

SAAMI TECHNICAL COMMITTEE MANUAL
VOLUME VII, CENTERFIRE RIFLE

7-10.03
ISSUED 10-5-78
REVISED 2-27-79

ACCURACY

A trained shooter using an appropriate rest and sights to minimize errors of aim

Max. average of the widest shots measured center-to-center of three 5 shot groups or a statistical equivalent

The accuracy shown is based on the use of ammunition made to SAAMI recommended practices and includes all bullet weights, but not mixed in one group. Each group should be fired with a single lot of ammunition having one bullet weight.
