MODEL 700 BOLT ACTION RIFLE FOR AUSTRALIA
(Reference letter to A.D.Kerr, Nov. 28, 1967)

The decision by the Operations Committee in January 1965 was that the Model 600 would have the shrouded Bolt Plug. The Model 700 was only to have the "F" and "S" marking added.

For 1969, changes scheduled for the Model 700 will include a shrouded Bolt Plug. If any action is to be taken prior to that time, Marketing should request approval by the Operations Committee.
