MODEL 700 FORE END TIP

Will you please check with Mike as to the status of work on improving the M/700 fore end tip. With production continuing to run high on this model am not surprised that the Plant is pressing us for some relief. Since it involves a plastics item and problem I had earlier asked if he would tie in with you and the Plastics Committee for help. In checking back on this today, Mike tells me that Paul has furnished several samples but apparently this still involves some more plastics research work, or else we are getting our signals crossed.

Please talk this over with Mike since he thinks he is "waiting" and as to priority it may be necessary to move it up on Paul's agenda (if this is required) since the item is actually in production.
