

Hi velocity (muzzle) approx 2650 ft/sec.
results in flat trajectory, longer range
better accuracy. Probably the most
powerful long range pistol ever designed
low recoil - 1. because of small bullet dia.

2. Grip designed close to center
of gravity - reduces & keeps close
to line of force - reduces upward
recoil movement.

Grip design - superior grip design versatile
to fit large & small hands &
will accommodate for left hand
shooters. Flare on bottom
of grip provides added grip
stabilization during shooting.
This the special grip also
provides thumb & shooting
finger support.

Strength Basic action is the 1721
except being shorter in length.
The strength is the strongest
ever used in a bolt action rifle
& the first commercial type bolt action
to be used in a hand gun.

Balance

Model is designed to be slightly muzzle heavy which is necessary in rifle shotgun handguns to stabilize the point of impact. The high finger & thumb grooves allow perfect support of the pistol ^{to rest} on the top of the fore finger & thumb - necessary for better pointing.

Appearance

Checkering, ^{white} lacquered inlays, black, black fore end tip & white spaces perfectly matched to a walnut colored nylon stock provide a pleasing appearance graceful lines and an ^{new} exclusive look in pistol design.

Sights

Adjustable windage & elevation rear sights (partridge design) are provided mounted upon a ribbed barrel provide the proper sight picture for target ^{line} or game shooting.
