Info

WARNING

The Trigger Balance and Trigger Balance Spring are integral parts of the Trigger mechanism which help protect against accidental discharge if the pistol is dropped.

Do not use this pistol without these parts.

Do not install the barreled action on a new stock without these parts.

IMPORTANT

This XP-100 Pistol has been fitted with a new safety assembly. One difference of the new assembly from the old is that the bolt can be opened and the chambered cartridge unloaded when the safety lever is in either the ON or OFF position. The old safety assembly enabled the bolt to be opened only when the safety lever was in the OFF position.

Read this new Owner's Manual completely before using your modified XP-100 Pistol. Pay particular attention to the Safety Section and Figure 1 on Page 1.

Complete - Custom Repair
Warning only - on new
product.
