REVISED REMINGTON STANDARDS - M/600 6.5 MM

The new 2.5" E. S. specifications issued 12/15/65 for this caliber in the M/600 is unrealistic on the basis of our tests to date. The hand loaded ammunition supplied by both Ilion and Bridgeport R. & D. using the 120 gr. bullet averaged 2.71" and only twelve (12) of eighteen (18) guns would pass a 2.5" spec. using either the first or second group.
