

SAAMI TECHNICAL COMMITTEE MANUAL  
VOLUME VII, CENTERFIRE RIFLE

7-150.01  
ISSUED 10-5-78  
REVISED           

TRIGGER PULL

For reasons of safety, it is recommended that trigger pulls on all firearms, with the exception of target\* models, be 3 lbs. (1.36 kg) minimum as measured parallel with the barrel.

The placement of the scale or weight on the trigger should duplicate the normal placement of the trigger finger.

\*Target firearms are those which are specifically designed for use in competition and may have trigger pulls which are adjustable for force or travel without alteration of components.
