

January 14, 1961

Mr. H. Walker

Mr. H. Walker

Mr. H. Walker

Dear Sir:

I am writing you to inform you that I have received your letter of January 10, 1961, regarding the "dope" for my hunting. I am sorry that I cannot provide you with the information you need. I have been unable to get Clyde Hart to come to Wyoming. He has been more than two days from his work of making rifles, barrels, and repairing his main business, the rendering plant.

I am sorry that I cannot provide you with the information you need. I have been unable to get Clyde Hart to come to Wyoming. He has been more than two days from his work of making rifles, barrels, and repairing his main business, the rendering plant. I would recommend that you use a 2-oz. trigger as it has better lock time than a 1-oz. trigger and is just as safe for the intended purpose. Since the wind breaking ability of 55 to 60 grain bullets is better than that of 50 grain bullets, I would recommend that you use 55 to 60 grain bullets to load your rifle. I am sorry that I cannot provide you with the information you need. I have been unable to get Clyde Hart to come to Wyoming. He has been more than two days from his work of making rifles, barrels, and repairing his main business, the rendering plant.

You are right; I cannot keep up with you on this letter

writing. We probably have done more than we can do with this letter. I am sorry that I cannot provide you with the information you need. I have been unable to get Clyde Hart to come to Wyoming. He has been more than two days from his work of making rifles, barrels, and repairing his main business, the rendering plant. I would recommend that you use a 2-oz. trigger as it has better lock time than a 1-oz. trigger and is just as safe for the intended purpose. Since the wind breaking ability of 55 to 60 grain bullets is better than that of 50 grain bullets, I would recommend that you use 55 to 60 grain bullets to load your rifle. I am sorry that I cannot provide you with the information you need. I have been unable to get Clyde Hart to come to Wyoming. He has been more than two days from his work of making rifles, barrels, and repairing his main business, the rendering plant.
