"CONFINE YOUR LETTER TO ONE SUBJECT ONLY"

September 30, 1948

TO: D. S. Foote

FROM: M. H. Walker

SUBJECT: PATENT APPLICATION ON THE NOBEL 721

In writing the article for the Product Engineering Magazine I have noted references to patent application for the enclosed cartridge head on the N/721.

Not having signed a patent application for this feature it was thought a little investigation was in order. Claims No. 13 and 14 of patent application 644,287 signed only by John D. Small are strictly the property of the writer.

Unless it jeopardizes our position with the patent office on this application it is thought that the credit should be rightfully placed.

MHW:NE

Mike 3, 8, 9, 10, and 13 only
claims granted. I saw some thing
now file. JLS advise.

all of
Claim 13 is
broad enough to
include the 721
but does not include
the actual enclosed cartridge.
So everything is O.K. MHW
