TO: F. E. MORGAN

FROM: J. E. DICKEY OFFICE - F. E. MORGAN

SUBJECT: PACKAGING OF MODEL 660 RIFLE

It is my understanding that all bolt action rifles packed for shipment at Ilion have the bolts removed from the receivers with the exception of the Model 660 rifle which is shipped with the bolt in the rifle.

The question arises as to why we should make this exception on the Model 660.

Will you or Herb please review this matter with Ilion to determine what steps can be taken to having the 660 bolt removed from the action for packing purposes.
