

SAAMI TECHNICAL COMMITTEE MANUAL
VOLUME VII, CENTERFIRE RIFLE

7-120.02
ISSUED 10-5-78
REVISED

PROOF TESTING
INSPECTION BEFORE PROOF TESTING

Before proof firing, the firearm should be inspected for:

1. Barrel obstructions.
2. Bore and chamber to be free of oil or grease.
3. Any inspection indentation indicating that all inspection and testing normally performed before proof firing have been completed.
