AFMU-OD SUBJECT: Remington Model 40XC Caliber 7.62 mm Rifles 21 July 1977

3. Plan of Test: Three 10 round shot groups from each ammunition will be fired from each of the barrel actions prior to USAMU altering. Additionally, three 10 round shot groups from each ammunition will be fired from each of the barrel actions after USAMU altering of rifles. All firing to be conducted at 300 meters using the cradle. Firing to be conducted, when possible, during early morning hours offering best environmental conditions. Also, any malfunctions will be noted and recorded.

4. Conduct of Test: Firing was conducted during morning hours of 15 October 1976 and morning and afternoon hours of 18 July 1977 according to test plan. Temperature during the October firing was from 68-72 degrees with the wind from 3 o'clock at 2 to 4 mph. Temperature during the July firing ranged from 80-90 degrees with wind from 11-1 o'clock at 6 to 8 mph. There were no malfunctions during the test.

5. Results of Test:

a. Rifles prior to altering:
