M/700 COLD HEADED FIRING PIN

Per your request three sample firing pins were run through a test to determine their acceptance to alignment and indent. Indents were taken on all pins at the beginning and end of the test. Alignment was also checked visually and appeared to be acceptable.

#1 - .0205	#2 - .0207	#3 - .0212
.0210	.0215	.0200
.0210	.0220	.0220

Five thousand dry cycles were run on each and indents were repeated.

#1 - .0180	#2 - .0205	#3 - .0200
.0195	.0205	.0205
.0190	.0205	.0208

Alignment still appears to be the same.
