[Signature]

Dear Vic:

I am happy that the sight we furnished for your Model 600 is what you desired. I cannot furnish you a parts number for this item because this had to be made up special for you in the model shop with no particular design dimensions on it, and required a little special set-up to obtain the right contours to blend in the radius on each side so that the width of the sight was pretty much in proper accord with general sighting dimensions.

I'm assuming that your request was for one for your gunsmith friend and this can be taken care of but it will have to be at a later date as the shop is really filled with designs of new gun mechanisms. However, if your interest still requires another one, please let me know and I can work it in by some means or other.

I was glad to hear from you again Vic, and hope I can see you in Cleveland one of these days.

Best wishes,

WEL:ec
