SUBJECT: M/721-722 SAFETY

*A. J. Greene replied 9/31
attached*

In accordance with a decision reached at the Ilion Design Meeting of Thursday, August 26th, arrangements have been made to supply you with one M/721 rifle taken at random from warehouse stock. It is expected that you will examine this gun and subsequently report your findings with regard to the operation of the Safety, it being desired to determine if the present design should be changed to eliminate potential difficulties from this respect.

Arrangements were made in accordance with the above plan and a gun was turned over to G. E. Pinckney today for shipment to Bridgeport via his personal car. In a similar manner, a rifle has been delivered to W. E. Leek of the Technical Testing Unit.
