OPERATIONS COMMITTEE - MODEL 600 - CALIBER 35 REMINGTON MAGNUM

Will we be all set to get Committee approval of the Caliber 35 Remington Magnum, Model 600 for release to Production at the May 12 meeting? Presumably, you are completing the necessary steps of a prototype sample and will have determined the adequacy of stock strength. We sure want to get this into Production's hands for start up as soon as we can.
