U.S. MARINE CORPS, QUANTICO, VA.
MODEL 700 SNIPER RIFLE
REQUEST FOR CURRENT COSTS

In anticipation of a possible procurement action, the Development and Education Center at Quantico has asked us to provide them with an updated price comparison of the present version of the Model 700 Sniper rifle, which we produced as a supply item, and the improved version, of which we produced two in 1970.

The last comparative costs we have are listed in Ilion's memorandum of March 23, 1970, copy attached.

Based on possible procurement levels of 500 units or 1,000 units, please ask Ilion to update these costs, including the special sniper stock finish outlined in the attached note.

In addition to the cost comparison figures, we also ask that detailed information be given on the processes for the stock finish and the barrel coloring. These are factors which USMC needs for complete evaluation.

Delivery information is not required at this time.

Although there is no urgency, we would appreciate having this information by December 3, 1971.

RMAdams, Jr./tk
