SUBJECT

M/700 BDL SKIPLINE CHECKERING
(Item 3 - Dev. Sched.)

3. M/700 BDL Skipline Checkering

R & D reported that the M/700 BDL with skipline checkering dresses up the model while at the same time gives a definite model distinction between the classic and BDL checkering patterns. This change will also give Production approximately 10% more machine capacity on the checkering machines as the skipline pattern has a shorter machine cycle.

A prototype rifle was shown.

Production reported that during the changeover to the new checkering, there would be a mix of checkering. This will continue into 1978 because of the large number of specifications in this rifle.

Per J. Pressor

- CAN NOT SWAP OLD STYLE IN PLACE OF NEW
 - CATALOGUES SHOW ONLY NEW, ∴ DEALERS ONLY ORDERING & EXPECTING NEW.
 - JOGGER COMPUTERS SET UP TO HANDLE NEW RAMAC'S ONLY
(HOW HANDLE INVENTORY CARROUSEL?)
- WILL GET WITH CONROTH TO FIND OUTLET

INFORMED JACK

- NO ONE AT ILION UNDERSTOOD "NEW" GROUND RULES, AS SUCH
- WE WOULD COOPERATE TO DO WHATEVER BEST FOR REMINGTON
- CHECKERING @ CAPACITY, ∴ ANY FAILURE TO SWAP REDUCES AVAILABILITY; REPLACEMENT FEASIBLE, BUT OLD STOCK WOULD NEED TO BE USED SOMEWHERE
- CONCERN FOR CALIBER AVAILABILITY

JACK WILL -

- REVIEW LIST FOR MKTS. POSITION

{ All to be moved except, 3 items
- 6mm Van Sp - 900 short Action (Actually 112 guns)
- 243 Van Sp - 1400 " " (1228)
- 222 Reg - 2000 " " (2100)
- 3440 -

To Do

- EVAL. COST TO SWITCH STOCKS
- REVIEW LIST, WHEN AVAILABLE, FOR PRACTICALITY OF SWITCHING.
