MODEL 600 RIFLES and AMMUNITION for SPORTS WRITERS

I have just received a letter from E. S. McGawley dated November 26th concerning the shipment of ammunition in the 308 caliber to be coordinated with the Model 600 Rifles that are to be shipped to the sports writers. In discussions with McGawley during our recent meeting with the sports writers, it was suggested that we make sure the ammunition furnished for these rifles be of high quality and especially very accurate. I would appreciate if you could select a lot in 150 grain 308 Win. caliber that would be acceptable for this model.

It would also be advisable if I might have the opportunity to review the appearance of these 600's before they are shipped to the sports writers, and would appreciate your cooperation in this.
