COST IMPROVEMENT - M/700 BOLT HANDLE

You have copy of test report signed by John Brooks dated Sept. 22nd. Wayne Lock tells me that he has warned Walker against using this M/600 Bolt Handle process after having had some troubles with the 61010 material in the M/600. Wayne thinks that with the heavier calibers in the M/700 this may not be feasible.

Since this item represents a sizeable cost reduction possibility, you had better investigate further. If we are to drop, must have a justifiable reason.
