Versatile Stock Designs and All-Black Platform

Madison, NC – Remington is pleased to announce enhanced offerings of its Model 870 line of 12-gauge tactical shotguns for 2007. These versatile pump action shotguns, based on our law enforcement line, feature compact barrels with cylinder bores and front bead sight and highly functional stock designs with magazine tube extensions. Four durable, well-designed models will be offered – **Model 870 Tac-2 Knoxx SpecOps™ Stock** with 18-inch barrel; **Model 870 Tac-3 SPEEDFEED® IV Stock** with 20-inch barrel; **Model 870 Tac-2 Knoxx SpecOps Folder Stock** with 18-barrel; and **Model 870 Tac-3 Knoxx SpecOps Folder Stock** with 20-inch barrel. Tac-2 versions feature a two-shot magazine extension and Tac-3 models have a three-shot magazine extension for maximum firepower.

Based on the time-proven and extremely reliable Model 870 pump action platform, these extremely utilitarian shotguns feature standard profile, carbon steel hammer-forged barrels with single front bead sight and fixed cylinder choke; durable black synthetic tactical-style fore-ends with front extension bracket swivel stud and rear swivel stud; amazing, recoil-taming R3® Recoil Pad (excluding folding stock versions); blasted black oxide finish on exposed metalwork; and are chambered for 2³/₄ and 3-inch shells. The sturdily constructed receiver, featuring the “870 Tactical” rollmark and milled from solid steel, is drilled and tapped for the easy attachment of optics with Weaver-style rail. Stocks and fore-ends feature a non-glare, matte black finish completing the all-black package.

The Model 870 tactical shotguns equipped with the SpecOps or SpecOps Folder stocks feature the unique Knoxx Industries recoil-compensating system contained within the pistol grip. This patented mechanism reduces muzzle jump as well as taming recoil for consistent shot placement, rapid follow-up shots and less shooter fatigue.

The **Model 870 Tac-2 SpecOps Stock** version has an 18-inch barrel with 2-shot extension. Setting this tactical 870 apart is the adjustable and recoil compensating Knoxx SpecOps pistol grip stock. With an easily adjustable LOP (length of pull) feature, this pump action can almost instantaneously be fit to any shooter or adjusted to accommodate additional layers of clothing with a LOP from 12 to 16 inches. Suggested retail price: \$665

The **Model 870 Tac-3 SPEEDFEED IV Stock** version has a 20-inch barrel length with 3-shot extension. This fast-handling, pump action features the highly regarded SPEEDFEED IV pistol grip stock for true one-hand control and added comfort when shooting magnum shells or slugs. Suggested retail price: \$572.

Remington Model 870 Tactical Shotguns Now Available with Three Versatile Stock Designs and All-Black Platform (cont'd)

The Model 870 Tac-2 Knoxx SpecOps Folder Stock version has an 18-inch barrel with 2-shot extension and the Model 870 Tac-3 Knoxx SpecOps Folder Stock version has a 20-inch barrel with 3-shot extension. Both feature the latest in stock technology from Knoxx Industries with its patented recoil-reducing mechanism and sleek, versatile folding pistol grip stock design. The overmolded, soft-rubber wire frame stock can easily be folded over the top of the receiver for compact storage or ease of maneuverability. Extending the stock creates a stable platform for increased accuracy. A simple squeeze of the wire frame releases the lock and allows the stock to be folded open or closed. Suggested retail price: \$665

This well-designed, multi-purpose line of Model 870 Tactical Shotguns offers a version that's right for your specific needs - whether for competitive shooting, personal defense or protection of property. For complete specifications on the Model 870 Tactical Line and the extensive family of Model 870 pump action shotguns, please visit our web site at www.remington.com.

Remington Enhances the Renowned Model 700™ “Out-of-the-Box” Accuracy with New X-MARK PRO™ Trigger

Madison, NC – Since its introduction in 1962, the Remington® Model 700 bolt-action centerfire rifle has garnered its legendary reputation as the strongest and most accurate factory-built rifle by setting the standard for others to imitate and being the platform of choice for many custom gunmakers. Its unmatched “out-of-the-box” accuracy has just gotten better – introducing the **Remington X-MARK PRO Trigger**. This state-of-the-art fire control breaks like glass, has virtually no creep and has up to 40% lower factory-set trigger pull weights. This just may be the finest trigger that you have ever squeezed!

With technological advances in manufacturing processes and extremely tight production tolerances, the key components of the X-MARK PRO feature mirror-like surface finishes for crisper trigger pull. Electroless nickel plating enhances corrosion resistance and further improves surface finish. The result is an ultra-crisp feel with no creep. The X-MARK PRO operates like the current Remington fire control and features a safety that blocks the sear and trigger. The advanced design allows for lower trigger pull settings direct from the factory, up to 40% less right out-of-the-box. The X-MARK PRO trigger is 100% adjustable for pull weight by a factory authorized repair center and is designed to accommodate all products in the Model 700 and Model Seven™ families.

The best just keeps getting better – the highly accurate Model 700 now with the finest production trigger ever, welcome the **Remington X-MARK PRO Trigger!**

###

The best “out-of-the-box” rifle now has the best “out-of-the-box” trigger. For 2007, the X-MARK PRO trigger will be featured on the following Model 700 and Model Seven offerings: Model 700 XCR™; Model 700 XCR RMEF Camo; Model 700 CDL™ SFLtd Edition; Model 700 CDL SF; Model 700 Alaskan Ti; Model 700 Sendero SF II; Model 700 SPS Varmint; Model 700 VS SF™ II; Model 700 VL SS™ Thumbhole; Model Seven XCR Camo; Model 700 XCR Tactical Long Range; and .17 Remington Fireball offerings in the Model 700 SPS, Model Seven CDL and Model 700 VSF™.

Two New Caliber Offerings Join the Remington® Family of Model 700™ XCR™ Bolt-Action Centerfire Rifles

Madison, NC – Launched in 2005, the Model 700 XCR (Xtreme Conditions Rifle) soon became known as the hardcore hunter's "dream rifle". By partnering the legendary features of the Model 700 platform with some of today's technologically-advanced, manufacturing processes, the result is a rifle truly built for the harshest weather conditions and most extreme hunting environments. Joining the family of Model 700 XCR offerings are the .25-06 Remington and 7mm-08 Remington, both long-standing favorite calibers for mid-range, deer-sized game. And on all new 2007 XCR rifles is the Remington X-MARK PRO™ trigger. With its mirror-like surface finishes, this trigger breaks like glass and features lower factory trigger pull settings.

The Model 700 XCR is truly built for extreme conditions with our exclusive, patent-pending TriNyte® Corrosion Control System. This multi-layer process consists of electroless nickel and proprietary PVD (Physical Vapor Deposition) coatings on the solid stainless steel barreled action. Benefits of this micro-thin coating include superior scratch resistance and virtual corrosion resistance. Fitting this weather-impervious barreled action into a top-of-the-line synthetic stock adds to the toughness of this Model 700. Designed with a rubber overmolding technology from Hogue, this durable stock has easy-gripping, overmolded panels in the grip and fore-end areas. Other features include clean 24-inch barrel (26-inch barrel length on magnum offerings); drilled and tapped for scope mounts; hinged floorplate; sling swivel studs and the amazing, recoil-reducing R3® Recoil Pad.

If you want the top of the class in high performance and durability, look to Remington and the Model 700 Xtreme Conditions Rifle. Available in .270 Win, .30-06 Sprg, 7mm Rem Mag, .300 Win Mag, .270 WSM, .300 WSM; 7mm Rem Ultra Mag, .300 Rem Ultra Mag, .338 Rem Ultra Mag, .338 Win Mag, .375 H&H and .375 Rem Ultra Mag and new for 2007 - .25-06 Remington and 7mm-08 Remington. Suggested retail prices range from \$1029 to \$1103. For complete specifications, visit our web site at www.remington.com.

2007 Limited Edition Model 700™ Elk Foundation Rifle Chambered in Versatile .300 Remington® Ultra Magnum

Madison, NC – For 2007, Remington is pleased to announce the seventh offering in the limited edition Rocky Mountain Elk Foundation (RMEF) rifle series, the **Model 700 XCR™ (Xtreme Conditions Rifle) RMEF Camo** chambered in the flat-shooting, hard-hitting .300 Remington Ultra Mag. This annual offering features the Elk Foundation logo engraved on the hinged floorplate and the stock wears the official RMEF camo pattern – Realtree® All-Purpose™ HD. A portion of the proceeds from the sale of this rifle will be donated to RMEF in support of their conservation efforts.

The physical demands of elk hunting can push a hunter to his limits as well as taking a toll on his rifle. The Model 700 XCR bolt-action rifle is built to handle the most-daunting terrain and weather conditions with our exclusive, patent-pending TriNyte® Corrosion Control System. This multi-layer process consists of electroless nickel and proprietary PVD (Physical Vapor Deposition) coatings on the solid stainless steel barreled action. Benefits of this micro-thin coating include superior scratch resistance and virtual elimination of corrosion. Fitting this weather-impervious barreled action into a top-of-the-line synthetic stock adds to the toughness of this Model 700. The durable stock has easy-gripping, gray overmolded panels in the grip and fore-end areas, utilizing a rubber overmolding technology from Hogue, and is camouflaged with the latest multi-purpose pattern from Realtree and the official camo of the Elk Foundation – Realtree All-Purpose HD. Other features include clean 26-inch barrel; drilled and tapped for scope mounts; hinged floorplate; sling swivel studs and recoil-taming, R3® Recoil Pad. And new for 2007, the Model 700 XCR rifles feature the Remington X-MARK PRO™ trigger. With our tight production tolerances, this trigger breaks like glass, has zero creep and up to 40% lower out-of-the-box trigger pull weight.

Previous offerings in the RMEF series include the Model 700 BDL™ SS Camo in .300 Rem Ultra Mag, 7mm Rem Ultra Mag, .300 Rem Short Action Ultra Mag and .300 Win Mag, and the Model 700 XCR Camo in 7mm Rem Ultra Mag and .300 WSM.

The seventh annual **Model 700 XCR RMEF Camo** rifle in .300 Remington Ultra Mag, partnered with the new Remington Power Level ammunition, makes this one of the most versatile rifles you can own. Available for one year only at a suggested retail price of \$1199.

Second Offering of the Limited Edition Model 700™ CDL™ SF Chambered in the HOT New .17 Remington® Fireball

Madison, NC – Remington is pleased to announce the second offering in the newest limited edition Model 700 collectible series – the **2007 Model 700 CDL SF (Stainless Fluted) LTD Edition** chambered in the new lightning-fast .17 Remington Fireball. This limited edition version is the premier introductory rifle offering for this exciting .17 caliber small game and varmint cartridge. Commemorative engraving on the hinged floorplate and limited production quantities will add to the collectible value of this handsome bolt-action rifle.

The Model 700 CDL SF LTD Edition is housed in a satin finished, straight comb American walnut stock with right-handed cheek piece. Enhancing the classic look of the stock are generous cut checkering, black fore-end tip and grip cap. The durable 416 stainless fluted barreled action, clean 24-inch hammer-forged barrel and jeweled bolt – all feature a satin stainless finish. Other features include receiver drilled and tapped for scope mounts; four round magazine capacity; R3® Recoil Pad; and sling swivel studs.

Engraving on the hinged floorplate denoting the introduction of the .17 Remington Fireball cartridge and “Model 700 Limited” rollmark on the receiver, set this limited edition CDL apart from the standard offering.

This limited edition of the Model 700 CDL SF was not designed just to display in your gun cabinet. With its legendary “out-of-the-box” accuracy; barrel fluting for heat dissipation; magnum contour 24-inch barrel for optimum velocity and stability; and the new Remington X-MARK PRO™ trigger, this well-crafted rifle performs in the field! Partnered with Remington’s initial .17 Remington Fireball offering – the 20 gr Premier® AccuTip-V™ at 4000fps, varmints and predators don’t stand a chance.

The **2007 Model 700 CDL SF LTD Edition .17 Remington Fireball** joins last year’s offering in the acclaimed .30-06 Springfield in this highly collectible Model 700 series. Available for one year only at a suggested retail price of \$1065. Visit our web site at www.remington.com for specifications on this and other fine rifles from Remington.

Remington Adds Full Line of Model 700™ CDL™ Stainless Fluted Offerings

Madison, NC – Following on the tremendous popularity of the limited edition series of the Model 700 CDL SF, Remington is pleased to announce a full line of this handsome, traditionally-styled walnut and stainless offering in 2007. The Model 700 CDL SF (Classic Deluxe Stainless Fluted) will be available in six popular calibers – 7mm-08 Rem, .270 Win, .30-06 Sprg, 7mm Rem Mag, .270 WSM and .300 WSM. Only the limited edition version in .17 Remington® Fireball will feature commemorative engraving and the “Model 700 Limited” rollmark.

This classically-styled hunting rifle is based on the highly accurate Model 700 bolt-action platform, renowned for its “three rings of steel” design delivering unparalleled strength; solid-steel cylindrical receiver design providing a solid bedding area and consistent shot placement; and the new X-MARK PRO™ trigger with its mirror-like surfaces and adjustable pull weight provides an ultra crisp feel and no creep. The result is a rifle that delivers peak performance and accuracy.

The Model 700 CDL SF has a traditional straight comb American walnut stock with right-handed cheek piece. Adding to the classic look of this handsome stock are generous cut checkering, black fore-end tip and grip cap and satin finish. The durable receiver and barrel are machined from solid 416 stainless steel and feature a satin finish. The clean, magnum contour 24-inch barrel on short action, short magnum and long action offerings and the 26-inch length on the magnum calibers feature our Light Varmint-style fluting for weight reduction and heat dissipation. Other features include jeweled bolt, hinged floorplate with four round magazine capacity (three round capacity in magnum versions); recoil-softening R3® Recoil Pad; receiver drilled and tapped for scope mounts; and sling swivel studs.

The attractive walnut and stainless package sets this rifle apart from the competition, but the Model 700 CDL SF performance blows them away. Available in six widely popular calibers at suggested retail prices of \$1039 to \$1085. See your local dealer today or visit our web site at www.remington.com to see the complete line of Model 700 bolt-action rifles.

Remington Adds Full Line of Model 700™ CDL™ Stainless Fluted Offerings

Madison, NC – Following on the tremendous popularity of the limited edition series of the Model 700 CDL SF, Remington is pleased to announce a full line of this handsome, traditionally-styled walnut and stainless offering in 2007. The **Model 700 CDL SF (Classic Deluxe Stainless Fluted)** will be available in six popular calibers – 7mm-08 Rem, .270 Win, .30-06 Sprg, 7mm Rem Mag, .270 WSM and .300 WSM. Only the limited edition version in .17 Remington® Fireball will feature commemorative engraving and the “Model 700 Limited” rollmark.

This classically-styled hunting rifle is based on the highly accurate Model 700 bolt-action platform, renowned for its “three rings of steel” design delivering unparalleled strength; solid-steel cylindrical receiver design providing a solid bedding area and consistent shot placement; and the new X-MARK PRO™ trigger with its mirror-like surfaces and adjustable pull weight provides an ultra crisp feel and no creep. The result is a rifle that delivers peak performance and accuracy.

The Model 700 CDL SF has a traditional straight comb American walnut stock with right-handed cheek piece. Adding to the classic look of this handsome stock are generous cut checkering, black fore-end tip and grip cap and satin finish. The durable receiver and barrel are machined from solid 416 stainless steel and feature a satin finish. The clean, magnum contour 24-inch barrel on short action, short magnum and long action offerings and the 26-inch length on the magnum calibers feature our Light Varmint-style fluting for weight reduction and heat dissipation. Other features include jeweled bolt, hinged floorplate with four round magazine capacity (three round capacity in magnum versions); recoil-softening R3® Recoil Pad; receiver drilled and tapped for scope mounts; and sling swivel studs.

The attractive walnut and stainless package sets this rifle apart from the competition, but the **Model 700 CDL SF** performance blows them away. Available in six widely popular calibers at suggested retail prices of \$1039 to \$1085. See your local dealer today or visit our web site at www.remington.com to see the complete line of Model 700 bolt-action rifles.

Updated Remington® Model 700™ Titanium Gets a New Look and Name – the Model 700 Alaskan Ti

Madison, NC – In 2001, Remington revolutionized the world of production rifles when we introduced the Model 700 Titanium Ultimate Lightweight bolt-action rifle - the lightest production rifle on the market, rivaling custom rifles at a fraction of the cost. For 2007, the Model 700 Titanium gets an updated style, enhanced features and a new name – the **Model 700 Alaskan Ti**, available in nine versatile hunting calibers ranging from the medium range 7mm-08 Rem to the full-power .300 Win Mag. It is incredibly strong, impervious to the weather and amazingly accurate; and it weighs a mere 6 pounds!

At the core of the Model 700 Alaskan Ti is the strong, yet lightweight, receiver milled out of a solid block of Titanium. Spiral flutes are added on the bolt body and the bolt handle is skeletonized to remove additional weight while increasing bolt rigidity and cycling capabilities. And with all the great features of the legendary Model 700 bolt-action platform, this rifle offers the dependability and “out-of-the-box” accuracy that hunters and shooters have come to expect.

The addition of several new features to the Model 700 Alaskan Ti enhances performance, durability and updates its look. The new Remington X-MARK PRO™ trigger helps to deliver extraordinary accuracy with a trigger that breaks like glass, has virtually no creep and comes with up to 40% lower factory set pull weight. The clean 24-inch magnum contour barrel with Light Varmint style fluting is constructed of durable 416 stainless steel. The longer barrel length optimizes velocities while the fluting reduces weight and improves heat dissipation. The magnum contour barrel with fluting provides for magnum caliber chamberings (not previously available in the Model 700 Titanium) without adding significant weight. The barreled action is pillar bedded into a rugged Bell & Carlson carbon fiber synthetic stock, enhanced with a black and gray webbed paint scheme. This well-designed stock also features the new MaxxGuard™ protective coating which provides a soft touch, easy-grip finish for solid-handling in even the harshest weather conditions. Also new for 2007 is the addition of a hinged floorplate magazine with four-round magazine capacity in the short and long action calibers and three-round capacity in the magnum offerings. Completing this high tech package is the addition of sling swivel studs; receiver drilled and tapped for scope mounts; and revolutionary R3® Recoil Pad which significantly lessens recoil in this lightweight rifle.

Getting to the top of that mountain won't be as difficult with the amazingly lightweight and durable Model 700 Alaskan Ti. Getting your trophy won't be either.

The **Model 700 Alaskan Ti** rifle is available in 7mm-08 Rem, .25-06 Rem, .270 Win, .280 Rem, .30-06 Sprg, .270 WSM, .300 WSM, 7mm Rem Mag and .300 Win Mag at suggested retail prices ranging from \$2105 to \$2225. Visit our web site at www.remington.com for a complete listing of Model 700 specialty, high performance rifles.

Lightweight, Weather Resistant Model 700™ Mountain LSS Now Available in Solid-Performing .280 Remington

Madison, NC – Remington has responded to the demands of avid hunters and shooters with an extensive offering of specialty Model 700 bolt-action rifles. One of the most attractive and practical offerings is the Model 700 Mountain LSS (Laminated Stock Stainless). With its compact clean design, durable 416 stainless steel barreled action, element-resistance laminate stock and legendary Model 700 platform, this versatile mountain rifle is a favorite with the zealous, high-climbing hunter who doesn't want to sacrifice performance. New for 2007 is the "do anything" .280 Remington chambering joining the 7mm-08 Rem, .270 Win and .30-06 Sprg offerings.

The Model 700 has a rigid, cylindrical receiver design that adds stiffness and a solid bedding area for the action in the stock for consistent shot placement. A counterbored bolt face encloses the cartridge head with an unbroken ring of steel, which then fits inside of the barrel chamber, surrounded by the receiver – creating the famous Remington "three-rings-of-steel." This revolutionary design creates an action of unparalleled strength.

The Mountain LSS platform includes a handsome, two-tone brown laminate stock with right-handed cheekpiece and straight-line comb; clean 22-inch lighter "mountain" contour barrel; sling swivel studs; receiver drilled and tapped for scope mounts; convenient hinged floorplate with four-round magazine capacity; and R3® Recoil Pad. Crisp cut-checkering and black fore-end tip and grip cap complete this attractive and extremely rugged package.

Performance driven, extremely lightweight and classically designed – the Model 700 Mountain LSS .280 Remington offering is THE high country, hunting rifle. Suggested retail price: \$1015. For a complete listing of Model 700 bolt-action rifles, please visit our web site at www.remington.com.

Special Buckmasters® Edition of Model 700™ SPS™ Available in Six Popular Calibers and Young Bucks™ Version

Madison, NC – Since the introduction of the Remington® Model 700 Special Purpose Synthetic (SPS) family of centerfire rifles in 2005, these durable, highly functional bolt actions have quickly become a favorite with hunters and shooters worldwide. New for 2007, Remington is pleased to partner with Buckmasters on the introduction of special edition **Model 700 SPS Buckmasters** and **Model 700 SPS Buckmasters Young Bucks** rifles. Setting these logo versions apart from the standard Model 700 SPS line are a specially-engraved floorplate and fully-camouflaged stock. The Buckmasters edition is available in six traditional chamberings - .243 Win, 7mm-08, .270 Win, .30-06 Sprg, 7mm Rem Mag, .300 Win Mag and the Buckmasters Young Bucks edition in .243 Win.

The rigid design of the Model 700 receiver, machined from a solid steel bar, is the core of the Model 700 SPS. This combined with the famous “three-rings-of-steel” design which completely supports the cartridge; make the Model 700 one of the most reliable and accurate actions available. The Model 700 SPS has an ergonomically-designed synthetic stock with defined grips and features the recoil-reducing R3® Recoil Pad. Unique to these special edition rifles are stocks fully camouflaged with Realtree Hardwoods® HD™ and convenient hinged floorplate magazines that are engraved with the Buckmasters logo. The clean carbon steel barrels come in 24-inch length for standard caliber offerings and in a 26-inch length for magnum calibers and feature a matte blued finish. These durable bolt action rifles are drilled and tapped for ease of scope mounting and have sling swivel studs.

The Buckmasters Young Bucks rifle shares the same great features but is designed to fit the younger or smaller stature shooter with a one-inch shorter length of pull and more compact 20-inch barrel for proper counterbalance with the shorter and lighter stock. These special edition Youth rifles have the Realtree-camouflaged stocks and Buckmasters logo engraved on the floorplate. Available only in .243 Win.

“Deer hunting is the first choice of most hunters across the country and the majority of those hunters look to Remington for their firearms’ needs,” stated Jackie Bushman, Founder and CEO, Buckmasters Ltd. “Buckmasters and Remington have had a long-standing relationship and it is only natural that we partner on these special Buckmasters Edition rifles.”

Remington and Buckmasters are synonymous with deer hunting. Who better to bring you the ultimate whitetail gun? The **Model 700 SPS Buckmasters Edition** and the **Model 700 SPS Buckmasters Young Bucks Edition** rifles are available at suggested retail prices of \$665.

Remington® Model 700™ SPS™ Youth Rifle Now Available in Ever Popular 7mm-08

Madison, NC – One of the major issues for young shooters and smaller stature shooters is finding a gun that fits properly. Remington offers a comprehensive line of downsized shotguns, centerfire and rimfire rifles, specifically-designed with a shorter length of pull and compact barrels for well-balanced, easy handling without sacrificing performance. Joining the **Model 700 SPS Youth** bolt action rifle line-up for 2007 is the popular and versatile 7mm-08 chambering.

This highly-functional centerfire features the unrivaled Model 700 solid steel cylindrical receiver housed in a weather resistant, black matte synthetic stock with defined grips and dual sling swivel studs. This sturdy, well-designed stock has a one-inch shorter length of pull than standard Model 700 SPS rifles and features the recoiling-taming R3® Recoil Pad which reduces felt recoil over 30 percent. The compact 20-inch hammer-forged, standard contour barrel is constructed of carbon steel and wears a matte blued finish. Receiver is drilled and tapped for easy attachment of optics. And for optimal performance and versatility from this bolt action, choose from Remington's three 7mm-08 ammunition offerings – Premier® AccuTip™ 140 gr, Express® Core-Lokt® 140 gr PSP or 120 gr HP.

Functional, durable and proven, the Model 700 SPS line of centerfire rifles represents a solid choice in a bolt-action rifle and now young shooters can own one designed just for them in a choice of two universal calibers - .243 Win. and new for 2007 the solid-performing 7mm-08. The **Model 700 SPS Youth** rifle is available at a suggested retail price of \$604.

Remington® Model 700™ SPS™ Youth Rifle Now Available in Ever Popular 7mm-08

Madison, NC – One of the major issues for young shooters and smaller stature shooters is finding a gun that fits properly. Remington offers a comprehensive line of downsized shotguns, centerfire and rimfire rifles, specifically-designed with a shorter length of pull and compact barrels for well-balanced, easy handling without sacrificing performance. Joining the Model 700 SPS Youth bolt action rifle line-up for 2007 is the popular and versatile 7mm-08 chambering.

This highly-functional centerfire features the unrivaled Model 700 solid steel cylindrical receiver housed in a weather resistant, black matte synthetic stock with defined grips and dual sling swivel studs. This sturdy, well-designed stock has a one-inch shorter length of pull than standard Model 700 SPS rifles and features the recoiling-taming R3® Recoil Pad which reduces felt recoil over 30 percent. The compact 20-inch hammer-forged, standard contour barrel is constructed of carbon steel and wears a matte blued finish. Receiver is drilled and tapped for easy attachment of optics. And for optimal performance and versatility from this bolt action, choose from Remington's three 7mm-08 ammunition offerings – Premier® AccuTip™ 140 gr, Express® Core-Lokt® 140 gr PSP or 120 gr HP.

Functional, durable and proven, the Model 700 SPS line of centerfire rifles represents a solid choice in a bolt-action rifle and now young shooters can own one designed just for them in a choice of two universal calibers - .243 Win. and new for 2007 the solid-performing 7mm-08. The Model 700 SPS Youth rifle is available at a suggested retail price of \$604.

Feature-Packed Varmint Rifle Joins the Highly Successful Line of Remington® Model 700™ SPS™ Bolt Actions

Madison, NC – The durable, high performance Model 700 Synthetic Special Purpose (SPS) family of centerfire rifles welcomes its newest member – the **Model 700 SPS Varmint**. These specialty bolt-action rifles deliver the Model 700 legendary accuracy and reliability in a package designed for precision, long range shooting at a surprisingly affordable price. New for 2007, the Model 700 SPS Varmint is available in six popular calibers - .204 Ruger, .22-250 Remington, .223 Remington, .243 Win, .308 Win. and in the sizzling new .17 Remington Fireball.

At the core of the Model 700 SPS Varmint rifle is the rigid design of the Model 700 receiver, machined from a solid steel bar. This combined with the famous “three-rings-of-steel” design which completely supports the cartridge make the Model 700 one of the strongest and most accurate actions available. Performance-enhancing features of the SPS Varmint rifle include a 26-inch heavy varmint-contour barrel; newly-designed black matte synthetic stock with vented beavertail fore-end for heat dissipation, weight reduction and stability; non-reflective matte blued finish on exposed metalwork; and convenient dual front sling swivel studs. This rifle also features the new Remington X-MARK PRO™ trigger, set at the factory between 3.5 to 5.5 pounds with no creep, further enhancing the performance of these tack-drivers. Other standard Model 700 SPS features include drilled and tapped receiver; hinged floorplate magazine with 5-round capacity in .17 Remington Fireball, .204 Ruger and .223 Rem chamberings or 4-round capacity in .22-250 Rem, .243 Win and .308 Win; and convenient sling swivel studs.

The Model 700 SPS family of centerfire rifles delivers remarkable accuracy, durability and the performance-driven features that hardcore hunters and shooters demand. Now varminters and long range shooters have a version they can call their own – the **Model 700 SPS Varmint**, available at a suggested retail price of \$647.

Thumbhole Stock Version Added to Legendary Remington® Model 700™ Varmint Line-Up

Madison, NC – Precision and accuracy are synonymous with the Varmint line of Model 700 centerfire bolt-action rifles. These exceptional, heavy-barreled production rifles are renowned for their out-of-the-box accuracy. The newest member of the family is the **Model 700 VL SS TH** (Varmint Laminate Stock Stainless Thumbhole Stock) chambered in three widely-popular, varmint calibers for 2007 - .204 Ruger, .223 Remington and .22-250 Remington.

The Model 700 VL SS TH has all of the legendary performance features of the Model 700 platform. Rigid cylindrical receiver milled from a solid bar of steel, providing consistent shot to shot placement. The “three-rings-of-steel” design (counterbored bolt face encloses the cartridge head with an unbroken ring of steel, which then fits inside of the chamber, surrounded by the receiver) provides for unparalleled strength. The new Remington X-MARK PRO™ trigger provides for crisper trigger pull and now lower trigger pull settings direct from the factory with exceptionally fast lock time. The hammer-forged, heavy contour barrels further enhance long range accuracy.

This newest edition to the Varmint line-up begins with a brown laminated wood, thumbhole-style stock designed with many performance-enhancing features including vent cuts under the barrel channel for improved heat dissipation; beavertail fore-end for added stability; comfortable rollover cheekpiece; and convenient sling swivel studs. This highly-functional stock design provides for rock-steady grip and the tack-driving accuracy required for long range, high volume shooting. The addition of a convenient four-round capacity hinged floorplate magazine allows for quick follow-up shots and the 26-inch stainless steel barrel has a concave target-style crown and heavy contour design for rigidity. Both receiver and barrel sport a satin finish.

When long-range precision performance is required, Remington delivers with its accuracy-driven line of Model 700 Varmint rifles. Welcome the newest member of this impressive family, the **Model 700 VL SS TH**. Available at a suggested retail price of \$1028.

Explosive New .17 Remington® Fireball Caliber in Five Bolt Action Rifle Offerings – Available Only From Remington

Madison, NC – At 4000fps, the exciting new .17 Remington Fireball breaks the barrier for small caliber performance. Only Remington can match this extremely fast, highly accurate and flat-shooting caliber with the legendary “out-of-the-box” performance of the Model 700™ and Model Seven™. For 2007, Remington is pleased to announce five bolt-action offerings chambered for the latest member of the .17 caliber family – the highly collectible Model 700 CDL™ SF LTD Edition (Classic Deluxe Stainless Fluted); two specially-designed varmint rifles, the Model 700 VSF™ (Varmint Synthetic Fluted) and the new Model 700 SPS™ Varmint (Special Purpose Synthetic); the durable workhorse Model 700 SPS; and the compact Model Seven CDL. All five rifles are based on the Model 700 platform, one of the strongest and most accurate actions available, and feature the new Remington X-MARK PRO™ trigger, further enhancing their tack-driving capabilities.

Model 700 CDL SF LTD Edition – Engraving on the hinged floorplate denoting the introduction of the .17 Remington Fireball cartridge, “Model 700 Limited” rollmark on the receiver and limited production quantities set this commemorative rifle apart. The CDL features a satin finished, straight comb American walnut stock with right-handed cheekpiece, generous cut checkering, black fore-end tip and grip cap. The durable 416 stainless fluted barreled action, clean 24-inch hammer-forged barrel and jeweled bolt – all feature a satin stainless finish. Other features include receiver drilled and tapped for scope mounts; four round magazine capacity; R3® Recoil Pad; and sling swivel studs. This second offering in the collectible Model 700 CDL SF LTD Edition series is available for one year only. Suggested retail price: \$1065

Model 700 VSF – Recently upgraded, this heavy-barreled rifle features a well-designed H.S. Precision composite stock with a contoured beavertail fore-end, defined ambidextrous finger grooves, palm swell and twin front tactical-style swivel studs to accommodate a sling and bipod. The desert tan stock has a textured, black webbed finish. The 26-inch hammer-forged, carbon steel barrel with satin blued finish features concave target-style crown and six longitudinal flutes for rigidity and increased heat dissipation as well as weight reduction. Receiver is drilled and tapped for scope mounts and the hinged floorplate magazine has a four round capacity. With its full length aluminum bedding, the VSF is designed for the precision shooter or long-range varmint. Suggested retail price: \$1159

Explosive New .17 Remington Fireball Caliber in Five Bolt Action Rifle Offerings – Available Only From Remington (cont'd)

Model 700 SPS Varmint – An exciting new line of bolt-action rifles for 2007, available in .17 Remington Fireball and five additional chamberings. Performance-enhancing features of the SPS Varmint rifle include a 26-inch heavy varmint-contour barrel; newly-designed matte black synthetic stock with vented beavertail fore-end for heat dissipation, weight reduction and stability; non-reflective matte blued finish on exposed metalwork; dual front sling swivel studs; receiver is drilled and tapped for scope mounts; and the hinged floorplate magazine has a four round capacity. At the core of the Model 700 SPS Varmint rifle is the rigid design of the Model 700 receiver, machined from solid steel bar stock. This combined with the famous “three-rings-of-steel” design which completely supports the cartridge make the Model 700 one of the strongest and most accurate actions available. Suggested retail price: \$647

Model 700 SPS - This synthetic version of the venerable Model 700 provides the avid hunter with a durable and accurate rifle or is the perfect “work tool” around the ranch. The Model 700 SPS features a redesigned, more ergonomically appealing black synthetic stock with R3 Recoil pad. The clean 24-inch barrel has a matte blued finish and is drilled and tapped for scope mount. The hinged floorplate magazine has a capacity of four rounds. This moderately-priced rifle delivers the solid design features and out-of-the-box accuracy that you expect from the Model 700. Suggested retail price: \$604

Model Seven CDL – This compact, easy-handling rifle has a traditional American walnut, straight comb stock with right hand cheekpiece, accented with black fore-end tip and grip cap, handsome cut checkering and satin finish and clean 20-inch carbon steel barrel with target crown. The metalwork has a non-glare, satin blued finish. Jeweled bolt handle; hinged floorplate magazine with four round capacity; receiver drilled and tapped for scope mounts; sling swivel studs; and R3 Recoil Pad complete this well-designed package. Suggested retail price: \$907

Match any of these full-featured, highly accurate rifles with the introductory 20 gr Premier® AccuTip-V™ offering and varmints beware! For complete specifications on these offerings and other fine Remington products, please visit our web site at www.remington.com or your local dealer.

Remington Introduces the Model 770™ and Model 770 Youth – an Upgraded Version of the Accurate and Dependable Model 710™

Madison, NC – The Model 710 bolt-action rifle set the bar high with its stellar accuracy and dependability when it was launched in 2001. This moderately-priced and well-designed line of centerfire rifles became one of our best sellers. Now Remington is pleased to announce the next generation of dependable, highly accurate bolt-action centerfire rifles – the **Model 770** available in seven popular calibers and the **Model 770 Youth** chambered in .243 Win. Both the standard and youth model are equipped with a factory-mounted and bore-sighted Bushnell® SHARPSHOOTER® 3-9x40mm scope. Grab a box of ammo and you are ready for the range!

The Model 770 rifle retains the reliable and technologically-advanced Model 710 barreled action design and all-steel receiver. The 22-inch clean barrels (24-inch barrels in magnum calibers) are constructed of ordnance-grade steel with six-groove, button-rifling for enhanced accuracy. The redesigned all steel bolt cams easier with a quick-cycling 60-degree throw and when fully engaged in the forward position, it locks securely inside the barrel for unprecedented strength. The center-feed steel magazine box has a four round capacity (three round capacity for magnum calibers) and features a redesigned, more durable magazine latch design. What truly sets this rifle apart from its predecessor is the re-designed, ergonomically contoured stock. This well-designed black synthetic stock features sling swivel studs formed into the stock; raised cheekpiece; textured grips for solid-handling; and distinctive “R” logo on the grip cap. Completing this impressive package is a pre-mounted and bore-sighted 3-9x40 matte black scope, utilizing heavy-duty Weaver-style bases and rings.

The standard Model 770 is available in .243 Win, .270 Win, .30-06 Sprg, 7mm Rem Mag, .300 Win Mag and two new caliber offerings – 7mm-08 Rem and .308 Win.

The Youth version has a 12 3/8-inch length of pull (1-inch shorter than standard model) and more compact 20-inch barrel for easy-handling by the young hunter or smaller stature adult. Available in .243 Win only.

If you want a highly accurate, dependable rifle that is ready to hunt, right out of the box - look for the new Remington® **Model 770** and **Model 770 Youth** bolt-action rifles at your local dealer's today or visit our web site at www.remington.com. Available at a suggested retail price of \$452.

Compact Remington® Model Seven™ Now Available in Rugged, Weather-Defying XCR™ Version

Madison, NC – The Model Seven bolt-action rifle, known for its unparalleled performance in a true short action platform, is now available in our most durable, corrosion and abrasion resistant package. Remington is proud to introduce the **Model Seven XCR (Xtreme Conditions Rifle) Camo** in three standard (.243 Win, 7mm-08 Rem and .308 Win) and two short action magnum offerings (.270 WSM and .300 WSM). With its impervious TriNyte® Corrosion Control System; fully camouflaged stock and renowned “out-of-the-box” accuracy, this just may be the most rugged, performance-driven hunting rifle in the marketplace.

Based on the legendary design and strength of the Model 700™ bolt action, the Model Seven is revered for its unprecedented accuracy, dependability, compact length and precision balance. With its 2 3/8-inch shorter total overall length, this fast-handling bolt-action is designed for dense cover, trekking through mountainous terrain or hunting from your treestand. Its compact size and well-balanced design also make the Model Seven the perfect rifle for smaller-stature or youth hunters.

The Model Seven XCR Camo combines performance and durability, starting with the 416 stainless steel barreled action which features our TriNyte Corrosion Control System. Traditional stainless steel barrels contain an element of carbon, so when exposed to the elements these barrels can rust, not the XCR. The multi-layer TriNyte process consists of electroless nickel and proprietary PVD (Physical Vapor Deposition) coatings on the solid stainless steel barreled action. Benefits of this micro-thin coating include superior scratch resistance and virtual corrosion resistance. The hammer-forged clean barrels are fluted for weight reduction and heat dissipation and have a matte finish. The standard offerings feature a 20-inch barrel length and magnum calibers sport a longer 22-inch barrel. The durable, weather-resistant synthetic stock is fully camouflaged with the newly introduced Realtree® All-Purpose™ HD pattern, designed to blend into any hunting environment. Hinged floorplate magazine (4+1 capacity for standard calibers and 3+1 capacity for magnum versions); sling swivel studs; and revolutionary, recoil-taming R3® Recoil Pad complete this well-designed package.

The accuracy and performance of this Model Seven are further enhanced with the addition of the new Remington X-MARK PRO™ trigger. With our tight production tolerances, these triggers break like glass, have zero creep with up to 40% lower out-of-the-box trigger pull weights and it is fully adjustable by a factory authorized repair center.

Big things come in little packages and the Model Seven lives up to its reputation. The new **Model Seven XCR Camo** is available in .243 Win, 7mm-08 Rem, .308 Win, .270 WSM and .300 WSM at suggested retail prices of \$1080 to \$1147. The Model Seven is also available in Youth synthetic and classic CDL offerings. For complete specifications, please visit our web site at www.remington.com.

Remington® Model 798™ Bolt Action Rifles Now Available in Weather-Defying Stainless

Madison, NC – In 2006, Remington introduced an extensive line of bolt action centerfire rifles based on the time-honored Model 98 Mauser action – the Model 799 Short Action Mini-Mauser and the Model 798 Long Action. This classic-styled action is known for its controlled round feed and positive fixed blade ejection; strength and reliability; fast lock time and inherent accuracy. Joining this exceptional line of rifles for 2007 is the **Model 798 Stainless** in seven popular chamberings: .243 Win, .25-06 Rem, .270 Win, .30-06 Sprg, 7mm Rem Mag, .300 Win Mag, and .375 H&H. This bolt-action is the first-ever, production stainless steel Mauser offering in the long history of this classic action.

These high-performance rifles feature solidly-built receivers and hammer-forged barrels constructed of durable stainless steel with non-glare satin finish. Standard calibers feature a 22-inch clean barrel while the magnum chamberings sport 24-inch clean barrels (.375 H&H has rifle sights). The barreled action is housed in a Monte Carlo CNC-inletted and glass bedded wood laminate stock for improved accuracy. Constructed of attractive forest green, gray and brown laminates, this durable stock is enhanced with cut-checkering and provides added protection from the rigors of hardcore hunting. Receivers are drilled and tapped for standard Mauser 98 scope mounts. Additional features include one-piece solid steel trigger guard/magazine assembly with hinged floor-plate and steel magazine follower; one-inch rubber butt pad; sporter-style, single stage trigger with tang mounted 2-position safety; and sling swivel studs.

At the core of the Model 798 Stainless Laminate is the rock-solid Mauser 98 action with claw extractor for true controlled round feeding. This time-tested design remains the platform of choice for many of today's production and custom-made bolt action rifles.

Solid performance and rugged durability define the latest centerfire offering from Remington – the **Model 798 Stainless**. Available at suggested retail prices ranging from \$710 to \$1032.

Synthetic Version of Remington® Model 750™ Autoloading Centerfire Rifle Now Available

Madison, NC – Following on the successful launch of the redesigned Model 750 Woodsmaster™ autoloader last year, Remington is pleased to introduce the **Model 750 Synthetic** autoloading centerfire rifle for 2007 in four standard offerings (.243 Win, .308 Win, .270 Win and .30-06 Sprg) and two carbine versions (.308 Win and .30-06 Sprg). This reconfigured synthetic version replaces the current Model 7400™ synthetic offerings.

Built on a long history of reliable and fast-handling autoloaders, the Model 750 Synthetic features an enhanced gas system for more consistent bolt velocities, less fouling and greater reliability. An electroless nickel and Teflon® coating on the breech bolt further improves feeding and reduces friction. The exterior of the Model 750 has been updated as well with an ergonomically-designed, durable black synthetic stock and semi-beavertail style fore-end. The solidly-built, all-steel receiver and hammer-forged carbon steel barrel feature a complimenting matte blued finish. Both the standard 22-inch and 18 1/2-inch carbine barrels feature iron sights and the receivers are drilled and tapped to accept standard Model 7400 bases for added versatility. The four-round capacity, detachable magazine box is interchangeable with the Model 7400 magazine. Completing this well-designed autoloading package is the revolutionary R3® Recoil Pad and rear swivel stud and magazine cap swivel stud for sling attachment.

When the hunting action is up close and fast target acquisition is the key, the **Model 750 Synthetic** delivers with its low-recoil, super-fast cycling and deadly accuracy. Available at a suggested retail of \$732. For a complete listing of available Model 750 offerings, please visit our web site at www.remington.com.

Model	750 Synthetic
Action	Autoloader
BBL Length	22 inches 18 1/2 inches (Carbine)

Ranch Carbine and Camo Hunter Versions Now Available in Quick-Handling Model 7615™ Pump Action Rifle

Madison, NC – In 2004, Remington introduced the Model 7615P Patrol Rifle to the law enforcement community. This enhanced version of the widely-used Model 7600™ pump action police rifle is a highly effective tool for officers in the line of fire. Remington is pleased to offer shooters and hunters their own version of this dependable, fast-handling rifle in two versatile packages – the **Model 7615 Ranch Carbine** with compact 18 1/2-inch barrel and the coyote-stomping **Model 7615 Camo Hunter** with 22-inch barrel. Both chambered in the popular and affordable .223 Remington with convenient ten-round detachable magazine box.

These reliable pump actions are based on the familiar Model 870™ platform with the capability of ultra-fast follow-up shots without unshouldering your rifle. Designed for functionality, these rifles will accept aftermarket M16/AR15-style magazine boxes and come drilled and tapped for scope mounts. Standard Model 7600 scope mounts will fit the Model 7615 offerings. Durable Parkerized finish on the barrel (Ranch Carbine version only) and quick-release magazine boxes enhance corrosion and abrasion resistance. The well-balanced and compact design lend the Model 7615 to be an ideal ranch “truck” gun or perfect hunting rifle for thick brush or fast-action situations.

Model 7615 Ranch Carbine – This handy version features a clean 18 1/2-inch carbon steel barrel with hardened Parkerized finish for added durability. Classic satin-finished American walnut Model 7600-style stock and fore-end complete this solid-performing work tool. Suggested retail price: \$932

Model 7615 Camo Hunter – To maximize velocity and performance, this hunter version has a clean 22-inch barrel, equipped with rifle sights for quick target acquisition. The weather-resistant, Model 7600-style synthetic stock and fore-end, carbon steel barrel and solid-steel receiver are fully camouflaged with Mossy Oak Brush™, ideal for concealment in the open range with elements of grasses, dirt and natural brush. Suggested retail price: \$985

With these two Model 7615 pump action offerings, Remington gives hunters and shooters the option of a high capacity, cost effective tool regardless of your needs. For complete specifications on the Model 7615 and other Remington products, please visit our web site at www.remington.com.

Popular Synthetic Model 597™ Rimfire Rifle Now Available in .22 LR Scope Combo Package

Madison, NC – The Remington® Model 597 rifle, when introduced in 1997, revolutionized rimfire technology with its innovative bolt guidance system, resulting in greater stability, feeding reliability and superior accuracy. This extensive family of semi-automatic rimfire rifles includes synthetic and laminated stock versions in standard and magnum rimfire offerings. New for 2007 is the field-ready **Model 597 Synthetic Scope Combo** in .22 LR featuring a pre-mounted, bore-sighted 3-9x32mm scope.

The technologically-advanced design of the Model 597 autoloader begins with the proprietary twin tool-steel guide rails which allows for smooth operation of the bolt and reliable functioning. Additional performance-enhancing features include a unique positive-locking, rigid barrel attachment clamp for proper alignment and improved accuracy; exclusive Teflon®/nickel plating on the bolt, hammer and sear which ensures a crisp trigger pull and dependability; and last-shot “hold open” design for easy identification of an empty chamber. Completing this performance driven rimfire is a patented staggered-stack, drop-out style metal magazine with 10-round capacity. Constructed from a lightweight magnesium-based alloy and cast via a unique one piece die-cast process, the Model 597 magazine clip design provides for flawless feeding and quick reloading.

This Model 597 has a durable, matte gray synthetic stock with sling swivel studs; clean 20-inch button-rifled barrel with satin blued finish; efficient twist rate of one turn in 16 inches; and is ready to take afield or to the range with its pre-mounted, bore-sighted 3-9x32mm scope.

This performance-driven rimfire rifle is designed for the rigors of high-volume shooting and is available now in the convenient **Model 597 Synthetic Scope Combo** package at a suggested retail price of \$229.

New Smoothbore Version of Model 572™ BDL™ Pump Action Rimfire Designed for .22 Shot Cartridges

Madison, NC – Rimfire rifles continue to be a favorite of sportsmen for their affordability, minimal recoil and broad applications. To meet your needs, Remington offers an extensive line of full-featured bolt, semi-automatic and pump action rimfire rifles and joining the line-up for 2007 is the smoothbore version of the classically-styled **Model 572 BDL Smoothbore Fieldmaster®** pump action in .22 LR. In this latest configuration, the Model 572 is specifically-designed for plinking and pest control at short ranges.

This traditional, smooth operating slide action features a high gloss American walnut stock and fore-end with handsome cut-checkering; rich polished blued finish on the alloy receiver and carbon steel barrel; high-capacity, 15-round tubular feed magazine; and positive cross-bolt safety. Setting this version apart from the classic Model 572 Fieldmaster is the compact 21-inch smoothbore barrel with front bead sight for use with .22 shot cartridges.

Looking for a rimfire rifle? Look to Remington for the specific model to meet your shooting needs. For specifications on the **Model 572 BDL Smoothbore Fieldmaster** and other fine rimfire rifles, please visit our web site at www.remington.com. Available at a suggested retail price of \$575.

Remington Expands Successful Line of Innovative Genesis™ Muzzleloaders with Special Buckmasters® Edition and New Camo Offering

Madison, NC – Muzzleloading performance, reliability and accuracy were elevated to new levels with Remington's introduction of the revolutionary Genesis Muzzleloader in 2006. With its innovative TorchCam™ action, super-hot 209 ignition and easy-to-use, easy-to-clean design, the Genesis family of .50 caliber rifles is like nothing in the blackpowder marketplace today. Joining the highly successful first-year offerings are the new **Genesis ML Camo** and the **Genesis ML SF Buckmasters Edition**. Also new for 2007 is an anti-friction Xylan® coating on the TorchCam action on all Genesis muzzleloaders. This high performance coating promotes smooth, effortless operation of the TorchCam as well as reducing fouling and making it easier to clean.

At the core of the Genesis ML is the patented TorchCam action and reliable 209 primer ignition. The camming breech block action provides easy access to the breech plug for quick placement and removal of the 209 primer without the assistance of a tool. The TorchCam design also protects the ignition system from inclement weather and isolates the trigger group from blowback and fouling. Removable 7/16-inch hex head breech plug (wrench included) and firing pin provide added reliability and ease of cleaning or replacement. Maximum efficiency and greater velocities can be obtained with the longer 28-inch barrel, optimized with one-in-28 inch twist rate, and the capability to use up to 150 grains of black powder or black powder equivalent. The compact design of the TorchCam action minimizes overall length and weight for easy-handling. For added versatility, the Genesis ML is drilled and tapped for scope mounts and features Williams® Fiber Optic Adjustable Sights. An ambidextrous hammer spur can be installed, if using a scope, for easier access. The dual safety system incorporates a traditional cross bolt safety at the rear of the trigger guard and the over-travel hammer prevents contact with the firing pin unless the trigger is pulled. Addition of front and rear swivel studs and handy aluminum anodized ramrod with jag completes the basic Genesis package.

Maintenance of black powder rifles is the essential key to their reliability. The unique design of the Genesis ML allows for easy breakdown and cleaning of the entire rifle with the removal of only four hex screws; one to remove the fore-end, two to remove the barrel and one to remove the trigger assembly. The easily-removable breech plug also aids in the cleaning process, allowing the rifle to be stripped and cleaned in the field, if necessary.

Genesis ML Camo – This versatile configuration combines low-glare blued barrel with camouflaged stock and fore-end for optimal concealment. Wearing the redesigned, widely-successful Mossy Oak Break-Up® pattern, this Genesis Camo version is a highly functional, yet affordable choice. Suggested retail: \$349

Remington Expands Successful Line of Innovative Genesis Muzzleloaders with Special Buckmasters Edition and New Camo Offering (cont'd)

Genesis ML SF Buckmasters Edition – Deer hunters take note, this stainless fluted, camo version just may be the ultimate deer hunting rifle. The durable stainless steel barrel enhances weather resistance, while its satin finish reduces glare. Addition of flutes aids in heat dissipation and weight reduction. Concealment is further enhanced with the realistic, high definition Realtree Hardwoods® HD™ camo-covered stock and fore-end. Completing this special edition offering is the Buckmasters logo laser engraved on the left receiver panel. Suggested retail: \$419

Additional Genesis Offerings Include:

Genesis ML Blued – This standard blued version has a carbon steel, matte-finished barrel set in a durable black matte synthetic stock. Suggested retail: \$293

Genesis ML Full Camo – For maximum concealment, this carbon steel version is fully camouflaged with versatile Mossy Oak Break-Up. Suggested retail: \$405

Genesis MLS Overmold – This stainless steel model features a black synthetic stock with overmolded grips on the stock and fore-end for more secure handling. Suggested retail: \$363

Genesis ML SF TH – This thumbhole-style, black synthetic stock version provides for added stability and precision shot placement. The stainless steel barrel features flutes for added heat dissipation and weight reduction. Suggested retail: \$405

Genesis ML SF TH Camo – As above with fully camouflaged, thumbhole-style stock and fore-end in Mossy Oak Break-Up. Suggested retail: \$461

Genesis ML SF TH Laminate – Sturdy black laminate thumbhole-style stock and fore-end with stainless fluted barrel. Suggested retail: \$594

Hunters and shooters worldwide have looked to Remington for nearly 200 years to bring the most reliable and innovative firearms and ammunition products to the marketplace. Remington delivers once again with the revolutionary Genesis muzzleloader.

Remington Launches Line of Tactical Rifles – Including Model 700™ Long Range Tactical and Model 7615™ Pump Action Carbine

Madison, NC – Remington is pleased to announce the expansion of its tactical line of firearms with the introduction of two new tactical rifles for 2007 – the performance-driven **Model 700 XCR™ (Xtreme Conditions Rifle) Long Range Tactical Rifle** in .223 Rem, .308 Win and .300 Win Mag and the quick-handling **Model 7615 Tactical Rifle** chambered in .223 Rem. These rifles are based on the long-accepted Model 700 bolt-action and Model 7600™ pump action platforms, selected by the military and top law enforcements agencies for their legendary accuracy, dependability and performance.

Model 700 XCR Tactical Long Range Rifle – Designed for the long-range, precision shooter and hunter, this Model 700 defines “tack driver”. At the core is the 416 stainless steel barreled action that features our exclusive TriNyte® Corrosion Control System – a multi-step, micro-thin protective layering process that makes this rifle element-resistant. This impervious barreled action is housed in a newly-designed Tactical Bell and Carlson stock featuring full length aluminum bedding block; tactical beavertail fore-end; and recessed thumb hook located behind the pistol grip for enhanced shooting performance. The composite stock reinforced with aramid fibers is finished in OD Green with a black webbed overlay. Dual front swivel studs and rear stud complete the stock package. Addition of the new Remington® X-MARK PRO™ trigger enhances accuracy with its mirror-like surfaces, no creep and 40% lower factory trigger pull weights. It is also fully adjustable by an authorized gunsmith. The clean 26-inch varmint contour barrel is free-floating and has wide tactical-style fluting with dish-style target crown and the receiver is drilled and tapped for scope mounts. Exposed metalwork features our black TriNyte finish. Convenient hinged floorplate magazine has five round capacity in .223 Rem, four round in .308 Win and three round in .300 Win Mag. This full-featured, performance driven bolt-action defines long range shooting. Suggested retail price: \$1332

Model 7615 Tactical Rifle – No stranger to tactical police units, this fast-handling carbine rifle is well-suited as a work tool on the ranch or as a recreational target gun alternative to the AR-15. Similar in design to the rugged and reliable Model 870 pump action shotgun, the Model 7615 can deliver ultra-fast follow-up shots as the shooter instantly chambers another round from the 10-round detachable magazine box. This tactical version has the durable Model 7600 black synthetic fore-end and Knoxx SpecOps NRS™ (No Recoil Suppression) stock with convenient adjustable length of pull feature for proper fit (adjusts from 11 1/4 to 15 1/2-inch LOP). Fore-end cap swivel stud and rear swivel stud are provided for attachment of sling. The compact 16 1/2-inch carbon steel barrel has standard rifle sights and more durable Parkerized finish for improved corrosion and scratch-resistance. Chambered in the widely-accepted .223 Rem, the Model 7615 will accept standard M16/AR15-style box magazines. Suggested retail price: \$932

Remington Unveils the .17 Remington® Fireball® Blistering Speed, Superior Accuracy and Explosive Impact

Madison, NC – In recent years, new introductions of .17 caliber rimfire cartridges have taken the hunting and shooting industry by storm. The .17HMR and .17 Mach 2 brought new levels of rimfire performance to varmint hunters and target shooters alike. New for 2007, Remington plans to re-energize the world of 17 caliber centerfire ammunition with the introduction of the .17 Remington Fireball. This addition to Remington's Premier® AccuTip™ Line eclipses the popular 17HMR by an astonishing 1450fps!

The 17 Remington Fireball, based on the classic .221 Remington Fireball case, is an extremely well balanced cartridge that provides laser-flat trajectory, with match grade accuracy, all in a compact package that does not require excessive maintenance and won't burn out barrels. When loaded with Remington's super accurate 20gr AccuTip-V bullet, the .17 Remington Fireball has a blistering muzzle velocity of 4000fps, rivaling the velocity and trajectory of the legendary 22-250 Remington out to 300 yards. That's awesome performance from a cartridge that uses 50% less powder and generates a whopping 86% less recoil than the 22-250. You'll never lose sight of your target when firing the .17 Remington Fireball, even with rifles scoped with today's high-power optics.

The 17 Remington Fireball is perfectly suited to short action firearms with 223 Remington bolt dimensions. To further complement this offering, look for exciting new rifles chambered in this caliber in Remington's 2007 lineup. From the work-horse Model 700SPS to the beautiful model Seven CDL, you're sure to find the perfect combination to suit your needs. Whether you're pursuing prairie dogs, ground hogs, coyotes, or targets, the .17 Remington Fireball puts the fun back into 17 caliber centerfire rifle shooting.

Offering for 2007:

Remington® Premier® AccuTip

	Caliber	Bullet Weight	Muzzle Velocity
NEW	.17 Remington Fireball	20 gr.	4000 fps

Remington Introduces 300 Remington Ultra Mag Power Level Ammunition – Unprecedented “ Three Guns In One” Centerfire Rifle Versatility

Madison, NC – The 300 Remington Ultra Magnum is the hardest hitting, flattest shooting .30 caliber factory offering in history and is known throughout the hunting world for its accuracy, velocity, and unmatched ballistic performance as a big-game cartridge. New for 2007, through extensive testing, laboratory research and development, Remington has taken this remarkable cartridge to unprecedented levels of versatility with the introduction of 300 Remington Ultra Mag Power Level Ammunition.

.300 Remington Ultra Mag Power Level Ammunition offers hunters multiple performance levels within one firearm, which normally would only be attainable by switching guns and calibers. Most hunters are familiar with the 12 ga. 3 1/2" Super Magnum shotgun which, using 2 3/4", 3" and 3 1/2" shells, is capable of delivering three performance levels in one firearm platform. Now, for the first time, this concept is being brought to the world of centerfire rifle hunting.

One Gun, One Cartridge - 3 Performance Levels

300 Remington Ultra Mag Power Level Ammunition exhibits the following performance features, providing hunters with the most versatile big game cartridge ever available.

Power Level III ammunition is loaded to full-bore 300 Remington Ultra Mag specifications - a caliber that defines the performance standard for 30 caliber cartridges and offers the ultimate in performance at extreme ranges for any North American big game species. This loading is traveling 500 fps faster and offers nearly 50% more energy at 200 yards than a 30-06. At 200 yards Power Level III ammo offers velocity that is 432 fps faster than the 300 WSM or 300 Win Mag while delivering 21% more energy to the target. The performance gap between the 300 Remington Ultra Mag and standard or short magnums is over 200 fps and 400 ft lbs of energy at 500 yards.

Power Level II ammunition has been developed to deliver performance levels identical to 300 Win Mag/300WSM, and is designed for all medium and large big game hunting at extended ranges. Power Level II ammunition offers reduced velocity and energy levels when the extreme performance of the 300 Remington Ultra Mag is not necessary.

Power Level I ammunition has been developed to deliver 30-06 velocity and performance levels and is perfectly suited for all medium big game hunting at long ranges. Power Level I ammo offers a recoil reduction of 53% when compared to Power Level III loadings so its ideal for spending time at the range sharpening shooting skills.

OCTOBER 17, 2006

Remington Introduces 300 Remington Ultra Mag Power Level Ammunition – Unprecedented “ Three Guns In One” Centerfire Rifle Versatility (cont'd)

‘Three Guns in One’ Centerfire Rifle Versatility

- System Flexibility Previously Only Available in Expensive Switch Barrel Firearms
- All 3 Power Levels point of impact within 2” out to 200 yd No need to re-sight your rifle when switching Power Levels
- To eliminate mix-up at the range where different Power Levels may be fired in a single setting, Power Level I and II cartridges are distinguishable by corresponding rings that are scribed upon the bullets

Now, all big game hunters can step up to the unrivaled performance of the 300 Remington Ultra Mag and increase the versatility of their hunting system like never before. It's as simple as choosing the appropriate Power Level to match your intended game species and shooting conditions. Whether you're shooting targets on the range, whitetails in the woodlands or elk in the Rockies, 300 Remington Ultra Magnum Power Level ammunition provides the perfect load to match any situation.

Offerings for 2007:

Remington Wingmaster HD™ – The Ultimate in High-Performance Shotshell Ammunition

Madison, NC – Waterfowl...Turkey...Predators...Whatever your quarry, Remington Wingmaster HD offers you the ultimate in shotshell performance. Wingmaster HD delivers a devastating payload of aerodynamically engineered golden pellets that are smooth and round, producing a degree of downrange lethality never before attainable in shotshell ammunition. If your style of hunting calls for heavy hitting dense patterns with true long range effectiveness, look no further than Wingmaster HD.

New for 2007, Remington expands their blockbuster Wingmaster HD offering to include turkey specific loadings in both 12 and 20 gauge. To further meet the needs of avid turkey hunters, these hard hitting turkey loads will be available in convenient 5 – pack packaging. Also, providing predator hunters with the most devastating shotshell performance available, Wingmaster HD will be offered in #T size shot in 12 ga. 3” and 3-1/2” loads.

In 2006, Remington’s industry-leading R&D team, in partnership with world-renowned metallurgists, developed a technological breakthrough in material composition and pellet forming processes. Utilizing Remington’s proprietary composite of tungsten-bronze-iron metal (approved for waterfowl hunting by the U.S. Fish and Wildlife Service), Wingmaster HD outperforms existing products with distinct and measurable advantages in pattern density and overall multi-range effectiveness.

With “Drop-Dead Better™” performance, Wingmaster HD exhibits the following advantages

12.0 Grams/CC Pellet Density – The optimal pellet density for an ideal combination of pattern energy and dispersion without sacrificing pellet count at extended ranges – unlike some competitive loads.

Round, Smooth, True-to-Size Pellets – Wingmaster HD pellets are smooth and round, resulting in true flight for dense, efficient patterns with no flyers. Every pellet is consistent in size and shape and equally effective in performance.

Equal Energy in Every Pellet - More Bone-Crushing Force – Wingmaster HD pellets are round and true-to-size, resulting in consistent velocity and energy for deep penetration at long range. These highly aerodynamic pellets also maintain their velocity longer, generating nearly 200 ft.-lbs. more energy at 40 yards than competitive tungsten based shot.

Choke Responsiveness – Lethal Near and Far – Changing hunting conditions often call for an adjustment in pattern diameter. Wingmaster HD has a hardness rating similar to steel shot resulting in less wear on barrels and chokes with improved choke tube responsiveness – a benefit not previously obtainable with high density shot materials.

New Remington Wingmaster HD™ – The Ultimate Turkey Load

Madison, NC – Turkey hunting is all about calling them in close for one well-placed shot. Unfortunately, long beards don't always play by the rules. You know you're dealing with a mature gobbler when he suddenly hangs up just out of range for no apparent reason, refusing to take another step. This old warrior has played the game before and he needs to be totally convinced before committing to your setup. This spring, it's time to teach that old bird a thing or two about shotshell evolution. From the folks that brought you Premier® Hevi-Shot™, Remington proudly introduces the next generation of turkey hunting ammunition. New for 2007, Remington has expanded its blockbuster **Wingmaster HD** category to include the most lethal Turkey-specific loads available to hunters.

We began the development process by utilizing our exclusive Wingmaster HD pellet technology. The aerodynamically superior golden pellets are smooth and round, unlike the competition. Comprised of tungsten, bronze and iron, Wingmaster HD pellets are specifically engineered with a density of 12 grams/cc, 10% denser than lead. After extensive testing, both in the field and the laboratory, Remington found that 12 grams/cc provides the optimal downrange performance without sacrificing vital pellet count.

Wingmaster HD loads also feature a precise balance of payload and velocity that provide turkey hunters with a shotshell that generates nearly 200 ft.-lbs. more energy at 40 yards than competitive tungsten based shot. This results in deeper penetrating pellets with bone crushing force that will extend your effective shooting range.

This spring, when that old gobbler glares at you from forty five yards, things will be different. You've done your preseason homework on the pattern board and you're loaded with a better product. Go ahead and make the shot with "Drop-Dead Better" Performance.

In an effort to help you determine the perfect shot size for your gun, Remington is offering Wingmaster HD turkey loads in convenient and economical 5-pack boxes.

Offerings for 2007 are as follows:

Remington Wingmaster HD™ Turkey

	Gauge	Shell Length	Velocity	Oz. Shot	Shot Size
NEW	12 ga.	3 1/2"	1225 fps	1 7/8 oz.	#4, 6
NEW	12 ga.	3"	1225 fps	1 5/8 oz.	#4, 6
NEW	20 ga.	3"	1185 fps	1 1/4 oz.	#4, 6

Remington Wingmaster HD™ – “Predators Beware”

Madison, NC – You’ve done your part. The set-up looked great and your calling was as real as it gets. The wise old coyote appears in the thicket fifty yards out. He freezes; silhouetted behind some brush as his sixth sense kicks in, detecting something is wrong. You have mere seconds to react before he bolts for heavy cover. No ordinary ammunition will do in this situation.

New for 2007, Remington introduces Wingmaster HD shotshell ammunition specifically engineered for predator and varmint hunting. This heavy-hitting high density composition of tungsten, bronze and iron delivers a lethal payload of large #T shot with devastating down range performance. The increased energy of Wingmaster HD pellets provide superior penetration at ranges of 40-60 yards, and beyond.

The science behind the extreme lethality of Wingmaster HD lies within its optimal 12 grams/cc density and aerodynamically engineered round, smooth pellets. Every pellet is consistent in size and shape. These design characteristics are the reason Wingmaster HD predator loads outperform the competition and deliver dense, efficient long range patterns with no flyers.

Predator hunting is one of the fastest growing segments in the outdoors today. This new breed of dedicated hunters knows that their ammunition is the final link between success and failure. Shots can often be hard to come by in the predator game and superior performing ammunition is a must. Wingmaster HD definitely gives them the edge with “Drop-Dead Better™” performance.

Offerings for 2007 are as follows:

Remington Wingmaster HD™ Predator Loads

	Gauge	Shell Length	Velocity	Oz. Shot	Shot Size
NEW	12 ga.	3"	1350 fps	1 1/2 oz.	T
NEW	12 ga.	3 1/2"	1350 fps	1 5/8 oz.	T

Remington® Managed-Recoil™ Copper Solid™ – The Formula for Success

Madison, NC – Absolute confidence in your slug gun and ammunition is one of the most important aspects of making a successful shot on a trophy whitetail and there is no better way to build that confidence than time spent on the practice range. Practice should be enjoyable but let's face the facts; full power, high performance shotgun slugs are not pleasant to shoot! No one ever looks forward to spending a day at the range sighting in their slug guns in preparation for deer season. New for 2007, Remington will help build your confidence with Managed-Recoil Copper Solid slugs.

Now, hunters of all ages can actually enjoy the necessary ritual of those pre-hunt practice sessions. Remington Managed-Recoil Copper Solid slugs will build confidence on the range and delivers devastating performance when it really counts. Offered in a 12 gauge 2 3/4" configuration, Managed-Recoil Copper Solid slugs are designed to significantly cut felt recoil by 40% without sacrificing on-game performance.

This new member of the Remington Managed-Recoil family allows hunters to practice more often and develop proper shooting skills without the discomfort of heavy recoil. Managed-Recoil Copper Solid slugs are super-accurate with nearly the same point of impact as full power loads. If you choose to hunt with full power loads, no scope adjustments are necessary.

For well over a decade, the Remington Copper Solid has remained one of the most popular high tech shotgun slugs among the nation's deer hunters. This popularity is based on one major factor – time proven performance. The Copper Solid slug is machined from solid copper stock using computer-controlled Swiss screw technology for perfect balance and concentricity resulting in superb accuracy. Upon impact, the five precision-cut nose petals peel back to perfection, exhibiting true 2x caliber expansion for devastating energy transfer, virtually 100 percent weight retention and deep-driving penetration for dropping big game in their tracks. This season, whether you choose the new Managed-Recoil Copper Solid slug, or the legendary full-bore Copper Solid, spend some extra time on the range. You owe it to yourself and your trophy buck.

Offerings for 2007 are as follows:

Remington Managed-Recoil™ Copper Solid™ Slug

	Gauge	Shell Length	Wt. Slug	Muzzle Velocity	Muzzle Energy
New	12 ga.	2 3/4"	1 oz.	1200 fps	14 00 ft-lbs.

Remington Unveils the Premier® Tactical Knife Series – A Bold New Approach from Remington

Madison, NC – New for 2007, Remington is proud to introduce the Premier Tactical Knife Series. This bold, new series of cutlery will provide civilians, law enforcement and the military with one of the finest selections of tactical knives available.

The Remington Design Team searched the world over to find a product worthy of bearing the Remington name.

The search ended in the township of Maniago, Italy. This area of Italy is world-known for its expertise and precision craftsmanship of fine cutlery. The Premier Tactical line of knives was designed by Remington experts and signifies the finest hand-made examples of Italian craftsmanship.

The Premier Tactical Tango™ Series represents the pinnacle of the Remington Premier Tactical Series of knives. Comprised of a Series I model – fixed Blade and a matching, companion Series II model folder, these rugged knives are designed to handle any tactical situation. Whether civilian, law enforcement or military, you can rest assured the Tango Series knives will not fail when called into action.

All Tango Series knives are constructed of grade-specific stainless steel blades and are equipped with nearly indestructible G-10 handles. Whether you find yourself carving up dinner, slicing through rope or busting through metal, these tactical knives are designed to handle any possible situation.

Series I fixed-blade knives are supplied with a matching Cordura or molle belt sheath while Series II folders are supplied with ambidextrous, metal pocket clips. For collector and replacement requirements, each series is clearly marked with corresponding production codes for authenticity.

Premier® Tactical Tango™ Series

Specifications

- Civilian
 - 440C SS with PTFE – Teflon® Coating
 - Heavy Duty Cordura® Sheath
- Law Enforcement
 - 440C SS with Mill Spec: Mil-C 13924 coating
 - Molle Sheath (Series I)
- Military Products Division
 - N690 SS with DLC (Diamond Like Carbon) Coating
 - Molle with Ext and Leg Strap (Series I)
- Series I 10 1/2 inch overall length
- Series II 4 3/4 inch closed length

All three versions of Fixed and Folders are available in Clip, Drop and Tanto blade designs. Look for Remington knives at your local Remington dealer or please visit our web site at www.remington.com.

Remington Continues the Tradition with Its Collectible Knife Series for 2007

Madison, NC – For generations, sportsmen and knife collectors have eagerly anticipated the annual arrival of Remington collectible knives. For 2007, Remington is continuing the tradition by offering three highly collectable, limited edition knives.

2007 Bullet® Knife – Continuing a tradition that spans over two and half decades, Remington is proud to offer the 2007 “**Renegade**” Bullet Knife. This unique folder is designed in the distinctive Cheetah pattern and features a 3 1/2 inch trapper blade that incorporates a folding hand guard. The beautiful red jig-bone handle exhibits nickel silver bolsters and rivets with solid brass liners and traditional Remington bullet shield on the face side and has a closed length of 4 5/8 inches.

2007 25th Anniversary Bullet® Knife – This handsome collectable celebrates 25 years of the famous Remington Bullet knife. The 25th Anniversary Bullet Knife is designed in the Original R1123 Trapper pattern and features 3 1/2 inch spey and 3 inch clip blades with a green jig bone handle and has a closed length of 4 1/2 inches. The 25th Anniversary Bullet Knife is package in a collectable tin that features images that chronicle twenty five editions of the Remington bullet knife.

Outdoor Exploration Knife – The third in a series of highly collectible, one-year production, knives celebrating the exploration of the great American wilderness. The **South** knife features both the Remington logo and traditional “Remington Country” compass face with the corresponding direction etched on the spear blade. In addition to the unique blade work, the “compass” shield, signifying the outdoor exploration series, is embedded on the genuine jig-bone handle. The handle is accented with nickel silver bolsters and rivets with solid brass liners. The South knife is constructed with a 2 9/16 inch spear blade and a 1 7/8 inch pin blade.

The Outdoor Exploration Knives are packaged in a unique display box designed in a manner that progressively builds a Remington Country Image on two sides upon completion of the set.

All Remington collectible knives are made in the U.S.A. and are available at your local Remington dealer or please visit our web site at www.remington.com.
