M/40X RIFLE IMPROVEMENT

Minute No. 5, Operations Committee Meeting of April 8th, states that "will supply the Sales Department with prototype samples after the redesign has been completed and approved by the Committee". This would be for the purpose of Government Sales clearing as for effect on our present approval status for regular procurement.

The above is perhaps all right; however, feel certain that the various proposed changes will be reviewed first as to justification or effect on factory cost both from the standpoint in interchangeability of M/760 as well as those features being proposed to improve competitive position.
