

REMINGTON ARMS COMPANY, INC.

INTER-DEPARTMENTAL CORRESPONDENCE

"CONFINE YOUR LETTER TO ONE SUBJECT ONLY" _____

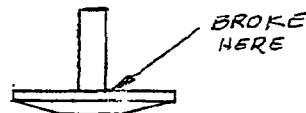

April 3, 1979

TO: J. W. BROOKS
FROM: D. E. BULLIS
SUBJECT: M/ XP-100 REAR ESCUTCHEON

A sample of XP-100 Rear Escutcheons were taken to the Metal Lab and pulled on the Tensile Machine in an effort to find the force required to either break off the round section or pull the threads out. In each instance the round section broke away from the flat bottom where they meet.

Pounds force required to break were as follows:

780
925
680
795
13600
900
850
