370 Competition trap

The latest Stock, Forwarding and
assembly drawings will be furnished to Procurement
Engineering this month.

Target grade being seen in that in
this will be. This firing tests have shown.

Shotgun	T. Miggins Pull at start	Rounds	Present T. Miggins Pull
870	2.08 #	1000	1.9 #
1100	2.92 #	210	2.87
1120	4.08 #	-	-

on the first two guns to fail to connect
and a double check safety.
was encountered. It was found that the trigger was
not returning to the hammer and was caught up.

11700-300 Fire Control

Fire controls which have adjustment for point of fall within safe limits without having to remove the sight from the stock, fixed trigger mechanism, and fixed trigger over hand are in the test plan.

2 different designs of a bolt action that adjust the sight in unison with the length of the barrel will be ready in October for testing and market evaluation.

11700, 500's, 541's, and 500's

11700, 500's, 541's, and 500's

11700, 500's, 541's, and 500's

11700, 500's, 541's, and 500's

11700, 500's, 541's, and 500's

11/25/88 - 27 Nov 88

Work is progressing on the design of a
prototype for this model and further.

Re: 11/25/88

The marketing department has requested information
on the design of the prototype, along with
the results of the evaluation. Evaluation will begin as
results are received.

Production has gone out for quotes on
the hand-coiled model for preliminary introduction.
