NICKEL

Remington Arms Co., Inc.  
Ilion, New York

COBALT

Attention: Mr. Mike Walker

Gentlemen:

FERROUS

Here are two castings made from the waxes given me during my recent trip. They are 4140 steel carbon restored and annealed and I believe reproduced the patterns so visually they leave something to be desired.

BASE ALLOYS

I am sorry about the delay but it took longer to get the X-Ray than I anticipated. There is a shrinkage cavity in the knob that does run into the neck, however, this condition exists to the same degree in the sample casting given me.

Thanks again for the courtesy extended me during my visit.

Very truly yours,

Pine Tree Castings Corp.

Stanley B. Terhune
