XP-100 Gen'l

Remington Arms Company, Inc.
Ilion, New York, 13357

Attn: Mr. S. M. Alvis: *A* 3

Thanks kindly for your letter of May 22 in regard to the trigger balance on the XP-100.

We never did know exactly what the purpose of it was and since the arm functions without it, we neglected to follow through on it.

From your letter, we now think it is a safety feature that would prevent the arm from firing accidentally if jarred from the muzzle end. Right?

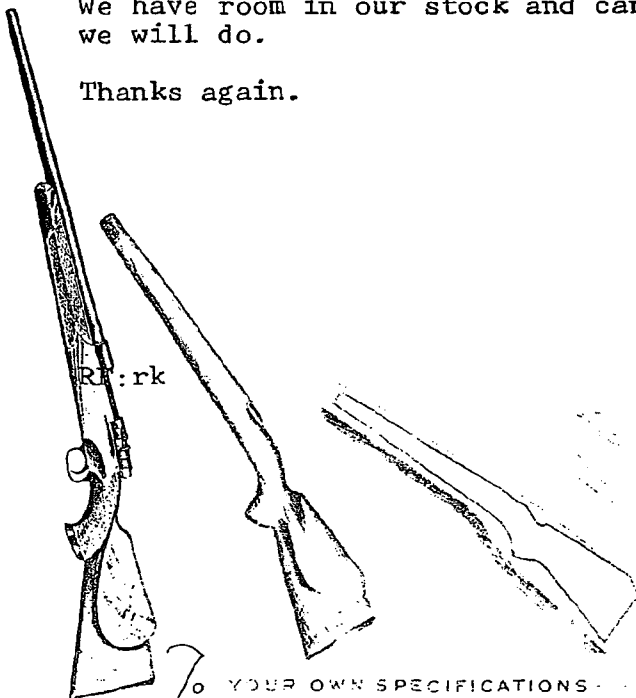

We have room in our stock and can make provisions for it, which we will do.

Thanks again.

Yours very truly,

Reinhart Fajen
