ART KERR: I talked to Fred Plunkett about this and he suggested that I bring it to your attention when you return from your well-needed vacation. Please give me a call or drop me a note regarding this.

Thanks.

Dear Lee:

After talking with you today about

15 700 BDL 243 Caliber Rifles

for a police department in California to be parkerized, I have come up with the following information.

It appears that this special process is done only on guns as their coming through the line and not on guns already produced as regular and put in the warehouse. I won't be able to get any answer for you on this until the plant opens Monday, August 12. As soon as I have some information, I will pass it on to you.
