Dear Sirs:

I recently purchased one of your
700 BSL Varmint rifles in caliber .25-06.

I do a lot of handloading for
long-range Varmint shooting and have owned
rifles both factory & custom-made.

I wish to express my satisfaction
with the accuracy & quality of your product.

This rifle consistently groups under 2" @ 250 yds
using 53 gr. Bench-rest bullets, a feat that many
"Custom" rifles can't duplicate.

Some people mount Varmint tripods
but I was so impressed with this group I
mounted it. Credit to your personnel for a job
well done.

Sincerely
William Ross
