Attached is a copy of Gail Evens' memo regarding steel barrels on the 243 and 244. I agree with his philosophy - but might well change on the 244 caliber, if and when we offer it in the 700. This might be a good plus feature to get us off the ground - if we announce such.

12/6 V Peter Dogs port stamless in 244 I not in , 243. Question on price? Museu
