

~~7-11-10~~

A high-contrast, black and white image showing a dense, granular texture. The surface appears to be composed of many small, irregular particles or fibers, creating a complex, almost crystalline pattern. The lighting is uneven, with some areas appearing darker and more shadowed than others, emphasizing the three-dimensional quality of the texture. The overall effect is one of depth and tactile richness.

We have been advised that Part Stores will accept the charges on these two APV's and we kindly request that you relieve 91004 of the charges accordingly.
