

FIREARMS AMMUNITION ACCESSORIES

Remington[®]

IT'S WHAT YOU'RE SHOOTING FOR.

It's the change in the
air – that wonderful crispness
that heralds the change of season.

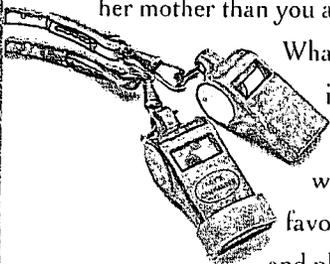

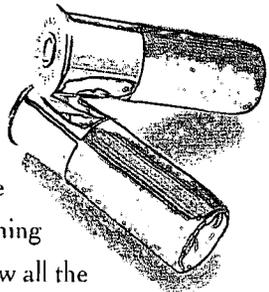

It's the colors of falling leaves and the
smell of newly
chopped corn.

You can see the
squirrels at har-
vest, and hear the
first Canadas coming
through. We know all the
clues, but each time hunting season
arrives, the same excitement is there
anew. It's a rebirth, and it's why bird
hunters and their dogs live so long. A
tonic for the soul.

So what will it be this year? Run little
Nell, or let her mother come along one
more season? Ah, take 'em both...the
youngster will learn the drill faster from
her mother than you anyway...

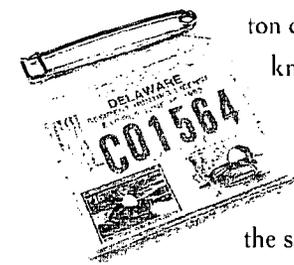

What will you carry
into the field this
fall? We hope it
will be your

favorite Remington
and plenty of green
shells for good measure – an old recipe
that's still an unbeatable combination.
And we've got you covered when it
comes to dressing for success afield,

from top-quality, hard-wearing Remington clothes, to knives, luggage and accessories. All backed by the same standards of quality, performance, and value the Remington name has always stood for. Have a great year!

**THE REMINGTON
PEERLESS™. NOTHING
ELSE STACKS UP.**

The name "Peerless™" pretty much says it: "without equal", "matchless", "incomparable." While there are many fine over and under shotguns on the market today, nothing stacks up to the all-new, American made, Remington Peerless™. Few of the competition come close to this gun's performance, and none of them can equal its value.

While a totally new gun for Remington, the Peerless™ is based on the classic elements of box lock over-under shotgun design. Two slender, light contour barrels are joined at the muzzle, and brazed into a hardened monoblock that incorporates a pair of automatic ejectors. The barrel assembly pivots on hardened trunions, and lock-up is achieved with two large rectangular lugs that project from the standing face of the frame. Side ribs keep briars from snagging in the space between the barrels.

The single selective trigger is set by mechanical action rather than by recoil inertia, so you will always be assured of a fast follow-up shot from the second barrel. The specially hardened sears are dynamically balanced, and lock time is extremely fast: 3.28 milliseconds*, which puts it in a league with the legendary Model 3200™. The top tang safety is automatic, and when in the "Safe" position, can be moved left or right to select the first barrel fired. The side plates are removable, and tastefully embellished with a pointer on one side and setter on the other. The 26", 28" or 30" barrels carry a

REMINGTON PEERLESS™

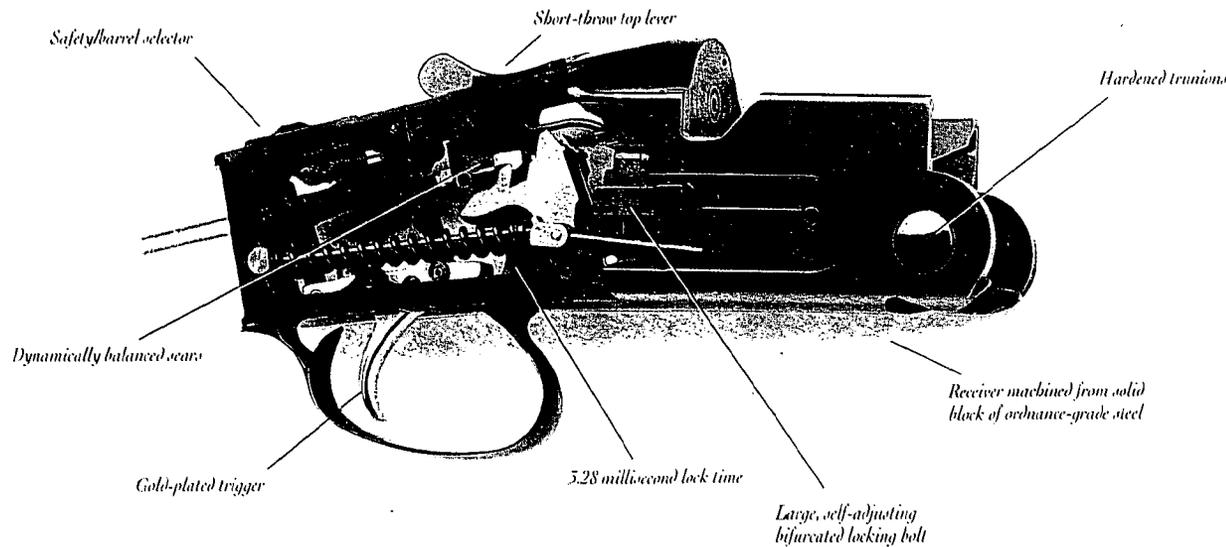

*Average speed achieved in product testing.

strong, but gracefully proportioned ventilated rib with target-grade front sight and stainless mid-bead. A three-tube set of Rem™ Chokes (1 Imp. Cyl., 1 Mod. and 1 Full) is supplied.

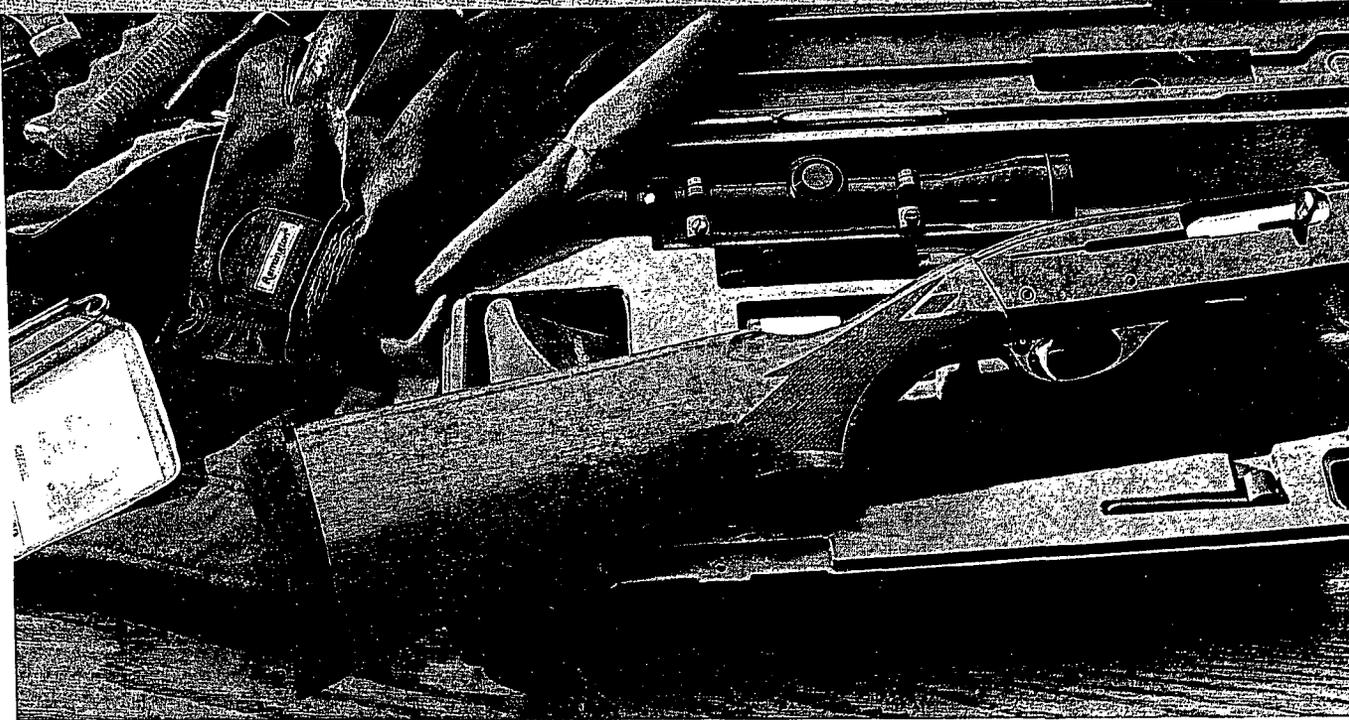

The Peerless™ is set up for field shooting with a 14 3/16" length of pull, 1 1/2" drop at the comb, and 2 1/4" drop at the heel. With 26" barrels the gun weighs in at 7 1/4 lbs, and the 28" and 30" versions tip the scales at 7 3/8 and 7 1/2 lbs respectively – an easy carry, but not so light as to be "whippy." The subtle figure of the Imron®-finished high-gloss American walnut stock and fore-end is perfectly complemented by a generous amount of 20-line to the inch cut checkering, and a vented recoil pad anchors the butt of the gun. All metalwork is highly polished and protected with Remington's rich, deep bluing process.

How does the Peerless™ shoot? Well, like all Remingtons, it feels incredibly responsive when you pick it up...the balance falls right between your hands, and the stock locks easily into your shoulder. Almost before you can think about nudging the fore-end, it starts to swing, and suddenly you realize the Peerless™ is an over-under like no other. We think it's one of the most well-balanced and responsive shotguns we've ever designed. But don't take our word for it – get on down to your Remington dealer and pick one up for yourself. We think you'll call it "incomparable", "without equal"...Peerless™!

**REMINGTON
AUTOLOADERS.
THE AUTOMATIC CHOICE
SINCE 1948.**

These are the standard; the guns that "others" try to measure up to. But the facts are that since the introduction of the Model 11-48, Remington has sold millions – for the very best reason: *they get the job done*. More importantly, they work *for* the shooter; they feel good in the hands, because their balance and weight are in the right relationship to point swiftly and surely. It's safe to say that the Remington family of autoloaders has helped more shooters shoot better than any other "would be" copy. As they say, "if you want to do your best, start out with the best." You'll be in very good company.

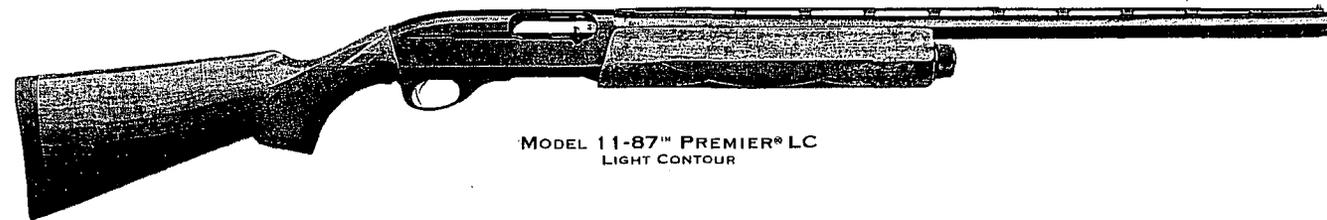

**MODEL 11-87™ PREMIER® LC
LIGHT CONTOUR**

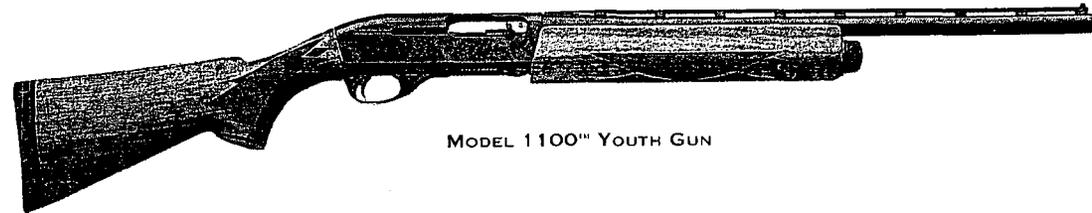

One of the most versatile firearms you can buy, the Model 11-87™ loads, shoots, and ejects everything from light 2 3/4" upland loads to heavy 3" magnums. And it's handsome too, with a beautiful stock of American walnut in satin or high-gloss finish. Choose from our new 26", 28", or 30" light contour Rem™ Choke barrels supplied with Imp. Cyl., Mod., and Full choke tubes. *Left-hand action available in 28" version. Premier® light contour version, come in our new two-barrel, custom-fitted hard case.*

MODEL 1100™ YOUTH GUN

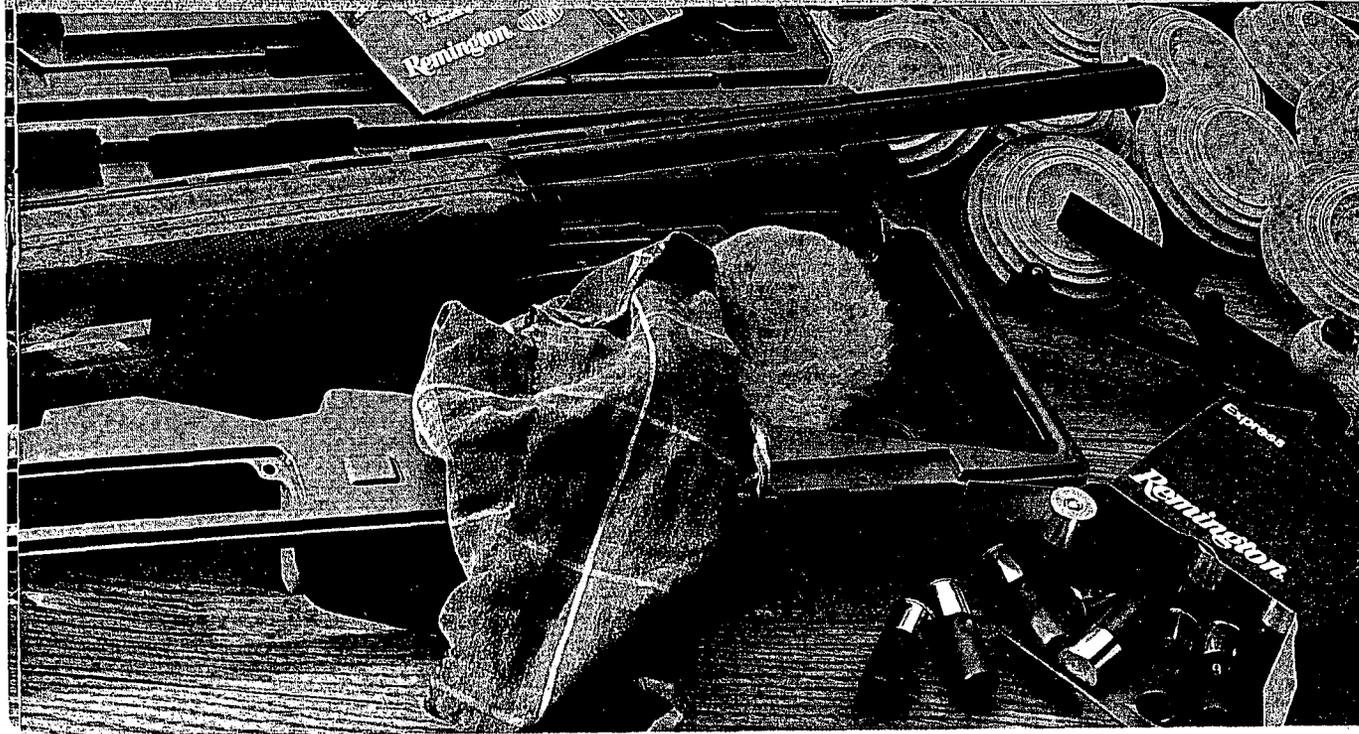

A 20-gauge autoloader designed specifically for small-framed shooters, with a 2 3/4" chamber and 21" barrel with Rem™ Chokes. The 13" length of pull makes it especially manageable for youngsters and ladies.

**MODEL 11-87™ PREMIER® LC
LIGHT CONTOUR**

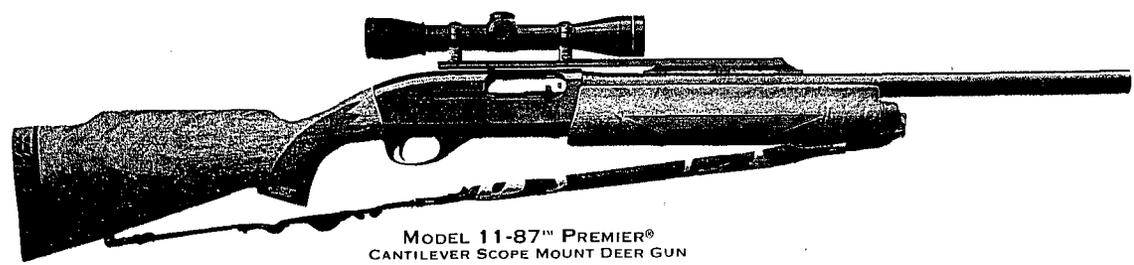

MODEL 1100™ YOUTH GUN

**NEW: TWO-BARREL,
TAKE-DOWN SHOTGUN HARD CASE**

◀ Now included when you buy certain models of our shotguns is a custom-formed, high-strength, two-barrel, fitted gun case. Inside, there's room for two barrels, six Rem™ Chokes, the magazine plug, choke wrench, and all sorts of accessories like Rem™ Oil, shooting glasses, etc. The outside of this Airline-approved case is made of a high-strength, lightweight, impact-resistant synthetic that will protect your gun during shipping. The case also incorporates a sturdy padlock lug for security. A great value, and it's free when you buy a Model 11-87™ Sporting Clays, Model 11-87™ Premier® LC, or 870™ Wingmaster® LC with new light contour barrel.

**MODEL 11-87™ PREMIER®
CANTILEVER SCOPE MOUNT
DEER GUN**

MODEL 11-87™ PREMIER®
CANTILEVER SCOPE MOUNT DEER GUN

The ease and versatility of Remington's Model 11-87™ Premier® autoloader with the sighting advantages of a Monte Carlo stock and barrel-mounted scope.° Now available is the option of a fully-rifled version with 1 in 35" twist for optimum slug stabilization. Barrels are 21" long, and the Rem™ Choked barrel comes with Rifled and Imp. Cyl. Rem™ Chokes for slugs or buckshot. Sling swivel studs and camo sling are included. *Note: 21" Model 11-87™ deer barrels are not pressure compensated. Not for use with target or light field loads.*

MODEL 1100™ SMALL GAUGE

MODEL 1100™ SMALL GAUGE

The proven standard for general hunting, it features a satin-finished American walnut stock, crisp cut checkering, and vent rib barrel. The 20-gauge comes with Imp. Cyl., Mod., and Full Rem™ Choke tubes and is available in 2 3/4" or 3" magnum versions. The 28-gauge and .410 bore are equipped with fixed chokes.

° Scope not included

**MANY WINGMASTERS
HAVE BEEN PASSED ON TO
A NEW GENERATION OF
OWNERS...TWICE.**

A gun doesn't become this sought-after without a lot of good reasons. Some Wingmaster® owners say it points well, it's easy to maintain, it looks good, or it's this or that. But one word always crops up: dependable. And if you want one thing in a shotgun, that has to be it. Wingmasters are so dependable, many of them are now being carried by a third generation of owners – proof enough of the mechanical durability and great design that has made these shotguns the wingshooter's favorite for over four decades. Sure, they probably have some blueing missing here and there, and maybe a few dents and dings in the wood, but when their owners reach for 'em, they're always ready to answer the call.

**MODEL 870™ WINGMASTER® LC
LIGHT CONTOUR**

The American walnut stock is furnished with satin or high-gloss finish, and new, light contour Rem™ Choke barrels in 26", 28" or 30" lengths. Handles 2 3/4" and 3" magnum shells interchangeably. Left-hand action available in 28" version. Supplied with Imp. Cyl., Mod., and Full choke tubes. *Light contour Wingmasters come in our new two-barrel, custom-fitted hard case.*

MODEL 870™ SPECIAL FIELD

You can point fast and shoot quick with this compact, lightweight gun designed for the special demands of upland hunting. Available in 12- and 20-gauge, featuring an English-style, straight grip stock, 21" barrel, slimmed and shortened fore-end, and Rem™ Choke tubes.

**MODEL 870™ WINGMASTER® LC
LIGHT CONTOUR**

MODEL 870™ SPECIAL FIELD

MODEL 870™ WINGMASTER®

◀ Whether you're watching for doves or waiting out ducks, there's no better choice than the legendary Model 870™ Wingmaster®. Everything about this pump gun is designed to make every shot count.

First of all, it feels good in your hands. The balance is right, and the stock dimensions let the gun shoulder smoothly. The target-type twin-bead sights quickly tell your eye that your head is down on the gun where it should be.

And after the first shot, the twin action bars allow you to cycle the fore-end swiftly and smoothly in any weather without twisting or binding. Our new light contour barrel lets you point fast and swing smoothly, and Rem™ Chokes deliver the pattern performance you need for the shooting conditions.

Great strength, pure simplicity, and absolute dependability – qualities that for over 40 years have made the Wingmaster™ America's most popular shotgun.

MODEL 870™ WINGMASTER®
CANTILEVER SCOPE MOUNT DEER GUN

MODEL 870™ BRUSHMASTER®
DEER GUN

MODEL 870™ WINGMASTER® CANTILEVER SCOPE MOUNT* DEER GUN

If you're a Model 870™ shooter, you'll appreciate the option of your favorite pump set up with the sighting advantages of a Monte Carlo stock and barrel-mounted scope.* Now available is the option of a fully-rifled version with 1 in 35" twist for optimum slug stabilization. Barrels are 20" long, and the Rem™ Choked barrel comes with Rilled and Imp. Cyl. Rem™ Chokes for slugs or buckshot. Sling swivel studs and camo sling are included.

MODEL 870™ BRUSHMASTER® DEER GUN

A 10-pointer will only give you one chance, so don't take a chance on your gun. With its 20" Rem™ Choke barrel and rifle sights, you can point and shoot faster than a buck can bolt. Available for right and left-hand shooters.

* Scope not included

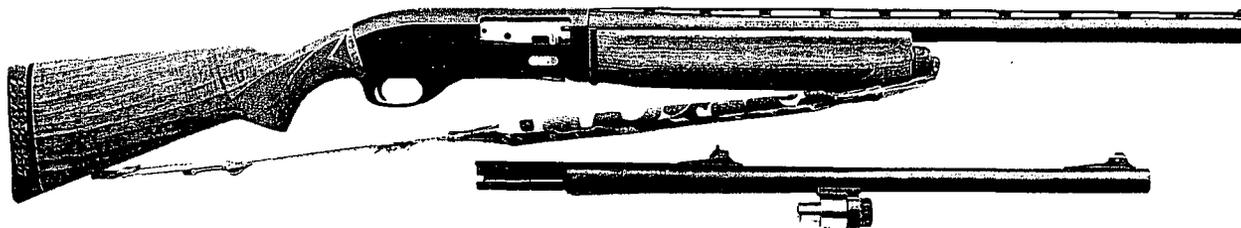

WHEN YOU HAVE TO WORK HARDER FOR THE GAME.

Remington's Special Purpose shotguns are for the hunter that has to work a little harder for his gobbler, buck, or limit of waterfowl. With features like synthetic stocks and the most comprehensive line of camo finishes in the business – a must when you're matching wits with an old Tom, a nervous buck, or a flight of gun-shy Canadas. And every Remington SP gun comes with sling swivel studs and a rugged Cordura® camo sling.

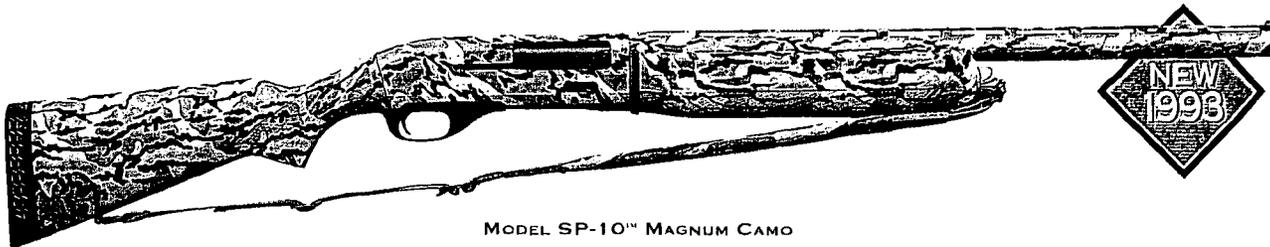

For 1993, we've expanded our SPS gun line-up to give you a wide variety of action types, lengths, sights, chokes and camouflage patterns to choose from, including a new SPS - BG (Big Game) Camo version with rifle sights. We've even added a camo version of the Model SP-10™ in Mossy Oak® Bottomland™ with a 23" vent rib Rem™ Choke barrel. And our black matte SPS guns are now offered with a 21", fully-rifled, rifle-sighted deer barrel – the perfect set-up for our new Premier® Copper-solid™ sabot slugs. For turkey hunters, we're supplying the SPS - T (Special Purpose Synthetic – Turkey) and rifle-sighted SPS guns with our new, high-constriction (.665"), Turkey Super Full Rem™ Choke that features a knurled extension for easy installation and removal.

MODEL 11-87™ & MODEL 870™ SPS – CAMO FINISHES

The chart at the right shows our Special Purpose Synthetic Camo guns with eight configurations to choose from, including vent rib wingshooting barrels, rifle-sighted deer and turkey barrels, and compact vent rib turkey barrels.

MODEL 11-87™ SPECIAL PURPOSE

MODEL 870™ SPS-DEER

MODEL 1187™ SPS

MODEL 11-87™/MODEL 870™ SPECIAL PURPOSE SYNTHETIC – ALL BLACK MATTE FINISH

Model/Type	Gauge	Barrel Type/Length	Rem™ Choke(s) Supplied	Finish
11-87™/870™ SPS	12	Vent rib/26" or 28"	I.C., Mod., & Full	All black matte
11-87™/870™ SPS – Deer	12	Rifle-sighted/21" 11-87™, 20" 870™	Fully-Rifled barrel, no choke tube	All black matte
11-87™/870™ SPS – T	12	Vent rib/21"	I.C., & Turkey Super Full	All black matte

Note: 21" Model 11-87™ turkey and deer barrels are not pressure compensated. Not for use with target or light field loads.

MODEL 870™ MARINE MAGNUM™

The key to the Marine Magnum's durability and corrosion-resistance is the electroless nickel plating used on the entire gun, including the inside of the barrel and receiver. The synthetic stock and fore-end are impervious to moisture, and generous checkering assures positive control, even in wet conditions. Comes with seven-round magazine, sling swivel studs, and 18" Cyl. barrel with single bead front sight.

MODEL 11-87™ SP – WALNUT STOCK & FORE-END WITH BLACK MATTE METAL FINISH

All the concealment advantages of our SP line for those who prefer the classic look and feel of a genuine American walnut stock and fore-end with cut checkering. Available with your choice of 26" or 28" vent rib barrels, with twin-bead sights and Imp. Cyl., Mod., and Full Rem™ Choke tubes. The Model 11-87™ SP can also be purchased with rifle-sighted or cantilever scope mount deer barrels with Imp. Cyl. and Rifled Rem™ Choke tubes.

MODEL SP-10™ MAGNUM (PG. 10)

The Model SP-10™ Magnum – a gobbler's worst nightmare – and a turkey hunter's best friend. The world's only gas-operated autoloading 10-gauge delivers up to 34% more pellets in the target area than a standard 12-gauge. Yet the SP-10™ softens and spreads out perceived recoil to less than many 12-gauge Magnums. Available with 26" or 30" vent rib barrel in standard matte finish, or in a 26" vent rib / 22" rifle-sighted deer barrel combo set. New for 1993 is a lightning-quick 23" vent rib barrel version with Mossy Oak® Bottomland™ camo finish. All Model SP-10™ barrels are fitted with Rem™ Choke tubes.

MODEL 11-87™ & MODEL 870™ SPS – BLACK MATTE FINISH

At left is the line-up of our black matte Special Purpose Synthetic guns with eight configurations to choose from, including vent rib wingshooting barrels, rifle-sighted fully-rifled deer barrels, and compact vent rib turkey barrels.

**REMINGTON TARGET GUNS.
TOTAL CONFIDENCE
AVAILABLE IN PUMP, BREAK
ACTION, AUTO, AND LEFT-
& RIGHT-HAND VERSIONS.**

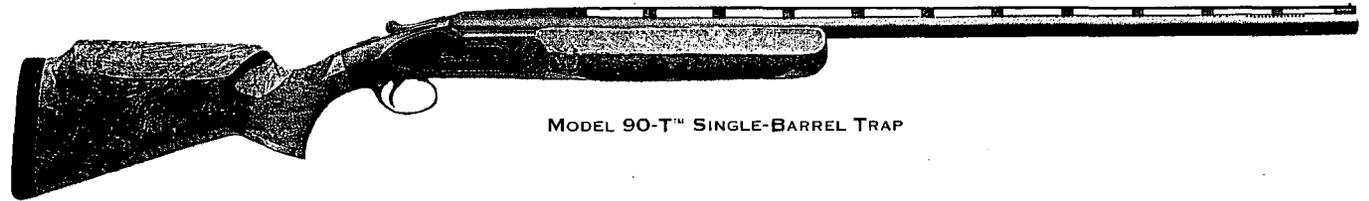

There are a lot of reasons to use a Remington in competition, and here are just a few: *Great balance* – it's between your hands where you want it in the Skeet and Sporting Clays guns, and a little forward in the Trap guns. *Low recoil* – a Remington target gun won't beat you up. The great balance and ergonomic design make these the softest-shooting family of target guns on the market today. *Value* – you won't find a competition Trap, Skeet, or Sporting Clays gun of the same level of quality and performance priced as comfortably as a Remington.

**MODEL 90-T™ SINGLE-BARREL
TRAP GUN**

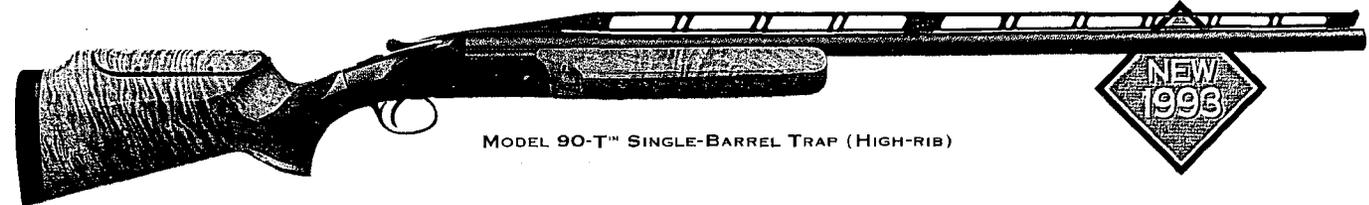

Designed for the dedicated 16-yard and handicap shooter, the Model 90-T™ is the strongest, and most reliable single-barrel trap gun on the market today. Perceived recoil is the lowest of any break action gun due to its unique distribution of mass. Satin-finished American walnut stock and crisp, deep-cut checkering is standard. The short-throw, top-lever release actuates an internal, full-width horizontal bolt. The 32" or optional 34" vent rib barrel is overbored at the factory and has an elongated forcing cone. Choke is fixed full. New for 1993 is an adjustable high-rib version of the Model 90-T™ for shooters who prefer a more open target picture and higher head position.

MODEL 870™ TC TRAP

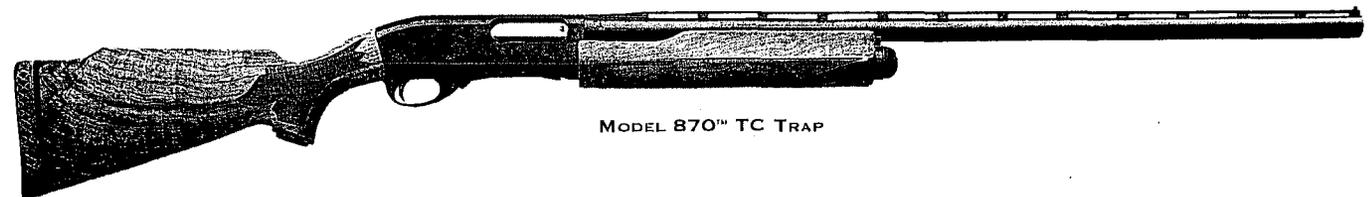

The trap gun for those who prefer the traditional look and feel of a pump action target gun. With straight comb or Monte Carlo stock, tournament-grade cut checkering, satin wood finish, 2 3/4" chamber, and 30" vent rib overbored barrel with special Trap Rem™ Choke tubes.

MODEL 90-T™ SINGLE-BARREL TRAP

MODEL 90-T™ SINGLE-BARREL TRAP (HIGH-RIB)

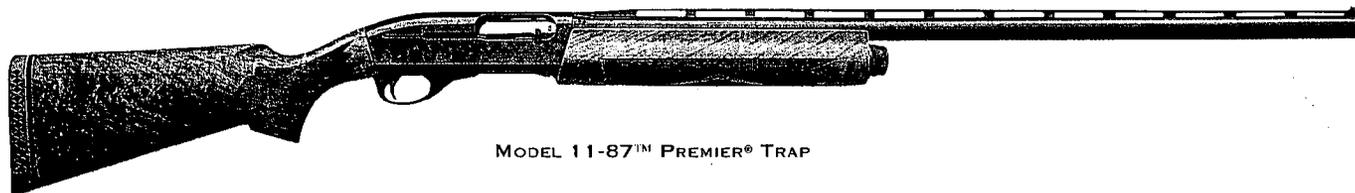

MODEL 870™ TC TRAP

**MODEL 11-87™ PREMIER®
SPORTING CLAYS**

◀ This Model 11-87™ features a target-grade, cut checkered, American walnut stock set up for Sporting Clays that's 3/16" longer in length of pull and 1/4" higher at the heel. The butt pad is radiused at the heel and rounded at the toe for smooth mounting. The receiver top, barrel, and rib have a fine matte finish on the bluing. The new light contour barrel has a lengthened forcing cone, and carries a medium-high, 8mm wide rib with stainless mid-bead and Bradley-style front bead sight. Skeet, Imp. Skeet, Imp. Cyl., Mod., and Full Rem™ Choke tubes are supplied. Each tube is knurled at the end, and clearly marked on the outside. Comes in our new two-barrel, custom-fitted hard case.

Note: Like other Model 11-87™ target guns, the Model 11-87™ Premier® Sporting Clays has a 2 5/4" chamber, is not pressure compensated, and is set up to handle target and light field loads only.

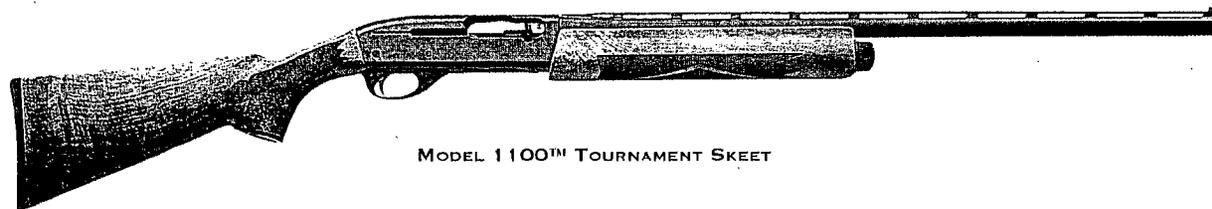

MODEL 11-87™ PREMIER® TRAP

MODEL 11-87™ PREMIER® TRAP

The autoloader of choice for trap shooters, prized for its reliability and smooth, low-recoiling performance. The softest-shooting trap gun on the market today. In right- and left-hand models, with straight comb or Monte Carlo stock, 2 3/4" chamber, 30" vent rib overbored barrel, satin wood finish, and special Trap Rem™ Choke tubes.

Note: Model 11-87™ Premier® target guns have 2 5/4" chambers, are not pressure compensated, and are set up to handle target loads only.

MODEL 1100™ TOURNAMENT SKEET

**MODEL 1100™
TOURNAMENT SKEET**

The strength and versatility of Remington's popular Model 1100™ autoloader, set up for the non-stop demands of competitive small-gauge skeet. Satin walnut stock and fore-end, cut checkering, 2 3/4" chamber (2 1/2" in .410 bore), and twin-bead target-sighted vent rib barrel. In 20-gauge, 28-gauge, and .410 bore.

**EXPRESS™ SHOTGUNS.
GREAT PERFORMANCE AT
A GREAT PRICE.**

The Model 870™ Express™ has all the important design and mechanical qualities of its Wingmaster® brother, but with features that allow us to offer it at a very easy-to-swing price. No company offers as much quality in American-made shotguns as Remington. And no American-made shotgun offers as much performance as the Express™.

The Express™ family includes a line-up of barrel configurations and gauges that is hard to beat, from vent rib wingshooters, to turkey guns and deer set-ups, and even small gauge, youth, and security models. So if you want to shoot a genuine Model 870™, but with no frills, you want to shoot a Model 870™ Express™.

**MODEL 870™ EXPRESS™ COMBO
(12- & 20- GA.)**

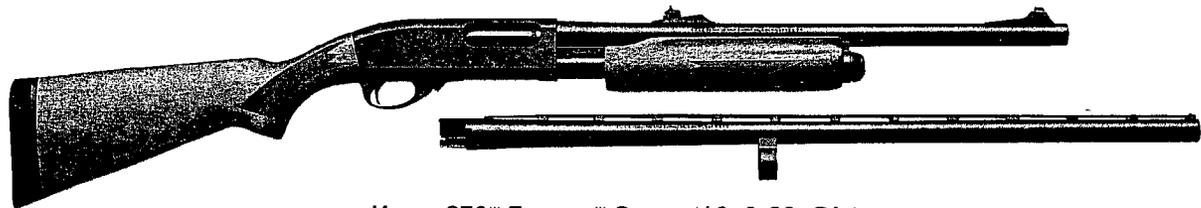

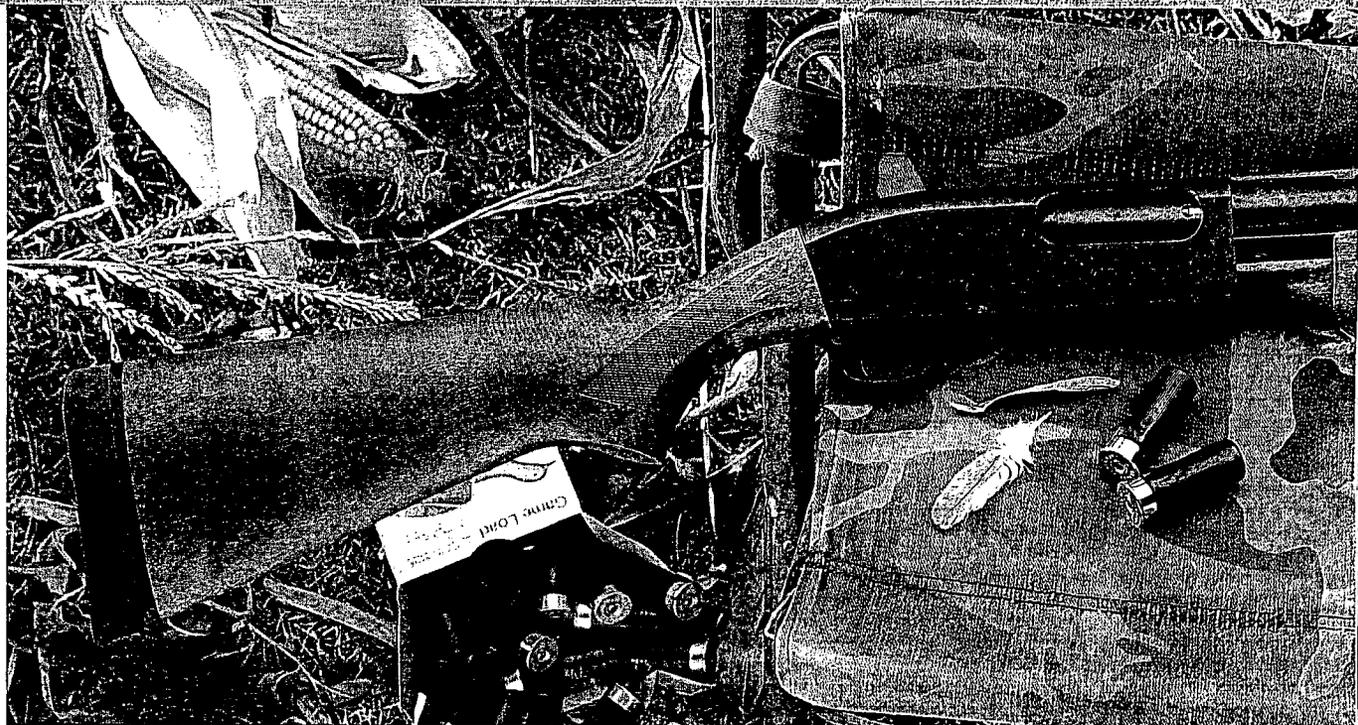

The Model 870™ Express™ Combo packages are designed for shotgunners with a taste for venison. Includes a 20" rifle-sighted, Imp. Cyl. deer barrel in addition to a 28" vent rib barrel and Mod. Rem™ Choke tube.

MODEL 870™ EXPRESS™ TURKEY

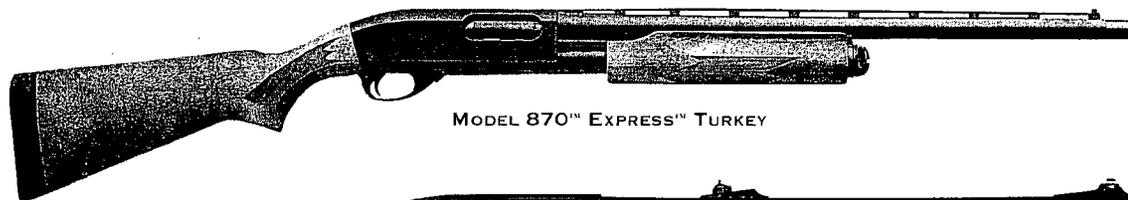

The positive feel of Remington's legendary pump action with the concealment advantages of our Express™ line. In 12-gauge, with 21" vent rib turkey barrel and Extra-Full Rem™ Choke Turkey tube.

MODEL 870™ EXPRESS™ DEER GUN

The pump action deer gun for hunters who prefer open sights. Features a 20" fully-rifled barrel, quick-reading iron sights, and Monte Carlo stock. Also available with rifle-sighted, 20" Imp. Cyl. barrel.

MODEL 870™ EXPRESS™ COMBO (12- & 20- GA.)

MODEL 870™ EXPRESS™ TURKEY

MODEL 870™ EXPRESS™ DEER GUN

MODEL 870™ EXPRESS™

◀ We're darn proud of our Express™ family of shotguns because we know we're bringing shot-gunners the very best value money can buy in an all-American pump gun: solid steel receiver for strength; 3" chambers; Wingmaster® fire control and cross bolt safety; twin action bars for smooth; non-binding cycling; vent rib, turkey, and deer barrel choices; solid rubber butt pad; small gauge versions; and a youth gun for beginners and small-framed shooters.

With all these features – Wingmaster® guts, a wide variety of configurations and great price, it's no wonder that Express™ is the most popular American-made shotgun on the market today.

Note: All 12- and 20-ga. Express™ shotguns are chambered for 2 5/4" and 5" shells. The .410 bore Express™ is chambered for 2 1/2" and 5" shells.

MODEL 870™ EXPRESS™ SMALL GAUGE

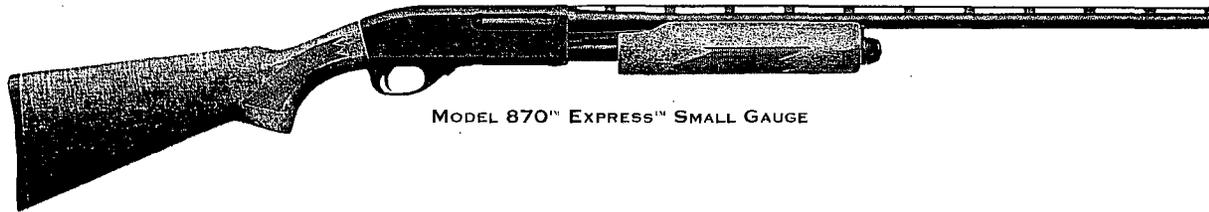

The ideal gun for shooters who want the light weight and maneuverability of a .410 or 20-gauge, with the concealment advantages of the non-reflective metal and wood finish of our Express™ line. The .410 comes with a 25" Full choke barrel, and the 20-gauge is available with a 26" or 28" Rem Choke barrel with Mod. Rem™ Choke tube.

MODEL 870™ EXPRESS™ YOUTH GUN

The lightest and smallest Model 870™ Express™, in 20-gauge with a 13" length of pull and 21" vent rib barrel. It features a handsome hardwood stock with low-luster finish, and comes with Mod. Rem™ Choke tube.

MODEL 870™ EXPRESS™ SECURITY

The ideal choice for home defense. With 18 1/2" Cylinder choke barrel and front bead sight.
Note: the Model 870™ Express™ Security is intended for personal protection, and will not accept law enforcement accessories.

MODEL 870™ EXPRESS™ SMALL GAUGE

MODEL 870™ EXPRESS™ YOUTH GUN

MODEL 870™ EXPRESS™ SECURITY

REM™ CHOKE TUBES

With the wide variety of Rem™ Choke tubes available for your Remington shotgun, you can refine the pattern performance of your gun as never before, and greatly increase its flexibility. If you're in your favorite blind, and for some reason the mallards aren't decoying like they usually do, you can switch to a tighter choke and take 'em as they pass. Or if the wind is making the Pheasants hold until you are right on top of them, you can put in a Imp. Cyl. tube so you can compensate for the shorter distance.

New for 1993 is a Turkey Super Full Rem™ Choke that brings new meaning to the phrase "right pattern." We also have five new Sporting Clays tubes designed for use on any Rem™ Choke barrel (except trap barrels).

TURKEY SUPER FULL CHOKE★

.665" (12-ga. only)

If a big tom has strutted up to the plate, and you want to throw him a strike, make sure you have our new Turkey Super Full Rem™ Choke screwed into your barrel. We've cranked the constriction down to .665", and that will throw 85%+ patterns at 40 yards with high quality turkey ammo like our Premier® Magnum Turkey loads. The front of the Turkey Super Full tube extends out beyond the end of the barrel by about an inch, and that portion has been knurled for a good grip and easy removal. *Note: This tube must never be used with steel shot.*

TURKEY EXTRA FULL CHOKE

.687" (12 ga.)

An extremely tight pattern used when you need maximum pellet concentration at long range. The right choice for stopping turkeys right in their tracks. *Note: This tube must never be used with steel shot.* Will deliver 80% patterns in a 30" circle at 40 yds.

★ NEW FOR 1993

FULL CHOKE

A long-range choke delivering tight, well-placed shot patterns when shooting between 45-55 yards. An excellent choice for high-flying ducks/geese, and long-range pheasant. Puts 65-75% of the pellets in a 30" circle at 40 yds., with the 10-ga. pattern being the tightest, and the 20-ga. pattern a little more open. Produces slightly tighter patterns when used with steel shot.

MODIFIED CHOKE

The most versatile Rem™ Choke, delivering a wider shot pattern for shooting at 25-45 yards. Great for shooting squirrels, rabbits, pigeons, doves, partridge, grouse, pheasant or wild flushing quail at medium range. It's also the right selection for pass shooting ducks and geese with steel shot. Will throw 55-60% patterns in a 30" circle at 40 yds.

IMPROVED CYLINDER CHOKE

A short-range choke delivering wider shot patterns for game within a 35-yard range. A fine selection for rabbit, quail, woodcock, and pheasant over dogs. With steel shot, it is a good choice for ducks and geese that are coming into decoys. Produces 45-50% patterns in a 30" circle at 40 yds.

RIFLED CHOKE TUBE

The big game choke tube to improve accuracy and shot placement. Helps stabilize Foster-type and sabot slugs as they exit the muzzle.

SKEET

The normal choke tube for skeet, producing 60% patterns in a 30" circle at 25 yds.

IMPROVED SKEET

A slightly tighter choke for skeet, throwing a 65% pattern in a 30" circle at 25 yds. A good choice for doubles or windy conditions.

FULL TRAP¹

The standard 16 yd. trap choke producing 65% patterns in a 30" circle at 40 yds.

EXTRA FULL TRAP¹

A good choke for the longer reach needed in the 20-24 yd. range, with consistent 70% patterns in a 30" circle at 40 yds.

SUPER FULL TRAP¹

Our tightest trap constriction for extremely tight patterns. Produces a 75% pattern in a 30" circle at 40 yds. A big help when you make it to the back fence.

For a detailed guide to the selection of choke tubes and the use of steel shot, pick up a copy of our brochure "Remington Steel" from your local Remington dealer, or write to: Steel Shot Brochure, B-6306, Remington Arms Co., Wilmington, DE 19898.

Note: Constrictions shown are nominal.
¹ Specially designed for use in Remington overbored trap barrels only. Will not produce satisfactory patterns in standard bore barrels.

GENUINE REMINGTON FACTORY EXTRA BARRELS

With a simple barrel change, you can use your Remington shotgun for anything from gobblers to grouse, and white-wings to whitetails. The same shotgun can be used for Skeet, Trap, Sporting Clays, small game, upland, waterfowl and deer. You can't ask for more flexibility than that. We offer the widest selection of genuine American-made factory accessory and replacement barrels in the business. All made right along side the ones that are shipped with our shotguns when they are new. If you want to get the best performance out of your Remington shotgun, always insist on original Remington equipment.

Pictured at left is a small sample of the extra barrels that are available to extend the flexibility of your Model SP-10™, 11-87™, 1100™ or 870™.

See page 86 for a full listing of all the extra barrels and accessories available through your Remington dealer.

VENT RIB FIELD BARRELS

We have extra vent rib field barrels available for our Model SP-10™, 11-87™, 870™, and 1100™ shotguns in lengths from 21" to 50", in blued and Special Purpose finishes, and in standard and new Light Contour profiles for Model 11-87™ and 870™. All current Remington field barrels are steel-shot compatible. There is also a wide selection of small-gauge extra barrels available for the Model 1100™ and 870™.

A GREAT VALUE FOR MODEL 1100™ OWNERS!

If you have a favorite Model 1100™ that you want to use with steel shot, we've got the answer: our Model 1100™ Steel Shot barrel. It's specially designed to function with today's lighter-recoiling steel loads, and will handle both 2 3/4" and 5" magnums interchangeably. *Note: This barrel should not be used with 5" lead magnums when fitted on a non-magnum Model 1100™, as this will cause extra wear and decrease the life of the gun.*

DEER BARRELS

There are 22 different specifications of extra deer barrels to choose from for the Model SP-10™, 11-87™, 1100™, and 870™ – giving you options like rifle-sighted barrels with fixed choke, rifled Rem™ Choke, or fully-rifled configurations in blued and special purpose finishes; and fully-rifled or Rem™ Choke cantilever scope mount deer barrels with blued or special purpose finish.

TARGET BARRELS

We offer 12 specifications of Skeet and Trap barrels, including 20-, 28-, and .410-bore Skeet barrels for Model 1100™ and 870™ small-gauge guns.

LEFT-HAND EXTRA BARRELS

There are 12 left-hand extra barrels in our line up in Light Contour, Deer, and Skeet and Trap specifications. For Model 11-87™, 870™, and 1100™.

SHORT BARRELS: 21"– 26"

In general, short barrels are used in heavy cover where easy handling and a fast, smooth swing are important. Usually an open choke such as Improved Cylinder is used for small game, and a rifled Rem™ Choke tube for use with rifled slugs.

MEDIUM BARREL: 28"

Most often chosen for small game hunting in open fields where game may flush at farther distances, and a longer sighting plane is an advantage. This is the most popular shotgun barrel length because it provides more flexibility for general purpose hunting.

LONG BARREL: 30"

This length is usually used for pass shooting ducks and geese. It provides a longer sighting plane and is slightly heavier, which makes good follow-through easier on those hard-to-make shots.

FITTING STANDARD BARRELS ON LIGHT CONTOUR SHOTGUNS

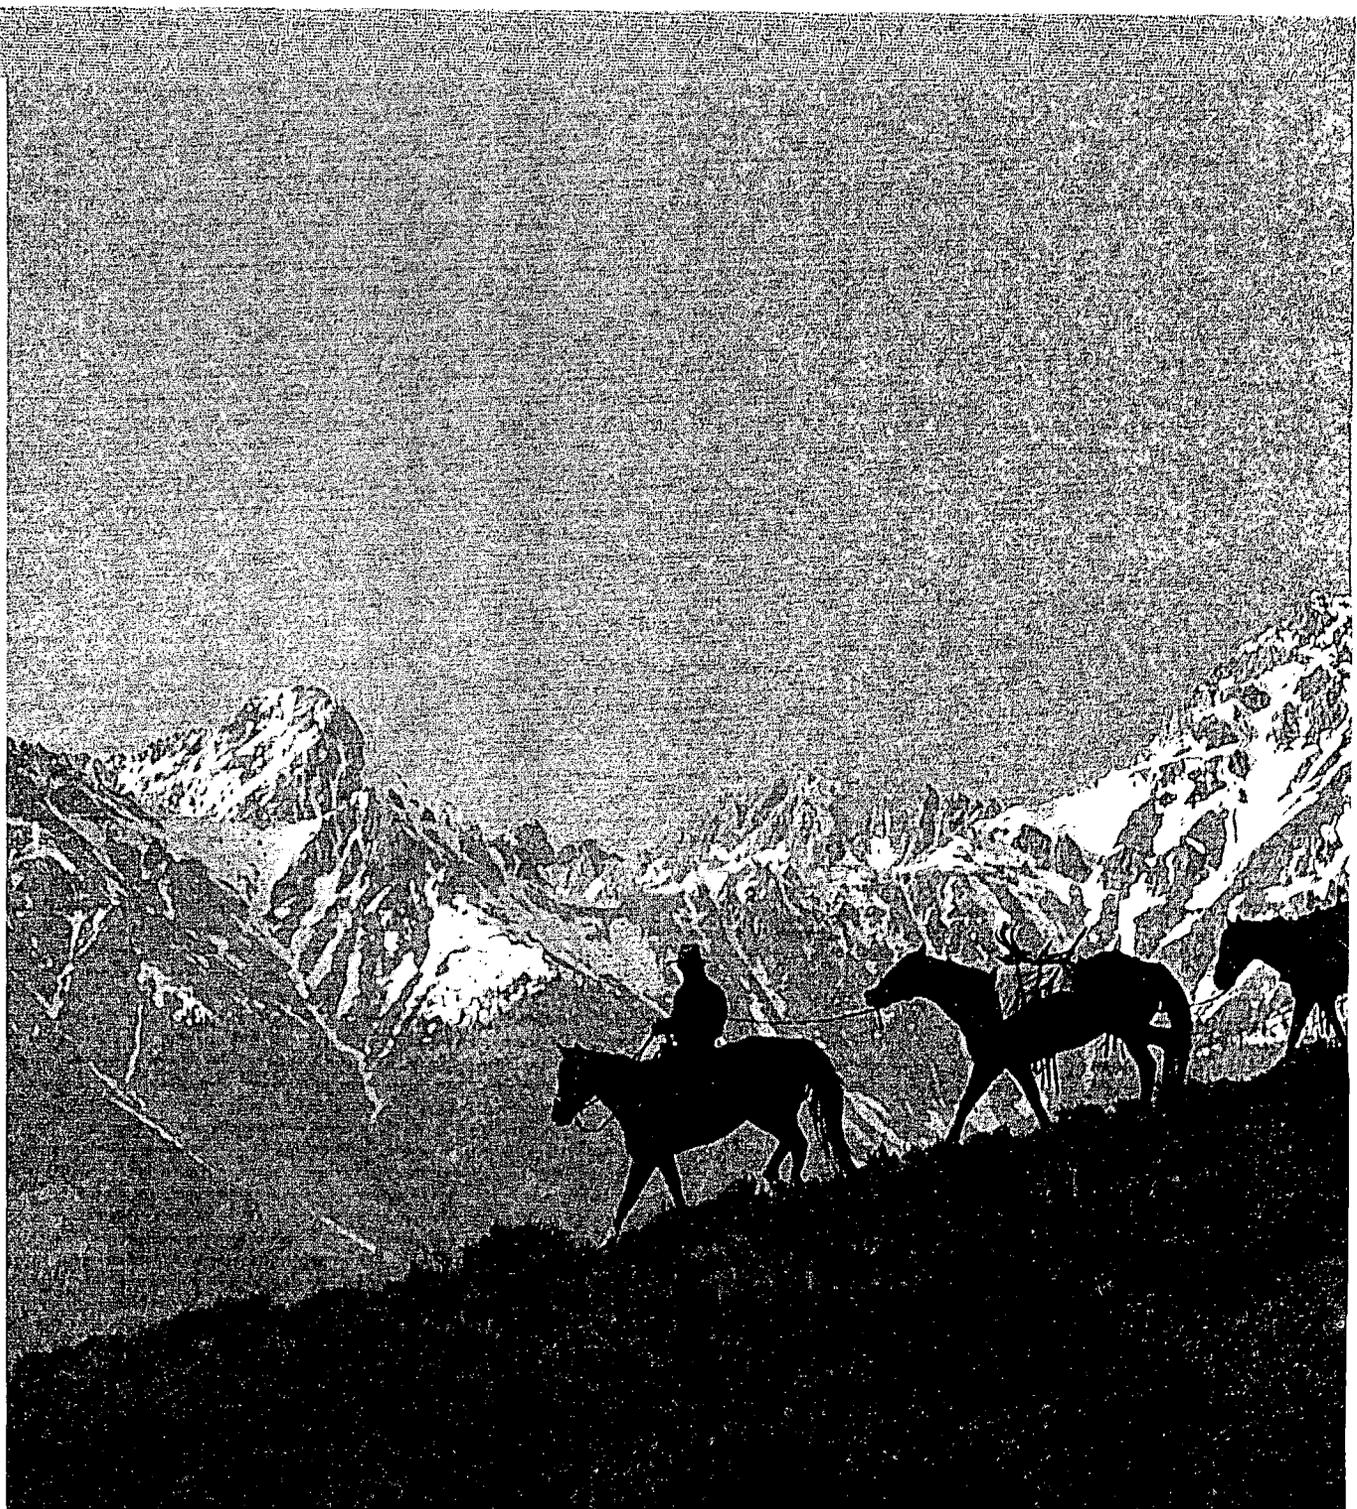

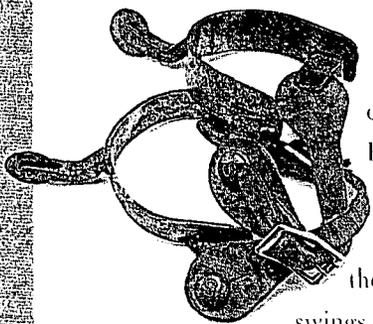

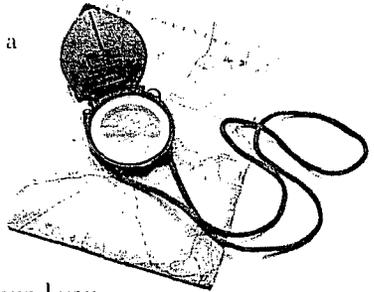

The fore-ends on our new Light Contour shotguns are shaped to follow the curve of the slimmer-profiled LC barrel, which means that a standard vent rib or deer barrel cannot be fitted to your gun unless you do one of two things: have your LC fore-end wood opened up by a competent gunsmith or stockmaker; or purchase a standard profile fore-end from our Arms Service Division by writing to: Arms Service Division, Remington Arms Co., 14 Hoeller Ave., Ilion, NY 13357

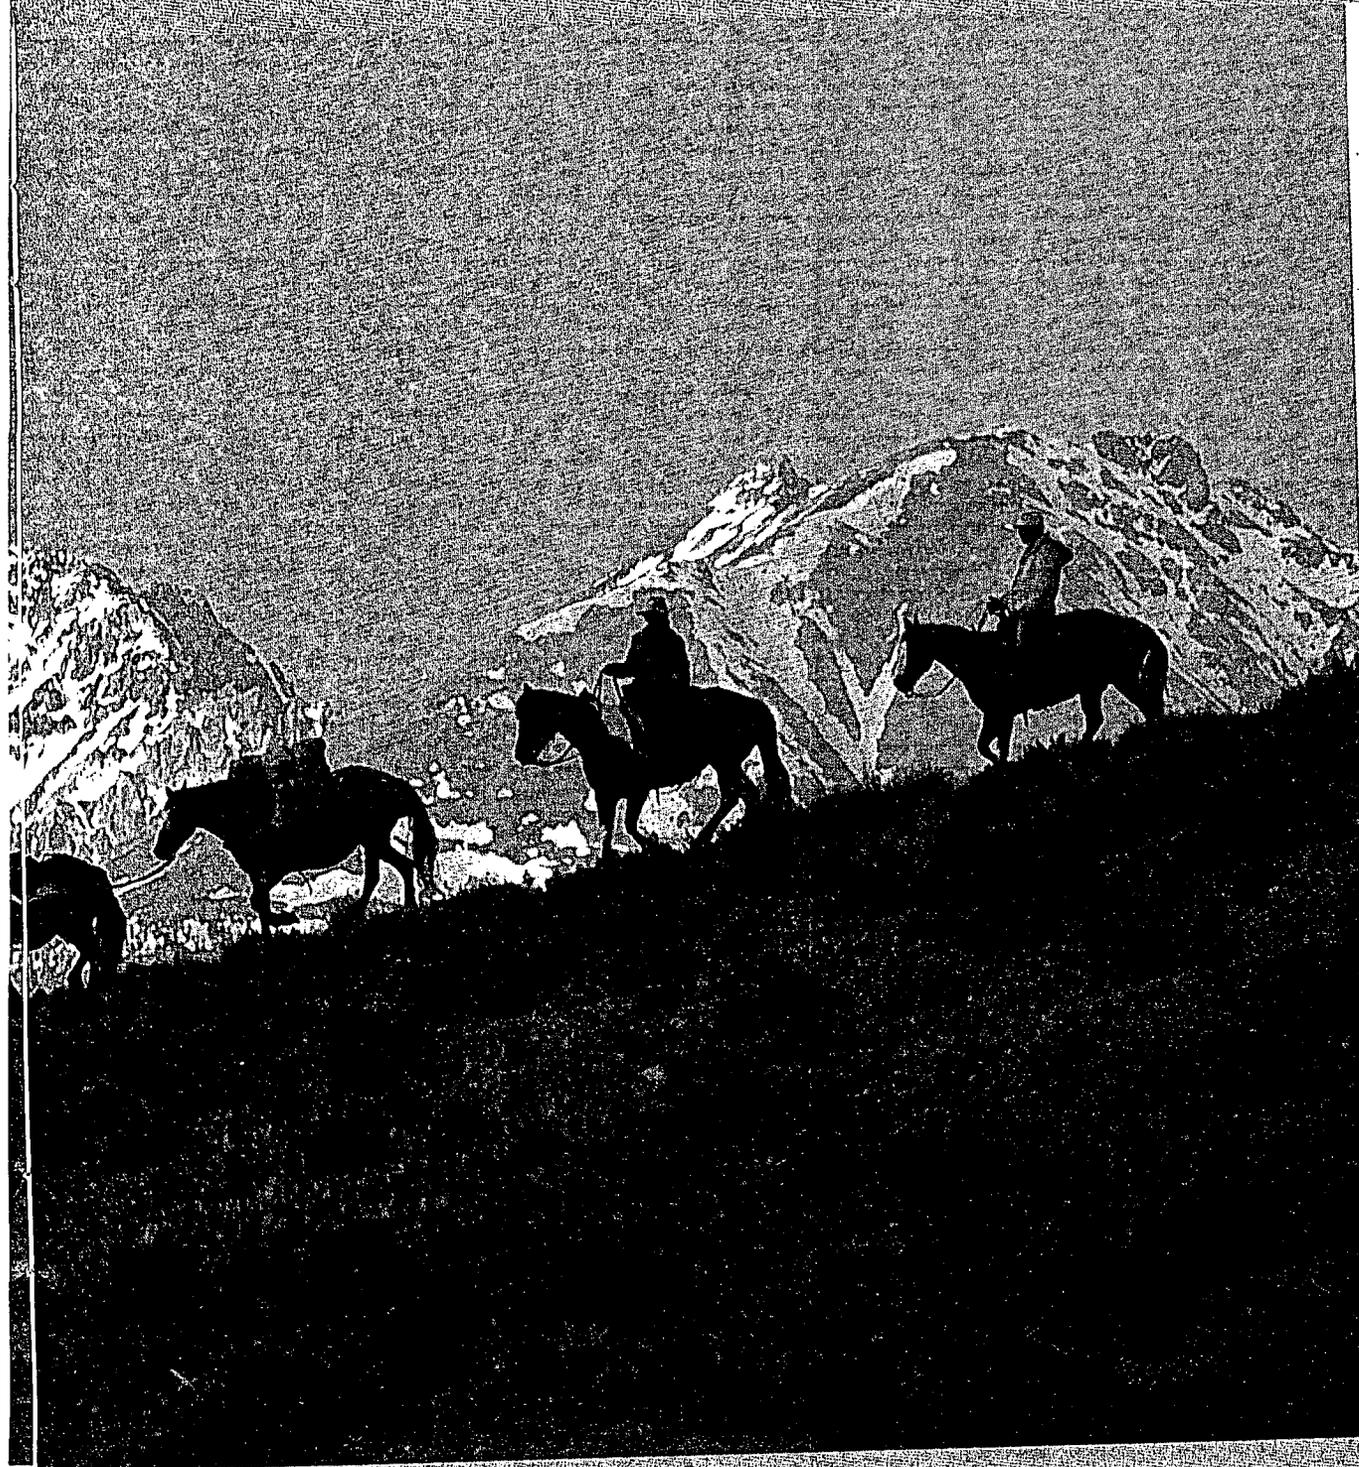

It's a good thing your horse is paying attention as it picks its way along the trail.

The rugged beauty of the mountains in British Columbia is a visual feast. And there are bald eagles everywhere – soaring around you,

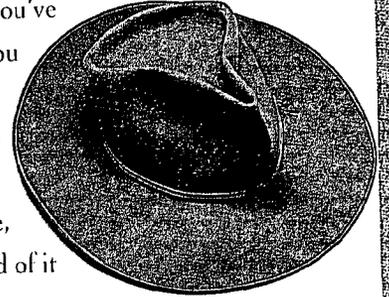

and working the river edges for salmon. Just about the time you get used to seeing them, a *really* large bird swoops down to the shallows. "What the hell is that?" you stammer. "A golden", the guide says softly in a way that speaks volumes about his respect for the big eagles. The horses too, have noticed the predator, and shift about uneasily, even

though it's on the other side of the Chilko River. "The bears will be coming down too," says the guide as he swings his horse back to the trail, "the salmon run drives 'em crazy."

You've traveled almost three-thousand miles, and now you are 8,000 ft. above sea level on a horse in the most spectacular country you've ever seen. You planned this hunt for two years, saved for it for five, and dreamed of it since you were ten.

That's why there's a Model 700™ in your scabbard. Because when it came down to selecting the gun to take along, the choice was pretty simple. For the better part of two centuries, we've been making rifles that are up to the challenge of any hunting done on this earth. And at a price and quality no other company can match.

So whether your hunting takes you to far-off places like the Kenai Peninsula, Anticosti Island, or the Sawtooth

Mountains, or even if it's only as far as the stand you've had for the last twenty years, bring your best. Bring along your Remington.

**THE MODEL 700™.
ACCURACY THAT COMES
FROM STRENGTH.**

For serious riflemen, the Model 700™ is the most popular centerfire action going. Why? When a 700™ locks up, the cartridge head is surrounded by three rings of ordnance-grade steel that align the cartridge perfectly with the bore. And that means accuracy – accuracy that comes from strength.

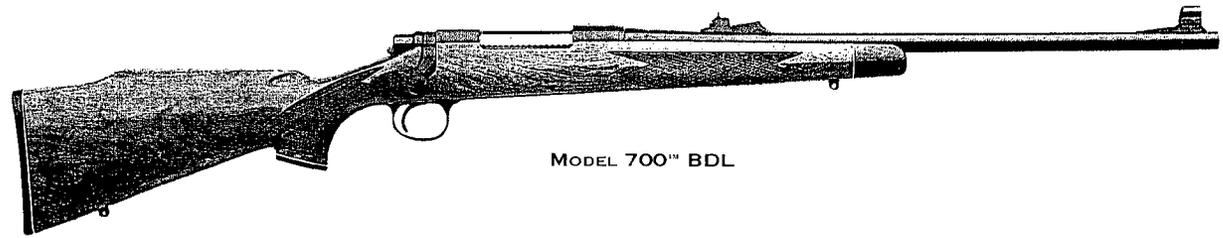

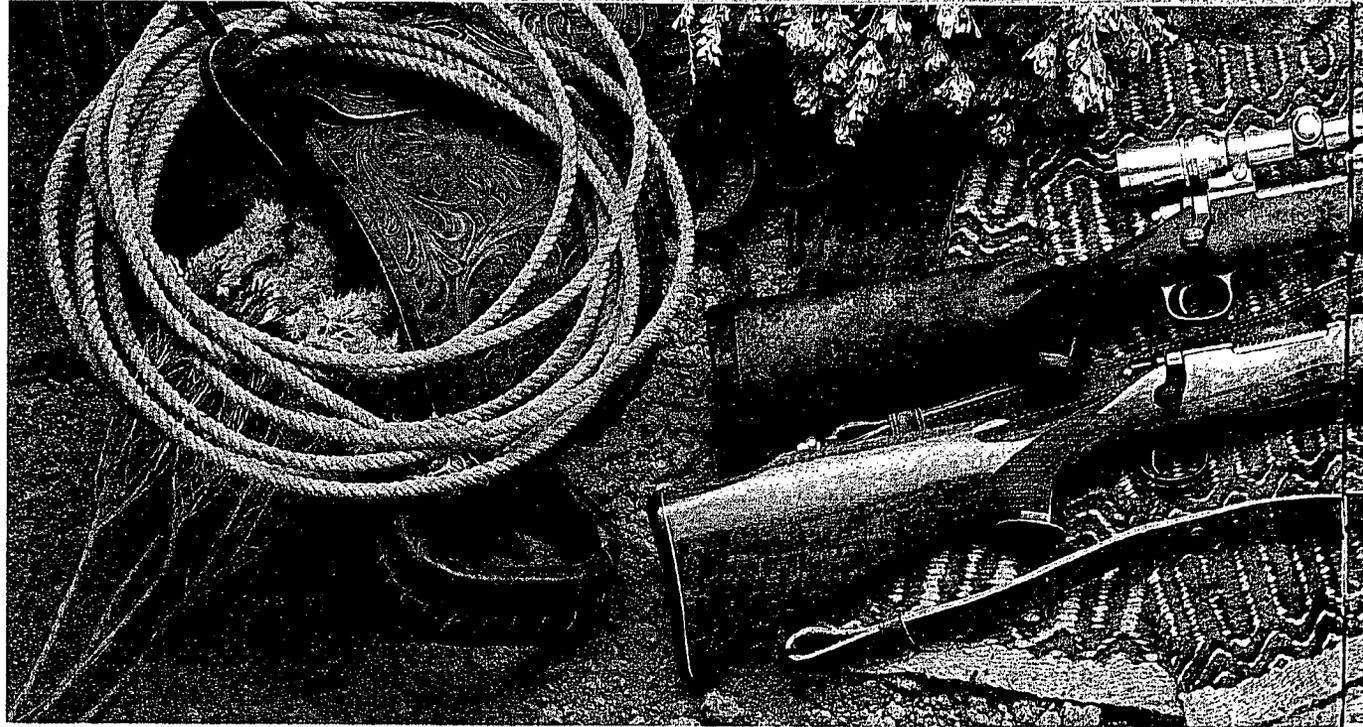

New for 1993: the Model 700™ BDL Stainless Synthetic in fourteen calibers; a European-styled BDL in seven calibers; a 220 Swift addition for the Model 700™ Varmint Synthetic; the Model 700™ Classic in 222 Remington; and for the Model Seven™, a chambering in 17 Remington, and a youth version with 1" shorter stock.

MODEL 700™ BDL

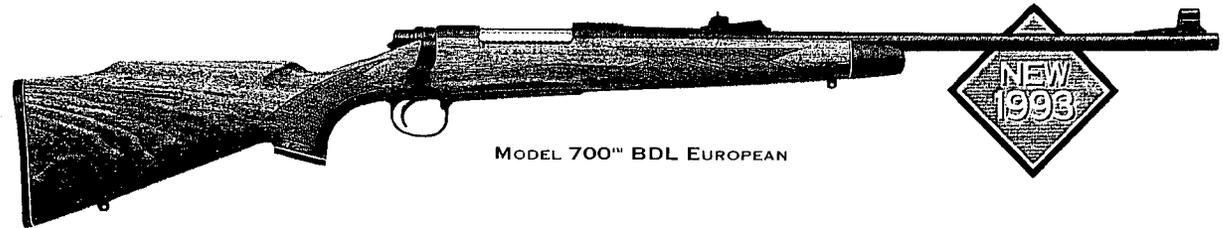

A classic beauty inside and out. The Model 700™ BDL features a Monte Carlo American walnut stock finished to a high gloss, and accented with finely cut skipline checkering for good looks and a sure grip. Also includes a hinged floorplate, sling swivel studs, hooded ramp front sight, and adjustable rear sight. Available in sixteen right-hand calibers and seven popular left-hand calibers. See page 26 for a complete listing of left-hand rifles and shotguns.

MODEL 700™ BDL EUROPEAN

We've brought the rich patina of a hand-rubbed oil finish favored by European riflemen to our Model 700™ BDL. The Monte Carlo comb and raised cheekpiece of its stock are complemented by finely-cut skipline checkering on the pistol grip and fore-end. Offered in seven calibers from the 243 Win. to the 7mm Remington Mag. With 22" barrel in standard calibers (24" in magnum calibers), hinged floorplate, sling swivel studs, hooded ramp front sight, and adjustable rear sight.

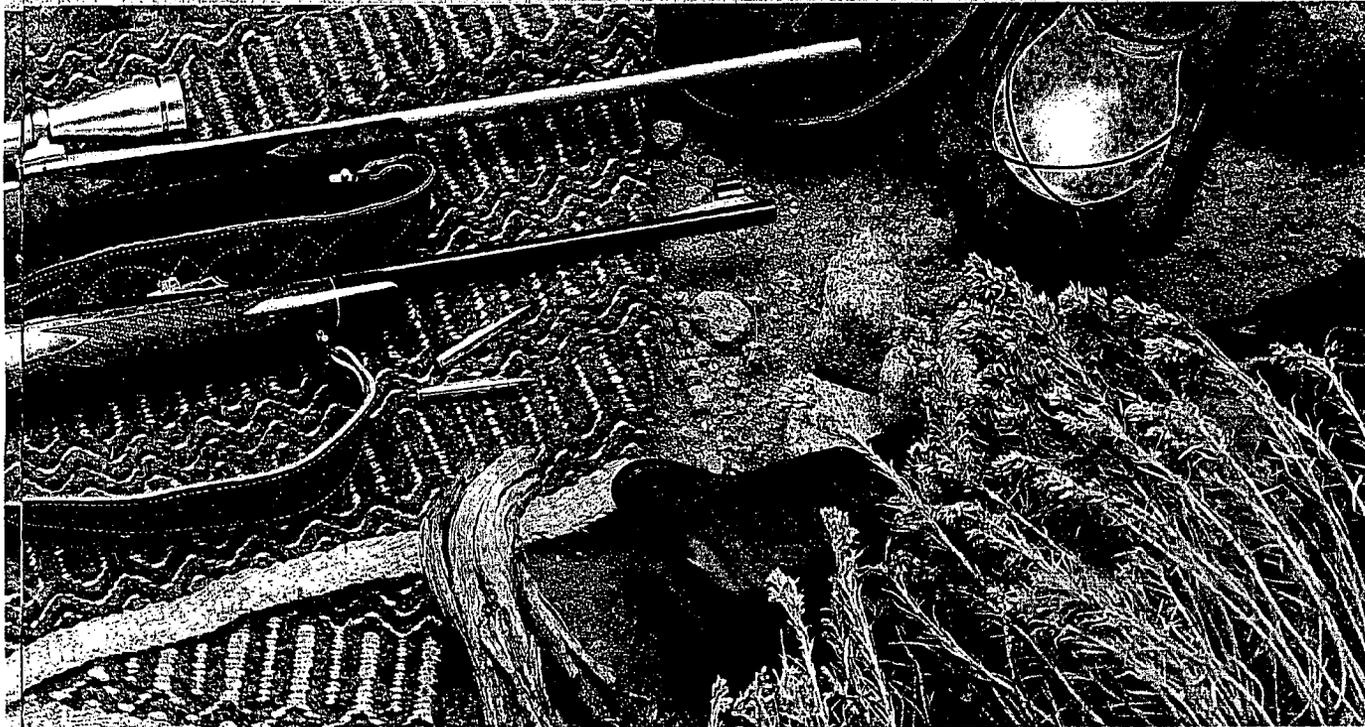

MODEL 700™ BDL

MODEL 700™ BDL EUROPEAN

**MODEL 700™ BDL
STAINLESS SYNTHETIC**

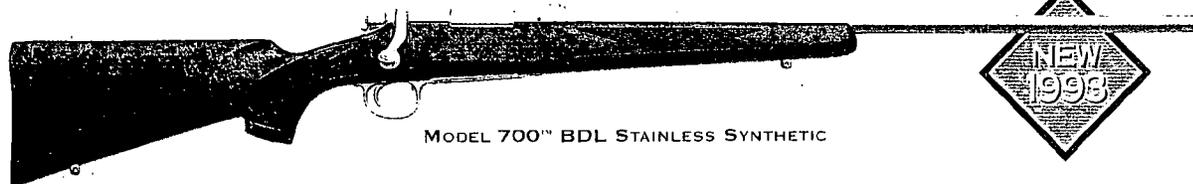

Our all-season Model 700™ BDL SS has a stainless steel barrel, receiver, and bolt for the ultimate in weather resistance and consistent accuracy. In fourteen of the greatest hunting calibers available today – from the 223 Remington to the 338 Win. Mag. Non-magnum calibers feature our standard BDL barrel contour, and magnum calibers have the heavier, magnum barrel contour. All barrels are 24" long. The synthetic stock features a trim profile, straight comb, raised cheekpiece, and hinged magazine floorplate. The metal work incorporates a fine matte finish that won't reflect light. The stock has a textured, black, non-reflective finish with positive checkering on the fore-end and pistol grip, and is furnished with sling swivel studs. *Note: Scope not included.*

**MODEL 700™ MOUNTAIN RIFLE
STAINLESS SYNTHETIC**

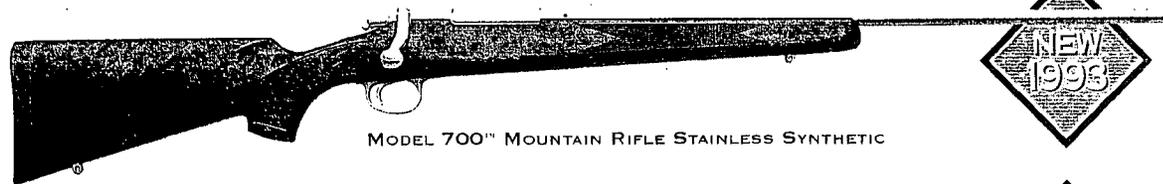

For those who want a rifle with the benefits of an all-stainless barrelled action in a more compact package, we have the Model 700™ Mountain Rifle SS. Offered in four classic long action hunting calibers: 25-06 Remington, 270 Win., 280 Remington, and 30-06 Spfld. The Mountain Rifle SS features a 22" barrel with a slimmed-down, lightweight mountain rifle profile and blind magazine. If you are going into the high country where weight and size come at a premium, and where the weather can change in the time it takes to saddle a horse, then this is the gun to take along.

**MODEL 700™
VARMINT SYNTHETIC**

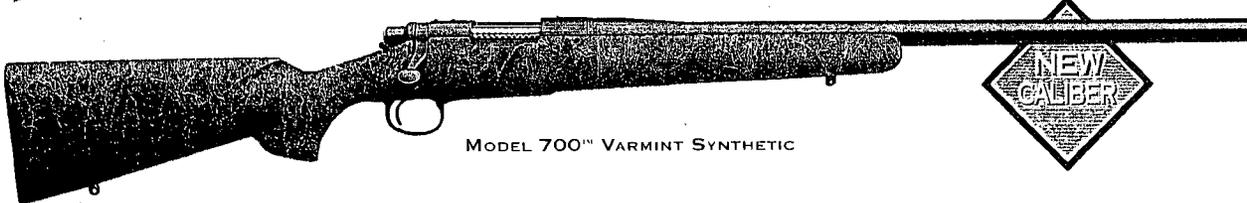

The stock of the Model 700™ VS is reinforced with DuPont Kevlar®, fiberglass and graphite, and stays dimensionally stable in any weather. The heavyweight barrel is completely free-floating. All metal work has a fine, black matte finish that minimizes light reflection. The barrel rests in a precisely machined aircraft-grade aluminum bedding block. The receiver is drilled and tapped for scope mounts. New for 1993 is a chambering in 220 Swift – one of the highest velocity production centerfire cartridges commercially available.

MODEL 700™ BDL STAINLESS SYNTHETIC

MODEL 700™ MOUNTAIN RIFLE STAINLESS SYNTHETIC

MODEL 700™ VARMINT SYNTHETIC

MODEL 700™ MOUNTAIN RIFLE

The lean barrel contour provides the accuracy and proven performance of the Model 700™ in a package that weighs only 6 3/4 lbs. The pistol grip is pitched lower to position the wrist for better grip. The smooth, trim cheekpiece positions the eye for accurate sighting. Also features a satin-finished American walnut stock, 20-line deep-cut checkering, hinged magazine floorplate, sling swivel studs, and trim butt pad.

MODEL 700™ CAMO SYNTHETIC

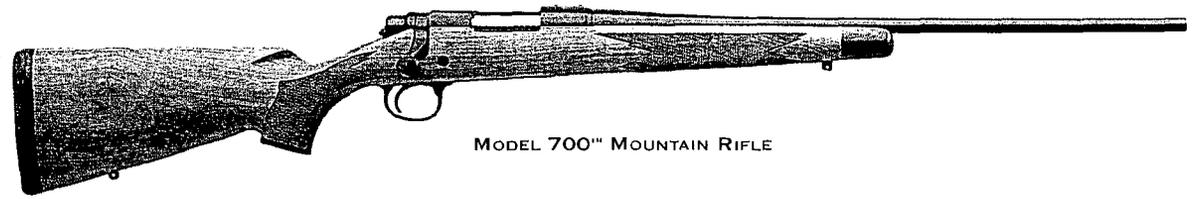

The tough Model 700™ action bedded to a virtually indestructible synthetic stock fully-camouflaged in Mossy Oak® Bottomland™. Stronger than wood and unaffected by weather, this stock will not warp or swell in rain, snow, or heat. It features a straight comb, with raised cheekpiece. The Model 700™ Camo Synthetic comes with a non-reflective matte finish on the bolt, and is available in nine popular calibers from the tack-driving 22-250 Remington to the venerable 300 Wby. Mag.

MODEL 700™ CLASSIC

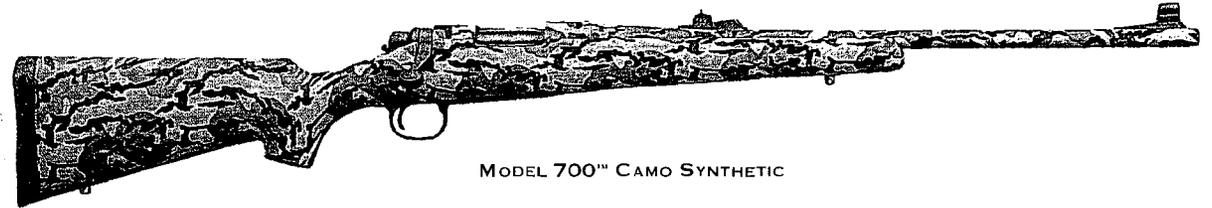

This year's Model 700™ Classic is chambered for the 222 Remington – one of the most accurate small-caliber centerfire cartridges commercially produced in the world. As a varmint cartridge, its mild recoil, extremely high velocity, flat trajectory, great reloadability, and high accuracy make it a continuing favorite. As always, the Model 700™ Classic rifle features a beautifully-profiled, straight-combed stock of satin-finished American walnut, with cut checkering, sling swivel studs, and hinged magazine floorplate.

MODEL 700™ VARMINT (WOOD)

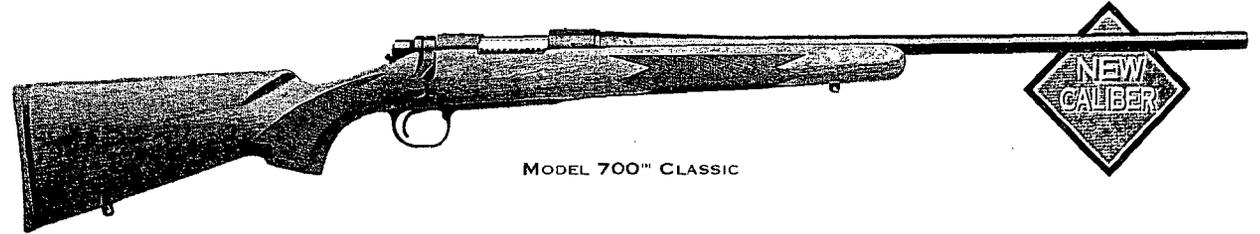

All the features and styling of our Model 700™ BDL (excluding sights), but designed for the dedicated varmint hunter. Its heavy, hammer-forged barrel reduces vibration to provide the stability and accuracy needed for long-range shooting. Available in seven popular flat-shooting calibers.

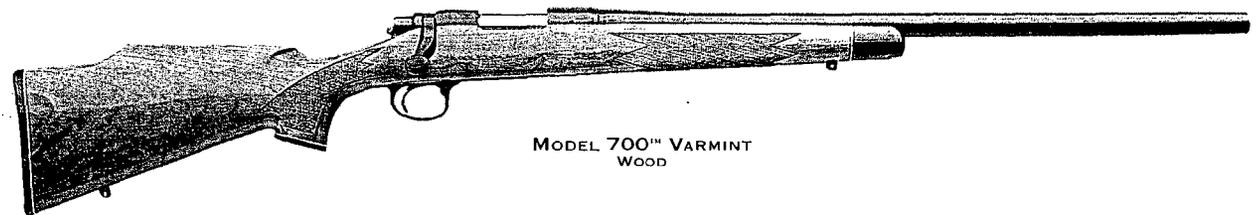

MODEL 700™ MOUNTAIN RIFLE

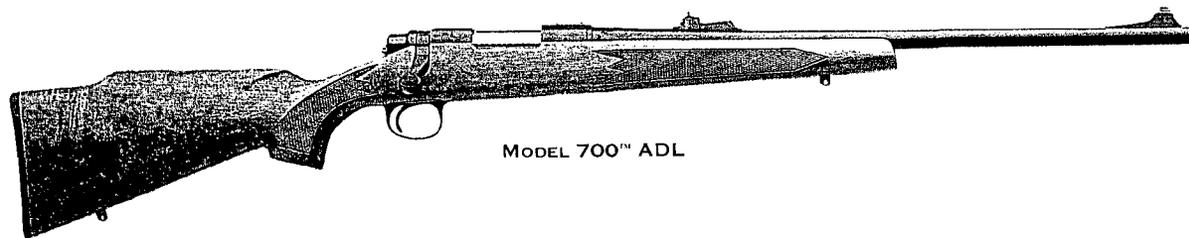

MODEL 700™ CAMO SYNTHETIC

MODEL 700™ CLASSIC

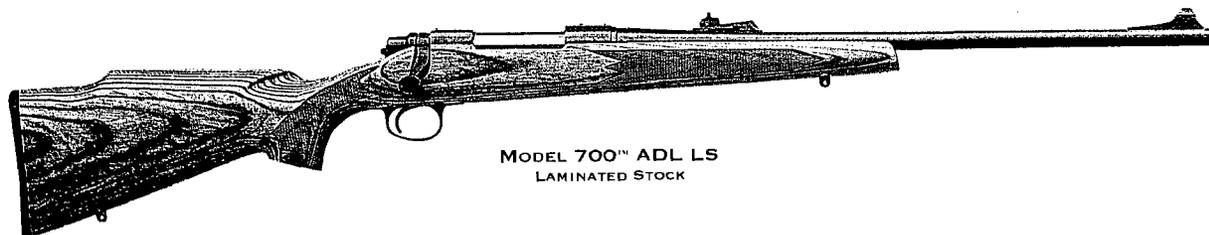

MODEL 700™ VARMINT
WOOD

MODEL 700™ ADL

MODEL 700™ ADL

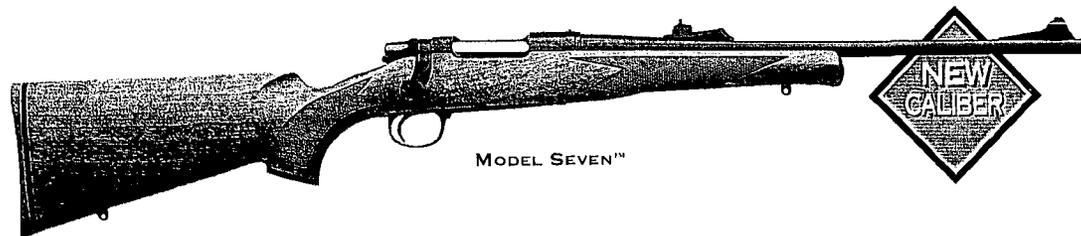

This gun makes legendary performance available at a modest price. Featuring the renowned Model 700™ action, satin-finished walnut stock with cheekpiece, cut checkering, and sling swivel studs. Available in nine great short- and long-action calibers, from the 243 Win. to the 308 Win.

MODEL 700™ ADL LS
LAMINATED STOCK

MODEL 700™ ADL LS LAMINATED STOCK

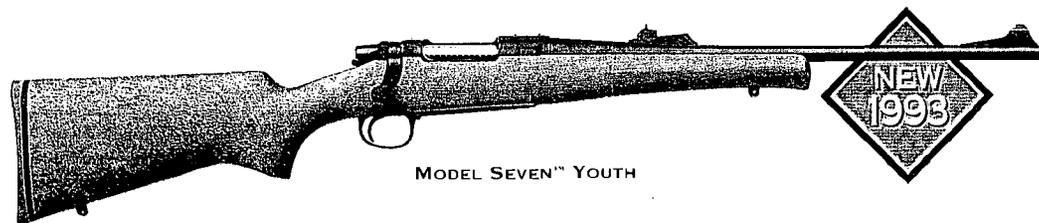

The same features as the affordable Model 700™ ADL, but with the strength of modern laminates and the warm, contemporary beauty of layered hardwoods. Lamination makes the stock stronger than ordinary wood stocks and more resistant to changes in temperature and humidity. Available in four chamberings: 243 Win., 270 Win., 7mm Remington Mag., and 30-06 Spfld.

MODEL SEVEN™

MODEL SEVEN™

The lightest, most compact of all Remington centerfire rifles, the Model Seven™ is built around the same bolt action design as the Model 700™, but weighs just 6 1/4 lbs., and is a full 5" shorter than its Model 700™ brothers. It features an 18 1/2" tapered barrel for easy handling and pointability, ramp front sight, adjustable rear sight, and hinged magazine floorplate. For 1993, we're offering a new chambering in the hot 17 Remington (no sights, clean barrel).

MODEL SEVEN™ YOUTH

MODEL SEVEN™ YOUTH

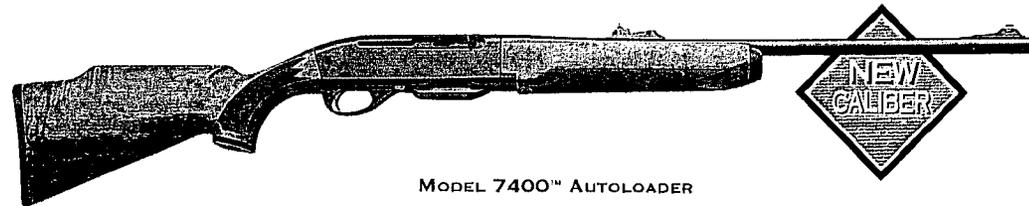

For young shooters who are ready to graduate to a centerfire rifle, but who aren't big enough to borrow Dad's just yet, we offer the Model Seven™ Youth. It comes with all the legendary strength and accuracy of Remington's full-size centerfire rifles, but with a 1" shorter hardwood stock for easy control by small-framed shooters. It is chambered in three great short-action calibers: the 6mm Remington, 243 Win., and 7mm-08 Remington – cartridges big enough to take a wide variety of big game, without the punishing effects of recoil that can ruin a beginner's enthusiasm for shooting.

**MODEL 7400™ &
MODEL 7600™
WHEN THE GAME IS
PLAYING HIDE AND SEEK.**

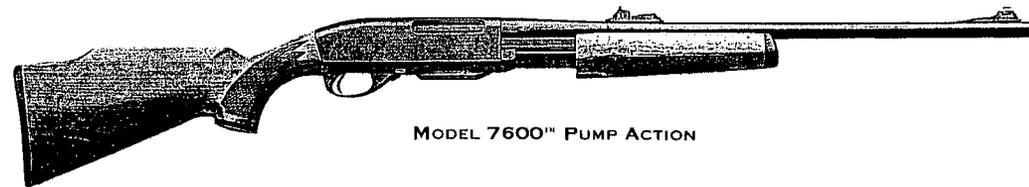

Whitetails play the game better than anything in the woods – now you see them, now you don't. And Whitetail country is where both the Model 7400™ autoloader and the Model 7600™ pump earned their reputations for quick handling and fast, smooth actions. But those qualities alone aren't enough to carry the Remington name. We've also designed an unmatched level of accuracy into both guns: the receivers are machined from solid blocks of ordnance-grade steel, and the barrels are hammer-forged with the same precision as our bolt action guns.

Over the years, we've improved the functioning of the Model 7400™ by spreading gas pressure over a longer increment of time. This has the added benefit of reducing perceived recoil, which will allow you to follow through with a steady second shot if needed. Bolt velocity is also more uniform, which eases wear and tear, and improves reliability.

On the Model 7600™ the barrel is fully-floated, just like custom target rifles, for outstanding accuracy. So once you get it sighted in, it stays there. The Monte Carlo-profiled stocks on both guns have raised cheekpieces, and are carved out of solid American walnut, with a generous amount of cut checkering for good control. And for really close quarters, we offer both guns in a compact 30-06 carbine version with an 18 1/2" barrel. Finally, each gun is available in seven popular calibers from the flat shooting 243 Win.

MODEL 7400™ AUTOLOADER

MODEL 7600™ PUMP ACTION

to the powerful 35 Whelen. So choose the action you like from the company that's sold more great pumps and autoloaders than any other, and for good reason: they always come through for the shooter.

New for 1993 are Special Purpose finish options for both guns, and a chambering for the Model 7400™ in 35 Whelen – one of the hardest-hitting non-magnum big game cartridges. Also, when you buy either gun (non-SP's only), we'll include our new hard case that's specially made to hold a Model 7400™ or Model 7600™ and lots of accessories. A great value!

MODEL 7400™ AUTOLOADER
(PAGE 24)

Pick it up, and you'll be impressed with its great pointability and balance. But you'll really appreciate its performance when you squeeze the trigger. That's because the Model 7400™ has a gas operating system specially engineered to soften recoil. And that means you can keep your eye on the target in case you need an extra shot. With satin or gloss finish on its American walnut stock, adjustable sights, and a removable four-shot magazine.

MODEL 7600™ PUMP ACTION
(PAGE 24)

The positive feel and performance of a pump action with excellent balance and pointability. Features Remington's rugged twin action bar system for fast, smooth ejection and chambering, and free-floated barrel for exceptional accuracy. Available with satin or gloss finish on its American walnut stock, adjustable sights, and a removable four-shot magazine.

MODEL 7400™ SP & MODEL 7600™ SP

These special finish versions have the concealment advantages of a non-reflective finish on the wood and metalwork – just the thing to keep a ray of sunlight from reflecting off your barrel at the wrong moment. Available chambered for 270 Win. and 30-06 Spfld. in both models. Sling swivel studs and camo Cordura® sling are sup-

MODEL 7600™ SP (SPECIAL PURPOSE)

**AT REMINGTON,
"LEFT-HAND" DOESN'T
MEAN "LEFT OUT."**

For years, firearm manufacturers have kept left-handed shooters out in left field. But not Remington. We've always offered a full complement of left-hand guns, and the tradition continues today with over 65 left-hand rifle, shotgun, and long-range pistol specs. See the charts on pages 82-85 for a complete listing of all left-hand production guns.

MODEL 11-87™ PREMIER® LC

The world's finest autoloader, with 28", L-H Light Contour vent rib Rem™ Choke barrel.

MODEL 870™ WINGMASTER® LC

The most popular pump action shotgun in the world, with 28", L-H Light Contour vent rib Rem™ Choke barrel.

MODEL 870™ BRUSHMASTER® DEER

The slug gun standard, with 20", L-H rifle-sighted Rem™ Choke barrel.

MODEL 11-87™ PREMIER® TRAP

With straight or Monte Carlo stock, and 30", L-H vent rib Rem™ Choke barrel.

MODEL 11-87™ PREMIER® SKEET

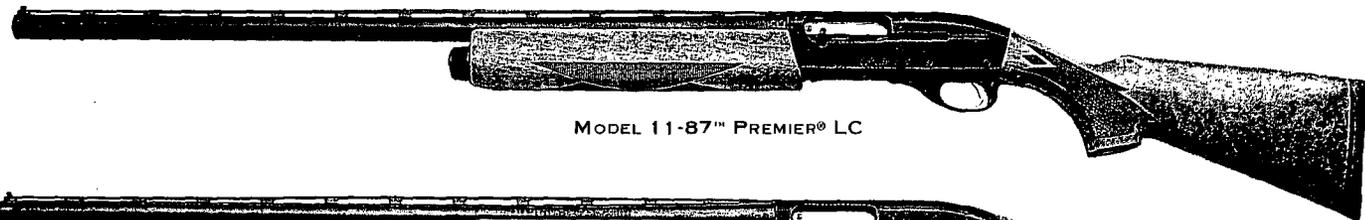

The most reliable 12-ga. autoloader on the market, with 26", L-H vent rib Rem™ Choke barrel.

**MODEL 700™ CUSTOM KS
MOUNTAIN RIFLE**

The ultimate high-country rifle in 10 calibers from the 270 Win. to the 375 H&H Mag. Available from the Remington Custom Shop. For more information, write: Custom Gun Shop Brochure, B6220, Remington Arms Company, Wilmington, Delaware 19898.

MODEL 700™ BDL

**MODEL XP-100™
THE STANDARD BY WHICH
ALL OTHER LONG-RANGE
HANDGUNS ARE
MEASURED.**

The Model XP-100™ started a whole new category in shooting sports when it was introduced in 1963. During the '70's and '80's it became the dominant barreled action in the unlimited class at IHMSA events around the globe. After watching the Model XP-100™ take the metallic silhouette world by storm, handgun hunters took advantage of the Model XP-100's bolt action accuracy to extend the range of their sport, and long-range handgun hunting hasn't been the same since. With the Model XP-100™, MOA accuracy is achievable in most calibers, and many shooters claim their XP's do consistently better than that.

The Model XP-100™ is available in two versions: for silhouette shooters, we have a walnut-stocked, single-shot pistol with a 10 1/2" barrel and open sights. For handgun hunters, the same gun is offered with a 14 1/2" barrel, no sights, and a beautiful, pressure-laminated hardwood stock.

The Model XP-100™ is also available from the Remington Custom Shop in a gracefully-profiled, walnut-stocked single-shot version, or as a repeater with a Kevlar®-reinforced synthetic stock. All "XP" handguns are drilled and tapped for scope mounts. For more information on Custom Shop versions of our Model XP-100™ write: Custom Gun Shop Brochure, B-6220, Remington Arms Company, Wilmington, DE 19898.

**MODEL XP-100™
SILHOUETTE & HUNTER**

The balance, strength, precision and accuracy you'd expect from a fine rifle — in a handgun. Available in two versions: the Model XP-100™ Silhouette (above) with solid American walnut stock and 10 1/2" barrel with target sights in 7mm BR Remington, and the Model XP-100™ Hunter (at top of page) with laminated wood stock, 14 1/2" drilled and tapped barrel, no sights, and chamberings for 223 Remington, 7mm BR Remington, 7mm-08 Remington, and 35 Remington. Both stocks feature a beautifully-sculptured ambidextrous grip. *Note: Scope not included.*

MODEL XP-100™ CUSTOM

The pride of our handgun offerings. The Model XP-100™ Custom features a beautifully-fashioned walnut stock with ergonomically-designed left- or right-handed grip. The Model XP-100™ is available in your choice of eight calibers, from 22-250 Remington to 35 Remington, in light or heavy barrel contours, and left- or right-hand actions. Available from the Remington Custom Shop through your local Remington dealer.

**MODEL XP-100R™ CUSTOM
KS REPEATER**

The accuracy of the Model XP-100™ in a repeater. With a Kevlar®-reinforced stock for extraordinary strength and durability. The ambidextrous grip is placed at the extreme rear of the gun to allow sufficient clearance for the blind box magazine to be recessed under the bolt. The fore-end has a broad, flat beaver-tail shape for comfortable resting. The Model XP-100R™ is available in seven calibers from 22-250 Remington to 35 Remington. All chamberings come with open sights except 223 Remington and 250 Savage. Includes sling swivel studs at front and rear of stock. Available from the Remington Custom Shop through your local Remington dealer.

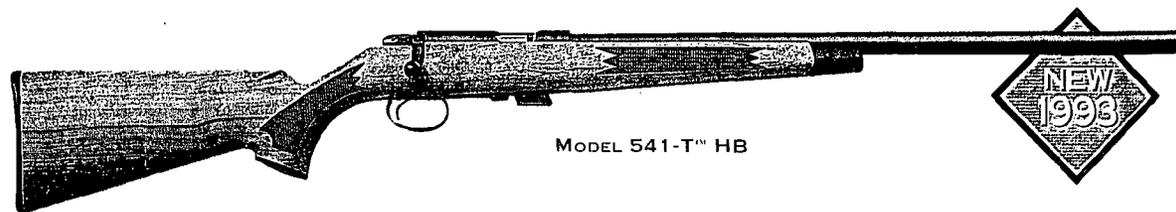

**REMINGTON 22s.
THE RIFLES THAT
SATURDAY AFTERNOONS
WERE MADE FOR.**

For most of us, our first, and longest-lasting experiences with shooting involve a 22. It was the baton with which the love of shooting sports was passed to us from our dads and uncles and older brothers, and odds are it was a Remington. Was it a Model 510™ Targetmaster® that earned you merit badges in the Scouts? Or was it a Nylon 66 that helped you take your first rabbit or squirrel? No matter. If it's Saturday, why not re-discover the spark that started it all? Take your son or daughter out for an afternoon of fun...and pass the baton.

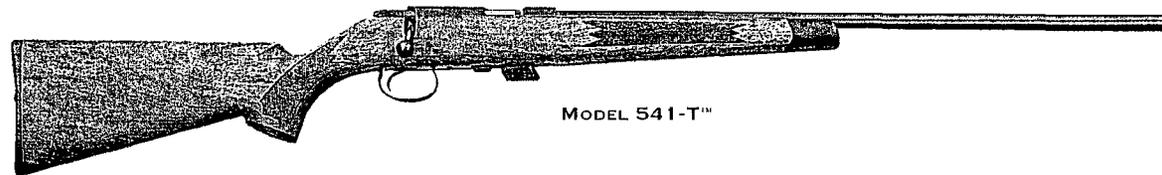

New for 1993 is the Model 522™ Viper™ – a compact, synthetic-stocked rifle that sets new standards for 22 autoloader performance and dependability. And we've given the Model 541-T™ an optional 24" heavy-contour barrel that delivers the kind of accuracy benchrest shooters expect.

MODEL 541-T™

The "T" stands for target, telling you right away this gun is engineered for accuracy. The Model 541-T™ uses a time-proven six-lug, rear lock-up bolt action, mated with a receiver milled from a solid block of ordnance-grade steel. The trigger pulls smoothly, and breaks clean with no creep. You simply can't get better quality in a production 22 repeater. For 1993, the Model 541-T™ is also available with a 24" heavy barrel that prints groups a centerfire shooter would be proud of. The Model 541-T™ is as beautiful to look at as it is to shoot, with a solid American walnut stock and black fore-end tip. The pistol grip and fore-end are graced with a generous amount of deep cut checkering. The Model 541-T™ comes with a 5-shot clip, clean barrel, and receiver drilled and tapped for scope mounts.

MODEL 541-T™ HB

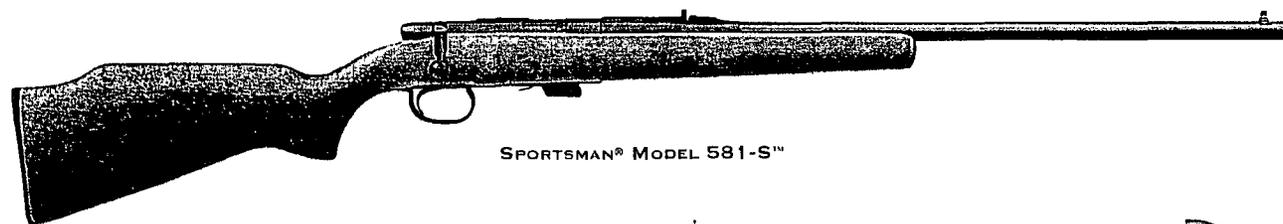

MODEL 541-T™

MODEL 522™ VIPER™

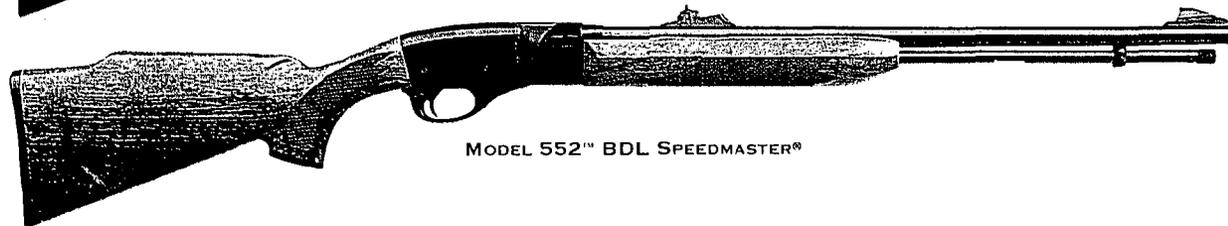

◀ The Model 522™ Viper™ is a totally new, state-of-the-art gun design, engineered to give experienced as well as entry-level shooters the highest value for their dollar in a 22 autoloading rifle. The Model 522™ is also one of the most innovative 22 rifles on the market, and incorporates many safety and functional features not offered on competitive 22 rifles. For example, a red indicator shows when the gun is cocked; a disconnect disables the trigger when the magazine is removed; an ejection port shield is molded into the receiver; and a last shot bolt hold-open feature lets the shooter know the gun is empty. The black, hard-wearing stock is made of high-strength injection-molded synthetic resin. The grip is slim and checkered for good control, and the fore-end has a semi-beavertail shape that is comfortable for younger and adult shooters alike. The receiver is made of a lightweight, extremely tough engineered synthetic. The sights are center-fire rifle quality, and the rear sight is fully adjustable for windage and elevation. A grooved scope mounting rail is integrally molded into the receiver. An easy to load, 10-round magazine is supplied. *Note: Scope not included.*

SPORTSMAN® MODEL 581-S™

MODEL 572™ BDL FIELDMASTER®

MODEL 552™ BDL SPEEDMASTER®

SPORTSMAN® MODEL 581-S™

Experienced shooters and beginners alike will appreciate the rugged, dependable performance built into this bolt action rifle. Comes with Monte Carlo styled hardwood stock. With five-shot clip and single shot adapter.

MODEL 572™ BDL FIELDMASTER®

The only pump action 22 rimfire rifle made in America today. Shoots shorts, longs, and long rifle cartridges. Features high-gloss Monte Carlo walnut stock with cut checkering, big game sights, high-luster bluing, and receiver grooved for scope mounts.

MODEL 552™ BDL SPEEDMASTER®

The same styling as our Model 572™ pump action, but in an autoloading version for consistent shooting round after round. With a high-gloss Monte Carlo walnut stock with cut checkering, big game sights, high-luster bluing, and a receiver grooved for scope mounts.

AMERICA'S BEST GUNS - SINCE 1816.

To its owner, a fine gun is a source of almost inexplicable pleasure: the subtle beauty of a highly-figured stock painstakingly decorated with deep, hand-cut checkering. Wood-to-metal fit so close the receiver looks like it grew right out of the walnut. Engraving and precious metal inlay that are timeless expressions of skilled artisans. Action fit and function as smooth as the workings of a fine time piece. And personalized measurements that make the gun feel like an extension of your body. These are just a few of the reasons that make the choice of a custom Remington a wise one... an investment in the quality and craftsmanship of America's best guns, from America's most experienced gun maker.

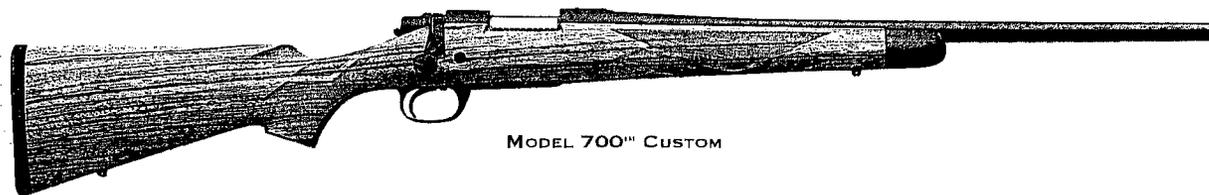

New for 1993 is the beautiful Model Seven™ MS, with its full-length laminated stock, and a stainless steel version of our awesome Model 700™ Safari KS.

MODEL 700™ CUSTOM

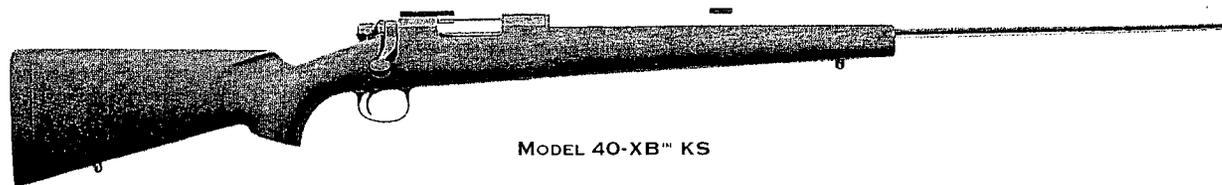

The legendary Model 700™ rifle built at your direction. Available with a hand-made stock of American walnut, English walnut, or California Claro. The stock can be shaped to your precise measurements, and finished off with beautiful, hand-cut checkering. Several engraving choices, many detail upgrades, and a large selection of calibers are offered for the owner who wants a truly "one of a kind" custom rifle.

MODEL 40-XB™ KS

This long-range target rifle features a free-floating barrel, high comb stock, hand-bedded action, and match-grade trigger. In single shot or repeater, with American walnut stock or synthetic stock reinforced with Du Pont Kevlar®. Left-hand actions available in 17 calibers. Other Model 40-X™ variations available for benchrest, rimfire and centerfire National Match Course shooters.

MODEL 700™ CUSTOM

MODEL 40-XB™ KS

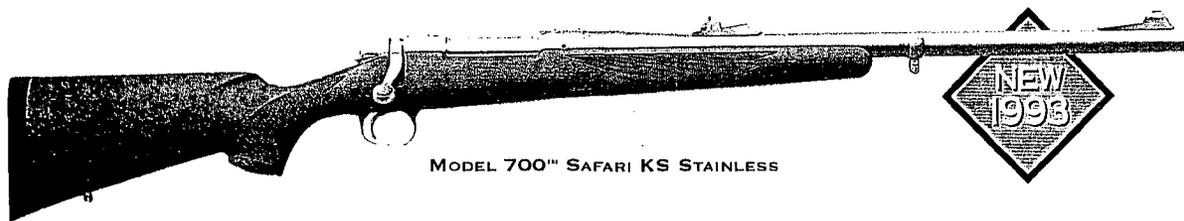

MODEL SEVEN™ MS

◀ The newest addition to the Remington Custom Shop family of fine guns. We start by fitting a 20" Custom Shop barrel to the compact Model Seven™ action, then add to it a classic Mannlicher-style full-length stock. The select hardwoods have been chosen for their clear grain, and pressure-laminated for strength and dimensional stability. The butt stock features a straight comb with raised cheekpiece, and is fitted with a black rubber recoil pad. The front of the carbine is finished off with a Mannlicher-style fore-end cap/barrel band. This beautiful little rifle is available in eleven great short-action calibers.

MODEL 700™ SAFARI KS STAINLESS

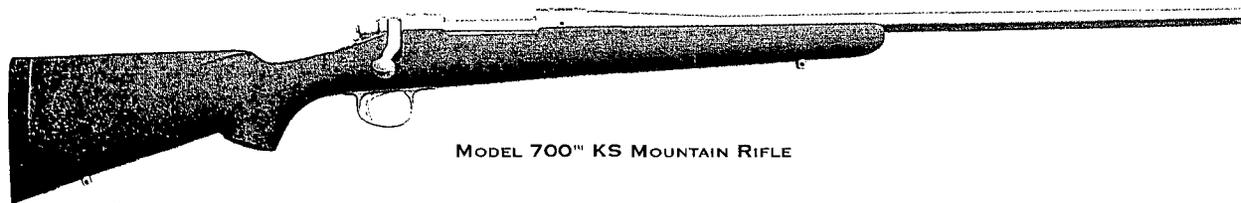

Whether your hunting takes you to the savannah of Africa, the tundra of Alaska, or the great plains of North America, this is the gun to take along. For 1993 we've added the option of a stainless steel barreled action to the line-up for true all-weather durability. The Kevlar® reinforced synthetic stock has a non-reflective gray finish. Cut checkering is 18 lines to the inch for a sure grip. The Model 700™ Safari KS Stainless is chambered for 375 H&H Mag., 416 Rem. Mag., and 458 Win. Mag., in right-hand action only.

MODEL 700™ SAFARI KS STAINLESS

MODEL 700™ KS MOUNTAIN RIFLE

This the lightest, toughest Model 700™ rifle available. Kevlar® makes the stock dimensionally stable, and the dull finish makes it virtually invisible to game in open country. The Model 700™ KS is offered in a wide selection of calibers in right- or left-hand versions, right-hand stainless barreled actions, and the option of matte gray or simulated wood grain finish on stocks. We also offer the compact Model Seven™ with a lightweight stock reinforced with Kevlar® in 225 Remington, 7mm-08 Remington, 308 Win., 35 Remington, and 350 Remington Mag.

MODEL 700™ KS MOUNTAIN RIFLE

REMINGTON FIREARM CARE KITS

Each and every Remington firearm is designed and manufactured to provide many years of enjoyable shooting. To keep your Remington working as accurately and dependably as the first day you fired it, we've developed a full line of superior firearm care products.

BREECH BRUSHES

Remove caked grease and lubricants, carbon, lead and copper deposits, rust and corrosion from all firearm parts with these tough, durable brushes.

CLEANING RODS

Our extra-hard stainless steel shaft rotates in the handle, allowing the bore brush to spiral with the rifling. Bore guides keep rod from abrading bore, plastic tips shield threads when rod is not in use. Available in one-piece rods for home or shop use, and three-piece rods for field cleaning and handguns.

REM™ OIL WIPE

This 100% cotton flannel cloth is treated with Rem™ Oil to remove fingerprint acid from firearms and help prevent rust.

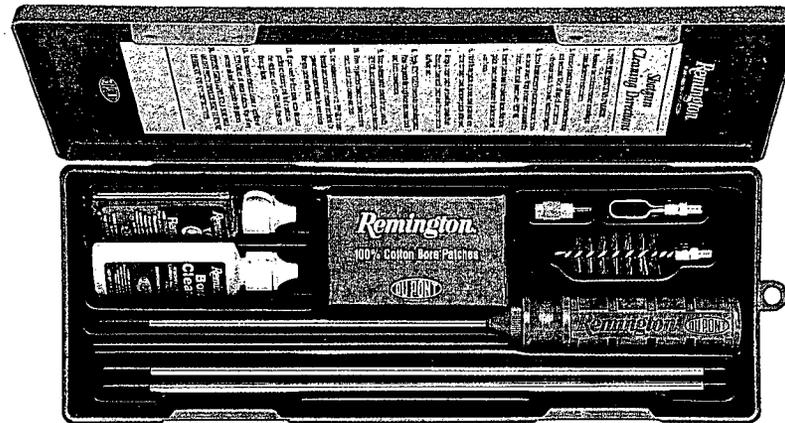

BORE GUIDE

Fits on all Remington cleaning rods to prevent bore damage.

SHEEPSKIN WIPE

Durable and long-lasting, it comes ready-treated with Remington Universal Grease, and may be re-treated with grease whenever needed.

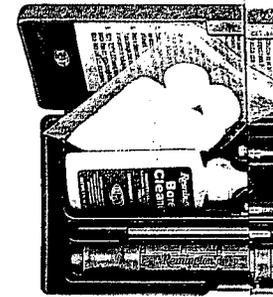

COMPLETE CLEANING KITS

Everything you need to provide the year-round cleaning and maintenance necessary to protect your firearm investment.

Includes a 3-piece stainless steel cleaning rod, phosphor-bronze bore brush with no-scratch loop tip, patch puller of

cadmium-plated steel, brass jag, revolver firing-pin shield (handgun kit only), double-napped cleaning patches and bore

PATCHES

Napped on both sides for extra absorbency, and cut to clean thoroughly without jamming in bore. 100% cotton flannel.

FIRING-PIN GUARD

Prevents damage to the firing pin when the cleaning rod is pushed through the bore, and keeps solvents and dirt out of the action during cleaning.

LEAD WIPE

Lifts lead and carbon deposits from shotgun, rifle, and handgun bores.

SWABS

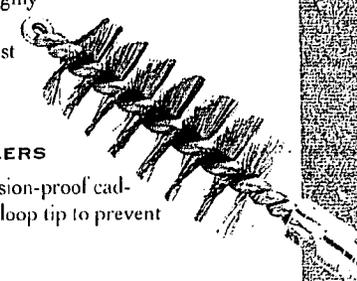

Durable base, thick-nap, 100% cotton for maximum absorbency.

JAGS

All-brass construction helps prevent bore damage; pointed tip keeps patch from sliding and jamming in bore.

BORE BRUSHES

High-quality phosphor-bronze bristles resist corrosion and clean thoroughly without excessive abrasion. Dense bristles resist flattening and breaking off in bore.

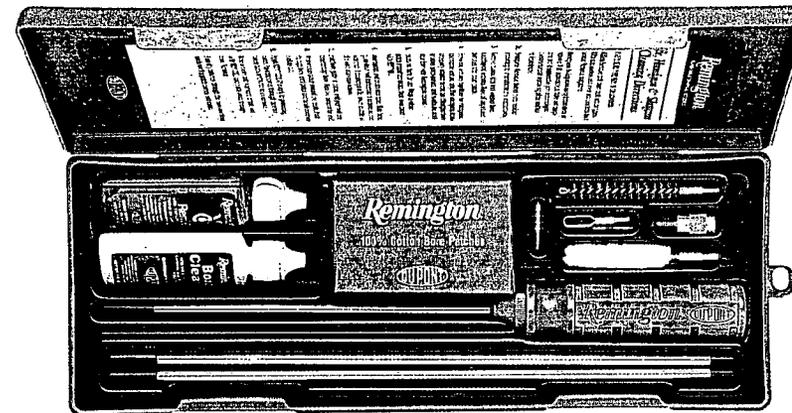

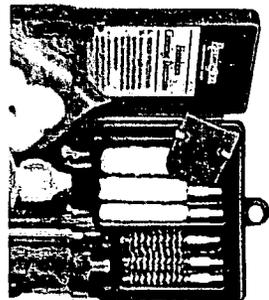

PATCH PULLERS

Made of durable, corrosion-proof cadmium-plated steel with loop tip to prevent scratching.

RIMFIRE ACCESSORIES ADAPTER

Allows you to attach rimfire accessories to a standard centerfire or shotgun rod.

swab of 100% cotton and 1-oz. squeeze bottles of Rem™ Oil lubricant and Remington Bore Cleaner. All packaged in

a tough, secure-latching plastic storage box that's impervious to lubes and cleaners. For specific instructions on

how to properly clean your firearm, ask your dealer for a copy of our "Remington Firearm Care" booklet.

REMINGTON OILS AND LUBRICANTS

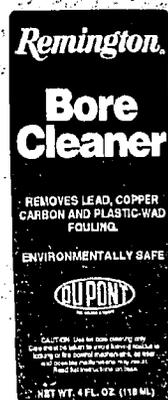

Remington's line of cleaning agents and lubricants are made of the most advanced formulas to help protect and extend the life of your firearms.

REM™ OIL

A favorite of sportsmen for years, Rem™ Oil displaces and repels moisture to guard against rust and corrosion. Its exclusive lubricant formula contains Du Pont Teflon® to ensure smooth, reliable performance in all kinds of weather. 1/4 oz. Tube, 1 oz. Bottle, 4 oz. Can, 10 oz. Can, 24 oz. Bottle.

REMINGTON BORE CLEANER

Made from an environmentally safe formula, Remington Bore Cleaner effectively removes carbon, lead, copper, and plastic-wad fouling from the bore. Free of corrosive acids, it will not deteriorate the bore or bronze bore brushes. 1 oz. Bottle, 4 oz. Bottle.

SIGHT BLACK OUT

This spray blackens the front sight and barrel top instantly to eliminate glare, reduce eyestrain, and improve aiming. Harmless to all gun finishes, the waterproof formula won't bleed or rub off. 3.5 oz. Aerosol Can.

REM™ DRILUBE

This instant dry spray lubricant keeps firearms working smoothly even at temperatures as low as -40°F. Its clean, non-staining formula contains Du Pont Teflon® for superior lubrication. 4 oz. Can.

BLACK POWDER PATCH LUBE

This lubricant reduces fouling, patch burnout, and buildup of unburned powder, while protecting the bore from rust. The result is increased muzzle velocity for flatter, more accurate shots. 3.75 oz. Jar.

HINGE & HIGH-PRESSURE GREASE

Lubricates hinges of break-open shotguns and all sliding surfaces of semi-automatic and fully automatic firearms. Effective on stainless and carbon steels, alloys, and polymer plastics, it safeguards guns against rust and corrosion. 3.75 oz. Jar.

SILICONE TREATMENT

An ideal general-purpose treatment for a wide variety of out-door equipment. The non-greasy formula lubricates, protects, repels moisture and retards mildew while keeping wood, leather, rubber, and plastic from drying and cracking. 8 oz. Can.

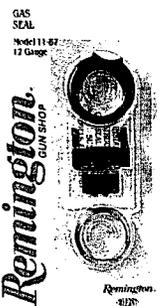

REM™ ACTION CLEANER

Spray-cleans firearm actions and fire-control mechanisms with no disassembly required. The non-flammable formula cuts through caked lubricants, including grease, synthetic and petroleum-based lubes, and gum. Leaves no residue, providing a dry, clean surface. 9 oz. Can, 16 oz. Can.

KIT #1: SHOTGUN BOLT PARTS

Contains firing pin, spring, and retainer; extractor, spring, and plunger; operating handle. For Model 870™, Model 1100™, and Model 11-87™ shotguns.

KIT #2: AUTO-LOADING GAS SEALS

Contains piston, piston seal, barrel seal, and fore-end support. For Model 1100™ and Model 11-87™ shotguns.

KIT #3: SHOTGUN MAGAZINE COMPONENTS

Contains magazine cap and plug. For Model 870™, Model 1100™ and Model 11-87™ shotguns.

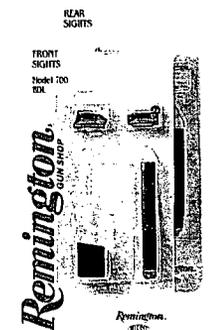

CHOKE-TUBE CLEANER

Cleans removable choke tubes and gas-operating parts overnight by soaking away plastic-wad deposits, carbon fouling, and other corrosives. Leaves anti-rust film to prevent tubes from sticking in bores and damaging threads. 3.75 oz. Jar.

UNIVERSAL GREASE

Ideal for firearms and other outdoor gear, this grease provides reliable long-term insurance against rust and corrosion. Keeps firearms rust-free during storage—even in humid climates. Remington formula resists gumming and caking. 1 oz. Tube, 5.75 oz. Jar.

KIT #4 & #5 FRONT AND REAR RIFLE SIGHTS

Front Kit Contains ramp and screws, blade, and hood. For Models 700™, Four™, Six™, 7400™, 7600™, 74™, 76™, and 78™ rifles. Rear Kit Contains ramp and screws, slide, aperture, windage and elevation screws. For Models 700™, Four™, Six™, 7400™, 7600™, 552™, and 572™ rifles.

KIT #6: REM™ CHOKES

Contains tube of specified choke size. For all Remington Rem™ Choke Barrels. See page 16 for a full description of available Rem™ Choke tubes; see page 83 for a complete listing of all available choke types/gauges.

KIT #7: MAGAZINE CLIPS

Contains specific clip for Remington autoloading and pump, centerfire or rimfire rifles by model and caliber.

DON'T USE ANYTHING LESS THAN A REMINGTON PART IN YOUR REMINGTON.

A well-loved gun is a well-used gun. And the more you use your firearm, the more likely it is that you'll eventually need a spare part or two. When that happens, look to the Remington Gun Shop – a full line of the most popular spare parts for Remington shotguns and rifles. There are seven different kits, and each is complete with all the components and installation information you need.

SPORTSMAN'S SOAP

This all-purpose, extremely effective, concentrated soap removes food odors, fuel odors, and human scent from clothes and skin. Ideal for fishermen as well as hunters, it also removes fish odors from tools and keeps lures clean and free of human scent. Gentle on skin, safe for use on pets, and biodegradable.

SPORTSMAN'S WIPES

Features the same odor-neutralizing formula of our Sportsman's Soap in convenient, biodegradable, disposable towels. Each towel is individually sealed in its own protective envelope. Easy to carry along in your car, truck, gear bag, or pocket.

Waterfowlers are crazy.

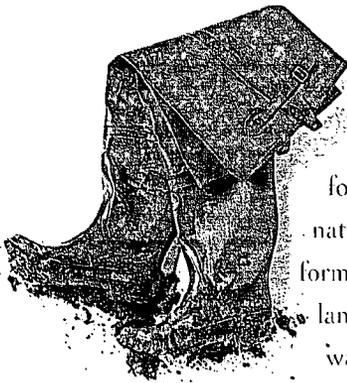

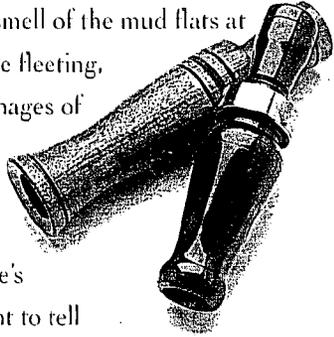

Crazy about things like the soft chattering sounds of ducks stirring in the marsh before sun up, and the musty smell of the mud flats at low tide; the fleeting,

phantom images of the first birds to move out before there's enough light to tell

what's what; or the sight of a proud Labrador tracking incomers like radar. Waterfowlers also view things differently than ordinary people. Like the privilege of getting up at 4:00am to go and crouch for hours in a cold, wet, hole in the ground.

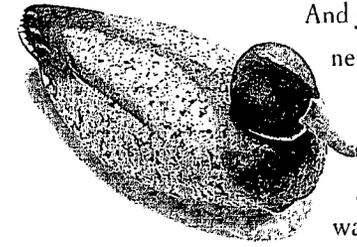

They see it as a chance to sit in a box seat for one of mother nature's best performances – a wetlands sunrise. We want you to think

of Remington as *your* ticket to that box seat – your ticket to a great hunting experience.

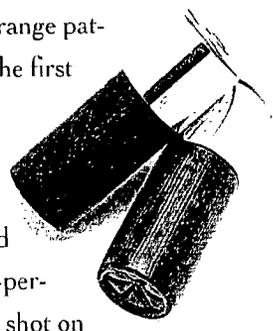

It used to be that the rain, snow, sleet and bitter cold that made for good shooting also made for a long day in the marsh.

And you were never really sure how well your gear was going to

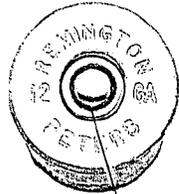

hold up under the abuse of the elements – especially your shells. *Until Remington made the difference.* We have a long tradition of shotshell developments that have made waterfowling ammunition much more reliable: Kleanbore® primers for rust-free barrels; the first magnum shotshells worthy of the name; Power Piston® one-piece plastic shot cup/wads that improved long-range patterns dramatically; the first plastic hulls for true water-resistance;

Duplex® multi-range shotshells, and the largest and best-performing line of steel shot on the market today. Why? Because we believe you should be thinking about how your decoys are working, not about your ammo. Just remember to keep your head down – we'll take care of the rest.

**NITRO-STEEL™ AND EXPRESS-STEEL™
KNOCKDOWN POWER THAT GOES THE DISTANCE.**

As of this year, there are only two kinds of steel shotshells you can buy – Remington's and everyone else's. Why? Because with the

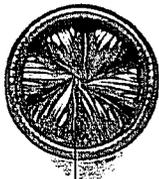

WETPROOF™
PRIMER SEAL

introduction of our new Nitro-Steel™ Magnum and Express-Steel™ lines, our steel is clearly superior to all the others.

When you need every ounce of knockdown power you can get, Remington's new Nitro-Steel™ Magnums will help you reach out and do the job. Nitro-Steel™ Magnums have the industry's only factory loading of "TT" shot – what you need for those tough-breasted specklebellies and high flying snows. We've added TT shot to 10-ga and 12-ga 3" Magnums, including our all-new 3 1/2" 12-ga. steel loadings. All together, we have 37 different choices of Nitro-Steel™ Magnums when you need ammunition that can go the

distance. For closer shots on decoying ducks, or for upland and small game hunting in "Steel Only" Zones, our new Express-Steel™ is the

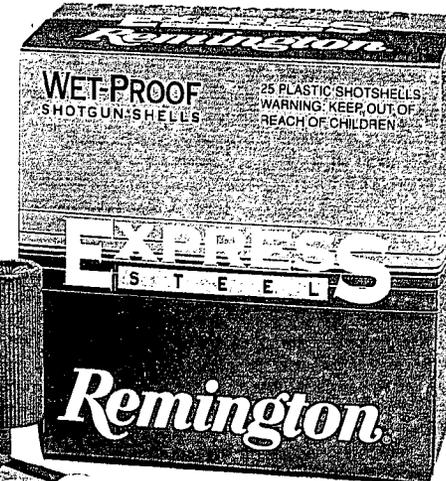

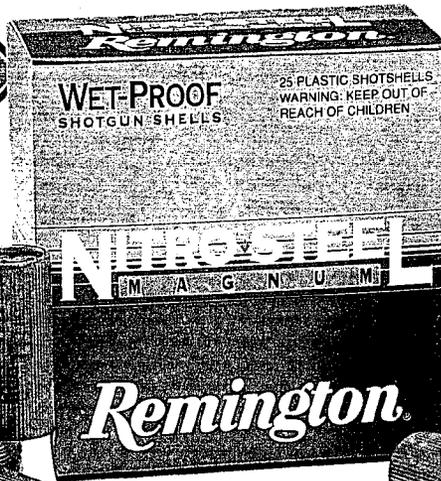

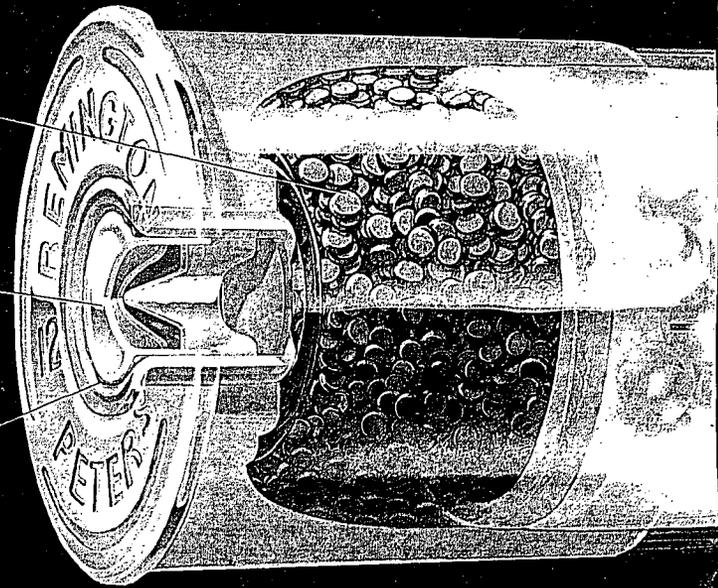

WETPROOF™
CRIMP SEAL

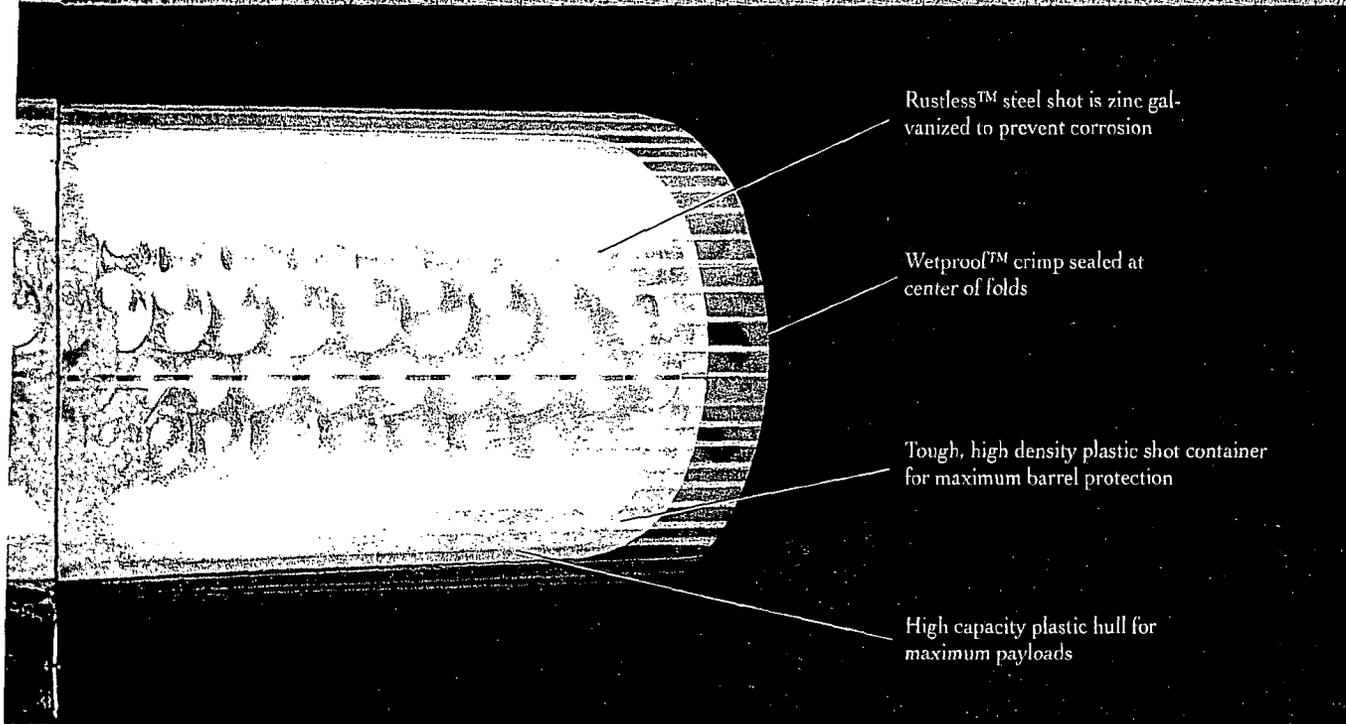

only choice. Our Express-Steel™ line includes eight new loadings for 16- and 20-ga. shooters with 2's through 6's for dense, hard-hitting patterns. And we've also added a lightweight 12-ga. loading with less recoil.

Specially-blended powders burn clean,
produce uniform velocity

Clean, dependable Kleanbore® primer

Red lacquer Wetproof™ sealant – visible
protection against moisture

Rustless™ steel shot is zinc galvanized to prevent corrosion

Wetproof™ crimp sealed at center of folds

Tough, high density plastic shot container for maximum barrel protection

High capacity plastic hull for maximum payloads

THE NITRO-STEEL™ AND EXPRESS-STEEL™ DIFFERENCE.

Shotshells and water don't mix, so we've designed a new process to Wetproof™ our steel shells. We seal in performance and seal out the elements. Our new Rustless™ steel

RUSTLESS™ STEEL SHOT

shot is zinc galvanized to prevent corrosion. That's important, because unprotected steel shot can rust, affecting both pattern

and performance.

Keeping steel pellets from rusting is a prime concern for today's waterfowlers, but no less important is keeping your powder dry. So we seal the primers in our steel shotshells with a special lacquer to keep out moisture. It's colored red so you'll know at a glance your shell is a Remington Wetproof™ shell. The crimp can also allow water to enter a shell, so it too, gets our new Wetproof™ treatment.

Add to these improvements our clean-burning powder blends, Kleanbore® non-corrosive priming mixture, and our special high-density polyethylene shot containers that protect the barrel and seal in powder gases for consistent velocity. When you stack it all up, you'll see why there really are only two choices in steel shotshells: Remington Steel...and everything else.

For a detailed guide to the selection and use of steel shot, pick up a copy of our brochure "Remington Steel" from your local Remington dealer, or write to: Steel Shot Brochure, B-6306, Remington Arms Co., Wilmington, DE 19898

REMINGTON PREMIER® COPPER SOLID™ SABOT SLUGS

You've been sitting 15 ft. in the air for the better part of a day with nothing for company but two bickering crows and a long-cold hand warmer. Time to come down and admit defeat. But wait...that movement - way over on the other side of the draw. At first it looked like the branches of a small tree. Then you recognized him...that phantom 12-pointer you saw at the end of last season, and have been dreaming about all summer. But he's at least 90 yards out and starting to move again. You need an accurate shot that anchors him straight away, because at his size, anything less is a recipe for a long track in falling light. You've got to drop him with one shot, and you've got to do it now.

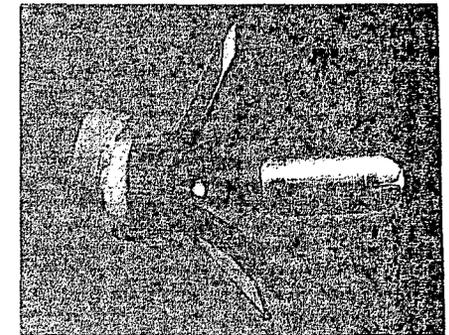

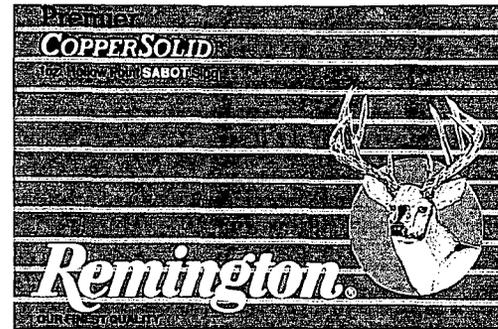

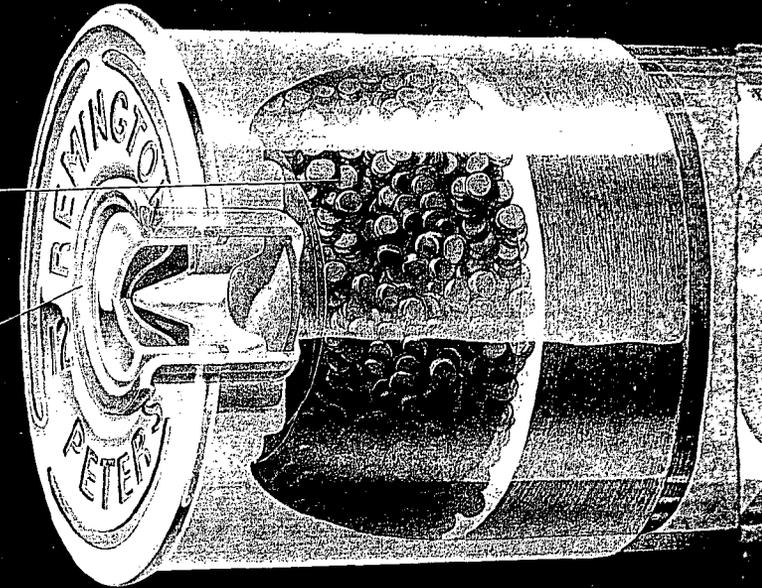

Tough spot, right? But you're shooting our new Premier® Copper Solid™ Sabot slugs, so put the crosshairs right behind his shoulder, and squeeze the trigger, because this new sabot round is unlike any other deer slug made.

First of all, it's an ounce of solid copper... not a lead core with a copper jacket or copper plating. And it's machined out of solid stock using computer-controlled Swiss screw technology for perfect balance and concentricity. So after it separates from our tight-fitting, eight-fingered sabot, it flies with the precision of a centerfire round. Wind drift, drop,

Specially blended powders burn clean, produce uniform velocity.

Dependable Kleanbore® Primer

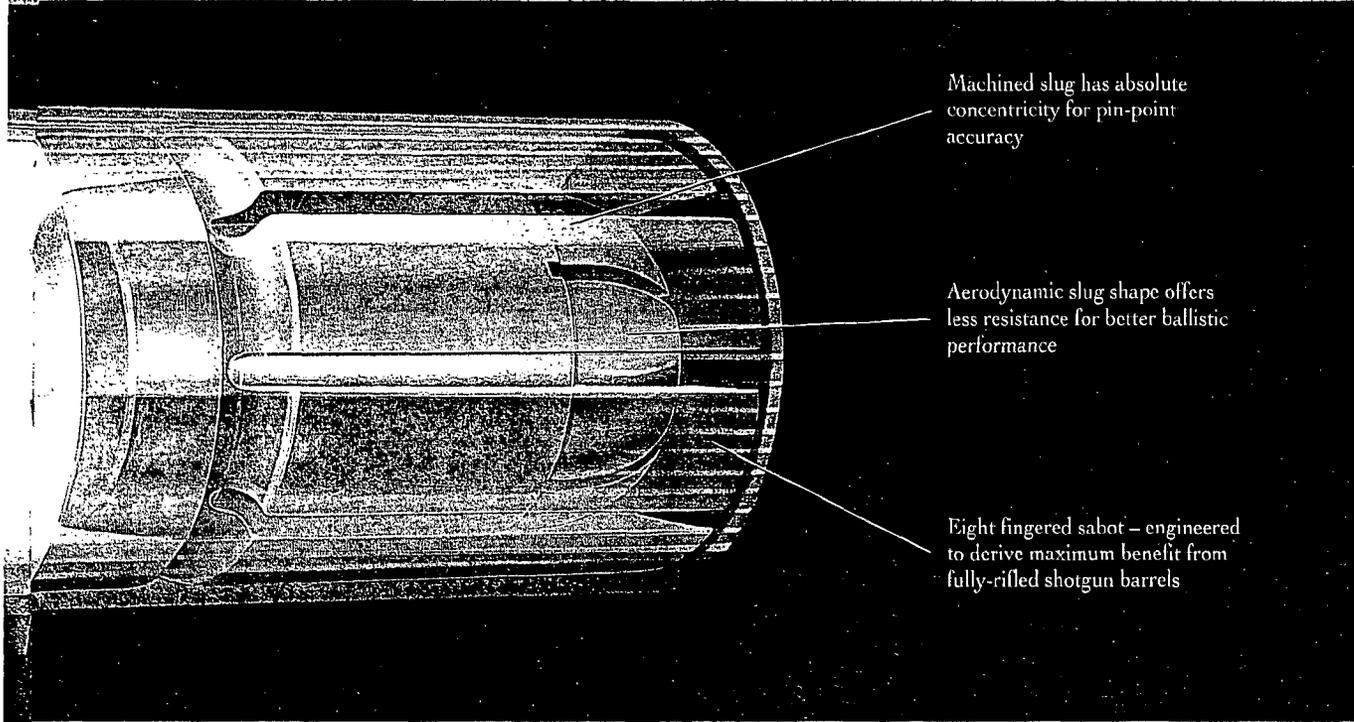

Test lab photography clearly shows the clean, uniform opening of the sabot - a key to the Copper Solid™ slug's incredible accuracy.

★ NEW FOR 1993

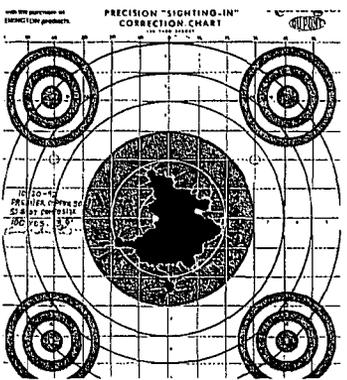

Machined slug has absolute concentricity for pin-point accuracy

Aerodynamic slug shape offers less resistance for better ballistic performance

Eight fingered sabot – engineered to derive maximum benefit from fully-rifled shotgun barrels

PREMIER® COPPER SOLID™ SHOT INTO BALLISTIC GELATIN

Actual 100 yd. target showing the incredibly consistent accuracy of our new Premier® Copper Solid™ Sabot slug. This 50-shot group measures just under 5.9".

As slug penetrates, hydraulic action forces nose sections outward, increasing frontal area for maximum energy transfer

After nose sections expand fully, they separate from main slug body, and develop additional wound channels as they continue to penetrate

Main body of slug drives deep, with momentum forcing it through bone that can often stop or deflect lead slugs

and energy put this 52-caliber slug in a class by itself in terms of deer slug ballistic performance. In terms of accuracy, you can expect 100-yd. groups of 2 1/2" or less out of a fully-rifled Remington barrel.

Remington is the proven leader in sabot technology – we were the first company to offer a commercial sabot, the Remington Accelerator®, almost two decades ago.

And our design for the Copper Solid™ sabot is unlike any other on the market today.

Instead of two halves that can slip in the rifling, ours has precision-molded fingers that lock into the rifling grooves for more positive engagement and higher rotational speed. And that means greater accuracy.

On-game results are incredible. The hollow point design of our new Premier® Copper Solid™ slug features four precisely machined slots that direct the mushrooming process.

As the nose sections open, tremendous energy is transferred, giving you the benefit of devastating impact...the kind of impact that puts big game down quickly and cleanly. The nose sections achieve a maximum outward expansion of well over 2X caliber diameter, then separate from the main body of the slug, and create additional wound channels as they continue to penetrate. The slug continues to drive deeper, even through bone that will often deflect or stop a lead slug.

Phenomenal accuracy, tremendous on-game energy, multiple wound channels – you simply can't get this kind of performance with any other deer slug except the new Remington Premier® Copper Solid™ sabot slug.

REMINGTON SHOTSHELLS. FIRST IN THE FIELD.

SP DUPLEX® SHOTSHELLS

Duplex® is the only factory-loaded shell with two shot sizes carefully layered in one shell. With a charge of larger shot up front and smaller pellets behind, Duplex® loads offer increased energy over comparable single pellet loads without reducing pattern density. Just what you need if that gobbler you've been expecting to see at 35 yards suddenly appears from behind a tree at 15 yards. And these copper-plated, buffered magnum shells have black heads and olive drab hulls to keep them hidden from prying eyes. Only from Remington!

PREMIER® TURKEY LOADS

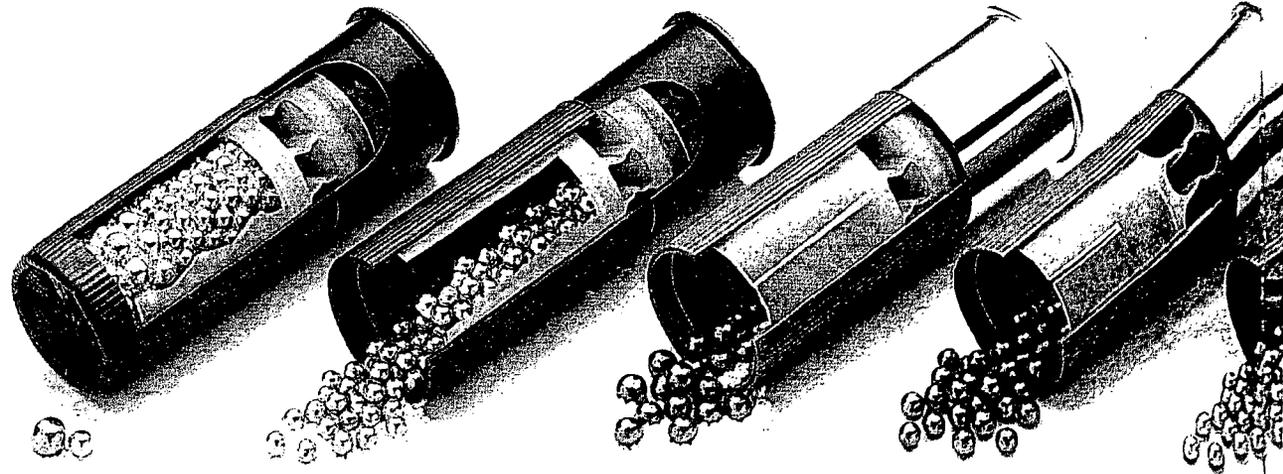

Maximum power and dense patterns are the hallmarks of our Premier® Turkey shotshells. We cover the magnum-grade shot with Copper-Lokt™ copper plating, cradle it in our Power Piston® wad, and surround it with special polymer buffering to protect the pellets for true flight and consistently tight patterning. Premier® Turkey loads are available with some of the heaviest payloads of 4's, 5's or 6's on the market, in "super magnum" 3 1/2" 12-ga. and 10-ga. shells, and regular 12-ga. 3" and 2 3/4" magnums.

NITRO MAG® SHOTSHELLS

The original buffered magnum shotshells from Remington. The shot charge is packed with a generous amount of shock-absorbing polymer buffering, and surrounded by our patented Power Piston® wad to protect the specially hardened shot all the way down the barrel, for dense, even patterns and uniform shot strings. The heavier payloads in all Nitro Mag® shotshells provide the pattern power for everything from turkeys to late season pheasants.

EXPRESS® EXTRA LONG RANGE SHOTSHHELLS

Express® is the standard by which other long-range shotshells are measured. These high-base loads are offered in a wide selection of loadings

†Uses a special shot container

in all gauges. They have our exclusive Power Piston® wad to cushion and protect the shot and prevent barrel leading. The wad's base seals the gas behind the shot column to deliver maximum energy and tight, even patterns.

PREMIER® FIELD LOADS

Our highest quality field loads. We start with a mid-height brass cap for strength. Inside, we load specially-graded, extra-hard lead shot and give it our Copper-Lokt™ plating for surface smoothness. The shot charge is protected by a Power Piston® one-piece wad for less pellet distortion, giving dense patterns with less flyers. In 12-, 16-, and 20-ga., with 6's, 7 1/2's and 8's.

SHURSHOT® HEAVY DOVE LOADS

When you need to put a dense pattern over some wary doves, ShurShot® is the way to go. Designed specifically for upland and small game hunting, these shells have 1/8 oz. more shot than promotional shells for better pattern density without the recoil of typical high-base loads. The ideal choice when you need increased pattern performance in a low-base field load.

BUCKSHOT

Remington Express® Buckshot loads contain a special granulated polymer buffering material which cushions the buckshot and helps keep it round, for tight, uniform patterns. Our Premier® buckshot features extra-hard, nickel-plated buckshot for super-tight, long-range patterns. Both are available in a complete range of sizes from 000 to 4.

SLUGGER® RIFLED SLUGS

For 1993, we've optimized the shape of all our 12-ga. Slugger® rifled slugs for improved aerodynamics. And even better accuracy. A new alignment disc in the wad column provides a straighter push down the bore. At velocities up to 1760 fps, these improved slugs deliver better ballistic performance and less wind deflection. Standard velocity slugs are also available in 12-, 16-, 20-gauge and .410 bore.

★ NEW FOR 1993

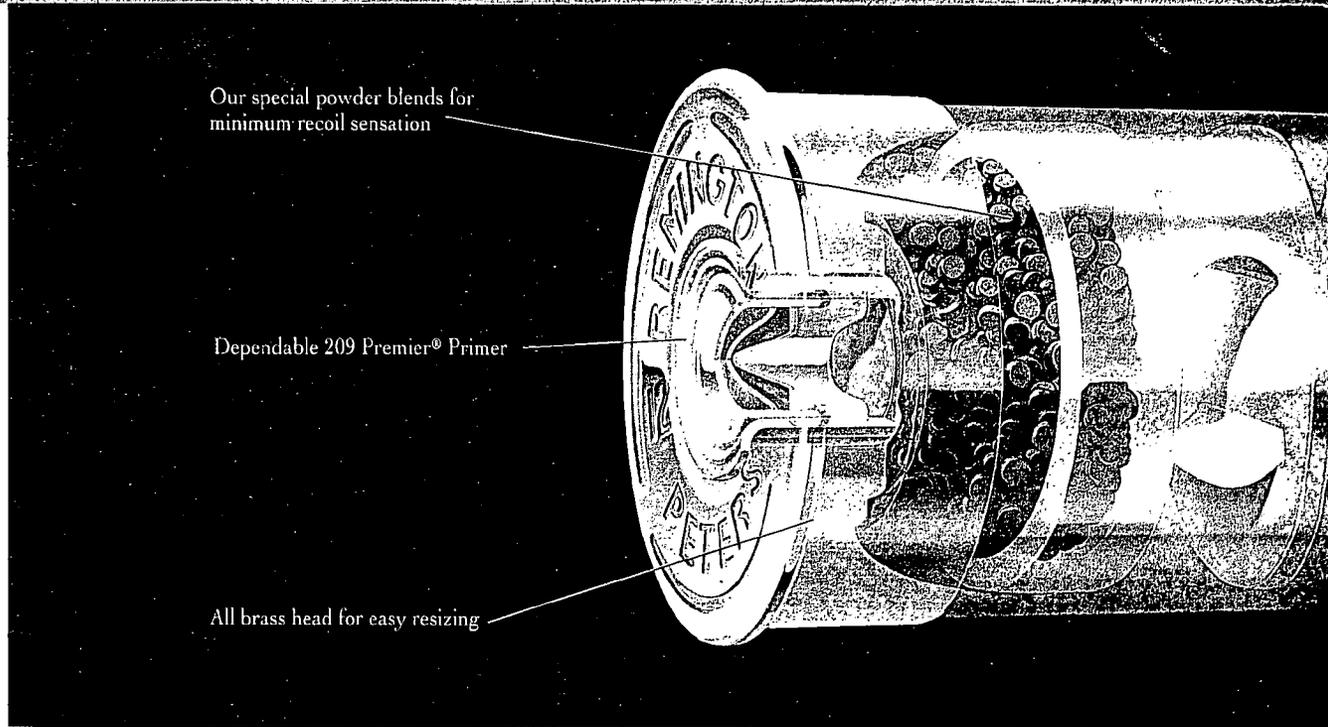

NOBODY CAN GUARANTEE YOU A WIN, BUT WE GUARANTEE OUR TARGET LOADS WILL GIVE YOU THE CONFIDENCE TO WIN.

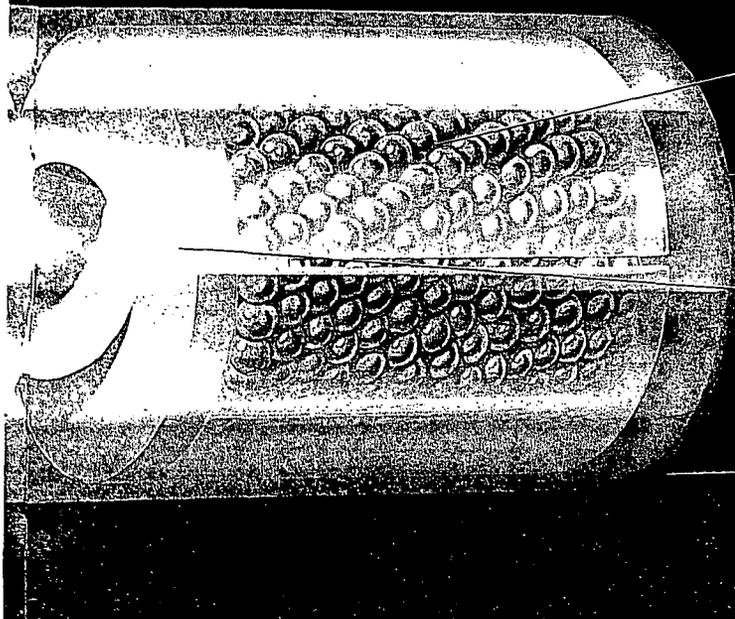

We know how serious you are about winning, so we make shells that demonstrate our understanding of what it takes to be a champion. Our Premier® Target loads are designed for the exacting demands of the competitive clay target shooter, and our patented Duplex® multi-layered shotshells are uniquely suited to the demands of Sporting Clays. All of our target loads have one thing in common – the best quality control in the business, for absolutely dependable performance shot after shot, round after round, tournament after tournament.

New for 1993 is a 1-oz. loading of No. 9 shot in our 20-ga. Premier® target load – the target-breaking power of a 12-ga. load with recoil that feels like a 7/8 oz. shell. We also have expanded our Duplex® Target line to include a 7 1/2 X 8 1/2 payload – a great choice for trap doubles, and a very flexible shell for the varying shots and targets served up on Sporting Clays courses these days.

DUPLEX® SPORTING CLAYS

The one thing that's predictable about Sporting Clays is its absolute unpredictability. That's why you need our Duplex® Sporting Clays ammo, the only target shell with two shot sizes, to give you a competitive edge when target size, hardness, angles, and distances all vary. With a 50/50 split of 7 1/2 X 8's in a layered combination for the ultimate in pattern density and long-range, target-breaking power. With our Duplex® Sporting Clays load, one shell covers all the possibilities.

Hard, target-grade shot for tight, even patterns

Eight segment crimp for easy reloading

Figure 8™ one-piece wad cushions and protects shot. Lighter weight for less recoil

Durable Hardbody™ hull for more reloads

PREMIER® TARGET

Features our hot 209 Premier® primer and clean-burning powder for consistent ignition, durable Hardbody™ hull for more reloads, and patented Figure 8™ wad for uniform velocities and dependable patterns. Available in both 12- and 20-gauge.

DUPLEX® TARGET

The same features as our Premier® Target loads, but with two carefully layered shot sizes in one shell — 7 1/2 x 8, or 7 1/2 X 8 1/2 — for improved patterns and more target-breaking energy at longer ranges.

REM-LITE™ PREMIER® TARGET

The right choice for shooters who want to punish targets...not themselves. Soft-shooting Rem-Lite™ target shells are ideal for long tournaments or recoil-sensitive shooters. They give you all the pattern performance you want in a target load — without the recoil. Available with 7 1/2, 8, or 9 shot.

PREMIER® INTERNATIONAL TARGET

Features a 24 gm. charge of target-grade shot that's specially graded for roundness and strict conformance to ISU specifications for pellet size and payload weight.

SMALL GAUGE TARGET LOADS

If you're going to take high overall, you've got to do it in the small gauges, and we've got the shells to help you do it. In a game where every pellet counts, you can count on Remington for the heaviest payloads of hardened, target-grade shot. Available in 20- and 28-gauge, and .410 bore. If you're an all-gauge shooter, you should be an all-Remington shooter.

PREMIER® PIGEON LOADS

Contains a full 1 1/4 oz. payload of super-hard, high-antimony pellets for dense, even patterning and maximum first-shot knockdown power on live birds.

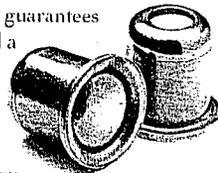

★ NEW FOR 1993

REMINGTON SHOTSHELL RELOADING COMPONENTS

If you're the type of shooter who likes to reload, Remington components can help you produce factory-quality shells with every pull of the handle. Remington target loads deliver the kind of quality competitive shooters stake their reputations on hundreds of times a day. And you can have that same level of quality, that same level of consistency when you reload yourself using Remington components. Sure, a lot of reloaders do it because it saves money, but it's also a great way to introduce the kids to shooting sports, or just a pleasureable way to spend a Sunday evening while the snow flies. Whatever the reason, try Remington components - you'll get factory-quality shells, over, and over, and over...

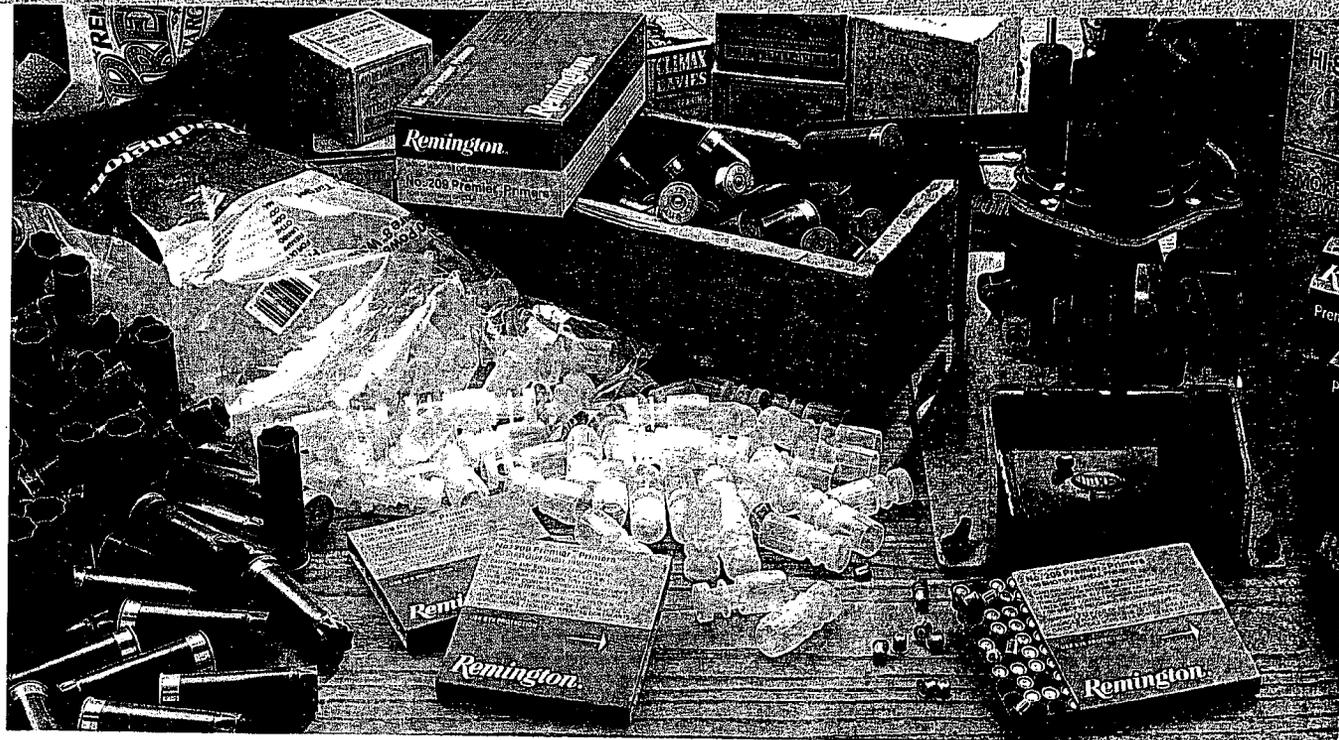

209 PREMIER® PRIMERS

The reloading standard - for instant ignition, all the time, every time. We make our 209 Premier® primers to exacting quality control standards. Our hot-burning, non-mercuric and non-corrosive mixture virtually guarantees complete powder burn and a clean, residue-free barrel. And our .410 Premier® brings 209 performance and reliability to all .410 loads. All our primers feature an all-brass primer cup and brass-plated battery cup, with a paper-covered flash hole that makes it acceptable for use with any powder type.

SHOTSHELL WADS

Whether your shotgunning takes you into a blind or onto the range, we have a one-piece shot cup/wad column that's tailored to your favorite recipe, for anything from 2 1/4-oz., 10-ga. field loads to 1/2-oz. .410 target loads.

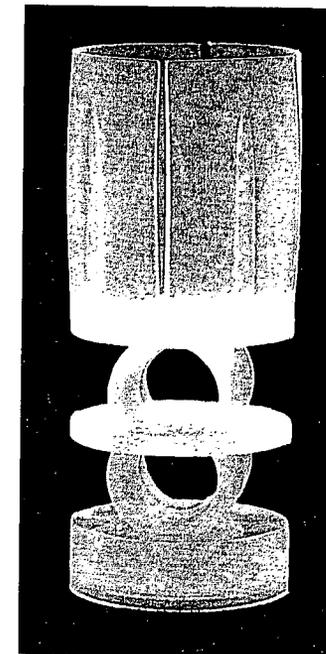

REMINGTON RELOADING COMPONENTS

SHOTSHELL PRIMERS

209 Premier®	For 12-, 20-, 28-gauge target loads, selected 12-gauge field loads and all 28-gauge field loads - specify 209 Primers, 100 per box.
.410 Premier®	For .410 target and field loads; 100 per box.

NOTE: Careless or incorrect handloading is dangerous. Improperly made handloads may cause the barrel or breech of any firearm to burst, which can result in serious personal injury.

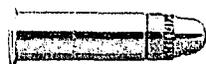

For 12-ga. trap, skeet, and sporting clays shooters, our Power Pistol® Figure 8" wad cushions the shot charge during acceleration, and is made with an elongated skirt that provides a superior seal even in overbored barrels. The result is consistent velocity, even patterning, and better functioning in autoloaders.

AT REMINGTON, GOOD THINGS ALSO COME IN SMALL PACKAGES.

We make 22s just as carefully as our center-fire ammo: all primed cases are inspected for defects. Powder charges are 100% gauged for precise weight. And our powders burn clean with lower chamber pressure for less wear on guns. Bullets are carefully swaged for the uniformity that delivers consistent accuracy, and precision-lubed to prevent barrel leading. And all Remington 22 components – brass, lead, powder and priming mixture, are 100% American-made. So even though our 22s are small in size and price, they deliver the velocity, energy, and accuracy you've come to expect from all Remington ammunition.

CBE® 22

With a muzzle velocity of only 700 fps, this round is quieter than most air guns. Perfect for small varmint and target shooting; available in shorts or longs.

STANDARD VELOCITY 22

These reliable long rifle target loads with consistent velocity and solid lead bullet deliver the accuracy needed for paper punchers who like to keep score.

HIGH VELOCITY 22

Ideal for small game or plinking. In shorts, longs, and long-rifle, these Golden™ bullet cartridges chamber easily and shoot clean.

HYPER VELOCITY 22

For superior accuracy and on-target energy, choose the 1500 fps Yellow Jacket® with 33-gr. truncated-cone hollow point bullet, or the 1410 fps Viper™ with 36 gr. truncated-cone solid bullet.

22 THUNDERBOLT™

Long rifle 22s that are big on performance, but easy on your pocketbook. With 40-gr. lead solid bullet.

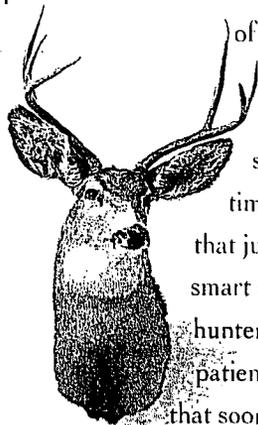

22 CYCLONE™

◀ The economy-priced long rifle hollow points for shooting rabbits, squirrels and other small game. Carries a 36-gr. lead hollow point expanding bullet.

‡ Values at 50 yards.

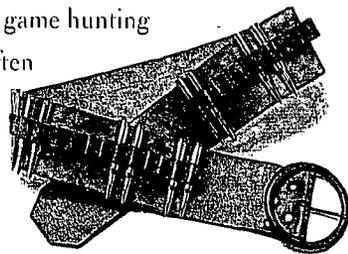

For most of us there are only a few days of getting out. You plan and daydream. You've sighted in and gotten your rifle just where you want it – then you finally pack. And for most of us, there are a lot

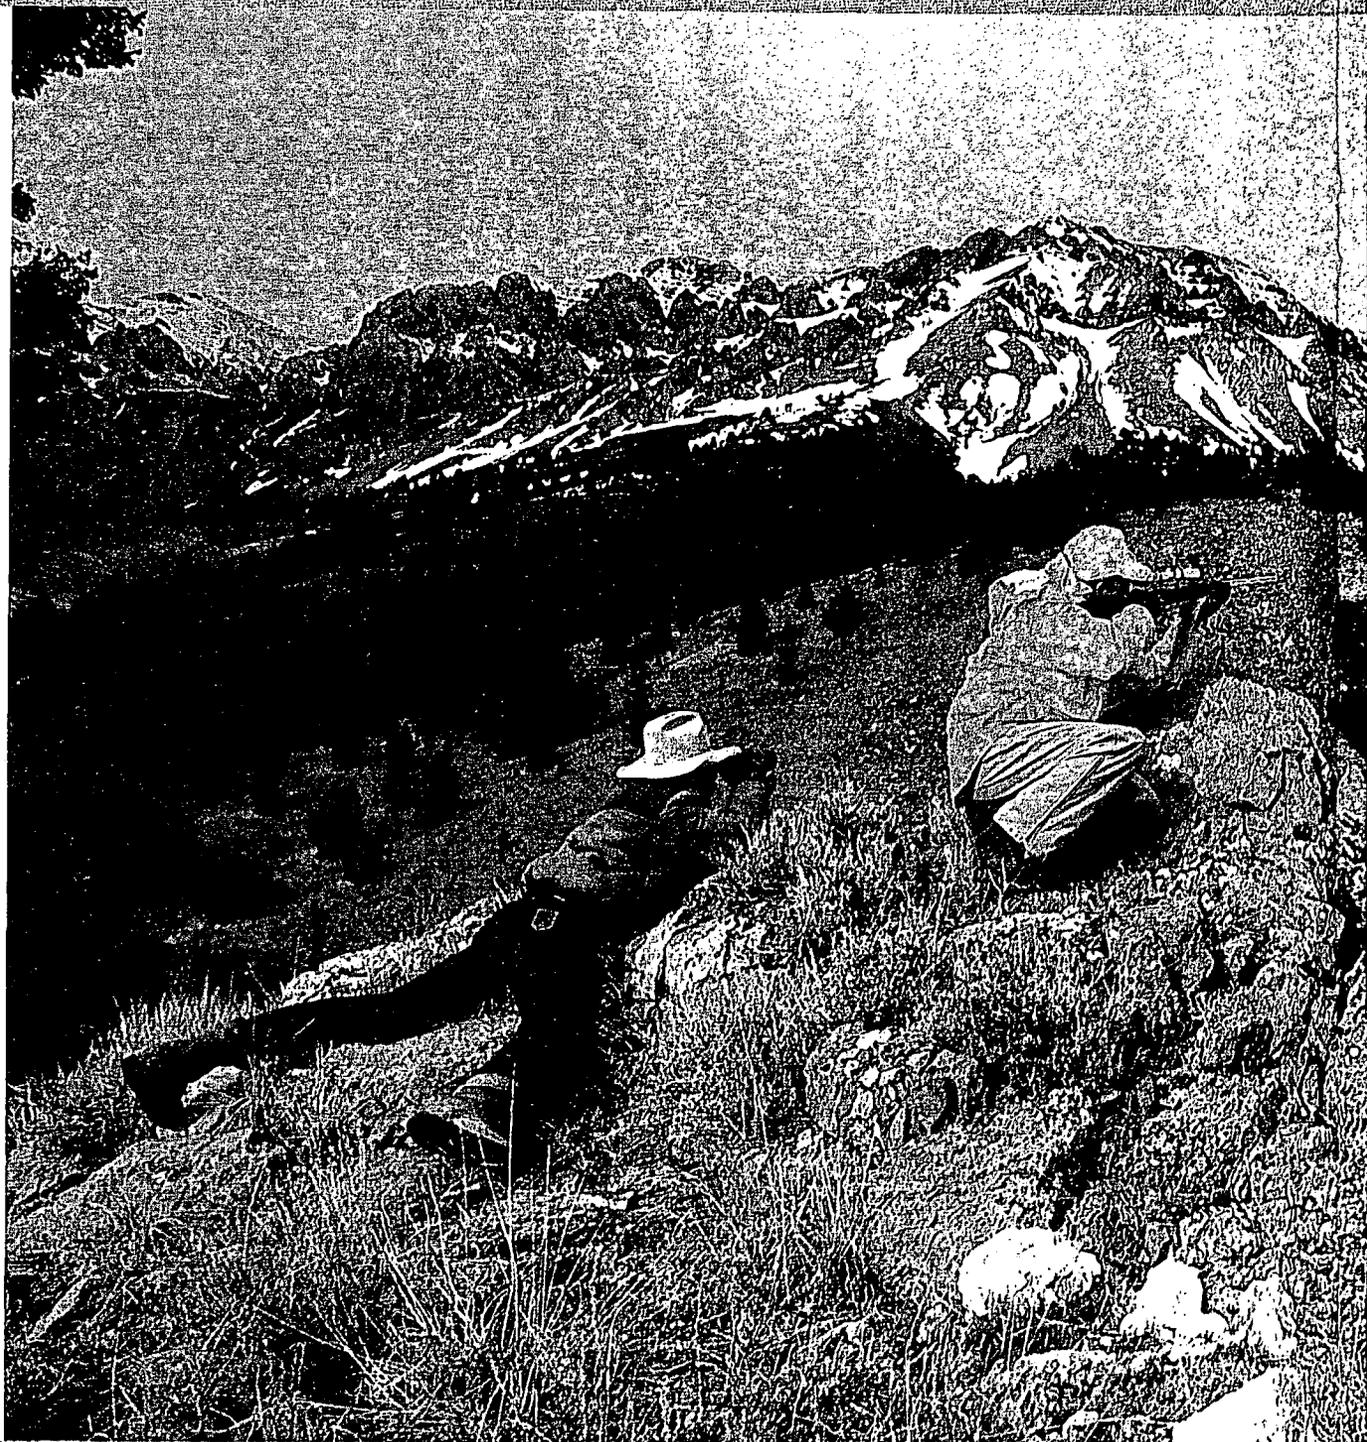

of almosts. Muleys just out of range, elk that stay in the black timber, whitetails that just seem to out-smart us. But you're a hunter, and you know patience. You know that sooner or later it

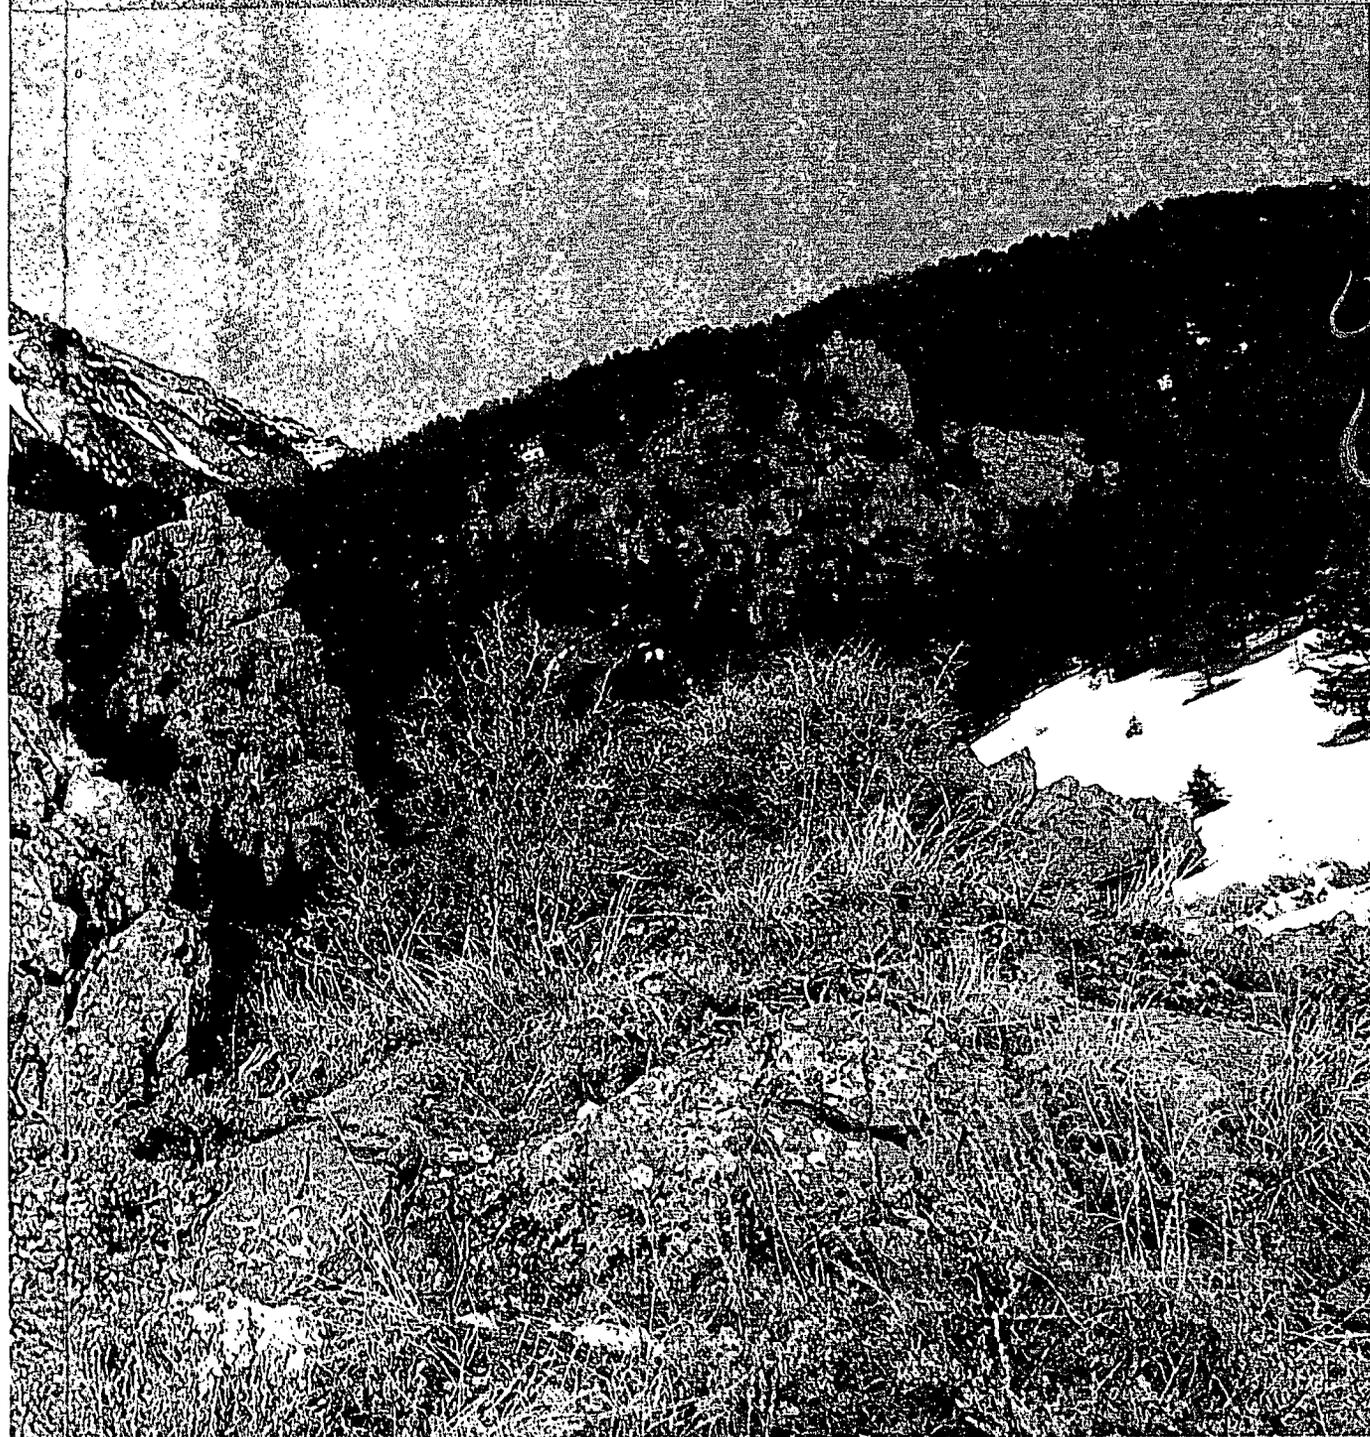

usually all falls into place. You're confident in what you're doing, you're confident in your rifle, and you're confident that even if you're not perfect, you've got a cartridge that can do the job. You know big game hunting

doesn't often give you a second chance, and you

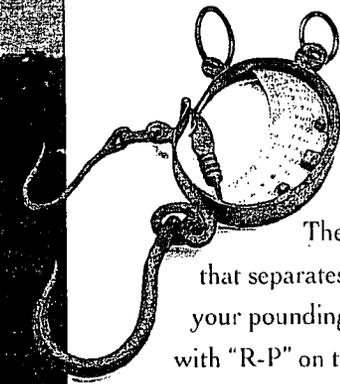

know Remington's centerfire ammunition reputation was earned the hard way. Not just on the bench, not just on paper, but in the far-off wind and the near-dark.

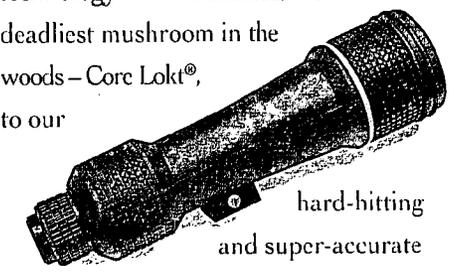

When you think back on your hunting, you remember how often you are faced with a split-second decision, that one moment when you realize it isn't going to get any better.

The moment when all that separates you and a trophy is your pounding heart, a cartridge with "R-P" on the headstamp and about a quarter of a mile of falling light. At times like that it's reassuring to know that your cartridge has everything going for it: sure-firing priming mixture, the highest grades of brass and powder commercially available, and the finest bullet technology in the business, from the deadliest mushroom in the woods - Core Lokt[®],

to our hard-hitting and super-accurate Extended Range bullets.

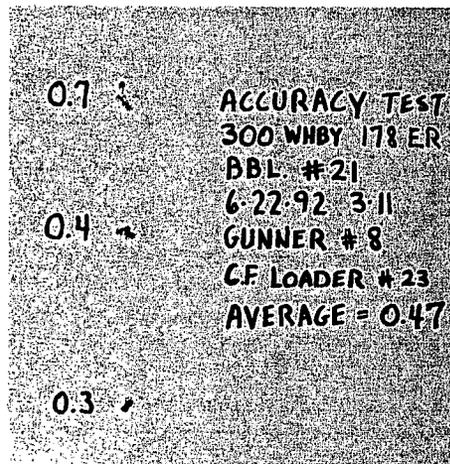

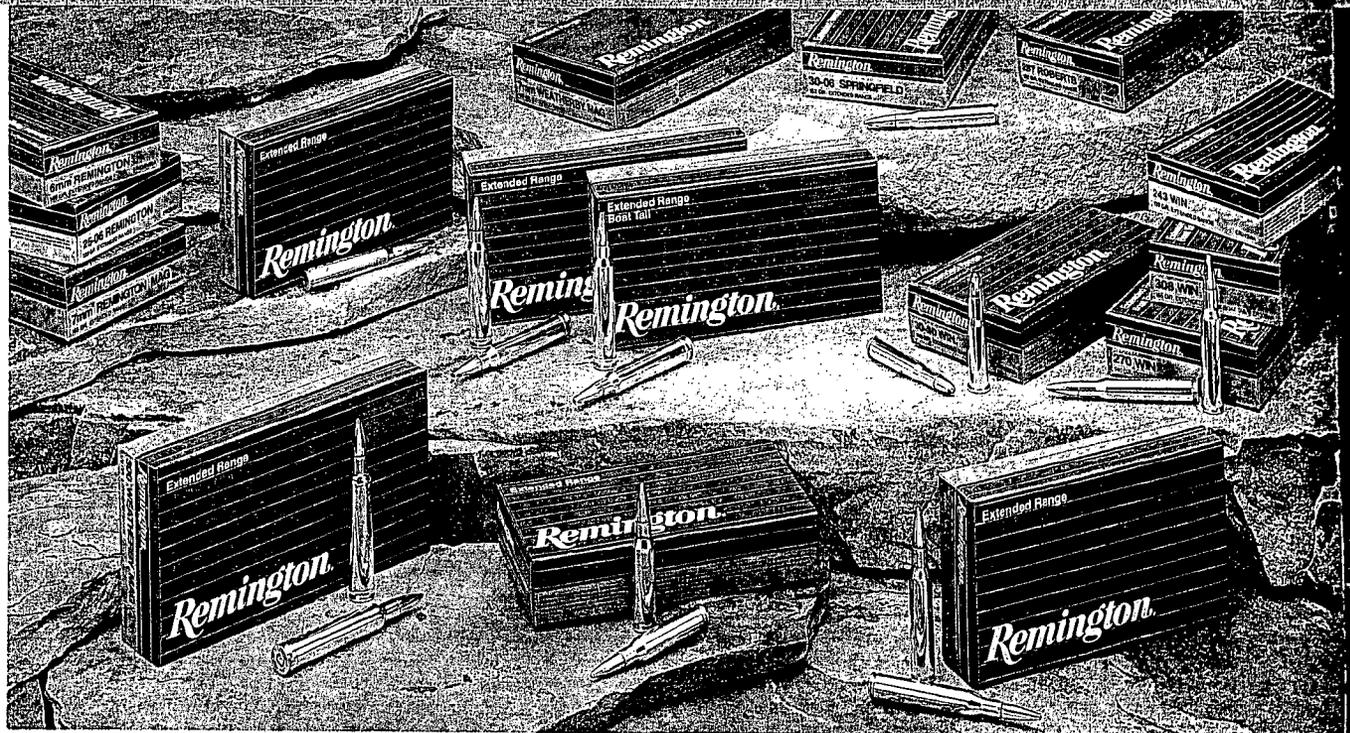

So when you get the windage cranked in, and have the elevation figured out, go ahead and let 'er rip, with the full confidence that everyone behind Remington's centerfire ammunition has done their part to bring that trophy a little closer.

**REMINGTON
EXTENDED RANGE
CARTRIDGES.
CALCULATE THE
DISTANCE, THEN
SUBTRACT FIFTY YARDS.**

If you've got a distant Muley in the cross-hairs and an Extended Range cartridge in the chamber, think before you pull the trigger. With these extraordinary rounds, you'll have to re-learn all new drops and windage figures that you pretty much had committed to memory for your old cartridges. In some cases, you'll have almost 14% less drop at 400 yds., and that can mean holding *on* his shoulder instead of holding *over* his shoulder.

The Remington Extended Range advantage lies in our two E.R. bullets that cheat the wind of its trajectory-robbing drag, so they shoot flatter, and arrive on game with considerably more energy than other bullets. As for accuracy, all you'll need is a quarter to cover your 100-yard groups. Sound extraordinary for factory hunting ammo? Before Remington Extended Range, it was. But now it's the standard everyone else is shooting for.

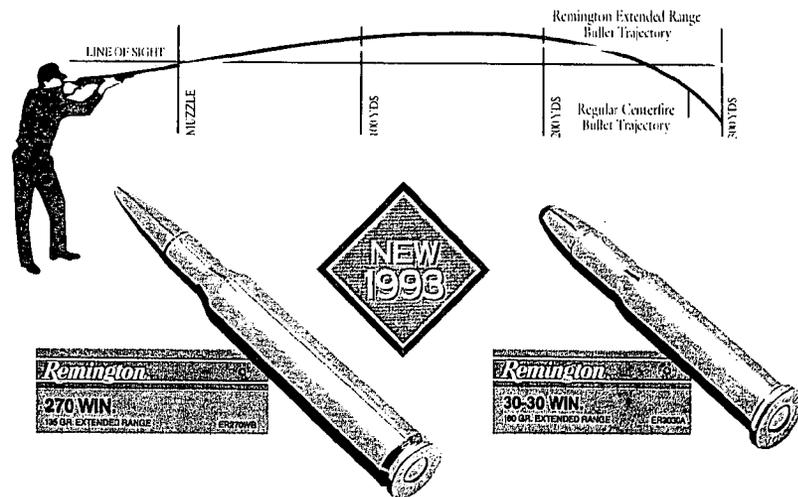

For 1993, we've added a 135-gr. flat base bullet to our 270 Win. Extended Range family, and a 160-gr. flat base Extended Range bullet to the venerable 30-30 Win. — both these loadings bring an unprecedented level of accuracy and power to two of the most popular big game cartridges on the market.

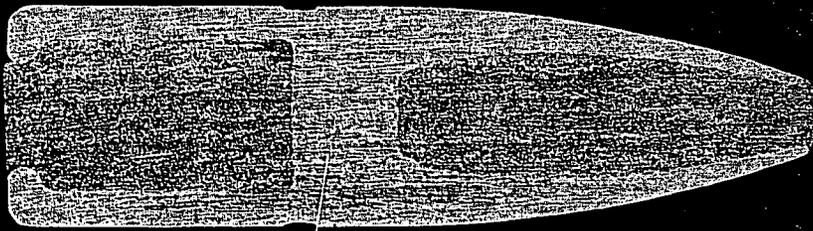

Actual control chart from our manufacturing plant in Lonoke, Arkansas, shows three, five-shot 100 yd. groups of our extended range ammunition that average .47". Not bad for factory hunting ammunition.

EXTENDED RANGE TRAJECTORY COMPARISON

Remington Extended Range Ammunition shoots flatter than regular centerfire ammunition, giving you the game stopping power you need out to 300 yards and beyond.

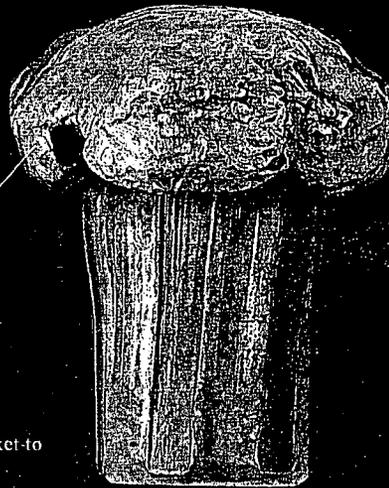

We chose the ultra-premium Swift A-frame™ core-bonded bullet because it retains 95%+ of its weight on game.

Unique A-Frame™ cross-member stops expansion at 2X bullet diameter, while protected rear core provides the momentum for deep penetration, even when working through bone at odd angles.

The core is physically bonded to the pure copper jacket to prevent core separation during mushrooming.

REMINGTON SAFARI GRADE CENTERFIRE. WHEN THE FIRST SHOT MUST BE THE LAST.

Sure, the PH is backing you up, but if you can't get the job done on the first shot, it's an odds-on bet that there are more things that can go wrong than even he can take care of. So the first one must be the last, and when you're looking at the business end of 2,000 lbs. of adrenaline-pumped Cape, you don't want to have your concentration distracted by concern over the effectiveness of your ammunition.

Remington Safari Grade ammunition is built around the finest large-caliber expanding bullet available – the Swift A-Frame™. It's made with only the highest-quality components – pure lead cores that are physically bonded to the 100% copper jackets, so it stays together as the mushroom develops. Weight retention is the highest of any large-caliber expanding bullet available today.

All our Safari Grade cartridges are loaded by Remington employees with a full measure of respect for the situations under which they will be used. Priming mixture is made under strict quality control standards. Finished primers are individually inspected three times before loading. Cases are nickel-plated to ensure smooth feeding and reliable extraction. Every round is hand inspected and measured for dimensional accuracy and chamber conformity. We know of no higher quality standards employed in the manufacture of centerfire ammunition anywhere in the world.

For 1993, we have added the 300 Win. Mag. to the Safari Grade family. It carries the heaviest bullet we load for this cartridge – a 200-gr. Swift – that exits the muzzle at 2825 fps. and 3544 ft.-lbs. of energy. A very potent medium-bore loading suitable for all North American big game, and all African plains game.

**CORE-LOKT®
POWER-LOKT®
BRONZE POINT™**
WHY SO MANY HUNTERS
AND SHOOTERS INSIST
ON THE GREEN AND
YELLOW BOX.

Great cartridges often earn their reputations because of great bullets. And that's why the first choice of the serious rifleman has always been Remington. Whether your passion is Rock Chucks at 400 yds. or Whitetails at 65, we've got a line-up of bullets and cartridges that makes our centerfire ammo the best choice on the market today. And everything that goes into Remington centerfire ammunition is of the highest quality: top-grade 70-30 cartridge brass, specially blended powders, and our Kleanbore® primers for dependable ignition and non-corrosive performance. Remington centerfire cartridges earned their reputations the hard way. In the mountains, in the woods, on game. So when you reach that one moment in the hunt when you know it just won't get any better, it's comforting to know that you can't shoot any better ammunition than Remington.

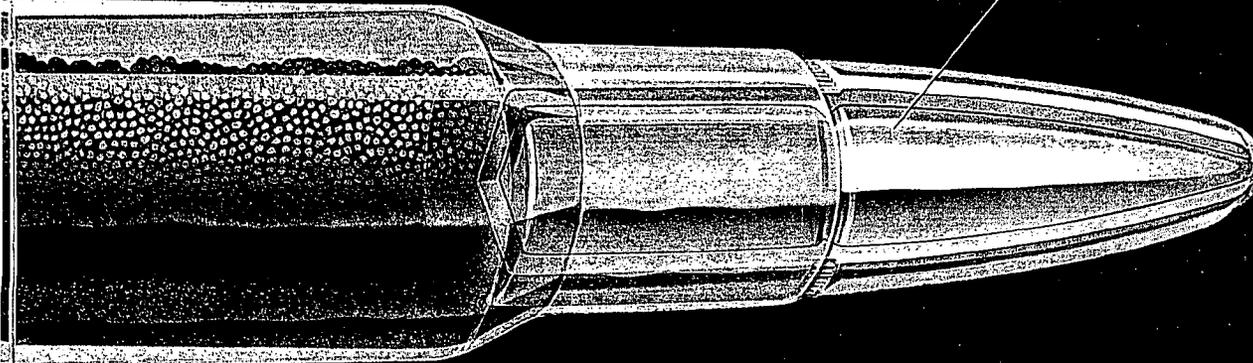

Kleanbore® Primer for instant ignition

Powders specifically selected and blended for maximum performance in each caliber

Actual recovered samples of 50 caliber Core-Lokt® soft point bullets showing extremely uniform and complete mushroom upset progression.

Core-Lokt® jacketed bullets – often imitated, never equaled. The on-game performance of Core-Lokt® is the standard by which expanding hunting bullets are measured.

CORE-LOKT® SOFT POINT BULLET

The most popular and most imitated jacketed bullet for over 53 years. Core-Lokt® bullets provide superior penetration and controlled expansion on medium and heavy game. The heavy mid-section jacket locks the lead core and jacket together, and stops expansion at the optimum point for maximum energy transfer. The result is a bullet that stays together on impact, expands in a controlled manner, and mushrooms uniformly to nearly twice the original diameter.

CORE-LOKT® POINTED SOFT POINT BULLET

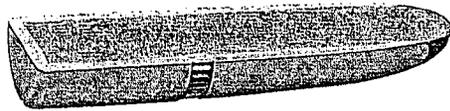

The sleek, pointed profile offers flatter trajectory at longer ranges. High retained energy down range and controlled expansion on impact makes this bullet the perfect choice for all medium to heavy game.

POWER-LOKT® HOLLOW POINT BULLET

The right choice for long-range pinpoint accuracy. The copper jacket is electrolytically bonded to the lead core, forming a perfectly balanced, concentric projectile. Its dependable accuracy makes this an ideal choice for long-range target and varmint shooting.

BRONZE POINT™ EXPANDING BULLET

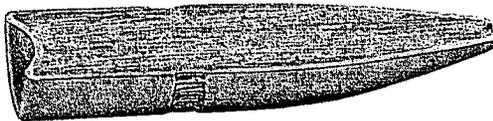

The bronze insert allows us to shape the nose of this bullet to exacting tolerances, for a high ballistic coefficient, that lets the bullet slip through the air with minimum velocity loss and wind drift, even at extreme ranges. The insert also protects the bullet nose from being deformed by recoil while in the magazine.

BRONZE POINT™ EXPANDING BULLET

**REMINGTON
GOLDEN SABER™
THE CUTTING EDGE OF
HIGH-PERFORMANCE
BULLET DESIGN.**

If you're looking for a self-defense or hunting cartridge with true stopping power, look no further. Remington Golden Saber™ high-performance handgun ammunition is built around a revolutionary new hollow point bullet that is optimized for accuracy, maximum expansion and penetration, and weight retention.

The Remington Golden Saber™ hollow point bullet has a jacket that's much thicker than other jacketed bullets, and it's made entirely of cartridge brass...not copper gilding metal. The Golden Saber™ bullet features our industry-exclusive Driving Band™ waist profile which locks the core to the jacket. In addition, the Driving Band™ design allows the bullet to become precisely aligned with the bore before the Driving Band™ engages the rifling. This alignment provides superb accuracy, a trait not usually associated with hollow point ammunition. These key features

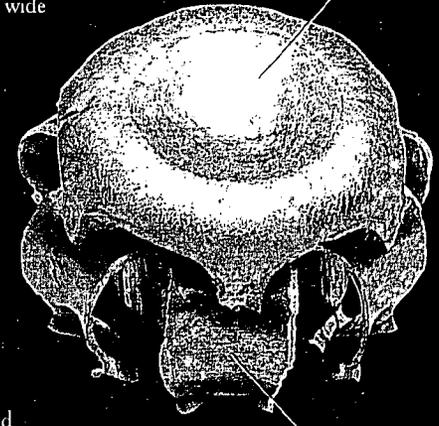

Brass jacket Material is stiffer, releases energy over longer distance while mushrooming

Reduced bullet nose diameter allows for precise bore alignment and match-grade accuracy

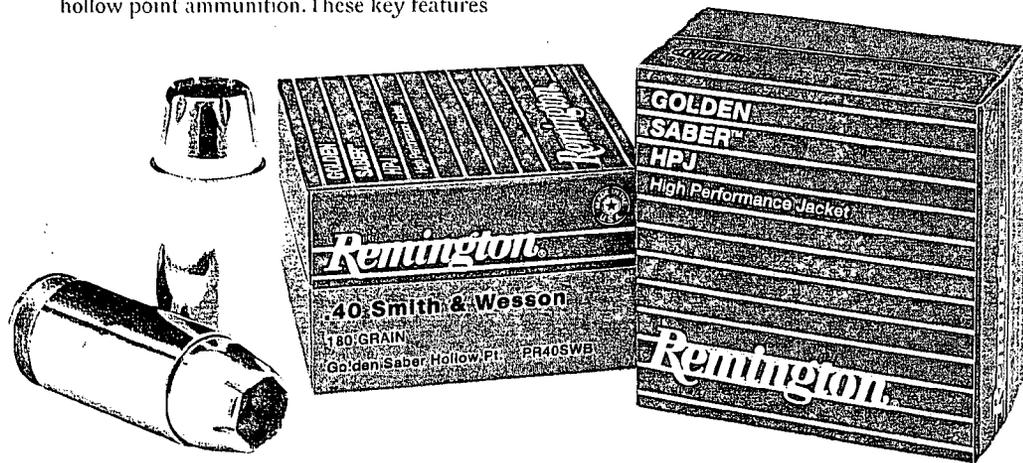

Jacket is nose cut completely through in order to promote "mushroomability" over a wide range of velocities

Minimal lead deformation retains energy for deeper penetration

Exclusive Remington Driving Band™ locks the lead core to the jacket and reduces rifling contact friction for optimum muzzle velocity

High performance jacket expands to a larger diameter than lead core - over 1.65X caliber diameter

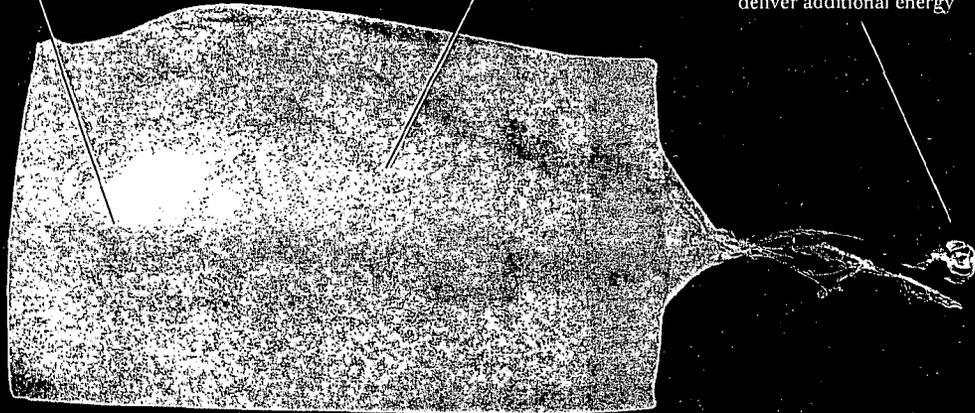

**GOLDEN SABER™ HPJ
(HIGH PERFORMANCE JACKET)**

Caliber	Order No.	Primer Number	Wt. Grs.	Velocity (fps)			Energy (ft.-lb)			Mid range Trajectory	
				Muz.	50 yds.	100 yds.	Muz.	50 yds.	100 yds.	50 yds.	100 yds.

Initial impact of Golden Saber™ causes longer temporary stretch cavity due to higher jacket stiffness

Radial swing of jacket sections enhance terminal performance and final mushroom diameter

After final expansion of 1.65X or more, bullet continues to penetrate and deliver additional energy

HIGH-SPEED PHOTOGRAPHY OF GOLDEN SABER™ FIRED INTO BALLISTIC GELATIN

The pictures above show the totally controlled and extremely uniform expansion of the Golden Saber™

all contribute to the tremendous performance of the Remington Golden Saber™ brass-jacketed hollow point bullet.

Unlike conventional hollow point bullets, the jacket of the Golden Saber™ is designed to expand to a larger diameter than the lead core. Mushroom performance is enhanced by nose cutting the jacket completely through – guaranteeing consistent expansion over a wide range of velocities and in varying mediums. Deep penetration is achieved by minimizing lead core deformation through precise hollow point cavity design.

Other hollow point designs mushroom rapidly and then continue to penetrate as a smaller, solid mass. With the higher jacket stiffness of the Golden Saber™ jacket, expansion occurs over a longer distance, creating a larger-volume cavity. That's because the jacket sections tend to make a radial swing outward during expansion rather than sliding down the bullet body. Penetration meets Remington's own stringent Law Enforcement standards.

The Golden Saber™ high performance bullet is not the only thing our new generation handgun ammunition has going for it. All the cases are nickel-plated for reliable feed and function in autoloaders and dependable extraction from revolvers. Powders are specially treated to suppress muzzle flash. And all Golden Saber™ cartridges are both primer and mouth waterproofed.

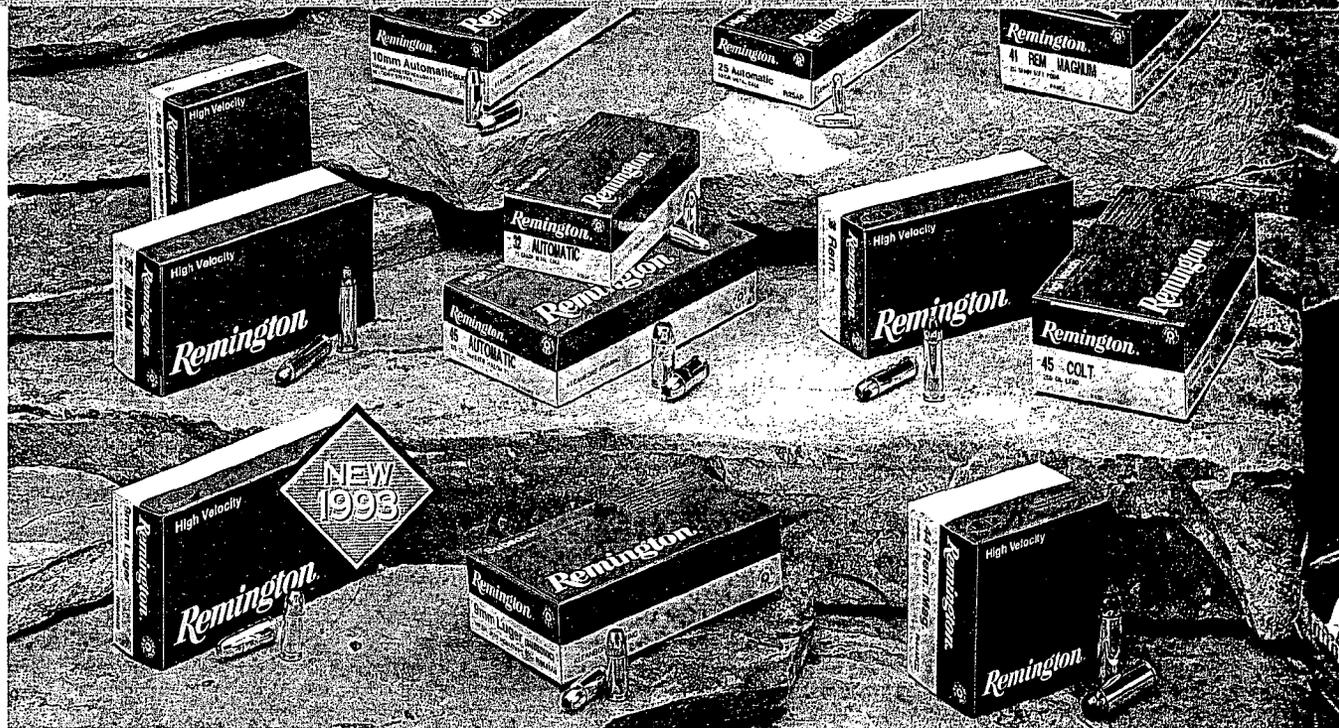

Hunting, self-defense, or law enforcement – whatever your need, Remington's new generation Golden Saber™ brass-jacketed hollow point high-performance cartridges are a cut above the competition!

**PISTOL OR WHEELGUN,
WE'VE GOT YOU COVERED.**

When you drop Remington cartridges into your favorite revolver, you're chambering the very best handgun ammo money can buy. And when you insert a magazine of our pistol ammunition, you'll be letting the slide fall on 126 years of cartridge-making experience. Experience that includes being the first ammunition company to market a centerfire cartridge, and the invention of Kleanbore® priming – which revolutionized cartridge ignition.

The pistol and revolver cartridges we make at Remington today are the extension of all that experience. Our plant at Lonoke, Arkansas is the most technologically advanced ammunition manufacturing facility in the world, operated by people who care as much about making high-quality cartridges as you do about shooting them. So, when you buy a box of Remington handgun ammunition, you get more than just cartridges – you get 126 years of cartridge-making experience. For revolvers and pistols, from rimfire to magnums, and with every type of bullet you want for your style of shooting – we've got you covered.

New for 1993 is a 147 gr. metal case match loading in 9mm for competition and training. Provides flawless functioning in today's large-capacity semi-auto pistols.

**SEMI-JACKETED
HOLLOW POINT**

Features a unique scalloped jacket design engineered to deliver optimum expansion with controlled penetration, for maximum energy transfer.

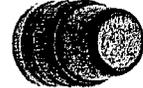

METAL CASE

A general purpose bullet for all autoloading pistols. Metal case construction ensures reliable feeding and trouble-free functioning.

**SEMI-WADCUTTER
LEAD BULLET**

Hard hitting lead bullet with wadcutter paper target precision.

LEAD GAS-CHECK

Minimizes lead fouling in higher-velocity loads.

**JACKETED HOLLOW
POINT**

The full-length jacket ensures positive, predictable performance in all autoloading pistols. Hollow point construction promotes uniform expansion while controlling penetration.

SOFT POINT

Exposed lead soft point provides deeper penetration with less expansion than semi-jacketed hollow points.

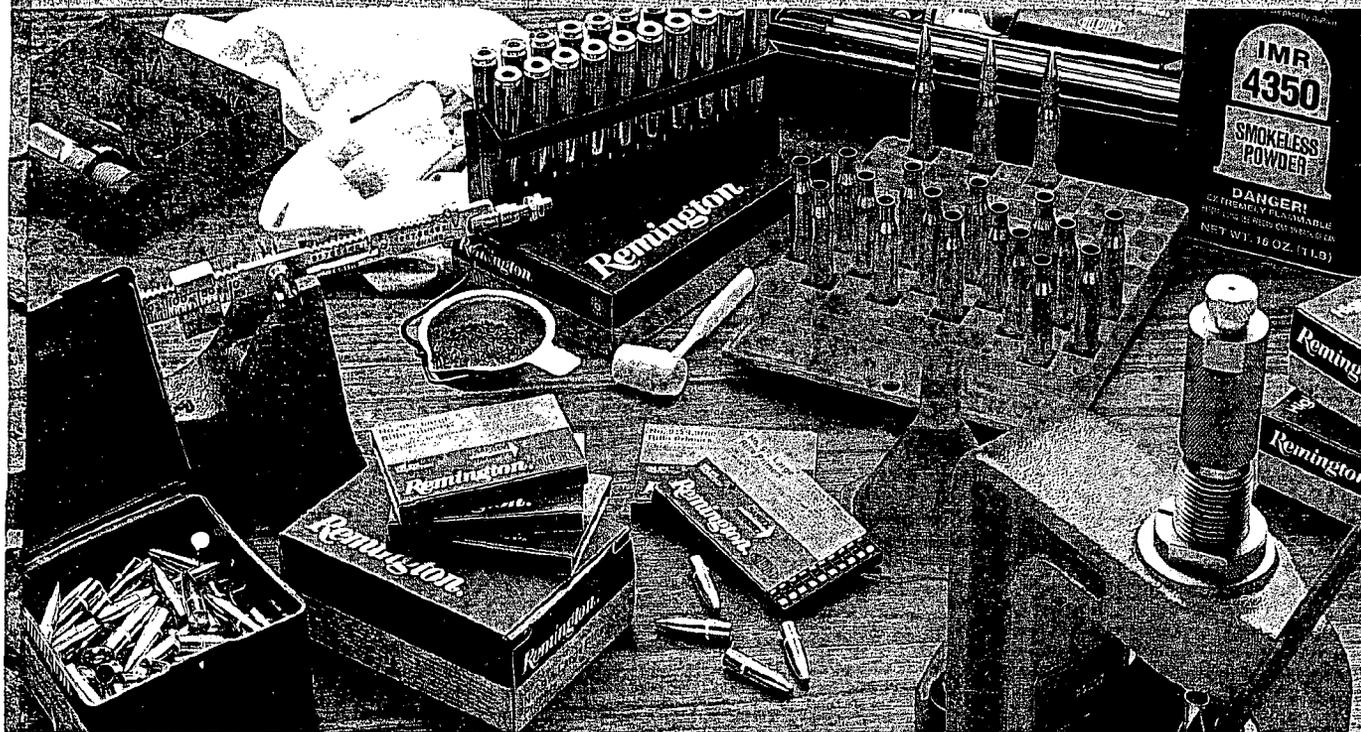

WADCUTTER MATCH

For precise target shooting and easier scoring, our Targetmaster® wadcutter delivers superior accuracy with excellent paper-cutting performance.

LEAD ROUND NOSE

Our general purpose bullet for all revolvers.

CENTERFIRE RELOADING COMPONENTS

Every Remington centerfire component is produced from the highest quality materials, and is 100% American made.

In bullets, we have the super-accurate Power-Lok[®] hollow point bullet in .17 to .25 caliber. The copper jacket of the Power-Lok[®] is electrolytically bonded to the lead core, providing extremely uniform concentricity for the long-range accuracy varminters demand.

In mid-size calibers, we have the legendary Core-Lok[®] pointed soft point and Bronze Point[™] expanding bullets. The patented Core-Lok[®] jacket design controls expansion for uniform and complete upset on-game. The nose insert of the Remington Bronze-Point[™] gives it a precise shape for high ballistic coefficient, and minimizes the effects of aerodynamic turbulence.

For handgunners, we have jacketed and semi-jacketed hollow point bullets in sizes from the popular 9mm to the big 44s and 45s, and metal case, soft point, wadcutter, semi-wadcutter, and lead round nose bullets in a wide range of popular calibers.

We offer a large array of Kleanbore[®] primers and factory brass cases for calibers from the 17 Remington and 22 Hornet all the way to the 416 Remington Mag. and 458 Win. Mag. We also sell URBR cases for bench rest shooters who prefer to do their own forming, and 6mm BR cases without flash holes for those who want to drill their own.

NOTE: Careless or incorrect handloading is dangerous. Improperly made handloads may cause the barrel or breech of any firearm to burst, which can result in serious personal injury. †This brass does not contain flash holes

★ NEW FOR 1993

**REMINGTON
GAME LOADS – HOW YOU
CAN GET A LITTLE MORE
BANG OUT OF YOUR BUCK.**

If you are an Upland hunter or Dove shooter, then you probably buy your shells by the case rather than by the box. And if you want the assurance of high-quality, factory-loaded Remington shells, but at a more attractive price, check out our Game Loads and Promotional shotshells.

With twenty specs in our line of Game Loads, Heavy Game Loads and Sport Loads, you'll find a recipe that's just right for your style of hunting, from rabbits and squirrels to pheasants, grouse, dove and quail. And these shells share the same great components as all our Remington shotshells: all-plastic hull/base wad, Kleanbore® priming, specially formulated powder blends, Power Piston® wads, and top-quality Remington chilled shot for consistently uniform patterns.

If you shoot a lot, try Remington Game Loads – we bet you'll find they give you more bang for your buck.

**UMC™: TOP
QUALITY + DEPENDABLE
PERFORMANCE + LOW
PRICE = GREAT VALUE.**

For over a century, the Union Metallic Cartridge Company name has been synonymous with some of the finest ammunition made in the United States. Since its beginning in 1867, UMC™ has been blazing a trail of innovation in cartridge-making excellence that continues to this day. UMC™ was the first ammunition company to produce centerfire ammunition, and was responsible for the development of the .44-40 – “The cartridge that won the West”, the 22 Long Rifle cartridge, and super-accurate “Palma Match” target ammunition. All these milestones mean one thing: Experience – experience that translates into outstanding performance at a very attractive price.

At our UMC™ division, we make only first-quality product, in a limited line of popular specifications, so we can bring you the benefit of manufacturing efficiencies that keep costs low. We offer ten handgun loadings, three rifle specs, and our UMC™ 22 Long Rifle cartridges.

The rifle, handgun and rimfire ammunition we make today is the product of 126 years of design innovation and manufacturing excellence. So try UMC™ – and enjoy the experience.

“He got behind, got excited, then got too far ahead,” you say to yourself as you step into the station. *Heart rate accelerating.* O.K. Settle down. Plant your feet where you

want to break the bird... right after the oak, just before it disappears behind the big beech. You've got about two seconds, then even Jon Krueger couldn't

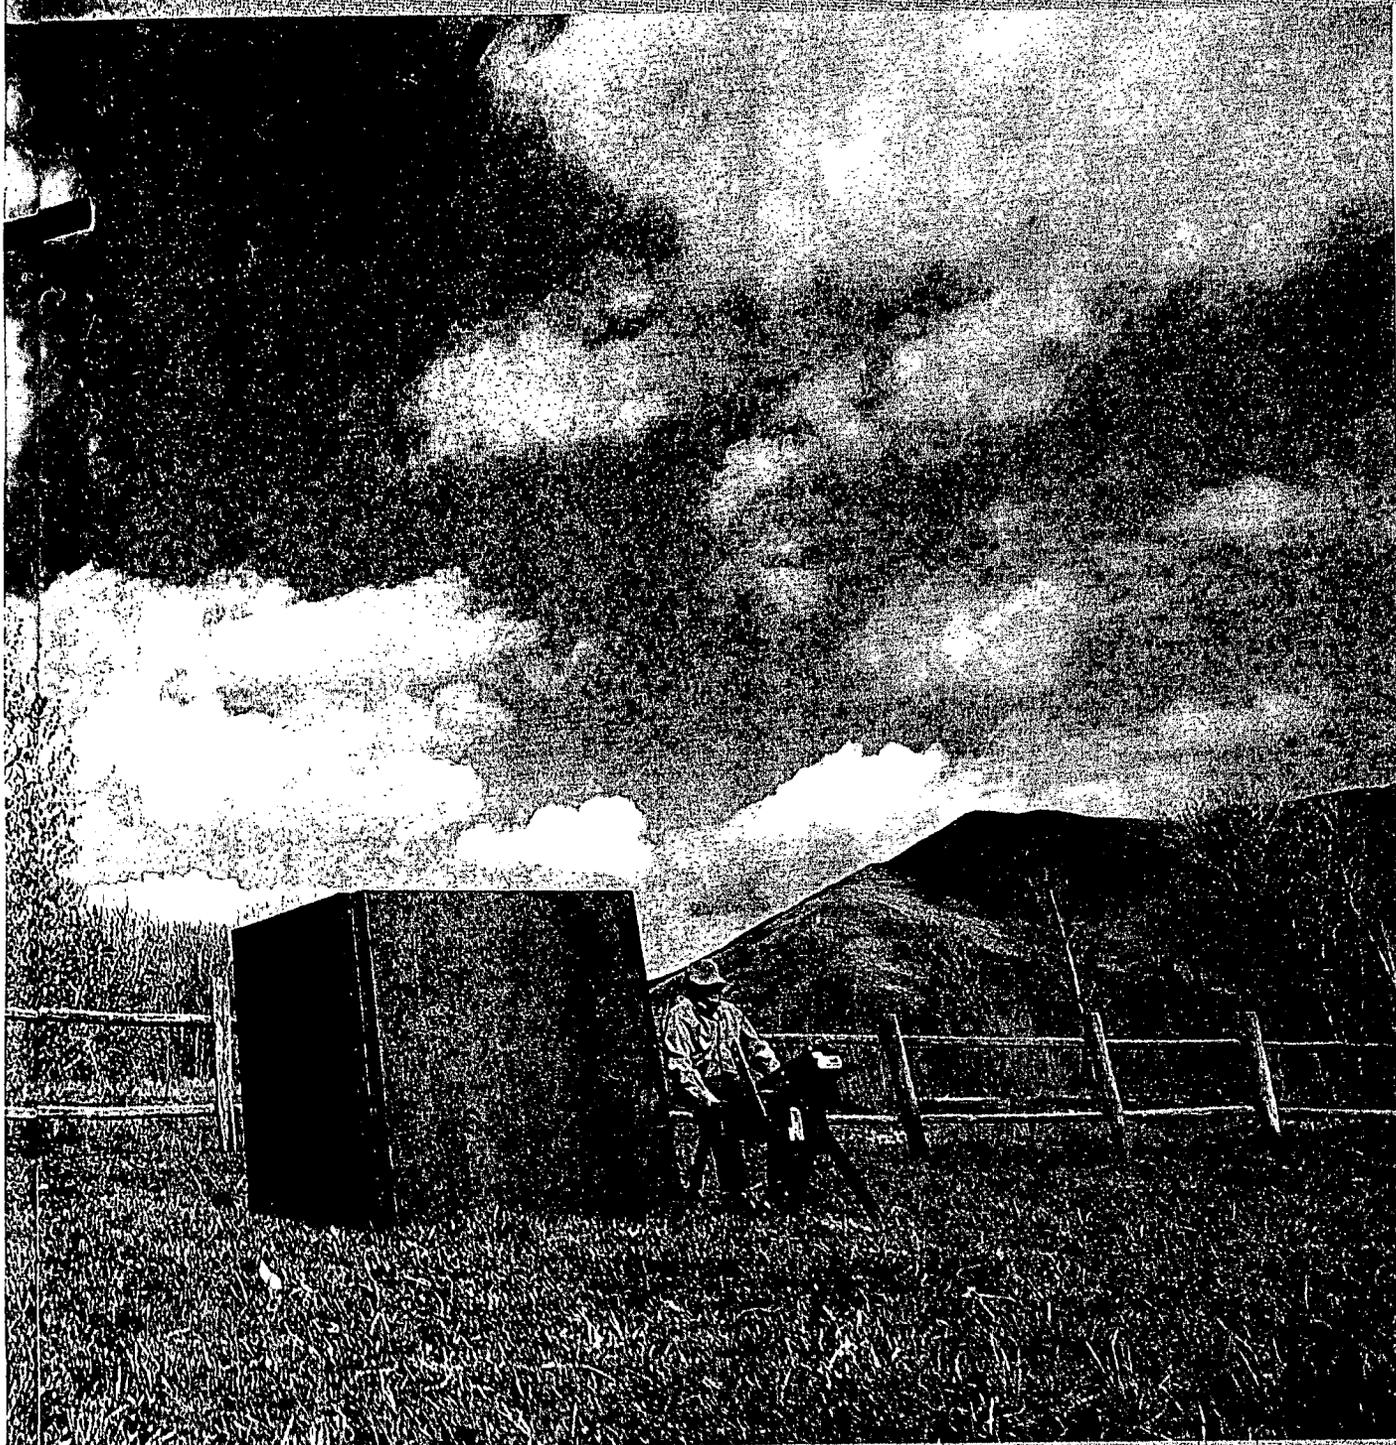

catch it – unless he's found a way to shoot through trees. *Heart rate still going up.* Drop in the shells, close the action. *Relax.* Set the gun, slip the safety. *Heart's really pounding now... Why?* It's just a friendly round of Sporting Clays, but it happens every time, doesn't it?

Go on, do it. Take a deep breath, let it out, look back to the trapper, and call it. Two X's on the sheet.

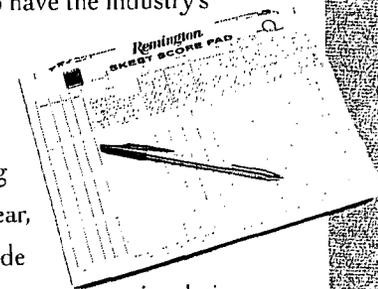

On to Fur & Feathers...

Sporting Clays demands your best, and as a serious target shooter, you demand the best from your gun, your ammo, even the clothes you wear. And we're right there with you, with a full line-up of competition-bred shooting clothing that'll let you smoke Trap, Skeet, or Sporting Clays targets in complete comfort, all day long, in just about any weather imaginable. From hot weather shirts and vests to lightweight sweaters and jackets; and from supple and responsive shooting gloves to foul weather gear, hats, and socks. We also have the industry's broadest offering of high-performance hunting and fishing wear, including a wide selection of camo patterns, insulations and styles, backed up by a wide array of hard-working luggage, accessories, and the legendary Remington knife collection. From underwear to outerwear – no matter what your game. From the oldest American company *in* the game.

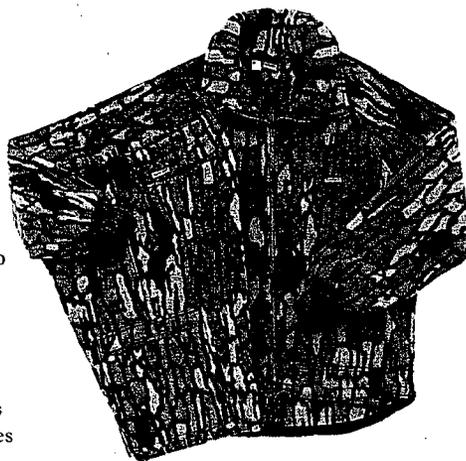

REMINGTON SPECIAL PURPOSE CLOTHING

It's your third day of this, and you've renamed the sport Turkey "sitting." You are knee-deep in acorns, there are scratches everywhere, and yet you still can't seem to coax that talkative old boy into sight. Ready to quit? Never. Oh-oh, he's finally decided to come in and look you over. Aren't you glad you're wearing your Remingtons?

SILENT STALKER JACKET & PANT

Ideal for deer and turkey hunting, these garments are made of soft, warm Polarplus®. Jacket features full-length zipper, zip-up collar, drawstring bottom, rib-knit cuffs, inside security pocket, and two outside pockets. The Pant features an elastic waist, drawstring cuffs, and five pockets. Blaze: Woodland, Trebark®, Trebark® II and Mossy Oak® Camo. Jacket W233. Pant W334.

SILENT STALKER JACKET AND PANT

ULTIMATE CLIMATE™ JACKET & PANT
Available in Big and Talls in Loden and Trebark® II

ULTIMATE CLIMATE™ JACKET & PANT

Made of a soft, quiet Supplex® shell with quiet, Gore-Tex® z-liner™ insert. The shell is also treated with Zeipel® HT to resist rain and stains. Jacket has detachable hood, windskirt, reinforced elbows, drawstring waist, and eight pockets. The pant features front pockets, flapped back pocket, belt loops, suspender buttons, elastic back and side-seam leg zippers for easy dressing. Red, Dark Grey, Forest Green, Tan, Loden; Woodland, Marsh, Mossy Oak™ and Trebark® II Camo. Jacket W220. Pant W320.

WOODSMaster SHIRT & PANT

WOODSMaster SHIRT & PANT

For warm-weather turkey or bow hunting. Made of lightweight, durable, shrink-resistant Dacron®/cotton blend. The Shirt has long sleeves and generous, button-flap pockets. The Pant has belt loops, suspender buttons, drawstring cuffs, waterproof seat, and seven pockets, including two large cargo pockets and two small inside cargo pockets. Woodland Camo, Mossy Oak™ Camo. Shirt W540. Pant W332.

Available in Big and Talls in Loden

BIG GAME
PARKA & OVERPANTS

CLASSIC GORE-TEX® RAIN SUIT

REMINGTON MULTI-PURPOSE CLOTHING

The same rugged construction and materials as our hunting clothing, but in colors and styling that are better suited for sitting on the 50-yd. line than at the base of an oak tree.

RANGER JACKET

Designed to wear on its own or to zip into Remington 4-Way Parkas. Made of windproof, water-repellent Supplex® nylon and treated with Zepel® for additional rain/stain repellency. Thermoloft® insulation and fleece-lined collar for warmth, rib-knit waist and cuffs for fit, action back and sleeves, inside security pocket and zippered front pockets. Loden, Tan. W281.

POLARPLUS® JACKET AND PANT

The warmth of wool at half the weight. Napped and double-sheared to prevent pilling. Jacket has zippered patch pockets, rib-knit waist and cuffs, and Dolman sleeves. Pant has elastic waist, front pockets, and hip pocket and side-seam zippers. Loden, British Green. Jacket W261. Pant W360.

BIG GAME PARKA AND OVERPANTS

Parka has Cordura® outer shell with Gore-Tex® z-liner™ insert, and Thermolite® insulation. Detachable hood, fleece-lined collar, climbing cut front, adjustable button cuffs, reinforced collar, and fleece-lined hand-rest pockets. Zepel® treated for rain/stain resistance. Blaze, Tan, Loden. W170. Overpants have Gore-Tex® z-liner™ inserts, and are available insulated with Thermolite® or non-insulated. Includes two front slash pockets, patch pocket on left hip, elasticized back waist, ankle-to-knee side-seam zippers, belt loops and suspender buttons. Tan, Loden, Blaze. Insulated W371. Non-Insulated also in Trebark® II W372.

CLASSIC GORE-TEX® RAIN SUIT

Constructed of Supplex®/Gore-Tex® fabric for light weight, and treated with Zepel® for rain and stain resistance. Jacket and pant are guaranteed to keep you dry even in extreme wet weather, and feature plenty of pockets. British Green. Jacket W267. Pant W367.

REMINGTON WATERFOWL CLOTHING

The guide said to just lay down in the stubble and wave the two white flags he gave you. Trouble is, there's about four inches of wet snow between each row, and more coming. "There's no way," you think to yourself as you lay back. But this is Texas, not Maryland. After a few minutes you notice that the horizon appears to be moving, and a fuzzy black line of about 200,000 geese begins to move your way, getting noisier by the second. Your heart starts to pound as you try to press yourself deeper into the snow. Aren't you glad you're wearing your Remingtons?

WATERFOWL PARKA

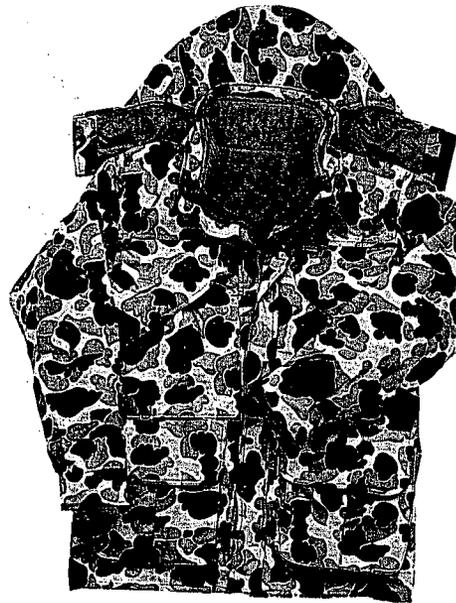

A tough Cordura® shell laminated to waterproof Gore-Tex® fabric and treated with Zepel® for rain/stain repellency. Also features Thermolite® insulation for extra warmth, action back and sleeves, adjustable cuffs, drawstring waist, and a variety of warm and functional pockets, including a hidden call pocket. Brown Camo. W180.

INSULATED WATERFOWL BIB

Made of the same Cordura®/Gore-Tex® fabric/Zepel® combination as our Waterfowl Parkas, these bibs are available insulated with Thermolite® for extra warmth without bulk. Features elastic shoulder straps, Lycra® rib-knit side panels, side-seam zippers, and plenty of pockets. British Green, Brown Camo, Marsh Camo. W480.

WATERFOWL 4-WAY WADER

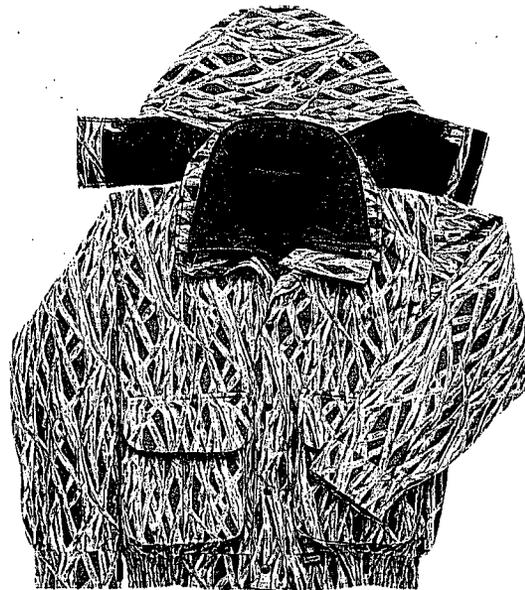

Like the 4-way Parka, the wader features a removable, reversible, insulated liner that can be worn separately or with the outer shell, but with a shorter waist length that's perfect for wading. Incorporates action backs and sleeves, adjustable cuffs, drawstring waist, and a variety of pockets. Brown Camo, Marsh Camo. W187.

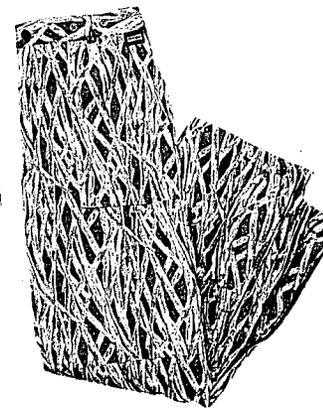

WATERFOWL PARKA

WATERFOWL BIBS

WATERFOWL 4-WAY WADER

WATERFOWL OVERPANTS

**GORE-TEX®
FABRIC FOR
WATERPROOF,
WINDPROOF,
BREATHABLE
PROTECTION.**

Our Waterfowl garments are made of a tough, lightweight Cordura® outer shell laminated to waterproof, windproof, breathable Gore-Tex® fabric treated with Zepel®. While there are other waterproof materials on the market, Remington continues to use Gore-Tex® fabric because it is the most waterproof, most breathable, and most durable of these fabrics.

Gore-Tex® Outerwear carries the "Guaranteed To Keep You Dry"™ pledge, and all Gore-Tex® fabric combines a membrane that contains over nine billion pores per square inch laminated to a shell fabric. These pores are small enough to keep water out, but large enough to allow perspiration vapor to escape.

All Remington Waterfowl outerwear qualifies for the Gore-Tex® Outerwear "Extreme Wet Weather" hangtag.

WATERFOWL 4-WAY PARKA & OVERPANTS

ENGLISH GUNNING COAT

WATERFOWL BIBS

WATERFOWL 4-WAY PARKA

For exceptional versatility in a wide range of weather conditions and temperatures, the 4-Way Parka features a removable, reversible liner that can be worn separately or with the outer shell. The liner has durable Cordura® on one side, soft Supplex® on the other, and is insulated with warm and light Thermoloft®. The shell is made of a tough Cordura® shell laminated to waterproof Gore-Tex® fabric and treated with Zepel® for rain/stain repellency. Also features action back and sleeves, adjustable cuffs, drawstring waist, and a variety of warm and functional pockets, including a hidden call pocket. British Green, Brown Camo, Marsh Camo. W185.

WATERFOWL OVERPANTS

Made of the same Cordura®/Gore-Tex® fabric/Zepel® combination as our Waterfowl Parkas, these overpants are available insulated with Thermolite® for extra warmth or in a non-insulated version. Both feature elasticized waist, side-seam zippers, belt loops, suspender buttons, front slash pockets, and left hip patch pocket. British Green, Brown Camo, Marsh Camo. Insulated W383. Non-Insulated W380.

NON-INSULATED WATERFOWL BIB

Made of the same Cordura®/Gore-Tex® fabric/Zepel® combination as our Waterfowl Parkas. Perfect for use under our Waterfowl shell or English Gunning Coat for superior mild weather rainwear. Elastic shoulder straps, Lycra® rib-knit side panels, side-seam zippers, and plenty of pockets. British Green, Brown Camo, Marsh Camo. Non-Insulated W483.

ENGLISH GUNNING COAT

This hip-length, foul-weather coat has the sophisticated look made famous by the English gentry. Made of a tough Cordura® outer shell, laminated to waterproof, windproof, breathable Gore-Tex® fabric, treated with Zepel®, and lined with Worsterlon® for comfort and easy care. Features include snap-down bellows hip pockets, hidden call pocket, inside security pocket, hand-rest pockets, inside game bag, and detachable hood. British Green. W245.

REMINGTON BIG GAME CLOTHING

Just about the time you spotted the old bull, he spotted you. So now it's hide and seek time in the Sawtooth. And much of the game will be played with you doing a belly crawl over terrain as rugged as their name implies. Aren't you glad you're wearing your Remingtons?

STILLHUNTER™ JACKET & PANT

The quietest clothing in the woods. Made of washable Worsterlon® that insulates like wool, but with greater durability. Jacket has hand-warmer breast pockets, bloodproof game bag, bellows pockets, drawstring waist, and two-way zipper. Pant features side slash pockets, deep back pockets, belt loops, and suspender buttons. Blaze, Forest Green, Red/Black Plaid (Jacket only). Jacket W212. Pant W312.

STILLHUNTER™ JACKET & PANT

SILENT STALKER JACKET AND PANT

BIG GAME SHELL

Available in Bigs and Talls in Blaze, Loden and Trebark® II

QUALLOFIL® STUFFJACKET AND VEST

Warm and lightweight, with a durable ripstop nylon shell insulated with down-like Du Pont Quallofil®. The versatile vest can either be worn as an outer layer or under Remington's non-insulated parkas and jackets. Both feature Cordura® shoulder patches for grip and abrasion resistance, Zepel® for rain/stain resistance, and a variety of pockets. The Jacket also has a removable hood and hand-rest pockets. Red, Blaze, Yellow. (Jacket also available in British Green, Dark Grey and Royal). Jacket W275. Vest W120.

QUALLOFIL® STUFFJACKET AND VEST

SILENT STALKER JACKET AND PANT

Ideal for deer and turkey hunting, these garments are made of soft, warm Polarplus®. Jacket has full-length zipper, zip-up collar, drawstring bottom, rib-knit cuffs, inside security pocket, and two outside pockets. The Pant features an elastic waist, drawstring cuffs, and five pockets. Blaze, Blaze Camo, Woodland Camo, Trebark® Camo, Mossy Oak® Camo. Jacket W233. Pant W334. (See Gore-Tex® Silent Stalker on page 63).

BIG GAME PARKA

BIG GAME SHELL JACKET

The shell jacket from our Big Game 4-Way Parka system (pg. 67), for an extra layer of coverage over sweaters or vests. Will also allow Ranger jacket (pg. 63) to be zipped in. A great companion jacket for our non-insulated Big Game overpants (pg. 63). Blaze, Loden, Trebark® II. W 174.

BIG GAME PARKA

A Cordura® outer shell, Gore-Tex® z-liner™ insert, and Thermolite® insulation make this parka warm, dry, quiet, and comfortable. Features a detachable hood, fleece-lined collar, climbing-cut front, adjustable button cuffs, reinforced collar, and fleece-lined hand-rest pockets. Treated with Zepel® for rain/stain resistance. Blaze, Tan, Loden. W170. (Big Game Parka and Overpants also shown on page 63).

NEW
1993

REMINGTON SPORTSMAN'S™ CLOTHING

When all you need is a great camo pattern and moderate protection from the elements, our Sportsman's™ hunting clothing fills the bill, and goes easy on your pocketbook as well. All the garments feature the new Trebark® II camo pattern to keep you out of sight, whether you are deer or turkey hunting, or standing in the dove field. And these hard-wearing Sportsman's™ clothes are made right here in America.

SPORTSMAN'S™ KNIT SHIRT

Of 100% cotton printed in Trebark® II. Ideal for wear under other Sportsman's garments. Available in long or short sleeve versions, with breast pocket on front. Trebark® II Short W504, Long W505.

SPORTSMAN'S™ SHIRT JACKET

Action back, lightweight jacket of 100% ripstop cotton in Trebark® II pattern. Flat patch pockets allow jacket to be tucked in like a shirt. Deep breast pocket on front. Trebark® II W255.

SPORTSMAN'S™ SIX POCKET PANT

The same ripstop cotton printed in Trebark® II as used in jacket. Six pockets provide the room to carry needed accessories for deer and turkey hunter alike. Trebark® II W355.

SPORTSMAN'S™ COVERALL

Action back, one-piece, five-pocket coverall of soft, 100% ripstop cotton. The Trebark® II pattern provides maximum concealment. Five pockets and main zipper designed to prevent any interruption of pattern. Side slots for access to inside pant pockets, and built-in elastic waist eliminates bagginess in the mid-section. Trebark® II W450.

SPORTSMAN'S™ GEMMASTER JACKET

Action back, lightly insulated jacket combines Trebark® II pattern and useful sweatshirt jacket design. Eight pockets throughout, with snap closures positioned for storage flexibility. Trebark® II W210.

BIG GAME 4-WAY PARKA

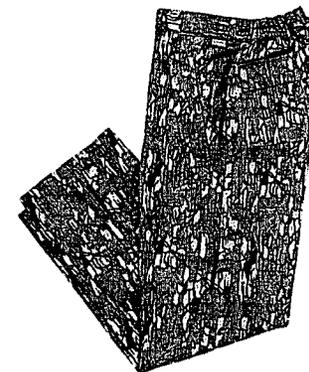

◀ This parka is made for wear in a wide range of temperatures. The shell is made of durable Cordura® treated with Zepel®HT, and features a quiet Gore-Tex® z-liner™ insert. Also features a zip-out liner jacket of soft, quiet Supplex® insulated with Thermoloft.® and button closures for quietness. Depending on the weather, these jackets may be worn together or separately. Also features a detachable insulated hood, fleece-lined collar, unique climbing cut front, and a total of 11 pockets, including fleece-lined hand rest pockets. Blaze, Tan, Loden, Trebark® II. W172.

SPORTSMAN'S™ SIX POCKET PANT

SPORTSMAN'S™ COVERALL

REMINGTON UPLAND CLOTHING

The young one seems to be picking it up pretty well, and his mother shows a lot of stamina for her 8th season. Two good flushes so far, two nice grouse in the bag, and the bells have gone quiet in what's usually the most productive cover of this farm – the one with all the wild roses. Aren't you glad you're wearing your Remingtons?

FRONT LOAD GROUSE JACKET

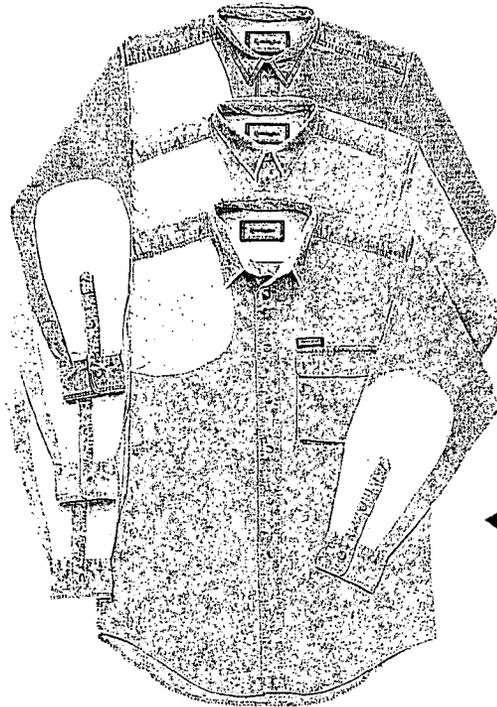

Designed for ease of movement, this short-length jacket is constructed of durable Cordura® treated with Zepel® and lined with warm, comfortable Worsterlon®. With washable Ultrasuede® shooting patches, bi-swing shoulders for upper body mobility, a front-load game bag that leads to a close-fitting, expandable rear bag that zips open for easy cleaning. Includes two-way zipper, corduroy collar, adjustable button cuffs, shooting glasses pocket, pleated bellows pocket with shell loops and authentic rock horn buttons, fleece-lined hand rest pockets, inside security pocket and outside zip security pocket. Blaze, Tan, Loden. W204.

UPLAND FRONT LOAD JACKET

Made of Cordura® treated with Zepel®, this jacket is lined with Worsterlon® for warmth and comfort. Includes a front-load, extra-large game bag, an expandable rear game bag that zips down for easy cleaning, suede shooting patches, corduroy collar, bi-swing shoulders for ease of movement, and a variety of functional pockets, including fleece-lined warming pockets. Blaze, Tan. W205.

UPLAND CLASSIC JACKET

Of durable Zepel®-treated Cordura® fabric, and lined with warm, comfortable Worsterlon®. With suede shooting patches, corduroy collar, bi-swing shoulders, and detachable game bag which is easily cleaned. Includes fleece-lined hand-rest pockets and pleated bellows pockets with shell loops. Tan. W200.

BRIAR POINT SHIRT

UPLAND FRONT LOAD VEST

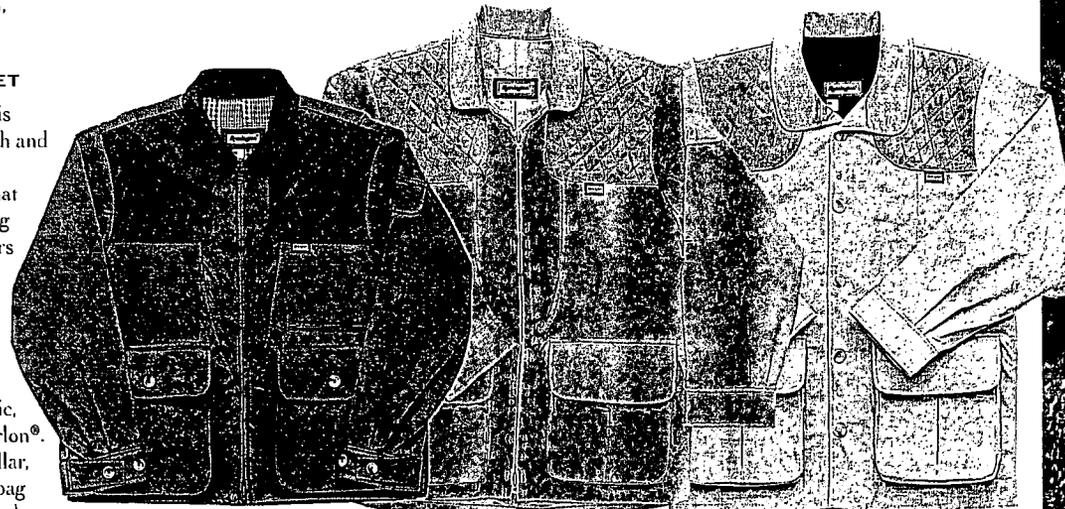

Made of the same Zepel®-treated Cordura® fabric as our Upland Jackets. This popular vest features a front-load, zip-down game bag, suede and Ultrasuede® shooting patches, and pleated bellows pockets with shell loops. Blaze, Tan, Loden. W101.

UPLAND PANT

Made of the same Zepel®-treated Cordura® fabric as our Upland Jackets, the Pant features hip pockets, front pockets, suspender buttons, and 500 denier Cordura® facing for brush protection. Tan, with Tan facing or Loden facing. W300.

BRIAR POINT SHIRT

◀ Made of comfortable, shrink-resistant 100% stonewashed cotton with reinforced forearm, elbow, collar, and yoke for durability. Features bi-swing shoulders for greater mobility, custom-quilted shooting patch, bellow chest pocket, and accent color trim. Loden, Peacock, Coral. W547.

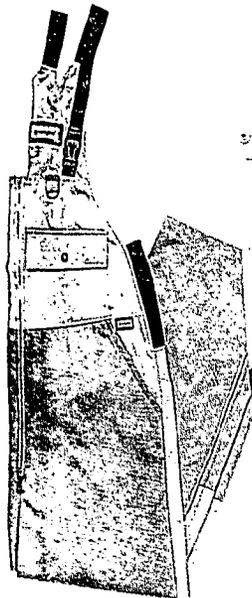

FRONT LOAD
GROUSE JACKET

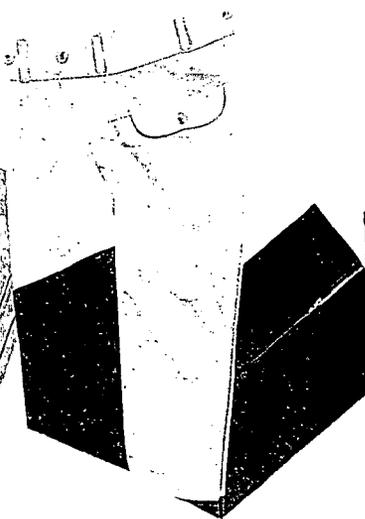

UPLAND FRONT
LOAD JACKET

UPLAND
CLASSIC JACKET

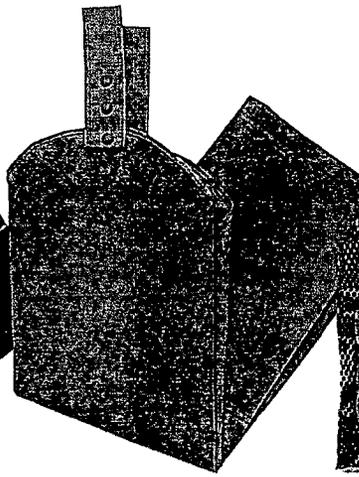

UPLAND BIB

BRIAR PANT

SNAKE CHAPS

UPLAND MESH VEST

UPLAND BIB

Made of the same Zepel®-treated Cordura® fabric as our Upland Jackets, the fully-lined Bib has waterproof briar facing of heavy Cordura® along the front and on the removable game bag. Also features adjustable shoulder straps, Lycra® rib-knit side panels, two-way zipper front, side-leg zippers, front slash pockets, rear hip pocket, and two breast pockets with shell loops. Tan. W451.

BRIAR PANT

Designed for stalking through briars, this pant is as soft as our Upland Pant, but provides more abrasion resistance. Made of a tri-blend of Cordura®/Dacron®/Cotton with a 1000 denier Cordura® Plus facing. Features front pockets, hip pockets, suspender buttons, and side leg zippers. Tan with Loden facing. W302.

SNAKE CHAPS

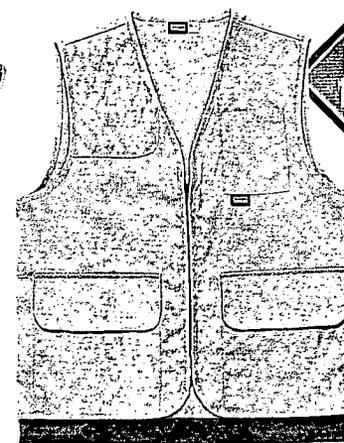

Made of lightweight, tightly-woven basket weave of 1000 denier Cordura®, these chaps contain double layering from the knee down to prevent even the smaller rattlers from penetrating. With three adjustment straps, inside zippers to the knee. Loden. W029.

UPLAND MESH VEST

Soft mesh construction for lightweight comfort, with quilted shooting patches of tough Cordura®, pleated bellows pockets with shell loops and a zip-down game bag treated with Zepel®. Also ideal for clay target shooting in warm weather. Tan, Woodland Camo. W102.

CLOSE COVER VEST

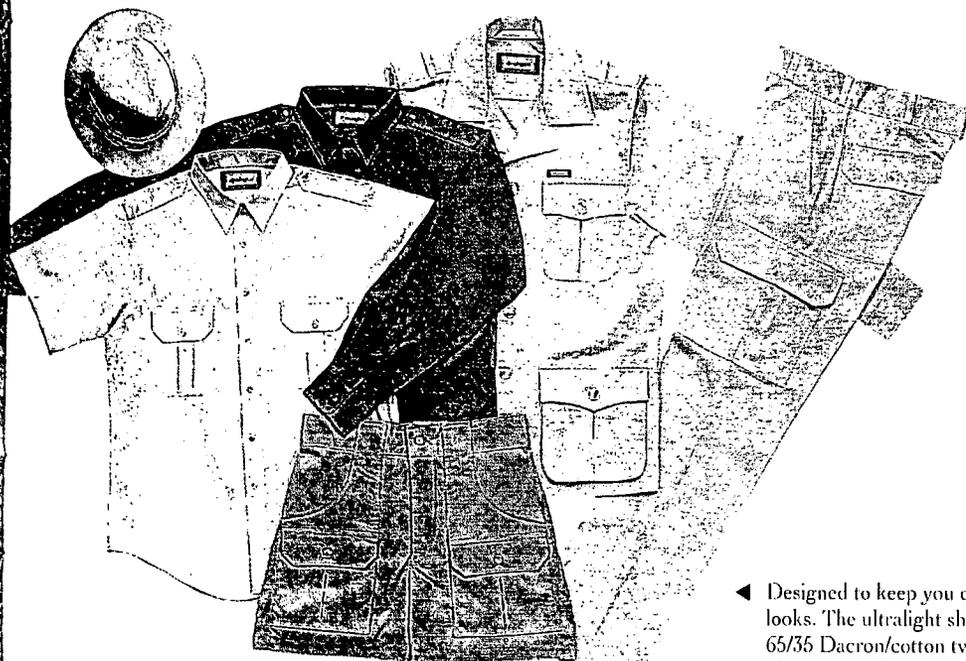

Durable Dacron/cotton blend. Ideal for use in thick cover with large hip patch pockets that are sewn flat to prevent snagging in tight places. Blood-proof game pouch of nylon to avoid brush snags. Tan, Blaze. W105

CLOSE COVER VEST

SAFARI COLLECTION

◀ Designed to keep you cool and dry when it's hot and muggy, with easy care and great design features for functional good looks. The ultralight shirts are made of cool, 100% combed cotton, and the jacket, pant, and shorts are made of a durable 65/35 Dacron/cotton twill for comfort. Khaki, Olive. Jacket W208. Pant W309. Shorts W409. Long-sleeve Shirt W530. Short-sleeve Shirt W532. Hat W842.

REMINGTON WESTERN WEAR

You don't have to own a ranch to appreciate the hard-wearing good looks of our new western-styled shirts, jeans, gloves, coats, vest and hats. If you're someone who likes hard work in the outdoors, these new clothes will work hard right along with you. And let you stay comfortable to boot!

ROCKY MOUNTAIN VEST AND JACKET

The vest and jacket are insulated using new microfiber technology for extra warmth and comfort. The Microloft™ filling is actually warmer than down at the same weight. The microfiber shell fabric has a very soft hand, yet is still tougher than canvas. To further enhance comfort, the linings on both garments are made of plaid Worsterlon®. Collar and yoke are accented with a soil-masking brown corduroy. Olive, Tan, Vest W118, Jacket W297.

ROCKY MOUNTAIN VEST AND JACKET

RA CAMP SHIRT

Made of comfortable, shrink-resistant 100% stonewashed cotton with reinforced forearm and elbow, and double layered collar and yoke for durability. Features the "RA" insignia, Rock Horn buttons, and a chest patch pocket. Loden, Peacock, Coral, W539.

RA WESTERN SHIRT

This popular western-styled, canvas cotton striped shirt comes stonewashed and is shrink-resistant. Features the "RA" insignia, western yoke, two front patch pockets, Rock Horn buttons. Offered in complementary colors. Tan Tri-Stripe, Brown Tri-Stripe, W537.

ROCKY MOUNTAIN WIND COAT

A mid-thigh length coat constructed with a lightweight, durable Cordura® and Supplex® shell backed with Gore Wind Stopper™ membrane, and lined with plaid Worsterlon® fabric. Collar and yoke are accented in a rich soil-masking brown corduroy for comfort and style. Olive, Tan, W295.

CAMP SHIRT AND WESTERN SHIRT

ROCKY MOUNTAIN WIND COAT

RA WESTERN JEANS

An exclusive from Remington, these jeans are made of a unique blend of 80% cotton/12% Kevlar®/8% nylon, and provide all of the comfort and fading of regular jeans, but are shrinkproof and will wear many times longer. In fact, the fabric has ten times the abrasion life of standard 14 1/2 oz. indigo cotton denim jeans. Triple (extra reinforced)-stitching in stress seams, extra tacking on pocket corners, reinforced stress points, 1 3/4" belt loops, and 8 lb. nylon sewing thread add to their durability. In addition, unlike other major jean manufacturers, Remington designed the inside pockets to have the identical fabric as the Jeans to insure longer life. Features the "RA" insignia (found on Remington Arms shotguns) branded on leather on the right rear pocket. Also features the popular straight leg cut to provide an improved fit, two front pockets, two rear pockets, a Remington/Peters shotshell steel button, and zipper that locks. Indigo, W395.

CORDURA[®]

TAKES ON TOUGH CONDITIONS

Lightweight yet extremely durable, our Rugged Outerwear Clothing is made from rugged, comfortable Cordura[®] nylon, and treated with Zepel[®] to resist rain and stains. Cordura[®] wears up to five times longer than cotton canvas. Used in everything from boots to pants, and gloves to jackets, Cordura[®] will take you into the field with confidence.

SUPPLEX[®]

STAYS SOFT AND DRY

Many Remington garments are made of Du Pont Supplex[®] nylon. Supplex[®] provides the soft, natural feel of cotton, with the durability, abrasion resistance and wind- and water-repellency of nylon. Supplex[®] also dries very quickly, a factor that's especially important for any outdoor garment.

TREKKING PANTS

BACK PACKER PARKA

REMINGTON RUGGED OUTERWEAR

Even if your need for rugged, well-designed outdoor apparel doesn't include hunting, Remington should still be your source for great outdoor clothing. From easy-care sweaters and trousers, to jackets and over-pants that are just right for your outdoor pursuits, whatever they may be, and wherever they may take you.

MOUNTAIN JACKET

Supplex[®] shell laminated to Gore-Tex[®] fabric and treated with Zepel[®] to resist stains and rain. Lined with wool-like Worsterlon[®] for warmth. With attached, cinch hood with visor, breast map pocket, breast patch pocket, and two-way zipper. Includes bellows hip pockets with Worsterlon[®]-lined, hand rest pockets underneath. Red, Dk. Grey. W218. Forest Green (Non-Gore-Tex[®]) W216

CLIMBER JACKET

Lined with Polarplus[®] velour for warmth and treated with Zepel[®] to resist stains and rain. Waist-length "bomber jacket" styling and raglan sleeves provide comfort and freedom of movement. Includes zippered, hand-rest pockets. Red, Navy, Grey. W285.

BACK PACKER PARKA

Tough, lightweight Cordura[®]/Supplex[®] shell laminated to Gore-Tex[®] fabric. Insulated with Thermolite[®] for warmth and treated with Zepel[®] to resist stains and rain. Includes drawstring waist, zipper-detachable hood, and elastic cuffs with Velcro[®] closures, as well as comfortably-placed hand-rest pockets at chest and hips. Red, Navy. W176.

TREKKING PANTS

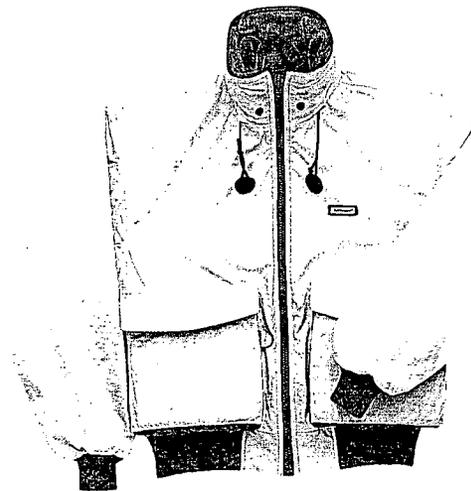

Lightweight and comfortable, this Overpant features a durable shell of Cordura[®]/Supplex[®] laminated to Gore-Tex[®] and treated with Zepel[®] to resist stains and rain. Includes elastic waist with belt loops; full-length, side-seam zippers, and zippered pockets. Red, Navy. W375.

STREN™ FISHING WEAR BY REMINGTON

Whether you're chasing big Blues or King Mackerel in the surf at Hatteras, or trying to seduce a fat rainbow in Colorado, you can do it better in Stren™ Fishing Wear.

CASTING JACKET

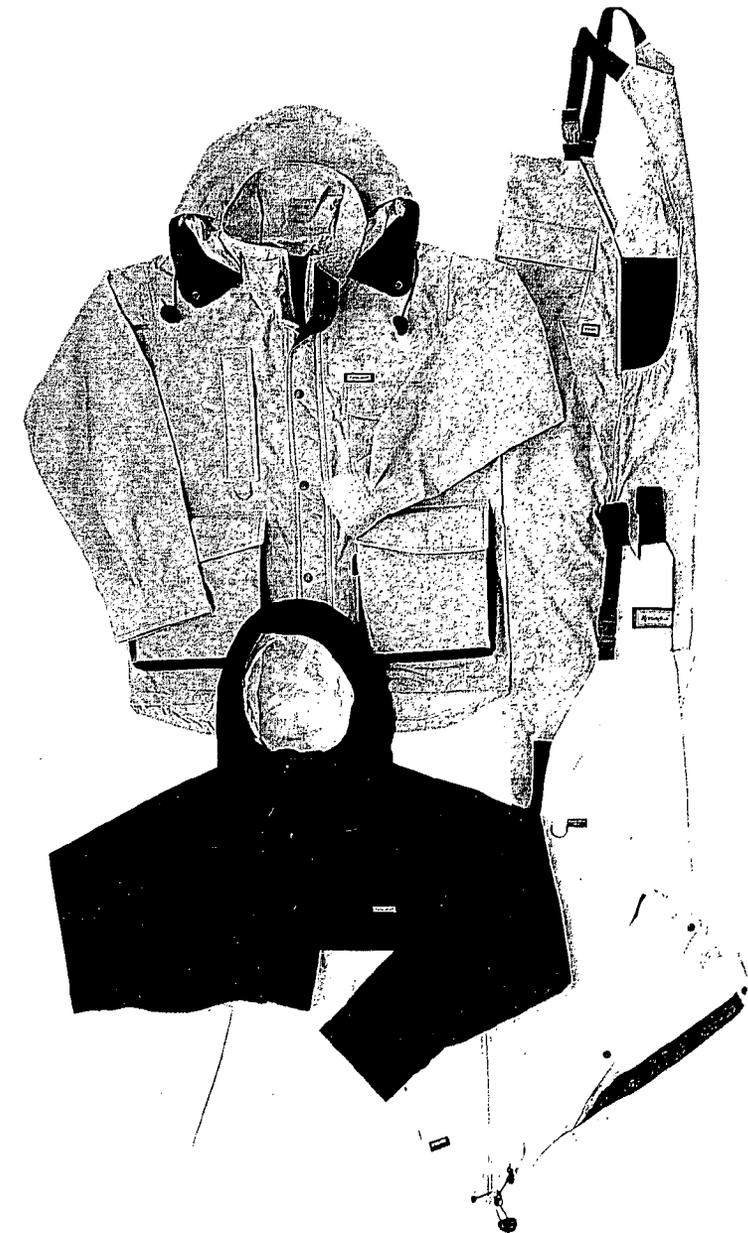

Windproof, water-repellent, and lined with Polartek® for lightweight warmth, this waist-length jacket of soft, quiet Supplex® nylon is perfect for wading. With action back and sleeves for easy mobility, roll-up hood, hand-warmer pockets, inside security pocket, bellows pockets, and accent color trim. Red, Loden, Yellow, Pewter. W293.

CASTING JACKET

BIG WATER FISHING JACKET AND BIB

Made of a Supplex® shell laminated to Gore-Tex® fabric, and treated with Zepel® for additional rain/stain protection. The jacket has a roll-up hood, action sleeves, adjustable Velcro® cuffs, drawstring waist, and seven pockets. The Bib has a two-way zipper front, adjustable shoulder straps, Lycra® rib-knit side panels, side-seam leg zippers, reinforced knees, and five pockets. Both qualify for the Gore-Tex® "Extreme Wet Weather" hangtag. Red, Tan, Yellow, Pewter. Jacket W290. Bib W490.

BIG WATER FISHING JACKET AND BIB (TOP)
STORM PULLOVER, JACKET, AND BIB (BOTTOM)

STORM PULLOVER JACKET AND BIB

Made of lightweight, durable Du Pont nylon laminated to Gore-Tex® fabric and treated with Zepel®. Jacket has attached cinch hood, drawstring waist, side zipper, and three zippered pockets. Bib has zippered chest pocket, front pockets with secure Velcro® closures, flapped hip pocket, side-seam zippers, elastic cuffs, Lycra® rib-knit side panels, and adjustable shoulder straps. Yellow/Black, Pewter/Royal. Pullover W224. Bib W495.

STORM PULLOVER JACKET AND OVERPANT (NOT SHOWN)

The same jacket as above, but offered in solid colors with matching overpants. Overpant features elastic drawstring waist, elastic cuffs, side-seam leg zippers, and snap fly front. Solid Red, Navy, Light Gray. Jacket W224. Overpant W324.

At the top right is 'STREN Clear Blue Fluorocarbon' with 'EXCELLENT FOR ALL TYPES OF FISHING'. In the center is a circular logo for 'HIGH IMPACT' with '100% POLYURETHANE' and '100% POLYURETHANE'. At the bottom left is 'STREN MAGNA THIN' with 'FLUOROCARBON' and '100% POLYURETHANE'. At the bottom right is 'STREN MAGNUM 14/40' with 'FLUOROCARBON' and '100% POLYURETHANE'.

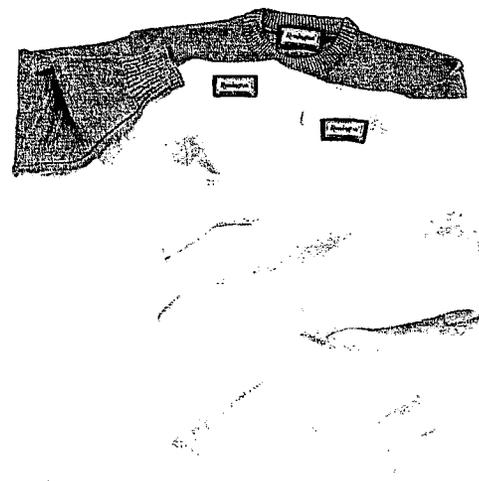

MESH FISHING VEST

FLY FISHING VEST &
COOLMAX*/COTTON POLO SHIRT

CHINO PANT

HIGH TREK* CREW SWEATER

MESH FISHING VEST

Ideal for warm-weather fishing, this mid-length vest is made of soft, fast-drying Dacron® polyester mesh and durable Supplex® nylon. Features seven pockets outside, and five pockets inside – including roomy zippered pockets and a large rear pouch for stowing gear. Also features "D" rings and rod holder. Tan, Pewter. W109.

FLY FISHING VEST

A short wading vest, made of very lightweight, fast-drying Supplex® nylon and lined with moisture-wicking Coolmax® mesh. Features six pockets outside, nine pockets inside, including several roomy zippered pockets for stowing gear. Also features a fleece patch for holding flies, "D" rings, and fly rod holder. Tan, Pewter. W111.

CASUAL WEAR

COOLMAX*/COTTON POLO SHIRTS (With Fly Fishing Vest, above)

In long- and short-sleeve versions, this shirt is very comfortable in warm weather, thanks to the moisture wicking capability of the Coolmax® fibers. The three-button placket allows for venting, and the drop tail keeps the shirt tucked in. With embroidered Remington logo and accent collar and trim. White, British Green, Khaki, Royal. Long-Sleeve W552. Short-Sleeve W555.

CHINO PANT

For cool, lightweight comfort, this pant is made of 100% combed cotton, stabilized for shrink resistance. With front slash pockets, hip pocket, double-needle outside seams, and unfinished hem. Khaki. W305.

HIGH TREK* CREW SWEATER

A classic, medium-weight crewneck sweater of washable High Trek® yarn. White, Grey, Yellow. W662.

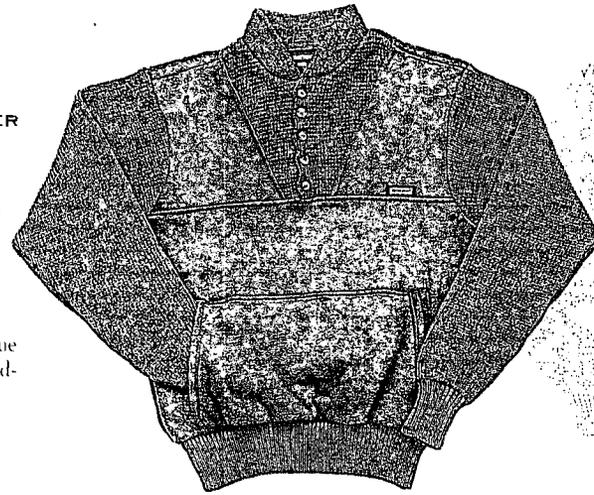

THERMAX* THERMAL WEAR

Remington offers thermal wear of Therman® in a variety of styles. All are constructed of a smooth, interlock knit for comfort and a good fit. The Standard-Weight Top features a crewneck and long tail; the Standard-Weight Bottom has an elasticized waist and fly front. Red, Navy, Tan, Loden. The Turtleneck provides extra warmth and shape retention. Loden. The Zip Turtleneck allows venting when necessary. Red, Navy, Loden. The Heavyweight Top, and Bottom, feature double-layer construction for extra warmth and two-button neck on the Top for ventilation. Red, Navy, Tan, Loden. Standard-Weight Top W700. Standard-Weight Bottom 703. Turtleneck W708. Zip Turtleneck W706. Heavyweight Top W370. Heavyweight Bottom W733.

SHIRTS AND SWEATERS

POLARPLUS[®]/HIGH TREK[®] PULLOVER

With a body of Polarplus[®] fleece and sleeves of High Trek[®] yarn, for exceptional warmth and comfort with light weight. Features front pouch pocket and button fatigue collar for ventilation. Loden, W670.

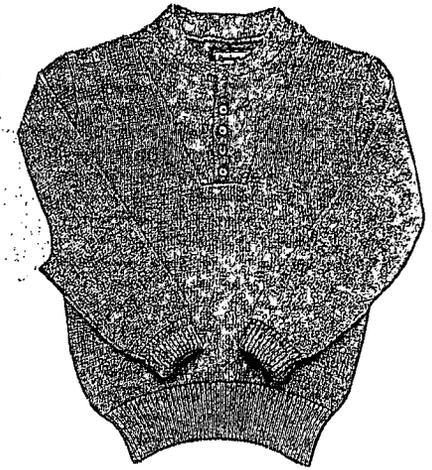

POLARPLUS[®]/HIGH TREK[®] PULLOVER

WINDSTOPPER[™] SWEATER

Of washable High Trek[®] yarn with button fatigue collar for style and ventilation. Features the wind-proof-yet-breathable protection of the Gore Windstopper[™] comfort liner, which keeps you twice as warm in windy conditions as a conventional sweater. Loden, Oatmeal, W652.

WINDSTOPPER[™] SWEATER

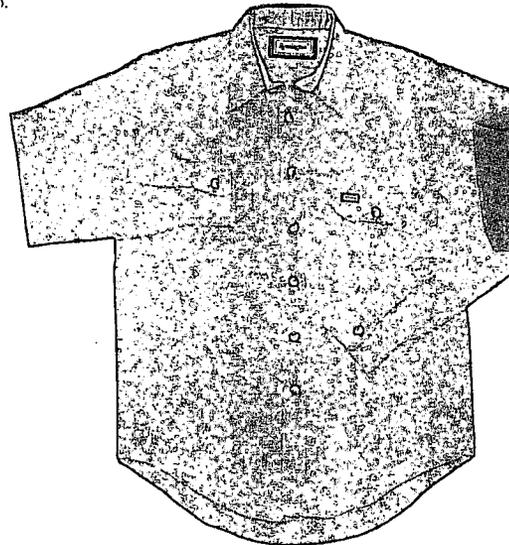

SPORTSMAN'S[™] SWEATER

"RA" WESTERN GLOVE
Made of the finest quality whitetail deerskin leather, with whip stitching along fingers, elastic wrist, and "RA" insignia branded on leather. Cognac. W810.

LEATHER SHOOTING GLOVE
Supple leather enhances grip and dexterity. Leather is perforated for ventilation, and the elastic wrist has adjustable Veler[®] tab closure. Black, Brown. W814.

HIGH TREK[®] KNIT GLOVE
Of warmer-than-wool, washable High Trek[®] yarn. Won't shrink or lose shape after repeated washings. Features nylon gripping dots on palm. Natural, Loden. W803.

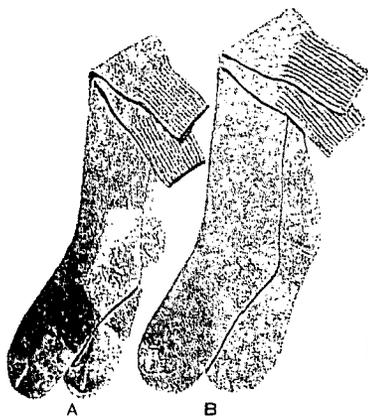

UPLAND GLOVE
Of tough Cordura[®]/Supplex[®], treated with Zepel[®] and lined with Thermax[®] to wick moisture from skin. Leather palm aids grip and dexterity. Tan, Dark Brown. W800.

ALL PURPOSE GLOVE
Similar to Upland Glove, but with Core-Tex[®] fabric insert for total waterproofness. Fully insulated with Thermolite[®] for warmth. Tan, Dark Brown. W808.

EXTREME WEATHER GLOVE
Like All Purpose Glove, but insulated with Thermolite[®] for extra warmth. With reinforced leather palm and leather pull strap. Tan, Dark Brown, Brown Camo. W812.

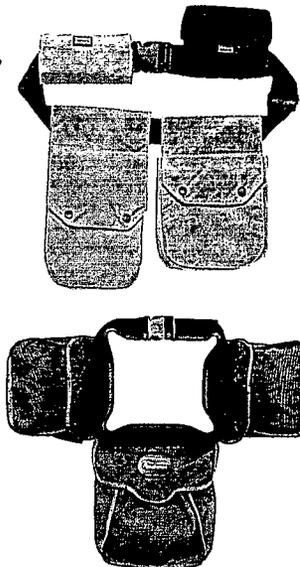

THERMAX[®] LINER SOCK (A)
100% Thermax[®] for warmth and superior moisture wicking. Over-the-calf length. Thor-Lo[®] cushioning for comfort and protection against blisters. White, Grey, Tan. W860.

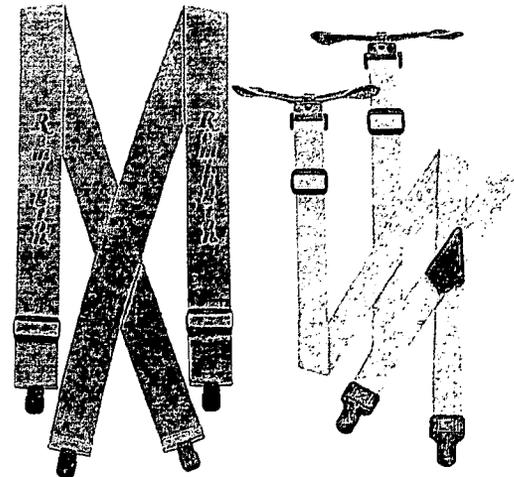

COOLMAX[®]/COTTON LIGHTWEIGHT SOCK (B)
Coolmax[®]/cotton single-layer knit for moisture wicking to keep feet warm and dry. Thor-Lo[®] cushioning for comfort and blister protection. White, Grey, Tan. W871.

FIELD SOCK (D)
Hi-Bulk Orlon[®], Thermax[®], and cotton/Lycra[®], with Thor-Lo[®] cushioning at heel and toe. Low-density knit allows fast moisture evaporation. Red/Grey. W880.

UPLAND SHOOTER'S BELT
The perfect place to rest your gun in the field or on the target range, this Belt features a unique elastic gun caddy. Also includes elastic slots to hold extra shotshells or choke tubes, and three waterproof Cordura[®] pouches — one each for shells, accessories, and game. Tan. W001.

CLIP SUSPENDERS
2" wide heavy-duty web with durable tempered steel clip and non-glare finish. Cross patch with embossed Remington logo. Tan suspenders feature Remington logo on front straps. Available in Red, Blaze, Brown Camo. W026.

COOLMAX[®]/COTTON MEDIUM-WEIGHT SOCK (C)

Coolmax[®]/cotton single-layer knit for moisture wicking to keep feet cool, dry, and comfortable. Grey. W875.

EXTREME WEATHER SOCK (E)
High bulk for extra warmth and moisture wicking. With Thor-Lo[®] cushioning for protection against blisters and abrasion. Of High-Trek yarn in Forest Green/Grey. W881.

WADER SOCK (F)

Designed with flat knit on back of the calf for rapid moisture wicking, even in rubber boots. High-density knee pads for kneeling. Thor-Lo[®] cushioning comfort. Of High Trek[®] yarn in Loden/Grey. Of Hi-Bulk Orlon[®] in Brown/Grey. W882.

DOVE SHOOTER'S BELT

Designed for the dove and quail hunter, this 2 1/4" Belt is urethane-coated and made of 500 denier Cordura[®] for durability yet only weighs one pound. Features three permanently attached pouches: two for shells and one for game. Green. W003.

BUTTON SUSPENDERS

Made of 1 1/2" heavy-duty web with durable, leather fasteners, and cross patch with embossed Remington logo. Tan suspenders feature Remington logo on front straps. Available in Red, Blaze, Brown Camo. W024.

RIFLE CASE (TOP)

Of heavy-duty Cordura® fabric treated with Zepel® to resist rain and stains. Features scooped design, wraparound handles, corduroy lining, open-cell foam padding, and Remington logo. Green.

SHOTGUN CASE (BOTTOM)

Of heavy-duty Cordura® fabric treated with Zepel® to resist rain and stains. Features wraparound handles, corduroy lining, open-cell foam padding, and Remington logo. Green.

TWO-BARREL, TAKE-DOWN SHOTGUN HARD CASE (TOP)

Now available as an accessory is our custom-formed, high-strength, two-barrel, fitted gun case. Inside, there's room for two barrels, six Rem™ Chokes, magazine plug, choke wrench, and lots of accessories like Rem™ Oil, shooting glasses, etc. The outside of this airline-approved case is made of a high-strength, lightweight, impact-resistant synthetic. Incorporates a sturdy padlock lug for security.

RIFLE HARD CASE (BOTTOM)

A great way to carry or ship your Model 7400™ or 7600™. Made of the same high-strength, lightweight, impact-resistant synthetic as our shotgun hard case with lots of extra storage places for accessories.

SPORTSMAN'S™ BAG

Of heavy-duty Cordura® fabric treated with Zepel® to resist rain and stains. Features adjustable padded carry strap, two front pouch pockets, large rear zippered document pocket. Measures 17 1/2" x 7" x 17 1/4". Green.

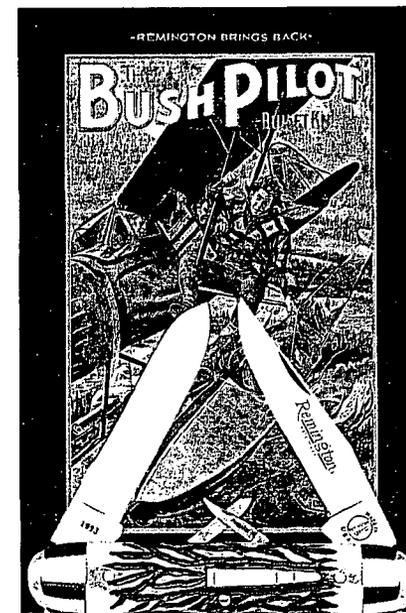

FIELD BAG AND GEAR BAG

Both bags are made of heavy-duty Cordura® fabric with double-stitched seams and reinforced piping for strength. Treated inside with polyurethane, outside with Zepel® to resist water and stains. With numerous zippered pockets, wraparound handles, and strong carry strap. Field Bag measures 16" x 6 1/2" x 8 1/2", and is available in Woodland Camo. Gear bag measures 18 1/2" x 9 3/4" x 9 3/4", and comes in Green.

DUFFLE BAG

Of heavy-duty Cordura® fabric treated with Zepel® to resist rain and stains. Features wraparound handles, zippered end pockets, strong carry strap, and brass fittings. Green. Large bag measures 25" x 10" x 10". Extra-large bag measures 29" x 10" x 10".

**"BUSH PILOT"
1993 BULLET KNIFE**

The R4356 "Bush Pilot" is styled after our 1920's original, and is the eleventh in our series of Bullet Knife collectibles. It features 440 stainless steel Turkish clip and spey skinning blades, and Delrin® Dura-Stag handles. The "Bush Pilot" has a brass liner, and the bolsters and pins are nickel-silver. Like all our "Bullet" knives, a detailed, nickel-silver representation of a centerfire cartridge is inlaid into the handle. The "Bush Pilot" measures 10" open, and 4 1/4" when closed.

**"BUSH PILOT"
BULLET KNIFE POSTER**

For 1993 we're honoring those unsung heroes of the back country, the daredevils who get us to the remote camps and pristine streams, the magicians who somehow coax thousands of pounds of airplane, men and material to lift off alpine lakes, the "taxi drivers of the mountains." Bush pilots are a special breed - great pilots, skillful mechanics, knowledgeable hunting and fishing guides, capable medics, and most of all, the kind of gentlemen that make any campfire a little warmer. We salute you!

RH134 SHEATH KNIFE

Replica of the RH134 introduced in 1926, this knife features a 5" hollow ground clip blade. With handle constructed of aluminum spacers and red and black fiber washers, aluminum guard and butt, original design countersunk brass nut, and a brown embossed leather sheath. Measures 9 3/4".

RH50 SHEATH KNIFE

First produced as a scouting knife in 1931, the RH50 features a 4" hollow ground blade for skinning. Handle reinforced with aluminum spacers and red and black fiber washers. Features aluminum guard and butt, original design countersunk brass nut, and a brown embossed leather sheath. Measures 8 3/4".

RH31 SHEATH KNIFE

Replica of the 1925 model which was only produced in small quantities for six years, this collectible knife features a 3 3/8", hollow ground drop point blade making it perfect for easy skinning and boning chores. With handle constructed of aluminum spacers and red and black fiber washers, aluminum guard and butt, original design countersunk brass nut, and brown embossed leather sheath. Measures 8 1/2".

BIG GAME KNIFE

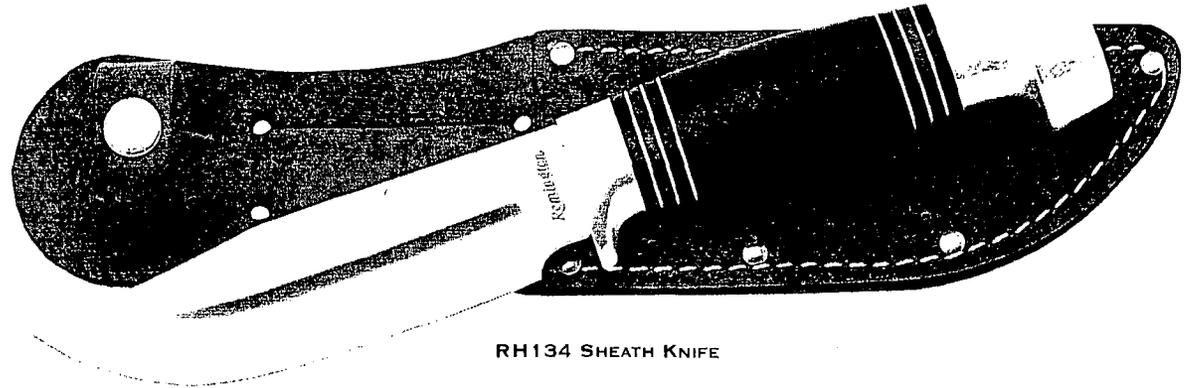

Features 3 3/8" clip blade, 3 5/8" self-cleaning bone saw, paunch hook, grip notches and leather sheath with sharpening tool.

WILDLIFE KNIFE

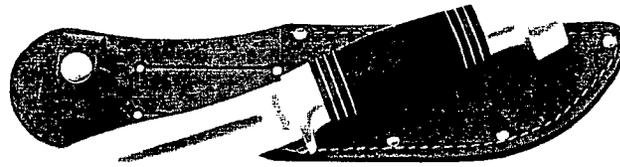

A beauty to look at and to use, this knife features a nostalgic design highlighted by brass handles with an attractive wildlife design. With a single lock-back clip blade with etched Remington logo. Slim and comfortable to carry. Measures 3" when closed.

SKINNER KNIFE

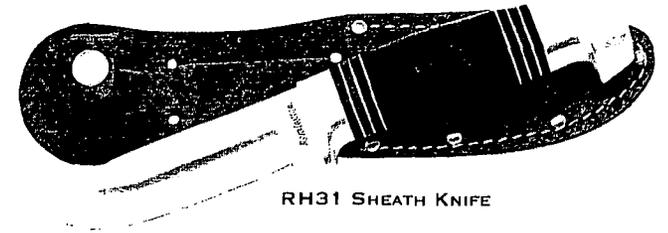

Features a fixed, skinning type blade with a bone saw on top. The universal handle and unique fingertip control allow you to skin game or saw through bone safely. Blade measures 4". Overall knife length is 9". Also includes leather sheath and sharpening stone.

REM™ SHEATH

REM™ STONES

OUTDOORSMAN KNIFE (PG. 80)

Features a lockback single clip blade, with etched Remington logo, and a leather sheath with logo on the snap. Whether your interests are hunting, fishing, camping, or handiwork, the Outdoorsman Knife fits the need. Its one-piece bolster/liner construction combined with stainless steel pins and springs, and tough Du Pont Delrin® handle, make this one of the strongest, most durable knives you can buy. The heavy, genuine-leather sheath fits comfortably on your belt and provides protection, convenience and good looks. Measure 5" when closed.

GENTLEMAN'S KNIFE

Features a single lockback blade that measures 2 1/4". Slim and comfortable to carry. Knife measures 5 1/4" open and 3" closed.

FARMHAND KNIFE

Features a clip blade with etched Remington logo and spey blade. Sturdy enough for farm or field, this knife is just the right size, weight and shape to take on a variety of functions. With tough Delrin® handle with the look of bone. A basic, no-nonsense knife that will stand up to years of hard use. Measures 3 7/8" when closed.

UPLAND KNIFE

Features a Remington patented choke tool to fit popular 12- and 20-gauge choke tubes, 2 3/8" clip blade, gut hook and screwdriver tip.

HANDYMAN KNIFE

Features a patented double lockback system and double blades to handle a variety of tasks. With clip blade etched with Remington logo for general use, a scalloped drop-point blade for tough jobs, and Delrin® handle with the look of bone. Measures 3" when closed.

STOCKMAN KNIFE

Features a clip blade with etched Remington logo, a spey blade, and a scalloped sheepfoot blade. This age-old standard for farm and field has been subjected to Remington's exacting tests for quality and endurance to make sure it stands up to the test and provides long-lasting satisfaction for its owners. Measures 3 7/8" closed.

TURKEY HUNTER KNIFE

Before you stalk the wily Tom, make sure you have this handy tool in your pocket. It features everything you need in the field, including clip blade with etched Remington logo, pin punch, our patented choke tube tool to fit popular 10- and 12-gauge choke tubes, and a unique turkey foot and beard shield. Measures 4 1/2" when closed.

WATERFOWL KNIFE

Features a Remington patented choke tool to fit popular 12- and 20-gauge choke tubes, 3" clip blade, 2 1/8" serrated bone/cartilage blade, a pin punch designed to fit Remington shotguns, and a screwdriver tip.

MUSKET KNIFE

The Musket Knife is an authentic reproduction of a 1920-era Remington "Daddy Barlow" knife distinguished by an extra-long bolster on only one end. Features a pewter musket and powder horn shield on the right saw-cut Delrin® handle and a single clip blade etched with Remington logo. Measures 5" when closed.

UTILITY KNIFE

Features 2 3/8" spear blade, 1 7/8" coping blade, saw, screwdriver, can opener and shackle.

REM™ SHEATH

Of top-grade leather, this 5 1/2" long sheath fits comfortably on your belt and is ideal for carrying virtually any outdoor knife.

REM™ STONES

Available in two versions, these sharpening stones give your knives an extra sharp edge for tough skinning and cutting. The 6" hard Arkansas stone removes larger blade chips, while the 6" soft stone finely hones your blade. Comes with a protective leather case embossed with the Remington logo.

Varmint Special equipped with a 24" barrel only. 3-Revolver pad included. L.S. = Laminated Stock. L.H. = Left Hand. NOTE: Adjustable open sights are on Model 700™ ADL, Camo, BDL, BDL European, Safari, and Seven™ (Except Model Seven™ chambered for 17 Remington). The Mountain Rifle, Limited Classic, Stainless Synthetic, and Varmint Specials do not have sights. All Model 700™ and Model Seven™ rifles come with sling swivel studs. The BDL, BDL European, Camo, Synthetic, ADL, ADL L.S., and Seven™ are furnished with sights. The BDL, Stainless Synthetic, Mountain Rifle, Mountain Rifle Stainless Synthetic, Classic, and Varmint guns have clean barrels. All Remington centerfire rifles are drilled and tapped for scope mounts.

PLEASE NOTE THE FOLLOWING AMMUNITION RECOMMENDATIONS FOR USE WITH THE MODEL 1100™ STEEL SHOT BARREL.

When used with Model 1100™ Magnum shotguns:
 - Use 2 1/2" magnum or 3" magnum steel shotshells.
 - Use 2 1/2" magnum or 3" magnum lead shotshells.
 When used with Model 1100™ non-magnum shotguns:
 - Use 2 1/2" magnum or 3" magnum steel shotshells.
 - Use 2 1/2" magnum lead shotshells. Do not use 3" magnum lead shotshells in non-magnum Model 1100™ shotguns, as this will cause extra wear and decrease the life of the gun.

1 These barrels are not equipped with a pressure compensating gas system.
 2 Manufacturers suggested retail price.
 3 Scope not included.

*Illustrated (not shown in actual size). **Will not chamber in .357 Mag. or .38 Special handguns. ‡Ammunition with (+P) on the case headstamp is loaded to higher pressure. Use only in firearms designated for this cartridge and so recommended by the gun manufacturer. §Subject to stock on hand. (A)Adapted only for .38 Colt sporting, military and pocket model automatic pistols. These pistols were discontinued after 1928. (B)Adapted only for .38 Colt Super and Colt Commander automatic pistols. New for use in sporting, military and pocket models.

These tables were calculated by computer. A standard scientific technique was used to predict trajectories from the best available data for each round. Trajectories shown typify the ammunition's performance at sea level, but note that they may vary due to atmospheric conditions, equipment, and the ammunition itself.

All velocity and energy figures in these charts have been derived by using test barrels of indicated lengths.

Ballistics shown are for 24" barrels, except those for 30 carbine, .350 Remington magnum and .44 Remington magnum, which are for 20" barrels, and the 6mm BR Remington and 7mm BR Remington which have a 15" barrel. These barrel lengths were chosen as representative, as it's impractical to show performance figures for all barrel lengths.

The muzzle velocities, muzzle energies and trajectory data in these tables represent the approximate performance expected of each specified loading. Differences in barrel lengths, internal firearm dimensions, temperature and test procedure can produce actual velocities that vary from those given here.

CENTERFIRE RIFLE VELOCITY VS. BARREL LENGTH

Muzzle Velocity Range (fps)	Approx. Change in Muzzle Velocity per 1" Change in Barrel Length
2000-2500	10
2500-3000	20
3000-3500	30
3500-4000	40

- Determine how much shorter, or longer, your barrel is than the test barrel.
- In the left column of the above table, select the muzzle-velocity class of your cartridge.
- To the right of that class, read the approximate change in velocity per inch of barrel length.
- Multiply this number by the difference in the length of your barrel from that of the test barrel.
- If your barrel is shorter than the test barrel, subtract this figure from the muzzle velocity shown for your cartridge.
- If your barrel is longer, add this figure to the muzzle velocity shown.

The trajectory figures shown in these ballistic tables are the rise or drop, in inches, of the bullet from a direct line of sight at selected yardages. Sighting-in distances have been set at 100 to 250 yards. (See the drawing below.) The line of sight used is 0.9" above the axis of the bore. This height is common to iron sights and low-mounted scopes.

The trajectory tables can also be used for rifles with high-mounted scopes, that is, 1 1/2" above the axis of the bore. The difference in drops at even the extreme 500-yard range is not significant enough to negate the figures shown.

Since the rise or drop figures shown at the stated yardages are points of impact, you must hold low for positive figures, high for negative figures.

Many shooters who use the same cartridge often find it helpful to commit the rise and drop figures for that cartridge to memory, or tape them to their rifle stock. That way, they know instantly the right "hold" as soon as they estimate the target's range.

VENTED TEST-BARREL BALLISTICS

This Remington-patented, industry-accepted method provides data that more precisely reflects actual use of revolver ammunition. It considers cylinder gap, barrel length, powder position, and production tolerances. Although our final values differ from conventional figures, the ammunition is unchanged. Key elements of our patented procedure include: (a) horizontal powder orientation; (b) cylinder gap: .008"; (c) barrel length: 4".

INTERCHANGEABILITY CHART

Cartridges within groups shown are interchangeable. Other substitutions should not be made without specific recommendation of the firearms manufacturer, since improper combinations could result in firearm damage or personal injury.

Rimfire	32-20 Colt L.M.R.

NOTE A: *High-speed cartridges must not be used in revolvers. They should be used only in rifles made especially for them. NOTE B: Ammunition with (+P) on the case headstamp is loaded to higher pressure. Use only in firearms designated for this cartridge and so recommended by the gun manufacturer. NOTE C: Not for use in revolvers chambered for 32 S. & W. or 32 S. & W. Long. NOTE D: All 38 Special cartridges can be used in 357 Magnum revolvers but not conversely. NOTE E: 9mm sub-machine gun cartridges should not be used in handguns. NOTE F: 44 Russian and 44 S. & W. Special can be used in 44 Remington Magnum revolvers but not conversely. NOTE G: Not to be used in Win. M-66 and M-75.
