TO: L. J. FOX

FROM: PAUL E. CALLAHAN

SUBJECT: YOUR 10/13/70 LETTER TO J. HEATH
RE MODEL 700 25/06 CALIBER

Dear Lloyd:

Jack Heath sent me the above letter, with a note that lengthening was required on an additional three Model 700 in 25/06 in his territory.

We are just starting to get field service complaints on the 25/06 and would like to know from you just what the problems are so that we can handle them to keep everybody happy, especially the user. It could be in the above cases that 120 grain cartridges were used and are of the long loaded lot referred to in J. W. Stone's Product Bulleting of 9/2/700. If this is the case, properly loaded bullets may have alleviated any further work on the chamber throats.

Any information you can give us will help.

Also, please mark me for copies of all correspondence to Western Region Field Personnel in the future, so that we can expeditiously handle Produce Service Complaints.

Thanks for your help.

Very truly yours,

Paul E. Callahan
Manager - Western Region
