FROM: S. M. Alvis

SUBJECT: M/721-722 TRIGGER - S.D.O. #33

Please refer to Dwg. G-17048 - Trigger for the M/721-722 rifle. Alteration #1 dated 11-13-45, was to remove the flange as originally shown for this design. It being understood that this change was requested in order to facilitate procurement. It is understood that as yet, an order has not been placed by the plant for this part and also that several questions are on hand based on supplying the part with the desired flange as originally required.

Finally, we were in error in placing this change without prior Products Committee approval and since it is not reasonable to attempt the elimination of this change, it is requested please consider this as a request to hold up on alterations requiring authorization of the design department requirements. Arrangements should be made to correct the drawing after the necessary approval is obtained. Also, at the same time, Products Committee approval should be solicited, if required.
