TO: C. L. JONES

FROM: W. G. BURCKEL

SUBJECT: RETURN OF 222 CARTRIDGES

You requested an account number to charge some 4,000 of the above cartridges to.

These cartridges were returned from the Arms Division of the Technical Department at Ilion. No charges or credits should be involved in this instance since the cartridges were made by the Ammunition Development Section of the Bridgeport Technical Department for use in the development of the M/721-722 rifle. Whether the charges were transferred to the Ilion project or whether they remained in the Ammunition Development Section is irrelevant, since in any event the work was Research Class A-II and, as such, does not go into mill cost.

I discussed this matter with K.C. Gilmore and he agrees that it should all be considered as "water over the dam".
