FROM:

G. O. CLIFFORD

SUBJECT:

PUBLICATION: PRODUCT ENGINEERING

You may be interested in the attached copy of a request from the magazine PRODUCT ENGINEERING for an article from our Company. No doubt you are more or less familiar with this magazine and the type of material which they could use.

Please give consideration to any subjects which you might feel worthy of submission. As a starter, we have suggested to H. P. Davis that an article on the design features of the Model 721 rifle might be worked up and we are awaiting their reaction to this proposal.
