MODEL 725

Operations Committee Minutes #7, August 16, 1960 meeting, covered the obsolescence of Model 725 Stocks which would result through the introduction of the Model 700. A request was made to indicate the status as of the middle of May 1961. This report has been expanded to include major components and the 244 caliber guns in addition to the Stock.

On the basis of present plant production planning which is in turn based on a plant estimate of calendar year sales (2650), this model goes out of the line December 31, 1961 and is replaced by the Model 700 ADL.

The commitments of major components beyond 1961 are:

Finished guns	104	244 cal.	
Finished Stocks	1400	222 cal.	\$17,000
Barrel Assembly	200	222 cal.	765
Trigger Guard	2700	short act.	1,260
Floor Plate	3400	long act.	673
Floor Plate	500	short act.	100
Total			<u>\$19,798</u>
